CAKLAND COUNTY ROAD COMMISSION

R-OCDOC TE 1 .O3 1971

Paul W. McGovern, Chairman

Frazer W. Staman, Vice Chairman

Fred L. Harris, Commissioner

To The Honorable Board of Commissioners of the County of Oakland, Michigan

Gentlemen:

Your Board of County Road Commissioners, in compliance with the statutes thereto, takes pleasure in submitting for your consideration and approval our Annual Report for the year ending December 31, 1971.

The 1971 Annual Report briefly reviews a random selection of our more important programs; the programs chosen do not provide an inward look at the Road Commission's various departments — which were featured last year — but focus instead, on extraneous activity that affects the county wide road system.

We hope that the Oakland County Board of Commissioners and all others who may read our report will become more fully aware of the function and importance of the Oakland County Road Commission.

Respectfully submitted, April, 1972

BOARD OF COUNTY ROAD COMMISSIONERS OF THE COUNTY OF OAKLAND, MICHIGAN

Paul W. McGovern, Chairman

Saul WM Lovern

Frazer W. Staman, Vice Chairman

Fred h. Harris

Fred L. Harris, Commissioner

ROAD COMMISSION PERSONNEL

ADMINISTRATIVE STAFF

Paul Van Roekel, County Highway Engineer R. G. Worland, Secretary-Clerk of the Board Bernard D. Speace, Accounting Department Supervisor

Willard L. McRae, Director of Personnel Leroy W. McEntee, Assistant Corp. Counsel Edward A. Besemer, Attorney Audrey G. Ellixson, Purchasing Director

ENGINEERING

William J. Fognini, Director of Engineering
Frank C. Beach, Planning Engineer
Harold J. Rathfoot, Jr., Plat Engineer
David B. Kahn, Right of Way and
Contracts Engineer
Dennis A. Grylicki, Design Engineer
Jerome L. Kelly, Jr., Construction Engineer
James R. Stevens, Subdivision Street
Improvement Engineer

TRAFFIC

Richard J. Folkers, Director of Traffic Control Robert W. Osgood, Traffic Engineer Lester I. Akey, Electrical Services Engineer Floyd E. Harp, Superintendent of Electrical Division

Robert C. Shultz, Superintendent of Traffic Services

MAINTENANCE

David W. Hasse, Director of Highway Maintenance James H. Bradley, Maintenance Operations Engineer

Allen R. Buchanan, Staff Engineer Paul W. Pepple, Area Maintenance Operations

Supervisor (Milford, Davisburg, Orion)
Cecil R. Bracken, Area Maintenance Operations
Supervisor (Pontiac, Southfield)

Gail Bracken, Jr., Superintendent of Equipment Repair

Zane J. Ivory, Superintendent of Forestry Lionel R. Cahoon, Superintendent of Milford District

George E. Keyser, Jr., Superintendent of Davisburg District

Robert V. Shelton, Superintendent of Orion District

Joseph V. LaBarge, Superintendent of Southfield District

William C. Kleino, Superintendent of Pontiac District

PERMITS AND SPECIAL USES

William R. Mercer, Director of Permits & Special Uses Mikel P. Long, Permit Engineer Peter Waisanen, Weighmaster

Cover

Silhouetted against a bright orange background, the Road Commission's red white and blue emblem traces its basic scheme to our Nation's Flag. As our Flag is a symbol of a proud and progressive nation, so is the Road Commission's emblem symbolic of our pride and progress in providing good roads.

GOOD ROADS

Oakland County ranks foremost among those counties that have a diversity of road systems and road needs. Subdivision streets, rural gravel roads, urban boulevards, and multi-lane avenues, combined, form the 2500 mile labyrinth of county roads. To provide and maintain such a vast road system, the largest in Michigan, the Oakland County Road Commission hosts a diversity of programs designed to meet present and future needs.

