Senior slugger

When the Novi Old Timers softball team takes the field there's power and energy to spare. Above, Alex Rachunok takes his turn at the plate. The Old Timers are all senior citizens who play ball once a week in Power Park. These men, who range in age from 55

to, well, let's just say - past 70, love the game of baseball and take their league play very seriously. The Old Timers ended the 1987 season with a winning 9-5 record. For more on the team, see page

Council race begins in earnest

There was a lot of smiling, a lot of hand shaking, some brief speeches and some quick-thinking responses to questions from the floor when six candidates for a position on the Novi City Council were headliners at the luncheon meeting of the Novi Chamber of Commerce on Aug. 18.

The six candidates, out of a total field of eight who have filed for the three positions on the Nov. 3 ballot, greeted a packed room which included State Representative Bill Bullard, current Mayor Patricia Karevich, and mayoral candidates

Nancy Covert and Matthew Quinn in addition to a good crowd of local

Novi business people. Martha Hoyer, Edward Leininger, Laura Lorenzo, Edward Phelps, Robert Schmid and Joseph Toth were the candidates available for the "Meet the Council Candidates" luncheon at the chamber. Council candidates Rico Digirolamo and Richard Clark did not attend the event.

Each candidate was allotted three minutes for a prepared speech. The following is a synopsis of those speeches.

JOSEPH TOTH: Toth told the audience he is currently on the council, appointed to the post after nine years on the planning commission. He has been a Novi resident for 18 years. "I claim some responsibility for the development that has taken place," Toth said.

"I strongly support the addition

of firemen and police to the city," he said. He said the city is lacking essential fire and police personnel due to the growth in the city. "I strongly support the First

Responder program," he said. Toth said he is an advocate of controlled growth for the city. He said he feels the city has sufficient commercial development and should begin encouraging additional residential and office development. Toth said he would like to see continued adherence to the city's master plan "which I am happy to say we are following fairly close-

MARTHA HOYER: Hoyer said she has been involved with the council for 12 years "plus three months" as: an elected official. She said she realizes planning for Novi goes beyond the boundaries for the city, including a subject near and dear to everyone's heart - traffic.

Hoyer said she has been involved with the South East Michigan Council of Governments (SEMCOG) and has managed "by being there and fighting for it." to get a promise from the state that a public hearing will be held in September on a proposed interchange for I-696, I-275 and the proposed M-9, somewhere in the vicinity of Twelve Mile and I-696. Hoyer said she has had a promise that construction will begin on the interchange by 1989.

The interchange is important, according to Hoyer, because it will relieve traffic congestion at the Eight Mile/Hagerty Road interchange as well as on surrounding

Hoyer said she has been pleased to serve the city and that her experience and background have helped her over the years. She said she has been working with the

Lake project debate rages

By ANN E. WILLIS staff writer

The controversy between property owners on Walled Lake and the

Novi City Council is heating up.

During the Aug. 24 city council
meeting, Novi lake area resident
sear Phelps accused the city of the "potential misuse of public funds" regarding the purchase of the 12acre site to be used for the development of the hotel/retail/marina development known as The Lan-

City Attorney David Fried said the allegations were so vague that he really could not reply to them. "Road funds were used to move South Lake Drive to its current position," Fried said, "and general funds were used to purchase property because the council desired to buy property."

Phelps, speaking during the audience participation segment of the meeting, addressed a matter for council action that had appeared on the night's agenda — namely the condemnation of L ot 47 in the Walled L ake Shores Subdivision.

The resolution for condemnation was removed from the agenda after

additional item that needed to be attached to the resolution. Fried stressed the item was not removed in response to Phelps' statement.

Phelps said in her prepared statement that "any action taken, including but not limited to the resolution for condemnation of Lot 47 is premature in light of the fact the DNR hearing has not yet been held and a decision cannot be reasonably expected for a period of at least 60 and possibly 90 days."

Phelps was referring to the public hearing held by the DNR on Tuesday, Aug. 25, regarding the city and developer's application for a dredging permit to construct a marina for 25 boat slips.

In her statement to the council. Phelps asked that "all discussion, including the resolution of condemnation, be postponed pending the findings of an in-depth investigation by an impartial third party as to the legal questions raised about the potential misuse of public funds used to purchase the entire site.

Board decides Upper El case

By BOB NEEDHAM staff writer

School officials will develop a definition of curriculum and appoint a committee to review the new schedule at Novi Upper Elementary School, the Novi Board,

of Education decided last week. In the first public vote it has taken on the Upper Elementary issue since the dispute surfaced earlier this year, the board agreed 5-0 to "reaffirm" the new schedule: establish a committee to evaluate the changes; and, with the administration, present a definition of curriculum to the district's Curriculum Council for review and consideration.

The resolution was offered by board member Stephen Hitchcock.

The disagreement first arose over the announcement of a new schedule which eliminated the Upper Elementary's study hall period. expanded language arts instruction and created a choice for each stu-

dent between a day band program with limited arts/foreign language classes, afternoon band or no band.

A group of parents has said that the changes should have gone before the school board and the Curriculum Council, and deserved more parent and teacher participation in decisions. On the other hand, the district administration and school board have maintained that the changes do not constitute a new curriculum.

The board convened a half-hour earlier than normal in a special session Thursday, Aug. 20, to hear new information in the upper elementary dispute.

In the special session Thursday, a proposal was read from parent John Kuenzel to simply replace the study hall with expanded language arts time, and make no other changes. The board did not formally consider the proposal.

Several board members offered

Planners against new hospital site

By CHRISTOPHER J. KOZLOWSKI

Citing traffic safety concerns and doubting the area's health service needs, two Novi planning commissioners last week spoke out against plans for a new Providence Hospital site at the Ten Mile/Taft Road intersection.

"I have some real problems with that location for a hospital-type development," said Commissioner Charles Kureth, adding that the hospital's high density and emergency use would negatively affect the neighborhood's residential character.

Providence officials proposed constructing a new campus-type full health service facility on a 70-

acre site at the southwest corner of the intersection. Hospital officials say additional health care services are needed to better serve the city's growing population.

But commissioners Kureth and Edward Kramer said they would at least prefer the facility be located in another area of the cit.

The proposed facility would be located directly west of Novi High School, which Kureth said could cause traffic safety problems. He said he was primarily concerned with the facility's potential traffic problems, noise problems, and its future growth.

"Every hospital grows . . . expansion is inevitable," Kureth said.

City OKs SAD traffic funding

Anyone who travels north or south along Novi Road between Grand River and Twelve Mile may have a special interest in the city's newest special assessment district.

A contract special assessment district (SAD) has been approved unanimously by the Novi City Council for the construction of computerized traffic control devices including conduit and fibre optics for the traffic signals on Novi Road in that area.

A contract SAD means only those property owners contracted into the SAD will be required to pay for the improvements. The major businesses along Novi Road such as Art Van Furniture, Fretter Appliance, West Oaks I and II developments, Twelve Oaks Mall, and others are part of the SAD con-

The construction will computerize the traffic lights on Novi Road which should ease the stop-and-go flow of cars along the much-travelled route, according to traffic consultants.

Schools to sport new flag • •

The American flags which fly over Novi schools will be joined this year by a new flag - the Flag of L earning and L iberty

Beginning Tuesday, Sept. 1, the first day of classes in the 1987-88 school year, the Flag of Learning and Liberty will fly below the American flag at each of the schools in the Novi Community School District.

The National School Public Relations Association designed the flg, which is becoming popular at schools around the country, reported Educational Programs Director Rita

The flag pictures a stylized flame of blue, red and gold on a white field, with a red stripe across the top and a blue stripe across the bottom. According to a press release, the colors symbolize learning, liberty and the foundations of education. The flag is also designed to promote democratic principles and the school district's commitment to excellence.

A Flag of Learning and Liberty went up in the space shuttle Challenger with teacher Christa

City studies new housing density reduction plan

By CHRISTOPHER J. KOZLOWSKI staff writer

Prompted by an expressed desire from city officials to restrict and reduce residential density levels in the city, City Planning Consultant Brandon Rogers is studying the feasibility of down-sizing additional sections of the city.

In conjunction with an update of the city's Master Plan for L and Use Development, Rogers has been studying the city's population and residential flow patterns since

According to Rogers' March 1987 Population Study and Forecast Report, the city's maximum population build-out potential was 85,371 which was determined by comparing residential zoning to available land use and projecting potential land use. In the report, Rogers stated that the city's population could reach 60,000 by the year 2010.

In his new study, Rogers is studying the impact of a reduction in residential densities through zoning which would require larger lots (and less people) in sections in the city's southwest area.

Judging from the data collected so far, Rogers said 1980 estimates on potential population were underestimated. Rogers said last week that Novi's holding capacity under the current Master Plan and zoning ordinances is 87,000. For his mission's Aug. 19 meeting. But not new study, which is in the every commissioner endorsed the preliminary stage, Rogers updated weight a preset holding capacity the city's density map to account for should hold in making planning deciall developments which have been sions approved or are currently in the

Rogers said his plan would downsize the city to a holding capacity of just pulling the figure out of the air,"

for the density study are the following recommendations: Beck roads from R-4 zoning to R-2; west of Beck Road between Ten Mile

and Eleven Mile from R-3 to R-1;

east of Beck Road between Nine Mile

and Ten Mile from R-4 to R-3; west side of Beck Road, south of Ten Mile from R-3 to R-1. "Basically everything along Beck Road should go from R-1 to R-A,"

Rogers said. Rogers unveiled the preliminary

Novi Briefs

Candidates night out: The Novi Jaycees are sponsoring a candidates night next Tuesday, Sept. 1, at the Red Timbers Restaurant on Grand River just west of Haggerty Road. The eight city council candidates and three mayoral candidates will-

answer questions starting at 7:30 p.m. The event will be taped by MetroVision and rebroadcast on the public access television station.

The Breakfast Club: Novi High School students will be able to: buy breakfast a la carte at the snack bar in the commons beginning Wednesday, Sept. 2 - the first full day of classes. Breakfast will be served from 6:45 to 7:15 a.m. Students will be able to buy

cold cereal and milk, bagels with cream cheese, danish pastry, yogurt, milk, The breakfast program is being offered on an experimental basis to seewhether it should become a permanent part of the food service program.