One of the Road Commission's most important 1971 programs was designed to increase the county's share of state returned revenue. The Road Commission cannot provide a better road system without more money. The reasons are twofold: First, Oakland County's population is growing at a faster rate than any other county in the state and rapid growth insures a corresponding increase in auto usage. Second, the existing state revenue return formula, if retained, further reduces Oakland County's ability to meet road needs, simply because it perpetuates the existing inequity of needs out-pacing revenue - especially true in urban The existing formula is structured so that for every dollar the Oakland County resident puts into the gas and weight tax fund only \$.40 is returned for expenditure on all roads in the county, including those under city jurisdiction. The percentage of funds returned to Oakland County is the lowest in Michigan. Since Oakland County has the largest road system and the fastest growing population, the lowest percentage of monies returned is further indication that Oakland County will be unable to meet some of its road needs.

Insufficient finances that result from the current gas and weight tax return formula can be traced back more than twenty years, to when Michigan — and therefore the State Legislature — was rural oriented. In 1951, the Legislature adopted a formula based on 1951 road mileage and population. The formula worked reasonably well — back in 1951; however, twenty years of rapid urban growth has shifted the state from a rural oriented to an urban industrial oriented state, but the twenty year old formula is still in effect.

To increase Oakland County's revenue, the formula must be modernized. In cooperation with the Oakland County Board of Commissioners, the Road Commission has proposed a formula change that is now before the State Legislature. The change would increase the gasoline tax; the urban counties would receive most of the additional funds, while the rural county's receipts would generally remain unchanged.

The Road Commission is the most active Michigan participant in the Federally sponsored "TOPICS" program, a program designed to improve capacity and safety of urban area roadways. "TOPICS" provides money on a matching basis to those eligible participating communities who wish to do something about their traffic problems. The program is well into its third year in Oakland County, and so far, the joint efforts of the Road Commission and the participating cities have yielded over five million dollars worth of "TOPICS" improved intersections and road segments.

A good example of a recently completed "TOPICS" project is Greenfield Road between Nine Mile and Eleven Mile Roads. At a cost of three quarters of a million dollars, this section was widened to seven lanes and the traffic controls modernized; the capacity of the roadway is now nearly double that prior to the improvement.

Federal involvement in funding programs designed specifically for urban areas reflects federal recognition that urban area road needs have outpaced existing road funds. The recently completed Michigan Highway Needs study confirmed this conclusion by showing the highest percentage of road needs to be in Michigan's urban areas; the study further concluded that Oakland County's road needs were the "highest in the state."

Related to federal interest in urban area road needs is federal concern over the current question of whether or not wider buses should be allowed to operate on portions of the Interstate System. Recently testifying on the question before a U. S. Senate Subcommittee on roads, was Paul Van Roekel, Oakland County's Highway Engineer and President of the National Association of County Engineers; Van Roekel advised Senator Birch Bayh, Subcommittee Chairman, that to allow wider buses "would

A colorful, and at the same time, a very important program initiated in 1971 is the adoption of some new traffic controls; late in the year the Road Commission began to install new types of signs and pavement markings that trace much of their origin to Europe. The signs transcend language barriers by utilizing pictures and symbols to convey meanings. Authorized through the Federal Highway Administration, the new signs are simplified, and are uniform in size, shape and color. Uniformity means that the same signs to be seen on Oakland County roads will also appear throughout the United States, Europe and South America.

Whenever an existing traffic sign must be replaced, or a sign installed in a new location, it will be done by using a new international style sign. The system-wide change is scheduled for a 1974 completion. The "new look" in pavement markings, already employed on the newly constructed Greenfield Road project, will be completed, county wide, by fall of 1972.

Engaged in many continuous programs designed to upgrade Oakland County roads, the Road Commission feels that one of the most important and successful programs is street improvement at the neighborhood level. Over the years the Road Commission has inherited many older subdivision streets that were inadequately built, and are now in poor condition. To improve these streets, the Road Commission provides a program that includes engineering services, financing, and contract reconstruction; the adjacent property owners pay for most of the rebuilding costs, and can spread the payments over a ten year period.

A good example of a 1971 Street Improvement project is Indianwood Hills Subdivision in Orion Township. Built more than twenty years ago when governmental agencies had little control over standards of design and construction, the roads in Indianwood Hills exhibited every problem

green indicates movements permitted, or direction Black and white designate regulation, while orange is used on conwhile indicates prohibition Brown is used for recreation and scenic guidance Blue is used for motorist service guidance, vellow means general warning Red their color signs are significant by warning signs the symbols anc maintenance

thic

tc

In addition guidance struction

Inadequate drainage, poor base, substandard surface, and severe grade and alignment problems accurately describe the conditions.

Through the Road Commission's Special Assessment program, the streets were reconstructed with the installation of drainage structures, improvements to the road base, slight re-alignment, and the placement of a five inch thick bituminous pavement. The residents now have a durable, easy to maintain pavement. That the program is successful is evidenced by the many people not only in Indianwood Hills who have communicated their satisfaction to the Road Commission, but in many other subdivisions, as well.

Good roads play a vital role in Oakland County's livelihood. Realizing that good maintenance is a requisite to good roads, the Road Commission has emphasized maintenance improvement by being the first County in the United States to utilize the service of a private consultant in that field. The consultant, Roy Jorgenson and Associates, of Gaithersburg, Maryland, completed an 18 month study in 1971; put into effect this year, the consultant's recommendations include improved work scheduling, budgeting, priorities, more emphasis on permanent type repairs, and advance winter storm preparation through the use of a Chicago based weather consultant.

The Road Commission feels that 1971 has been a particularly successful year. Although the major funding issue is yet to be resolved, the Road Commission's other programs have been particularly beneficial to the citizens of Oakland County. The vigorous participation in Federal Aid programs, the activity in new road construction, the implementation of new traffic controls, and the maintenance efficiency improvement program are all important measures in providing better Oakland County roads.

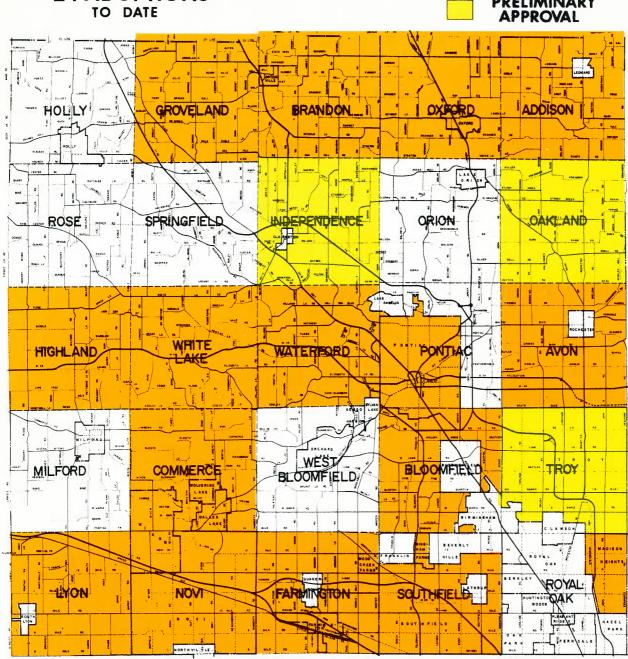

MASTER RIGHT-OF-WAY PROGRAM

24 ADOPTIONS

ADOPTIONS

PRELIMINARY

The Master Right-of-Way Program has been a most successful Road Commission undertaking. The Program, designed to establish and set aside the future right of way width and location of all major thoroughfares in Oakland County, coordinates the plans of the Michigan Department of State Highways, the Inter-County Highway Commission, the Oakland County Road Commission, and local units of government. Thus far, 24 local agencies have adopted the Master Right-of-Way Program. These agencies comprise approximately 55% of the total land area and more than 50% of the total County population. In addition, nearly 65% of the total road mileage is now coordinated by, and under the jurisdiction of those agencies who have adopted the Program.