Stop sign addition: The city has authorized the addition of a stop sign to the Cedarsprings Estate subdivision. Homeowners in the subdivision had been protesting the road layout for the new development taking place. City officials surveyed the subdivision and could only recommend a stop sign be placed at Christina Lane at

Buckminster. Northbound Christina will stop at Buckminster. The subdivision is located just south of Eleven Mile between Taft and Novi

Community Ed registration: Today (Thursday) is the last day to register for programs offered by the Novi Community Education Department during the fall semester. Community Ed offices will be open until 7:30 p.m. to accept registrations.

Copies of the Fall '87 brochure are available at the Novi Public Library and Community Education offices. For more information call the Community Ed Department at 348-1200.

Bridge over troubled roads? Kris Maisonville, a Novi resident, wrote to city council members recently with two suggestions for their consideration. Maisonville said the city should consider building an overpass bridge for pedestrian traffic across Novi Road between the West Oaks I and II shopping centers and Twelve Oaks.

Her second suggestion was that the "no left turn" sign from Novi Road to the newly constructed Donelson Drive service ramp adjacent to the Sheraton Oaks and West Oaks area, be removed. She said traffic traveling north on Novi Road would love to use the new ramp, but can't currently Council took the matters under consideration.

Beer and corned beef? Kosch's Deli, currently located in the West Oaks I shopping center, will be moving soon to a new site in the under-Owners of the restaurant received permission from the city council for a

transfer of their liquor license from the old restaurant to the new. The deliwill be located near the new movie cinemas.

Second annual Crop Walk: Dust off the walking shoes and start stretching. The second annual Novi Crop Walk is scheduled for Sunday, The money received from walkers' pledges will be donated to the World

Hunger Control Fund and the Novi Emergency Food Program. Last year this six-mile walk through the community netted \$5,200. This year organizers have set a goal of \$8,000. Sponsor envelopes are available at area For more information contact the Meadowbrook Congregational Church

School bells ring: Don't look now, folks, but it's Aug. 20 and the start of the 1987-88 school year is less than a week away. New teachers will report for an instructional day on Thursday, Aug. 27; and all teachers will report for a work day on Monday, Aug. 31. The tires were slashed on a 1986 responsible parties entered a storage Mazda and a 1985 Ford van parked on shed and removed eight 2½-gallon valued at \$75, a marine battery, an Students in grades 1-12 will report for a half-day of classes on Tuesday, AM-FM cassette radio and 20 valued at \$75, a marine battery, an Students in grades 1-12 will report for a half-day of classes on Tuesday, AM-FM cassette radio and 20 valued at \$75, a marine battery, an Sept. 1. recommended by Governor James Blanchard could mean significant revenue losses for local school districts like Novi - but legislators will likely vote to restore the money. officials believe.

In the state's budgeting process Blanchard made several vetoes of appropriations which included a \$20 million cut in the \$610 million school aid appropriation

The reduction would be set to come from the state's categorical aid money -- programs mandated by the state in certain categories such as special education, vocational education, and transportation.

The Novi Community School District budgeted for \$182,400 in total state aid for the upcoming fiscal year -- some of which could be in jeopardy. But the experts do not expect anywhere near the size of cut recommended by Blanchard.

"I feel that the legislature will have to restore some of that money that was vetoed. The governor took money out of transportation and said William Barr, assistant special education that absolutely has superintendent of the Novi Communito be there," said state Senator ty School District. Chevy Astros are selling as fast as we can build them.

The Good News:

The Bad News: We can't quite build them tast enough.

Chevrolet wishes to apologize for the popularity of its Astro passenger van. Because, quite frankly, people like the Astro so much, it can sometimes be tough to find one.

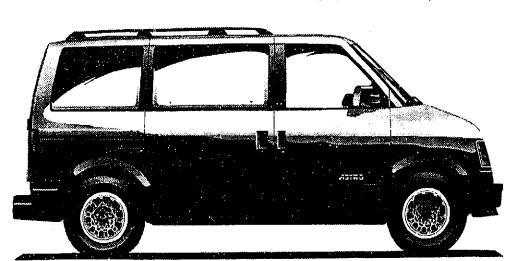

Maybe if Ford or Dodge had a van with Astro's torque, power and towing capacity, things would be a bit easier. Or perhaps if there were a compact van outside GM that could carry as much, the demand for Astros wouldn't be as great. Or just maybe if, after all this time, Ford or Dodge had made swing-out rear doors standard on their vans too, there would be an alternative to Astro.

But until that happens—if it happens—Astro will continue to be very, very popular. Which means we'll continue trying to keep up with the demand.

So if you find that you have to wait a bit for your Astro, we apologize. Just keep telling yourself you're not really waiting. You're merely investing some of your time into what could be the best compact van available today.

Best-backed Chevy ever. 6-year/60,000mile powertrain warranty and 6 years or 100,000 miles of outer-body rust-through protection. Solid proof of the quality built into every new Chevy Astro.

See your Chevy dealer for terms and

will be able to participate in a series of unique driver retraining programs through the Traffic Improvement Association (TIA) of Oakland Coun-

drivers up

TIA/Oakland County has received a \$30,000 federal highway safety grant through the Michigan Office of Highway Safety Planning to conduct

The project will seek to improve the driving performances of senior citizens, enabling them to maintain highway mobility as long and as safely as possible, according to TIA Managing Director Bruce Madsen. Through the project, TIA will provide 12 eight-hour courses of classroom instruction and offer on a voluntary basis psycho-physical tests and other driving performance

measurements. Classroom instruction will in corporate a curriculum plan and student workbooks developed by the American Association of Retired Persons (AARP).

Madsen said the project is unique in the United States in that no other known training for senior citizens includes psycho-physical and driving performance evaluation.

The evaluation portion of the special training will be used solely for the purpose of counseling senior drivers. The results of the performance measurement will be known only to the driver and the per-

son conducting the evaluation. "We are pleased to be able to offer this training because mobility is an extremely important factor in the independence and good mental health of older people," said Madsen.

If only the number of accidents per year is considered, the accident rate of older drivers is moderate, ac-

On a per mile basis, however, drivers over age 65 have a much higher accident rate than all other drivers except those 25 and younger. Madsen said the Oakland County program will be regarded as a pilot project for possible implementation elsewhere in Michigan and other

Some of the world's best doctors work right in your neighborhood.

They're the doctors at the M-CARE Health Center in your neighborhood, and they come from the University of Michigan Medical Center, one of the most respected health care institutions in the world. That means the physician you choose to be your family doctor will always have access to the research and technology available only at the University of Michigan Medical Center.

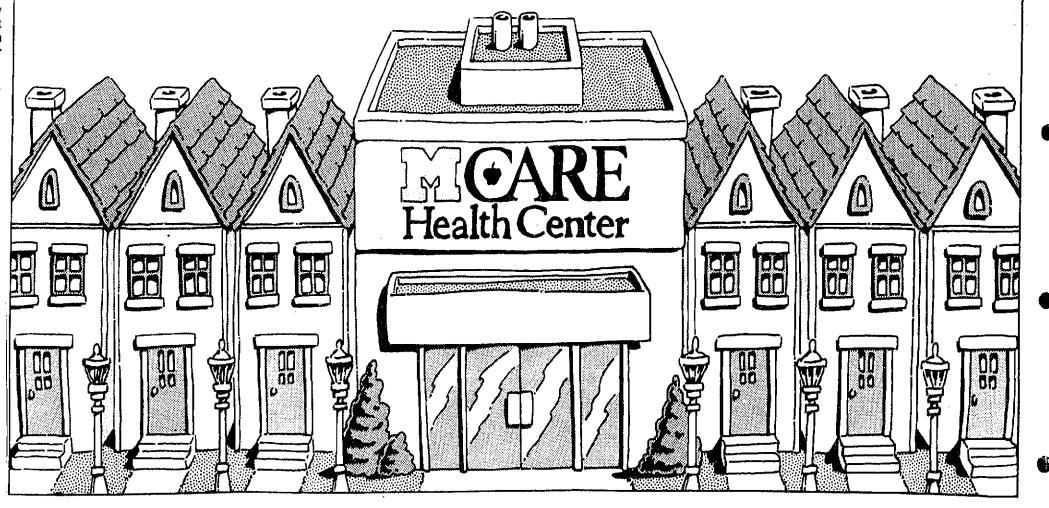

And since every M-CARE Health Center accepts most kinds of medical insurance, you'll always have access to an M-CARE Health Center. Of course, there are other smaller, but

significant considerations, like convenient locations, free parking and extended hours. So take care of all your medical needs at an M-CARE Health Center, where some of the best doctors in the world are practicing...right in your own neighborhood.

Knowledge heals.

Deffective ID decals reported

A manufacturing defect in 1989. watercraft registration decals which may cause them to shrivel and peel after being placed on a watercraft has been identified by the Michigan Department of State.

In responding to boat owners who were experiencing problems with the 1989 decals, the department found that they were manufactured improperly with a laminant that is affected by heat.

The defective decals are numbered from 0230001 to 0648600. A new series of 1989 watercraft

decals has been distributed to all Secretary of State branch offices where they are being given free of. charge to any watercraft owner who presents a 1989 registration. The new decals are numbered from 0955001 to

Department of State officials have notified marine law enforcement. agencies about the potential problem. As a result, watercraft owners whose 1989 decals may be illegible or missing should not be ticketed. Owners are reminded, however, that they must carry their registration when operating a watercraft in

Approximately 33 percent (254,210 of 750,210) watercraft registered in Michigan have 1989 registrations. The three-year registrations expiring

FETUS FACTS

If you are a typical mother. don't ask where you went wrong if your infant is a thumbsucker. You are completely innocent. Thumbsuckers are born, not made. Medical pictures of the fetus show that many babies are already well into the habit of thumbsucking by the seventh month in the uterus. In fact, all kinds of preparations are going on

before birth to get baby's mouth fready for its complex tasks. Did you know that teeth are already beginning to form in the growing fetus just three months after conception? Indeed, some parts of the 20 primary teeth, (also called baby

early stage. Even tiny pieces of

growing. The rest of the permanent teeth wait until right after birth to start forming inside the gums.