1971 PRIMARY ROAD CONSTRUCTION (FEDERAL AID) The following projects were substantially completed during 1971. Base Cost Participation: approximately 50% Oakland County Road Commission, 50% Federal Government; City Participation as noted.

| Project Number | Road Improved | Municipality | Length Miles | Termini | Type of Construction | Participation | Estimated Total Cost |
|-------------------|--------------------------------------------|------------------------------------------------|-----------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------|-------------------------|
| PRT-697 | Lahser Rd. and Fourteen Mile Rd. | Bloomfield Twp. Village of Beverly Hills | | Intersection | 12' wide, 8" thick asphalt north, south, east and west bound right turn lanes; concrete curb and gutter | | \$ 35,000 |
| FAS-739 | Seymour Lake Rd. | Brandon Twp. | 2.3 | Sashabaw Rd. to Baldwin Rd. | 22' wide, 2-1/2" thick asphalt pavement (2 lanes) | | 495,000 |
| PRT-786 | Elizabeth Lake Rd. and Cass Lake Rd. | Waterford Twp. | | Intersection | 11' wide, 8''—10" thick asphalt north, south and west bound right turn lanes; concrete curb and gutter | | 85,000 |
| PRT-790 | Quarton Rd. East of Telegraph Rd. | Bloomfield Twp. | | Intersection | 14' wide, 8" thick asphalt north and west bound right turn lanes; concrete curb and gutter | | 20,000 |
| PRT-791 | Walton Blvd. and Clintonville Rd. | Waterford Twp. | | Intersection | 60' wide, 9" thick concrete pavement; 8" thick asphalt tapers | | 175,000 |
| CWT-799 | Fourteen Mile Rd. | City of Troy City of Madison Heights | 0.9 | I-75 to East of John R Rd. | Additional 2 lanes, 24' wide, 9" thick concrete pavement; major median changes (7 lanes) | City of Troy City of Madison Heights | 750,000 |
| CWT-801 | John R Rd. and Maple Rd. | City of Troy | | Intersection | 60' wide, 10" thick asphalt pavement; concrete curb and gutter | City of Troy | 350,000 |
| CWT-806 | Maple Rd. and Rochester Rd. | City of Troy | | Intersection | 60' wide, 9" thick concrete pavement | City of Troy | 375,000 |
| PRT-807 | Maple Rd. and Lahser Rd. | Bloomfield Twp. | | Intersection | 13' wide, 9" thick concrete east and west bound right turn lanes; concrete curb and gutter | | 80,000 |
| PRT-809 | Middlebelt Rd. at Northwestern Hwy. | Farmington Twp. | | Intersection | 12' wide, 10" thick asphalt west and south bound right turn lanes; concrete curb and gutter | | 40,000 |
| CWT-814 | Twelve Mile Rd. and Lahser Rd. | City of Southfield | | Intersection | 60' wide, 9" thick concrete pavement | City of Southfield | 375,000 |
| PRT-830 | Greenfield Rd. | City of Oak Park City of Southfield | 2.2 | Nine Mile Rd. to Eleven Mile Rd. | Additional 3 lanes, 37' wide, 9" thick concrete pavement; concrete curb and gutter (7 lanes) | City of Oak Park City of Southfield | 730,000 |
| CWT-845 | Walton Blvd. | City of Pontiac Pontiac Twp. | 0.4 | West of Perry St. to Opdyke Rd. | 60' wide, 9" thick concrete pavement; 8" thick asphalt tapers (5 lanes) | City of Pontiac | 250,000 |

1971 PRIMARY ROAD CONSTRUCTION (NON-FEDERAL AID)

The following projects were substantially completed during 1971. Base Cost Participation: 100% Oakland County Road Commission; City Participation as noted.