Sometimes, shortly after birth, parents or physicians my notice little white spots on the mouth). These are little keratinized structures (keratine is a tough, fibrous protein found in nails, hair and teeth). They are not significant and normally will disappear in 10 to

Grand River future requires city action

how best to zone portions of the West commission has made recommendathe past that have stalled upon reaching the city council for action.

This corridor is a vital artery within the City of Novi, as well as an **Development** entryway to the city. After years of study and discussion it is time for the city to act and to zone the corridor. Many future planning decisions for the rest of the city rest on how the zoning in this area will fall.

The debate over the proper zoning of this corridor has gone on for years. Planning commissions and planning consultants have made recommendations, and it is time for the city council to make a decision resolving the matter once and for all. In fairness to business owners, residents and developers, the city must decide the proper future for this area — now, before further development occurs in the city.

The commission voted unanimously to recommend the north side of Grand River Avenue between Taft and Wixom roads be rezoned to OSC-2, or mid-rise (three stories or 42 feet) office zoning.

Novi planning commissioners have once again reached decisions on Grand River Avenue Corridor. The tions on the zoning for the corridor in

> Likewise, the commission recommended unanimously the south side of Grand River Avenue between Wixom and Taft roads be rezoned to light industrial, I-1, use.

A public hearing will be held in September for the north section of the area. Public hearings have been held on the south section of the corridor, and a citizen's group has made a formal land plan presentation to the commission and council. All the necessary steps have been taken to insure that the council has the necessary background to make an informed decision on the corridor.

Postponing a decision indefinitely cannot help an already thoroughly researched and debated subject. This rezoning must be done — the sooner, the better.

Novi already has an abundance

The right direction Specifically, homes on larger lots Novi Planning Consultant Brancost more money, thus introducing

don Rogers has presented a brief preview of a residential density study he is preparing in conjunction with a revision of the city's Master Plan for Land Use Development.

In essence, the preview served notice that Rogers is planning to recommend city officials amend the Master Plan to increase lot sizes in undeveloped residential areas on the west side of the city. Increasing lot sizes restricts population growth for the simple reason that on any given piece of property more houses can be built on 80-foot lots (R-4) than on 90foot lots (R-3).

The pending recommendation is likely to stir some controversy. The larger lots will lower the impact on first wail of dissent will come from the need for services. Fewer homes property owners and developers who will generate less traffic and fewer tend to believe profit margins vary school children as well as lowering proportionately with the total the need for sewer/water services number of houses that are built. and police/fire protection.

Although most homeowners would probably approve of increasing lot sizes and lowering density levels, there are some related issues they might not approve of.

Racism is wrong, and has that racist statements should not be no place inside — or outside — the made, politely thanked the applicant halls of city government.

Time to make flying safer

Kozlowski

The impact of the crash of Northwest Flight 255 on Aug. 16 is one that has left a very strong impression on me Although I cannot begin to feel the sense of loss that is being shared by the familes of the 157

Because of what happened

II days ago, I may not bring

myself to be able to fly for a

very long while, if ever.

people who were killed including four individuals who had ties to Novi and Northville), I have been consumed wanting to know everything about a tragedy that struck so close to

I, along with hundreds of other freeway drivers in the state, travel that stetch of I-94 near Detroit Metropolitan Airport frequently. In fact, I drove past the airport on that fateful Sunday about two hours before the crash. Driving home to Detroit from Ann Arbor yesterday, and seeing exactly where the crash occurred, made the images of the huge jet crashing to the ground more real, and more frightening.

Although investigators say it may be a matter of months before we know exactly what caused the crash, it disturbs me to hear so many "experts" blame the deregulation of the airline industry for the philosophical

airlines have relaxed preventitive maintenance standards in an effort to remain economically competitive. And I believe that is true. I also believe it is wrong.

Of course, the odds still suggest that air travel is the

These experts say that because of deregulation,

I have never felt comfortable with flying wholeheartedly.

safest way to get from one place to another, and that millions of flights occur each year without incident. But the rate of near misses and fatal airline crashes is on the rise, and the odds - no matter how long they were at one time — are getting smaller.

I have never felt comfortable with flying wholeheartedly, because I was always disturbed by the fact that I had no control over the missle that was transporting me from one place to another 20,000 feet above the ground. I do not like the feeling of my not being able to take over the wheel if my "driver" was too.

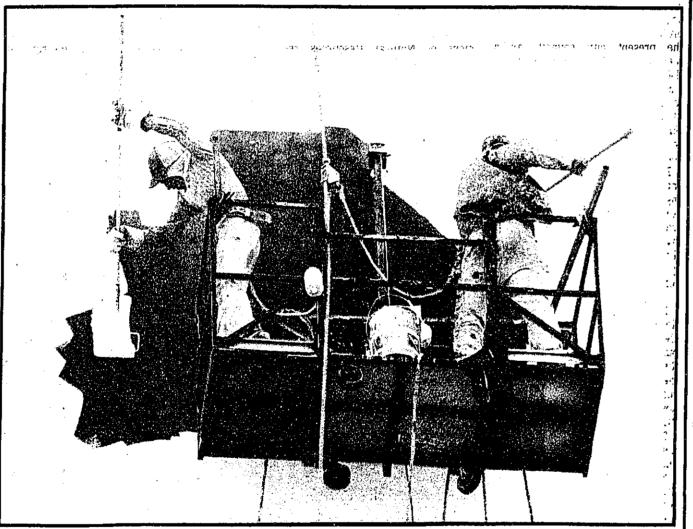

And now, we may have come to a time when no one - not the pilots, or the mechanics or the air traffic controllers - are really in control either. Even if it is determined that mechanical error did not cause the crash of Flight 255, you can rest assured that the cause of the disaster did not begin with one person — or even one

I have nothing against air travel conceptually. Theoretically, I prefer to get where I am going fast, but I also prefer to get there safely. The time is now for all of the powers that be to recognize the fact that the industry is in need of help. It is up to us to act, as citizens and as consumers, to make the skies safe for travel once more, and not forget about this tragedy. It can ' happen again, and as we have seen, it can happen close

Cover-up

JOA proposal doesn't add up

coffee (honest) at The Starting Gate when he asked, "What's

I'm never quite sure how to respond to the question. Millions of things are new. Do you mean at work? In Novi? In Washington? How 'bout them

Jerome Whenever someone asks "What's new?" I feel compelled to come up with an answer and I try to come up with something that will appease the person who asked the question and that I might not mind talking about.

"Well. I guess the JOA hearings between the Free Press and News in Detroit are new," I said finally.

I must have hit something which he was interested in, too, because he said he wasn't really sure what was going on and asked me to continue.

"Maybe I'm prejudiced because I'm in the suburban press, but it seems to me that both papers have a major credibility problem with anyone smart enough to add one and one," I said.

"Did you see where that Knight-Ridder executive" testified the Free Press will probably fold if the JOA isn't approved? Well, if you believe that, than you have to ask yourself why Al Neuharth with The News is so: willing to enter into an agreement in which he will share: profits from the combined operation with the other

"You've got to remember that Al Neuharth is one heckuva good businessman. If the Free Press is really going to fold, like the Knight-Ridder guy testified, than why doesn't Neuharth just wait for it to happen. Then hecan take 100 percent of the profits and not have to share them with anybody."

"Put it this way," I continued. "If you had a competitor in the same business, and that competitor was about to go under, leaving the entire market to you. would you be willing to go into a joint operating agree. ment with him and share the profits?"

I don't know if Jim was really interested or not. But he took a drink of his coffee and said, "Doesn't seem to make much sense, does it?"

"Not to me it doesn't," I said. "But, hey, I'm not a businessman. There's got to be something I'm miss-

When the City of Novi purchased the Glantz property (approximately three years ago) and announced their plans to develop this property, I wrote this newspaper (and the other newspaper) and publicly stated that I was personally against the city becoming involved in this and any other development projects because I did not think the city had the staff and resources to complete such a task. At that time, I was the senior member of the Novi Planning Board. In addition to writing letters, I Different opinion stood-up to the podium at a city council meeting and verbally repeated my opposition to the city's involvement in developing this property. When I looked around to see how much public support I had gathered,

Subsequently the city council created the Shoreline Property Committee and decided that any approved project would include at least two public elements, a public meeting room and a nominal number of boat slips for Novi residents to use. I was not a member of council at that time, nor was I a member of the Shoreline

Progress will come, whether we want it or not. Control of this depends

> Why should they be out running around having fun if I have to be at work? And from what I've learned from talking to some children in the Novi area, they're pretty glad

There were crowds of kids around the elementary schools. I walked up to two little boys and asked them if they were ready for school to start. They stopped ramming their bicycles into the brick wall and looked at me like I was an alien. "Yeah, I guess so," they said and walked away. It's the kind of question people who don't know what else to ask kids, tend to ask. Kids know this and don't put up with it.

At the next school I talked to four little girls. I interrupted their search for grasshoppers in the long playground grass. They all said they were not ready for school. They were emphatic about it. One little girl asked me what other kids had said. I told her about the little boys' answers and she shrugged her shoulders and said, "Well, boys what'd you expect?"

I went by the high school to ask some older kids, but I couldn't find a parking space in the lot. As I was leaving two young men in a shiny convertible passed me. They were wearing sunglasses and sporting what had to be fresh haircuts. They were laughing and waving to people on the sidewalk.

Trout with golden sauce

Texas-style Fajitas

■ Mexican beer E Salt to taste

Spiced corn on the cob

Juice of 12 Mexican limes

2 serrano chilli peppers, minced

Trim meat. Each fajita should be 1/2 to 3/4 inch thick in order to cook evenly. Place one layer of fajita in a large roasting pan, dousing it with lime juice. Add garlic, onion, serrano peppers and coriander. Add another layer

of meat (add remaining ingredients). Pour enough beer over fajitas to fill pan halfway. Cover with plastic wrap, marinate in refrigerator for six hours. Build mesquite fire in your grill. Make sure coals are very hot. Lay meat across the grill and cover. Turn the meat only as it cooks. When cooked, remove meat and salt to taste. (Serves 6-8)

6 corn on the cob

3/4 cup of salt butter, softened 1/4 teaspoon grated nutmeg 1/4 teaspoon paprika

Mix spiced butter after lighting barbecue. Beat butter in a bowl with spice mixture and lemon juice. Place each cob on a double square of heavy duty foll and spread butter mixture onto the corn. Wrap up the foil and fold it around corn to seal in the moisture. When coals are hot, cook corn on the grill for 15-20 minutes. Remove foil and serve at once, with

buttery juice poured on top of cooked corn. (Serves 6)

2 cloves garlic, chopped 2 onions, sliced

4 rainbow trout, each weghing about 3/4 pound,

cleaned with head and tail left on

Pat trout dry with paper towel. Brush oil onto fish, sprinkle with salt and pepper. Mix the mayonaise, mustard, parsley and lemon juice together in a bowl. When coals are hot, brush the grill with oil, place fish onto grill and cook 10 minutes, turning over once, until fish flakes easily. Hemove fish from grill. Spread mustard sauce evenly over trout, place fish back onto grill and barbecue for about two minutes, until fish skin begins to split and sauce turns golden brown. Ready to serve four hungry folks.

4 pounds fajitas (skirt steak or tenderized flank steak)

■ 1 handful coriander, stems removed and leaves chopped

1 tablespoon vegetable oil 2 tablespoons mayonaise 1 tablespoon Dijon mustard ■ 2 teaspoons fresh parsley 1 teaspoon lemon juice vegetable oil, for brushing

☐ Cooking experts agree that it the good ole' summertime. And as is important to oil the grill on your close with Labor Day fast ap- any food on top of it. Random Sample

Random Sample is an unscientific poll of 10 Northville/Novi area

residents conducted by the staff of this newspaper

Know you child's first literal step f your three-year-old pretends to read a page of scribbling while she tells you a story, take her seriously. She is in a newly-identified developmental stage called

That's the advice from Elizabeth Sulzby, associated professor of education at The University of Michigan, who has been researching emergent literacy in

traditional reading and writing schoolers and kindergartners," she said. "Our research shows that their developmental patterns are quite different from those of firstgraders and call for radically dif-

In a study conducted with June Barnhart and Joyce Hieshima of Northwestern University, Sulzby looked at many forms of writing and reading used by 123

Sulzby: 'We must not plunge in with traditional reading and writing methods when we teach.

"The forms include attempts to read favorite storybooks, scribbling, drawing pictures, making letter-strings, inventing spellings and 'reading' their own stories out

'We found that the forms do not always come in a particular chronological order. Also, a kindergartner may use pictures or scribblings to tell a very complex and advanced narrative one day

ing usually begins around 18 months of age, Sulzby said, and can go on into the second grade.

watching him as he scribbles. If he is working on a story, he may whisper sounds, read, edit and cor-

"You can also ask him to read the scribbling out loud," Sulzby said. "If the child has a reading intonation and uses phrases that would be found in writing as opposis a written composition."

Sulzby found that many children insert spaces, hyphens, underlinfingers, they may recite the same words for the same portion of say more words or elongate words

"Clearly, they are associating print with the narrative when they lo this," Sulzby said.

Letter-like forms often turn up in children's compositions even after they have mastered a few basic letters. "These often are called pseudo-letters," she said. "One 4-year-old explained that she used letter-like forms to 'write fast' when she was doing a batch of

to invent spelling. For example, "BKS" could mean "because." I mix of standard spelling and in vented spelling may come next. Although it seems logical that a

For those who like (or despise) 457 yard

water hazards on a hole, this Blue Course dandy at Godwin Glen surrounds both the men's and women's tees. Water also pops up

ly from the tee, this hole could be a nightmare. To make the green in two, the second shot has to clear the econd pond on the right. Ironically you need to keep the first two shots o the right in order to cut down the distance and give yourself a chance or par. Many try, but few convert. where the water is," Stephens said.

"Even for low handicap players, it's a hard hole to par." The green features a slight incline in front and is surrounded by trees in the back - so there isn't much room for error. Godwin Glen features a lot of water on its 27holes, but number five on the Blue Course is the granddaddy of them

Brae-Burn Golf Club No. 13

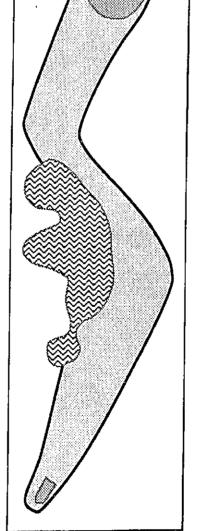

Brae-Burn's motto is "Home of 617 yards the Monster" which refers to the mammoth number 13 hole. The Monster is a 600-plus yard double dogleg surrounded by numerous

"It's a well-known hole all across the state," Brae-Burn Pro Chip Chamberlin said. "It has water all along the left hand side of the fairway and woods all down the right hand side. It's nothing that you'd find on any courses around here." If you are a short hitter, you might as well give up trying to par

this hole before you start. "It's very, very difficult to par this hole," Chamberlin said. "You need an extremely accurate and long drive, but the second shot is the key. Not only does it need to be long and straight, but it has to set up your third shot to the green and that's tough because you need to cut two corners.'

The green is good sized, but it slopes from front to back and has undulations. The slope makes it one of Brae-Burn's most difficult

"The average golfer cannot get onto the green in regulation," Chamberlin said. "It's impossible for them because they can't hit the ball far enough."

said. "It's a very demanding first

"I'd say it's probably the hardest

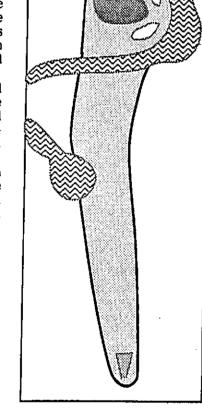

two in front of the green.

out here," he said. "There are woods on the left and several pines on the right so you need to stay in the middle of the fairway to do well

The hole is relatively straight and has a small pond on the left of the fairway. The green is surrounded by water, bunkers and woods, making accurate approach shots almost a necessity.

"The water is around the green and there is a large bunker on the right side, between the green and the pond," Zelazny pointed out. "On the left side there are woods, so there isn't a lot of room for

"It may not be the toughest hole in the world, but it is a pretty hole," said Brae-Burn Pro Chip

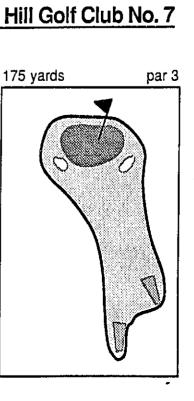

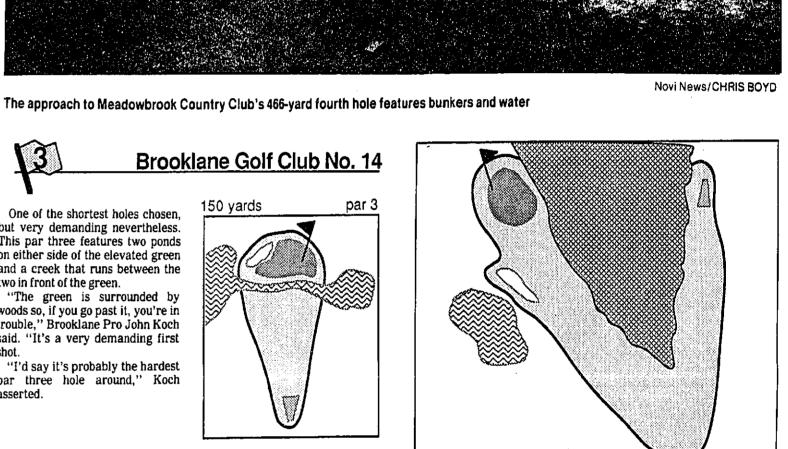

Hickory Hill Golf Club No. 7

This hole has an interesting history. The tee used to be a full 60 yards behind the present tee, making it virtually impossible to par. It was routinely ranked among the most difficult par three holes in the state. Owner George Catto mercifully cut down the length and reduced the size of the two bunkers, but it still remains a very difficult

"It's an elevated tee to an elevated, two-tiered-green with a deep valley in the middle," Catto explained. "It used to be impossible - now it's just tough.

"We had to make it easier for the golfers, but it is still a challenge. If your drive is one foot short, it will roll back down the hill."

Westbrook Golf Course No. 17

slicers. Keeping to the right may For uniqueness, nothing comes not be a bad idea, but the length of close to this hole in Novi. this hole will severly penalize you if Westbrook's number 17 carves its way through a heavily wooded area you try to take the first corner too and is one of the sharpest doglegs

you'll ever see. "It's very unique and unusual," said Dun Rovin Golf Course Pro Jack Nelson. "It's the sharpest dogleg I've ever seen." The hole is channeled and funnel-

ed right into the woods on the right. making it a potential disaster for

far and to the left, you'll be in the water or the bunker," said Westbrook Pro Bob Kuhn. "It has an undulated green that's on the big side, and it can be tricky becuase it's tucked into the woods a bit. Depending on the pin placement, i can be very difficult to two putt."

Meadowbrook Country Club No. 4

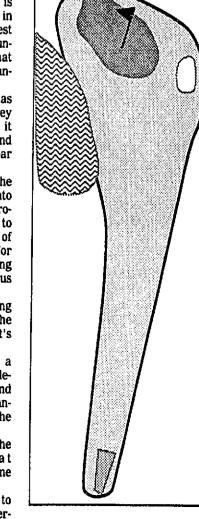

Meadowbrook Pro Andy Soley says the fourth hole at Meadowbrook Country Club hole is "probably the most difficult hole in the area." Perhaps the toughest aspect about the hole is its undulated green, but getting to that green in two shots is a very demanding task as well.

"The green is as tough as anything about the hole," Soley pointed out. "The length makes it difficult for the average hitter, and there are a number of hazards near the green as well."