| Project Number | Road Improved | Municipality | Length Miles | Termini | Type of Construction | Participation | Estimated Total Cost |
|-------------------|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|-----------------|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-------------------------|
| PR-787 | Orchard Lake Rd. | West Bloomfield Twp. | 0.4 | Will-O-Way north to Hardwood Dr. | 60' wide, 9'' thick concrete pavement (5 lanes) | | \$250,000 |
| CW-812 | Orchard Lake Rd. and West Shiawassee Rd. | City of Farmington | | Intersection | 11' wide, 10" thick asphalt north bound left turn lane; concrete curb and gutter | City of Farmington | 35,000 |
| CW-815 | Twelve Mile Rd. | City of Berkley | 0.5 | Greenfield Rd. east to Gardner St. | 44' wide, 9'' thick concrete pavement (4 lanes) | City of Berkley | 300,000 |
| PR-816 | Union Lake Rd. and Willow Rd. | Commerce Twp. | | Intersection | 12' wide, 8" thick asphalt south bound passing lane; concrete curb and gutter; 10' wide, 8" thick west bound right turn lane; con- crete curb and gutter | | 20,000 |
| PR-839 | Fourteen Mile Rd. and Orchard Lake Rd. | Farmington Twp. West Bloomfield Twp. | | Intersection | 11' wide, 8" thick asphalt north bound, south bound and west bound right turn lanes; asphalt curbs | | 20,000 |
| SP-842 | Pontiac Trail Bridge | Lyon Twp. | | North of Eight Mile Rd. | Structure replaced with culvert | | 20,000 |
| PLS-850A | Several Roads | Holly, Rose, Lyon, Springfield, White Lake, Commerce, Novi Twps. | | Various Locations | Thin Asphalt overlays | | 115,000 |
| PLS-850B | Several Roads | Brandon, Waterford, West Bloomfield, Oxford, Orion, Bloomfield, Southfield, Avon, Troy and Royal Oak Twps. | | Various Locations | Thin Asphalt overlays | | 345,000 |
| PR-853 | Quarton Rd. and Big Beaver Road | Bloomfield Twp. | 3.6 | Gilbert Lake Road to Adams Rd. | 22' wide, variable thickness (1-1/2"-8") asphalt pavement (2 lanes) | | 175,000 |
| SP-855 | White Lake Rd. Bridge | White Lake Twp. | | 0.5 mile west of Teggerdine Rd. | Structure replaced with two culverts | | 30,000 |
| WO-8291 | Thirteen Mile Rd. | Village of Franklin Village of Bingham Farms | | East and West of Telegraph Rd. | 60' wide, variable thickness (1-1/2"-8") asphalt pavement concrete curb and gutter (5 lanes) | t; | 35,000 |

1971 LOCAL ROAD CONSTRUCTION

The following projects were substantially completed during 1971. Base Cost Participation: Oakland County Road Commission 50% and Township 50%; City Participation as noted.

| Project Number | Road Improved | Municipality | Length Miles | Termini | Type of Construction | Participation | Estimated Total Cos |
|-------------------|----------------------------------------------------------------------------------------------------------------|------------------------------------------------|-----------------|--------------------------------------------------|-----------------------------------------------------------------------------------|--------------------------------|---------------------|
| ГМ-773 | Harvey Lake Rd. | Highland Twp. | 3.0 | M-59 to White Lake Rd. | 22' wide, 2-1/2" thick asphalt pavement (2 lanes) | | \$500,000 |
| TM-803 | Lone Pine Rd. | West Bloomfield Twp. | 0.6 | Orchard Lake Rd. to Fairway Ridge | 22' wide, 8" thick asphalt pavement (2 lanes) | | 120,000 |
| ГМ-821 | Fish Lake Rd. | Holly Twp. | 0.5 | Tinsman Rd. to Elliott Rd. | 22' wide, 2-1/2" thick asphalt pavement (2 lanes) | | 95,000 |
| TM-825B | Oxbow Lake Rd. | White Lake Twp. | 0.3 | Cedar Island Rd. to DeGrand St. | 22' wide, 2-1/2" thick asphalt pavement (2 lanes) | | 15,000 |
| TM-826 | Lahser Rd. | Bloomfield Twp. City of Bloomfield Hills | 0.5 | Square Lake Rd. to Hickory Grove Rd. | 27' wide, 8" thick asphalt pavement with concrete curb and gutter (2 lanes) | City of Bloomfield Hills | 320,000 |
| TM-846 | Quarton Rd. | Bloomfield Twp. | 0.1 | West of Telegraph | 11' wide, 3" thick asphalt approach lane | | 15,000 |