A long pond to the left of the green, and a cliff-like drop-off into the water can cause major problems. A large circular bunker to the right and woods to the back of the hole give very little room for mistakes and that isn't even taking into consideration the treacherous

"The green is narrow and long and, if you miss the green to the right, with the undulations, it's almost impossible to save par." In addition, this hole is truly a beautiful sight to behold. The widemanicured fairway, the pond and the uneven green are simply stunning to the eye, but not always to the

"One of the toughest holes in the area is number four at Meadowbrook," agreed Brooklane Golf Club Head Pro John Koch. To sum it all up, it's difficult to get to the green in two, and it certainly doesn't get any easier after

Top nine! Best holes shine

6C THE NOVI NEWS/Thursday, August 27, 1987

at area courses

Meadowbrook Country Club No. 12

This Meadowbrook gem is one of the longest in our nine best holes. At 574 yards, it could challege even the long-ball hitters. To complicate matters, a dogleg to the left and two large bunkers next to the green make matters even more difficult.

"It's a very difficult par five," Andy Soley said. "It takes three excellent shots from the tee if you want a chance for a birdie. You really can't afford not to have a good shot."

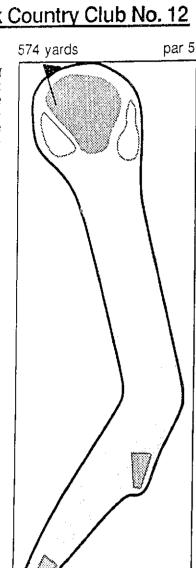

From the women's tee it's slighty easier because it's a full 100-yards closer to the green. But you still have to deal with the dogleg, the bunkers and the two-tiered green.

"Because it's a two-tiered green, it makes it very difficult to putt," Soley noted. "The drive is uphill, and you almost have to carry over that hill or you're hitting a blind second shot from the base of the hill with a lot of ground to cover.'

The key to the hole is the drive, and Soley reported that few can get the needed distance to reach the top of

"It's quite a long way, so many guys have trouble with the drive," he said. "The fairway is lined with trees and the large bunkers around the green see a lot of action.'

State License #22488

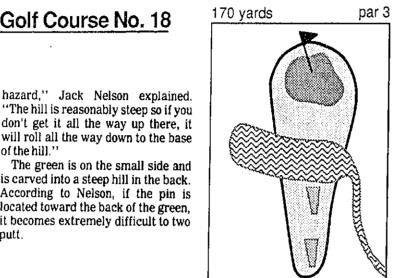

Meadowbrook's beautiful 547-yard number 12th hole has large bunkers and an undulating green

Dun Rovin Golf Course No. 18

This attractive hole, visible from hazard," Jack Nelson explained. Haggerty Road, is a picture-perfect "The hill is reasonably steep so if you don't get it all the way up there, it over a 40-foot wide pond onto an will roll all the way down to the base elevated green. From the women's of the hill." tee, clearing the water is usually

"The pond really doesn't come into located toward the back of the green, play unless you miss-hit the tee shot it becomes extremely difficult to two badly - but it is a psychological putt.

Thank-you extended

Novi News/CHRIS BOYD

The Novi News/Northville Record would like to extend a hearty 'thankyou' to the following people who were very helpful in nominating, choosing and lending expertise to our nine best golf holes project: John Koch, Mark Zelazny, Jack Nelson, Andy Soley, Bob Kuhn, George Catto, Paul Stephens and Chip Chamberlin. The author would also like to thank staff writer Christopher J. Kozlowski for his help with graphics.

The dog-days of summer

While most high school students enjoy the last few days of their summer vacations at the beach or shopping for new clothes, the football team is always busy preparing for another

In Novi, the Wildcats are coming off a championship 8-1 season and have been sweating it out at practice since Aug. 10. Under new MHSAA rules, the team didn't even begin padded workouts until Aug. 20 in preparation for the season opener on Sept. 4 at Walled L ake Western. Wildcat mentor John Osborne, the dean of Kensington Valley Conference coaches, has a solid nucleus of returnees in the fold as well as a few talented newcomers. The team is out to repeat as league champs, but is expected to get tough competition from Brighton and South L yon. On Sept. 4, some 300 other high schools across the state will open their 1987 seasons as well. But before

that first kickoff, each and every team has put in many hours of grueling, tiring and monotonous work — in hopes that all the effort will pay off on the gridiron this fall.

Photos by Chris Boyd

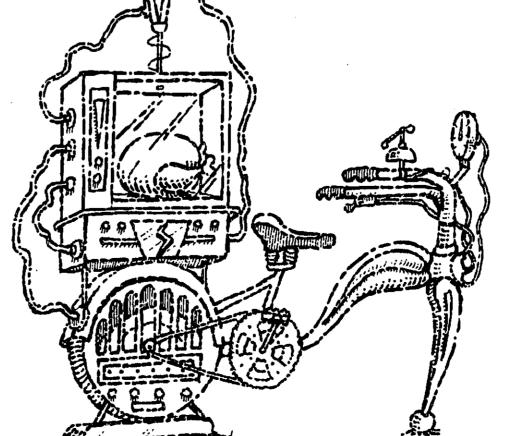

Varsity players (above), ed by senior Matt Brinker, urge on freshman team members during their workout; two Wildcat players (left) confront each other in a drill while a coach looks on.

Associations has voted to adopt the three-point shot for high school play. Since it has been the general practice for the Michigan High School Athletic Association (MHSAA) to follow suit with National Federation rulings, most area coaches expect the Michigan scholastic sports body to adopt the three-pointer.

"Michigan usually goes along with the national rulings so I think we'll have the new rule next season," Novi Basketball Coach John Cicchelli said. "It's just like that bench decorum ruling (preventing coaches from leaving their seats during a game).'

The MHSAA will make a final vote on the three-pointer when the Representative Council meets in August. If adopted, the rule would go into effect for the 1987-88 season. The distance would be the same as it is currently in the NCAA - 19 feet, 9 inches - and would apply to both boys and girls basketball. "It will definitely change the complexion of the

bably won't be a three-point threat next season. It's too bad we didn't have the rule last season when we had (oe) Miskovich, (Matt) Kamish and (Jeff) Tanderys. "I don't think we have anybody coming back who I will

encourage to take the shot, but certainly if we have a kid who can hit for the percentage out there — we'll let him The three-pointer has been optional in Michigan for

two years when the MHSAA allowed leagues to decide whether they wanted to use it. The Tri-County Conference, of which Whitmore Lake is a member, has played all of its games with the rule this past season. Novi Christian and other Christian school basketball programs, even though many aren't members of the MHSAA, have also employed the three-pointer. It just illustrates the broad-based popularity it's gained.

"More than likely, we'll have it," said Jack Roberts, the MHSAA's executive director. "Our council would have to take specific action not to accept the change, and three-point shot, so he couldn't be certain whether junior varsity and middle school programs would employ it too. As for the adoption of the rule, it didn't surprise

"I thought it was coming," he said. "I think most observers felt it was inevitable it would come to high school after the colleges adopted it.

"My personal preference is that I'm mildly opposed to it. I'm most concerned that it puts another demand on the officials. Secondly, it puts another demand on the facility — another line on a floor already covered with lines for volleyball and whatever else. Thirdly, I'm not convinced the high school game needed it as much as college. We don't have the packing in on defense like

Cicchelli thinks it will open up the game more, provide more excitement for the fans and make pure shooters a valuable commodity.

"But, I'm not so sure we need it at the high school level," Cicchelli added. "It will be a big adjustment for

consideration. A lead just isn't going to be as safe as it used to be. And the referees may have to adjust to the new rule more than the coaches and players."

According to Cicchelli, the new rule will place a . distinct disadvantage on the slower-tempo teams, with

"It will be a disadvatage to the slower teams because they just won't be able to keep up with quick teams in a man-to-man defense," he said. "And if your opponent has a shooter who can make it from three-point land, you have to go out and play them."

As for Novi's opponents, the rest of the Kensington Valley Conference is gearing up for the rule change as

"I'm looking forward to it," Howell Coach Jerry Johnson said. "We are going to get the (three-point) lines down as soon as we can so we can practice and work on it," he said. "If you make 40 percent (from three-point range), it's like making 60 percent of your shots from closer in."

Softball benefit planned

A charity softball game to benefit the families of the slain Inkster police officers will be held at Novi's Power Park on Sept. 13 at 2 n.m. The event is co-sponsored by the Novi Parks and Recreation Depart-

ment and Delwal Corporation. Former Detroit Tiger players representing the Detroit Tiger Alum-Novi/Delwal team composed of city officials and members of the Novi Police and Fire departments, Novi Parks and Recreation department.

In addition to benefitting the families of the slain Inkster police of ficers, proceeds will go to the University of Michigan Burn Center, A minimum goal of \$5,000 has been set by the planning committee.

The committee includes Novi Mayor Patricia Karevich, City Manager Edward Kriewall, Police Chief Lee Begole, Fire Chief Art Lenaghan, Parks and Recreation Director Dan Davis, Mr. and Mrs. William Walker and former Tiger pitcher Larry Pashnich, current treasurer of the Tiger Alumni

The former Tigers have agreed to sign autographs after the game. Hot dogs, pop and other snacks will be available. Pre-game ceremonies will include the release of 1,000 helium-

A warm-up softball game at noon will feature a battle between the Nov Old Timer's senior citizen baseball team and members of the Novi City Council and assorted city officials. Admission is \$1 per person, and tickets can be purchased in advance at the Novi Parks and Recreation Department or at the Novi Police and Fire departments. For more information call 349-1976

Bike tour due here

Avid cyclists are encouraged to ride and participate in the Blue Care Network Tour de Michigan bicycle pledge ride to fund the U.S. Olympic

This official Sesquicentenial event will include seven professional races and another seven community pledge rides. The professional races will feature over 200 world-class cyclists in seven Michigan cities for over

The pledge events will be group rides of about 15 miles each, including one in Northville on Saturday, Aug. 29, at 8 a.m. and another the following day at 8 a.m.

The pledge riders will start at the Northville parking structure and go to the K mart world headquarters in Troy on Aug. 29 and to Detroit's Millender Center on Aug. 30. For more information, call tollfree, 1-800-851-6886.

CPAs set 10-K race

10K Centennial Corporate Team Challenge and Two Mile Fun Run sponsored by the Michigan Associa tion of CPAs, will be held Saturday Sept. 12, at 8:30 a.m. at the Oakland Community College Orchard Ridge Campus in Farmington Hills.

this event, which celebrates 100 porate team race begins at 8:30 a.m. Teams are comprised of 4-5 runners at a cost of \$30 per team. The fun run is open to all runners at a cost of \$6 each. Entrants in either race will receive a complimentary race Tshirt. Prizes will be awarded in each race. Door prizes and refreshments will also be available.

Registration deadline is Sept. 4 For more information and registra-

Dr. Kenneth Poss and Associates

Uses laser foot surgery to reduce pain and trauma

They're called podiatrists or foot specialists and what they offer may be sur-They were the forerunners in the use of

laser surgery on the foot, one of the few practices to offer 24-hour emergency service, treat patients from infants to senior citizens and most of all, continue to make house calls.

Feet are the part of the body that most people neglect. We go for check-ups for all parts of the body, but when was the last time you had a foot check-up?

The professionals at Foot Health Centers located in Novi, Northville and Livonia offer all services related to the foot and ankle. Dr. Kenneth Poss and Dr. Randy Bernstein like to stress that taking the right steps towards better foot care can pay off. They treat all types of problems from sports related injuries, to children's in-toe or outtoe conditions, to complete reconstructive surgery of the foot like bunions and hammertoes to circulation and nerve problems

of senior citizens By being one of the first podiatric practices in the state of Michigan to use laser technology, Dr. Poss and Dr. Bernstein have used lasers with much success. The laser is used primarily for treatment of fungus nails, ingrown nails, growths,

warts (hands and feet), plantar corns and some nerve tumors (neuromas). By using the laser, there is less trauma and less pain for the patient. "The patient," Dr. Poss said, "is given a local anesthetic and walks out of the office when the procedure is done. "The problem is that not many people are trained to use laser properly. It should be noted that laser technology has not been perfected yet in treating bone disorders."

made up of senior citizens whose feet are beginning to show signs of wear. These ailments fall into four categories. 1) As we age, we begin to suffer from chronic illnesses, such as heart disease or arthritis. These may present direct or in-

A large part of the doctor's practice is

direct problems to the feet. 2) Lifelong neglect of the feet become apparent as feet age. Trouble from "wear and tear" accumulates and the eventual effect may be dramatic.

The staff at the Foot Health Center

3) Some foot problems are encouraged by the aging process. Slower circulation and hardening of the arteries are major con-

4) Feet become more vulnerable to injury with age. Senior citizens should see Dr. Poss at the slightest sign of change in the condition of their feet. Quick treatment could prevent problems before they become major, thus limiting the possibility of additional medical treatment and costs.

Keeping feet healthy contributes to a longer, more comfortable, and more active life. Older people should think in terms of prevention, to discourage infections and discomfort by routinely examining their feet for changes in color or temperature. These signs might indicate problems which could lead to gangrene and amputation.

Diabetic feet also need extra tender loving care. People with diabetes or poor circulation must take special care of their feet because they could lose them to an infection. In addition to providing general foot care, diabetics should be sure to wear adequate shoes and avoid constricting socks or stockings. Sensation is diminished, so look at and feel feet daily to check for cuts. cracks or redness. Contact Dr. Poss immediately about any ongoing foot problem. Especially report any sign of infection or

Surgery for bunions and other foot deformities can for the most part be done on an ambulatory basis in our office or as an out patient at one our hospitals. This means that the patient does not have to remain in the hospital following surgery. "I prefer ambulatory surgery because my patients can return home immediately after their procedure," Dr. Poss said. "They can recover in the comfortable atmosphere of their own

Dr. Poss has been practicing in the area since 1978. He is a graduate of Pennsylvania College of Podiatric Medicine in Philadelphia. Poss completed his surgical residency at Monseigneur Kern Hospital for Special Surgery in Warren, where he received advanced training in foot and ankle

Dr. Kenneth Poss checks a patient's x-ray prior to surgery.

He is director of residency training at North Detroit General Hospital as well as being on staff at Botsford Hospital in Farmington Hills. He is a member of the American College of Foot Surgeons (Associate), American Board of Podiatric Surgery, and the Academy of Hospital

Podiatrists. Dr. Poss also lectures across the country on foot and ankle surgery and gives many second opinion consultations on foot

surgery. Because of his advanced training in foot and ankle surgery, Dr. Poss is available for 24-hour emergency care. He will meet a patient at the office or hospital at any time, thus saving time of waiting in a hospital emergency room. Putting the patient first is a priority for Dr. Poss.

He believes children should have a foot exam within the first year and senior citizens should have their feet checked acproximately every two-three months for infection, nail care and making sure the cir-

Free transportation is offered for patients who need a ride and house calls are available for those senior citizens who are unable to leave their homes. When you call for an appointment, Dr.

Poss' staff members are trained to ask the nature of your problem. Please give them as much information as possible. This will help them schedule enough time for your com-

River/Novi Road intersection as a "Town Center" area in the 1980 Master Plan for Land Use Development. But drawing lines on master plans is easy; the hard part is making those lines become a reality. How do you take a largely undeveloped area and convert it into a

"downtown?" One answer is that you get a benefactor. And that is essentially what happened in Novi in the form of the Trammell Crow Company, the Dallas-based company which is the largest developer of commercial real estate in the United States.

"Benefactor" is, of course, the wrong word. Nobody harbors any illusions that the motives of the Trammell Crow Company are anything other than profit-oriented. At the same time however, the Trammell CrowCompany's extensive financial resources have made possible many things which would not have been possible with a

Sylvan Learning Center Guarantees educational skills can be improved

Supplemental education has been a mainstay for the Japanese educational system for years. Now supplemental education is becoming popular in America and the Sylvan Learning Centers are leading the way. Supplemental education helps students sharpen their skills and keep up in

"In America we've always had tutoring but that never really addressed the important issue; a tutor may not always be able to pinpoint what the real problem is," said Dr. Louis Porretta of Sylvan Learning Centers. Dr. Porretta is director of the Ann Arbor and Novi Sylvan Learning Centers.

He has been in the education field for 37 years and is currently professor emeritus in the College of Education at Eastern Michigan University. Dr. Porretta believes most learning problems can be traced back to lack of basic reading and math skills. "Maybe the child missed some school because of sickness or being moved

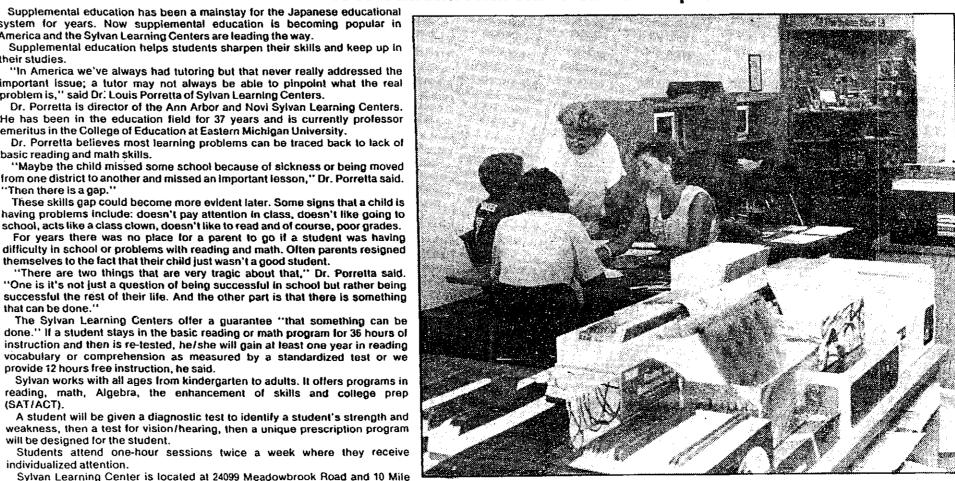

These skills gap could become more evident later. Some signs that a child is having problems include: doesn't pay attention in class, doesn't like going to school, acts like a class clown, doesn't like to read and of course, poor grades. For years there was no place for a parent to go if a student was having difficulty in school or problems with reading and math. Often parents resigned themselves to the fact that their child just wasn't a good student "There are two things that are very tragic about that," Dr. Porretta said.

"One is it's not just a question of being successful in school but rather being successful the rest of their life. And the other part is that there is something that can be done.' The Sylvan Learning Centers offer a guarantee "that something can be done." If a student stays in the basic reading or math program for 36 hours of instruction and then is re-tested, he/she will gain at least one year in reading

vocabulary or comprehension as measured by a standardized test or we provide 12 hours free instruction, he said. Sylvan works with all ages from kindergarten to adults. It offers programs in reading, math, Algebra, the enhancement of skills and college prep

A student will be given a diagnostic test to identify a student's strength and weakness, then a test for vision/hearing, then a unique prescription program will be designed for the student. Students attend one-hour sessions twice a week where they receive

individualized attention. Sylvan Learning Center is located at 24099 Meadowbrook Road and 10 Mile Road in Novi. Contact them at 334-1474. By Devon McCluskey

Bach Engineering & Associates

System reuses heat

Bach Engineering & Associates has been a part of the Northville business community since 1977. The primary thrust of the company's energy conservation program is directed toward

According to Bernard Bach, P.E., company president, the principal product is the Multi-Jet Energy System, which reduces heating costs with an average

payback of 1.3 years or less. Multi-Jet saves energy by distributing fresh outside air evenly along the ceiling of the plant to utilize the available waste heat as a heat source.

The Multi-Jet reduces the temperatures at the ceiling by mixing cool outside air with the hot air at the ceiling. By reducing the temperature at the ceiling and upper walls, the heat loss is substantially lowered. Air brought in by the system replaces exhaust air and elimi-

nates inflitration. At the same time, it improves air quality throughout the plant by gently mixing fresh air with plant air, thus eliminating stratification.

The Multi-Jet System can also be used to transfer excess heat from one part of the plant to another. Waste process heat can be recovered. The plus benefits of this process are fresh air make-up and free heating.

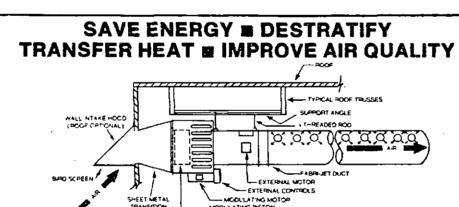

Bach Engineering & Associates' business is spread throughout the United States, with Multi-Jet Systems in operation in the Dearborn Glass Plant, Chrysler McGraw Plant, PPG Industries, Champion Spark Plug, as well as many "400" companies.

In addition to the Multi-Jet. Bach says there are various energy savings available to industry. Among the programs are ventilation systems, air quality control and Infra-red heating systems.

A 30-year resident of Northville, Bach also offers consulting engineering services through his company.

Bach Engineering & Associates is located at 113 E. Dunlap.

Advanced Dentistry Means "Total Comfort" at Novi Dental

When a patient enters a dentist's office for the first time, he may be anxious. He may be uncertain. Often, he is in pain.

At the Novi Family Dental Center, 24101 Novi Road (in the Michigan National Bank Building), a patient's anxieties are soon dispelled by the friendly welcome he or she receives there. The professional skill and competence of the staff eases any uncertainties the patient might have. And the innovative techniques and advanced skills of Dr. Allen Tuchklaper, D.D.S. soon

eliminate the pain. For seven years the Novi Family Dental Center has been serving patient's dental needs in Novi. Dr. Tuchklaper credits his friendly, professional staff for their con-

tributions to the steady growth of his den-

When young people are provided the opportunity to develop the character quality of responsibility, they will become the kind of leaders our community, state, and nation need for the future.

Novi Christian School

Are educational institutions

providing answers and giving direction for the youth of

America today? The educa-

tional establishment with it's

humanistic philosophy must

shoulder some of the respon-

sibility. Our young people face a

dilemma in life which has

resulted in drug dependency, in-

volvement in the occult, and suicide reaching epidemic proportions. What is the answer? We at Novi Christian believe in a cooperative effort "of home,

Novi Christian School places a strong emphasis on the development of character qualities which will enable young people to learn how to live as well as how to earn a living. The Accelerated Christian Education program uses a goal approach to life which encourages individual responsibility. The objective of these unique procedures is to encourage the student to set and attain achievable academic and deportment goals in his daily life. The concept of positive reinforcement is realized in field trips, special activities, and privileges which are earned.

The sports program includes boys and girls basketball, girls volleyball. boys flag football, boys cross country, and track and field. A state convention, followed by a national convention each spring, encourages competition in academics, athletics, play writing, acting, music, art, needlework, crafts, photography, poetry, and other fields. Novi Christian School has recieved National recognition in several of these areas.

For more information or an appointment call 349-3477 during regular school hours 9 a.m. to 3:30 p.m. Novi Christian School is a ministry of First Baptist Church located at 11 Mile at Taft Rd., Novi, MI 48050.

Qualified Students are welcome from All National & Ethnic Backgrounds

C. Harold Bloom Insurance Agency

takes its tradition of personal client contact into third generation

The C. Harold Bloom Agency has been going strong for 50 years and now, as the third generation joins the insurance agency, the tradition will continue.

The C. Harold Bloom Agency was born during the Great Depression. Bloom had been working at a bank in Northville, selling insurance and handling other bank duties. He eventually established his own office, in 1937, at 108 W. Main St., where it con-

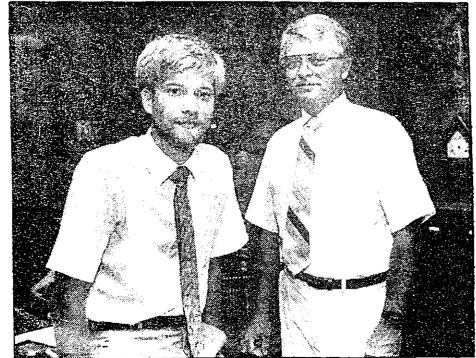

tinues to operate today. Bloom ran the business alone, catering to the insurance needs of Northville residents and businesses for over 20 years. Then, in 1959, Bloom's son-in-law, Richard Lyon, joined the agency.

Lyon is a graduate of Northville High School, as well as Michigan State University. He has been an active part of the Northville community, currently serving as a nber of the board of directors of the Northville Chamber of Commerce and as a past

president of the board. Lyon also has served on the Northville Board of Education and City of Northville Board of Review.

As the second generation at the Bloom Agency, Lyon has watched the Northville community grow and with it, the agency. "We still emphasize personal service," Lyon said. Clients are given Lyon's home phone number and know if they have a question or problem, they can always reach

Dan's Auto Repair

Reputation relies on personal attention and competitive prices

Manning the front desk at Dan's Auto Repair are (from left) Nannette and Dan

Douglas and Mike Maguire 20 Business & Industry August 26727' 1987

Before Dan Douglas, owner of Dan's Auto Repair, was eligible to have his own driver's license, he had rebuilt two cars and the engine in his father's automobile.

His high school, the original Novi High on Taft Road, did not offer auto shop classes, so he learned by doing.

Douglas worked as a service station mechanic while still in high school. He worked rebuilding diesel engines for one of the area's largest construction firms and in the machine shop of a local auto parts dealer. After years of working as an auto mechanic for others, Douglas was ready to open his own shop.

Although Dan's Auto Repair, at 43151 Grand River, Novi, is located on the same site as a previous repair facility, there is no connection between the two. Douglas's business has been built on hard work and his own reputation for reliable service, personal attention and competitive prices.

Dan's Auto Repair is a full-service shop. Whether a customer needs an auto emission test, a seasonal check-up, front-end alignment or a complete engine rebuilding, Dan's Auto Repair can provide any service

"We can even handle the computer systems that most mechanics won't touch,'

he said. Eight certified mechanics are available to diagnosis and solve performance problems on foreign, as well as

"We are competitive with the chain operations, the muffler and brake shops," Douglas said, "But we pride ourselves on our personal service.

Douglas often provides shuttle service to a customer's home or area business. He recognizes that each customer's time is a

"Our job," Douglas said, "is to make the customer happy. We do that by identifying the problem, then solving it." He knows that satisfied customers not only return, they refer their friends to Dan

Dan's Auto Repair has developed a loyal customer base. Dan Douglas credits the honesty, pride of workmanship and customer service provided everyday by assistant manager Mike Maguire and the crew of mechanics in the shop and Dan's wife, Nannette, and Wendy in the office.

Whatever your auto repair needs, call Dan's Auto Repair, 348-1230, during business hours 7:30 a.m.-6 p.m., Monday-Friday and 7:30 a.m.-1 p.m. on Saturday.

Continued from 12

spillover from the City of Northville. "There has been some moving back and forth, particularly with businesses already located in the city, just crossing Northville Road and extending their operation into the township, said Walters, citing the Belanger

operation as an example of spillover. "He has one operation in the city, then needed additional room. We couldn't provide it, but there was space in the township. Rather than lose the industry altogether, we made the cooperative effort and it has work-

ed out very well. Novi's Wahl said there have been some rather major changes in the way that city reacts to industrial residents since the recession.

"My predecessor would attend trade shows, beating the drum to have people locate here. I not only don't have the time, since I'm working on site plans and proposals, but it isn't necessary. We don't have to sell Novi as a good place for industry to locate. People are finding out on their own."

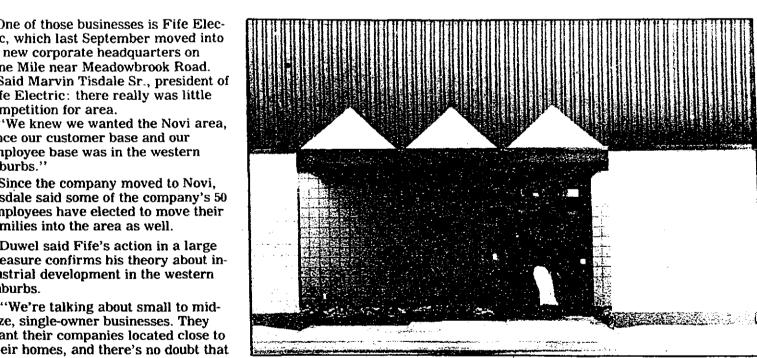

One of those businesses is Fife Electric, which last September moved into its new corporate headquarters on Nine Mile near Meadowbrook Road. Said Marvin Tisdale Sr., president of Fife Electric: there really was little competition for area.

"We knew we wanted the Novi area, since our customer base and our employee base was in the western

Since the company moved to Novi, Tisdale said some of the company's 50 employees have elected to move their families into the area as well.

Duwel said Fife's action in a large measure confirms his theory about industrial development in the western

size, single-owner businesses. They want their companies located close to their homes, and there's no doubt that the residential climate here is very good," he said. "If you provide good schools and easy access to the freeways and railroads, you're going to attract business, too.

Fife Electric moved its corporate headquarters to Novi in September, and found its employees moving their families into the area, too. (Photo by Chris Boyd)

Evans Mechanical Contractors

Offers computerized building climate control

Imagine having a computerized system that could precisely control the climate inside your building by adapting to changing outdoor conditions and even changes in efficiency of your mechanical equipment. Such a system is installed by a local Novi company

Novar of Michigan The Novar Logic One system is a building automation system. Intelligent computer modules are installed and wired directly to building equipment, such as heating, ventilating, air conditioning, pumps, lighting - virtually any HVAC or process equipment. What are the advantages of installing such a system?

The building climate is much more comfortable. Equipment runs only when it should. This provides the business with substantial energy savings. The building is constantly being monitored by the system so if there is a problem, such as temperatures dropping too low in the winter, an alarm will be reported.

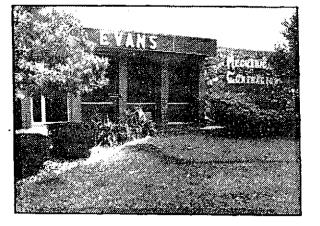

The system also can be accessed remotely over a standard phone line

An owner can actually call the system from a home phone to check critical areas, such as computer room or freezers. The Novar system responds to inquiries or commands in a clear, simulated human voice. All this adds up to considerable peace of mind for the building owner or manager. Evans Mechanical, a 35-year-old Novi firm, installs and

services Novar. Carl Evans, president of Evans Mechanical and pastpresident of the Novi Chamber of Commerce, has been a part of the Novi community for nearly 20 years. Evans selected the Novar Control system because of his intimate knowledge of the energy management

system market and Novar's unparalleled capabilities and

advanced design. Novar Controls has worked extensively with NASA, writing the software which will focus the high energy

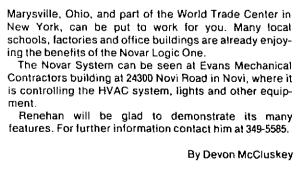

beam from the solar collection satellite to a receiving technology and applied it to its building control system.

The most popular aspect of the system is its simplici-"You don't have to have a manual by your side to control and monitor your building. No knowledge of computers is necessary because all commands are in English," says Michael Renehan, project manager.

"Building personnel can USE their system." The simplicity of the Novar system, the peace of mind it offers and the 20-30 percent energy savings help make this automated control system highly attractive to businesses and institutions.

The Novar Logic One system is currently in use in schools, office buildings and factories around the country. See how the power of the Novar system, which controls such facilities as the Honda of America plant in

International Business Centers

Offers a new concept in business office efficiency

The term is "shared office services" and it is the latest in business office efficiency. "Shared office services" refers to the ability to lease not only office space (as small as 150 square feet), but office equipment and the staff to run the equipment. All this is one large business complex. International Business Centers (IBC) is in

the forefront of the shared service office concept and has brought this concept into the expanding business community of Novi. IBC opened its Novi office June 1, thus establishing itself in the growing Novi market. IBC also has offices in Ann Arbor and Farmington Hills.

Gary Cobb, founder and president of IBC, feels Novi has a bright economic future. "Novi is the hub of growth on the west side," Cobb said. Because of this great growth, Cobb saw the need for small businesses to have all

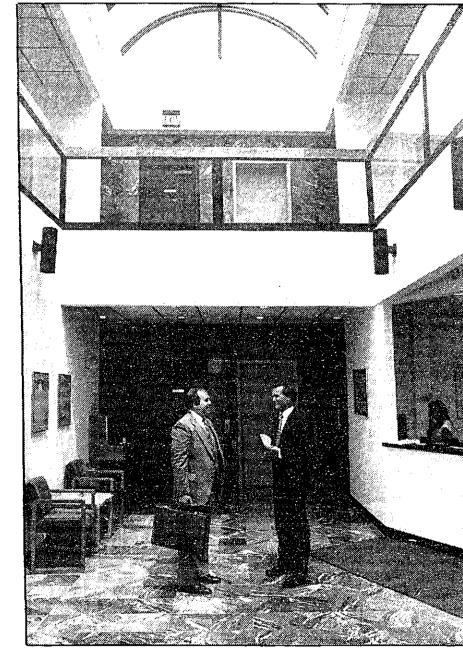

the technological equipment and prestige

of large companies but at a far more

realistic price. Cobb also saw the need for large-firm satellite offices and distribution warehousing in Novi. "Novi is the first time we have offered the shared warehouses," Cobb said. Now firms with small secretarial staffs and both office

and warehouse needs can tap into IBC's services to reduce or eliminate their own administrative personnel. The IBC offers office/warehousing with private entrance, individual office space,

and warehouses that offer 1,400-2,700-3,600 There are 13 office/warehouses, Tenants may participate in the many shared services that are offered. For example, they have the option to tie into phone services, secretarial

staff, or hire IBC warehouse staff for help loading and unloading.

The IBC office building offers the elegance of many large office complexes. The marble-floored atrium entrance leads to the fully-staffed reception desk. There are 42 executive offices offered in the two-story

Included in office rental are personalized telephone answering, the use of a fully equipped conference room and meeting room, as well as individualized mailboxes. IBC also offers all tenants other office services on a pay-only-as-used basis. These include: word processing, personal computer services, secretarial support, photocopier, out-going mailhandling, Telex, Facsimile,

courier services, and lease of office fur-"We offer the ability for an instant office. In two or three days you can be in business without buying furniture, telephone equipment, computers or office staff," Cobb said. IBC can reduce office costs by 50 percent

and can eliminate start-up costs. Obviously, shared services is a concept that has found its time. In the 60 days that the IBC has been open in Novi, it has already leased to 14 tenants.

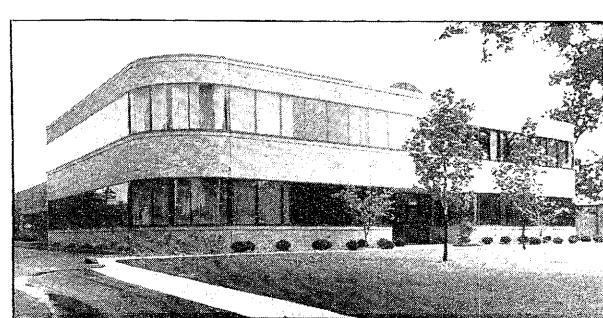

IBC also is an exclusive provider of satellite seminars. Programming examples include legal and management seminars. IBC also offers a satellite video conference room with seating for 75 people International Business Centers is located

at 43000 Nine Mile Road. Developed and built by Dial Construction Company of Livonia, Dial has recently relocated their headquarters to IBC. For more information, contact Cobb at 344-9500.

Office equipment and a secretarial staff are available at International Business Centers

A two-story complex houses 42 executive offices fronting 13 office/warehouse units

Business is a different for television or radio. good in area the Milford area merchants and government officials reflects an unflagging admiration for this picas merchants spruce up

By Stephanie Frania

But unequivocally, the consensus of turesque community.

"The overall business climate has become very good. Milford businesses are updated, offering a lot and they even look nice," said Milford Area Chamber of Commerce secretary Phyllis Motley. "It's a nice place to

With the recent streetscaping in downtown Milford, sponsored by the Downtown Development Authority, the community has been spruced up while the morale of business owners has been boosted.

"All you have to do is open your eyes and walk up and down Main Street," said Roy Danley, Milford Village Council President. "You will see a healthy and thriving business

Many individual merchants have been busy renovating and refurbishing the buildings they occupy.

"It's sort of contagious. Somebody makes an improvement and other merchants follow suit," Danley said. "Of course you always have a few foot draggers whose storefronts are deplorable."

Apparently, not every Milford business owner has caught the fever of taking pride in outward appearance.

"These businesspeople need to stand back across the street and take a long hard look at the image their projecting," Danley said. "The ones who are doing well and flourishing are the ones who have been showing improvements."

Although the Milford downtown businesses are offering more and more, he said that the village needs new retail.

"We need to look for more variety and not overburden ourselves with specialty stores," Danley said.

Not all of the successful businesses are in the Milford downtown area, however. Robert Foley, Milford Township Supervisor said that some businesses are beginning to branch out farther and farther away from the city because of more reasonable land

"As long as interest rates stay reasonable, there will be continued growth outside of the village," he said.

Several business owners also are seeing a great deal of potential in the Highland area.

'There's a lot of space to open up into," said Mike Kowal, President of the Highland Business Association and owner of Stan The Pants Man clothing

"Businesses have even moved out here from Milford and because of the anticipation land prices are starting to go up along Milford Road.'

As growth and improvements in the Milford area continue, thoughts of the expansion and growth in the Novi area

"I hope that type of development es not ripple out to Milford." Danley said. "We have something unique and I would fight to save it."

Being located a fair distance from the I-96 expressway is an advantage, according to Danley. "We also have the advantage of the metroparks buffering us from the intense saturation you see in other communities."

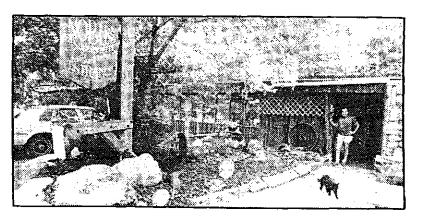

Although it sounds like everything is picture perfect in and around the Village of Milford, the community has

its share of problems.

"I think there needs to be an improvement in the way that the village government and the area businesses work together," explained Trudy McMartin of McMartin's Jewelry in Milford. "It's really important for everyone to understand each other and to work toward the same type of

Despite the building improvements made in the downtown district, Danley believes that the businesses on the south side of town need to follow suit.

"The south side of town is the main entrance to our community," he said. "We need to put our best foot forward to show a thriving community with the stamina and growth that Milford is so proud to have."

Noble's 8 Mile Landscaping Supply

A geologist would be in heaven at Noble's 8 Mile Landscaping Supply where rocks of all types and sizes can be found in massive piles across several acres of yard.

Noble's, which has been in the landscaping supply business for over 30 years, is located just west of Middlbelt Road on 8 Mile and stocks an eye opening variety of rock and lumber for the landscaping amateur or pro. The business also carries a wide assortment of other landscaping musts, such as flagstones, statues, top soil, gravel, fresh sod, cements, bricks and wood chips. The list is endless.

"We want people to be aware of our variety. We have materials from all over the country to fit all the landscaping needs a person might have," said Ray Noble, 32, owner of the business along with his brothers, Tom and Bruce. "We carry a lot of standard landscaping materials plus some unusual items.

"A lot of people don't consider the variety of materials that is available to them if they want to overhaul their backyard for example," Noble continued.

Rocks are probably the biggest inventory item at the Noble's yard. They come in all shapes and sizes and for a wide variety of

The stone available includes ground covers such as alabaster, brick crush and dolomite from Michigan, Inca gold and salmon crush from Missouri, rainbow mix from Maryland, white marbles from Vermont, red and black crater from New Mexico and west coast crush from California. Prices for ground covers are in bulk rates and range from \$2.99 to \$5.29 per 75 lb. bag.

Noble's is open seven days. The hours are from 8 a.m.-7 p.m. Monday through Friday and on Saturday and from 10 a.m.-4 p.m. on Sundays, weather permitting. Noble suggests landscapers give a call before coming

'That also helps us find out what a customer might want so we can be sure to have it," Noble said.
