What About Defaced Auto Numbers

What is the proper procedure to follow when the motor number of an automobile has been filled off or changed by thieves?

This is one of the questions that was answered at the "school" held recently for all investigators of the department.

Michigan laws provide that where the motor has no number or where it has been defaced, the owner may apply to the department for a special Michigan motor number. When thieves have changed or altered a number, the owner, after recovering his car, may have the original numbers of the motor and chassis restored after furnishing proof that the changes were made by thieves in an effort to conceal the real identity of the vehicle.

The "school" also brought out the fact that many automobile dealers do not know that they must transfer titles in the regular way and secure junking certificates before automobiles can be scrapped.

Soil Testing Train

The Soil Testing Train which will be in Oxford on Tuesday, April 5, will have as its objective the classification of soils on the farm for their most efficient utilization, according to K. D. Bailey, County Agricultural Agent.

In periods of economic stress and low commodity values of farm produce, the farmer must have more of a commodity to meet fixed charges or he must produce for less so that the margin of profit will be greater.

Producing cheap, home-grown feeds may be the saving factor in many livestock operations; cheaper hay, cheaper pasture, cheaper protein, are all in order—cheap livestock cannot all be fed on high priced feeds. "Poor soils" usually make high-priced feeds by low yields per acre—failures of alfalfa and sweet clover and wasted labor costs.

Lime is the basis of soil management and soil management is the basis of production costs on the farm. Lime therefore holds the key to more profitable farming.

Lime is essential for alfalfa and sweet clover and has never been cheaper—manure, too, may be used when readily available and where it can be purchased in line with other forms of lime.

Soil Testing Train will give the farmers of this community an opportunity to classify their soils as to crop adaptation and thereby avoid many serious mistakes that cannot be afforded in times such as we are having.

The train is being operated over the New York Central Lines and will be at the Michigan Central Station in Oxford from 10:00 a. m. to 4:00 p. m.

Michigan State College specialists will be present to test the soil and make recommendations.

Second Year Work: Jane Shouidice, first; Elmire Hall, second.

Third Year Work: Jewel Ambern, first.

The club was 100% all finished with their work.

First Year Work: Robert Smithson, first; Keith Mortimore, second.

Second Year Work: Jack Jacober, first.

Clarence K. Phillips Has Splendid Record

Clarence K. Phillips, present supervisor of Independence Township and candidate for re-election shows a fine record of work and improvement for the past year. Actual figures tell the story of the good work he has done.

During the past year Mr. Phillips has reduced the cost of operation of the supervisor's office to the extent of over \$600, or a percentage of approximately 33 per cent as compared with the previous year.

Additional figures show that the tax roll for 1931 was \$14,000 less than it was the previous year. This also shows the fine work of the supervisor now in office. When the question of salaries came up, Phillips voted to reduce the salaries of the members of the Board from \$7 per day to \$5 per day plus mileage; this was done, and considerable saving resulted.

Mr. Phillips, as a member of the salary committee, secured a reduction of the salaries of the county officials of approximately \$110,000. He has also done some fine work on the Covert tax measure and road problems and voted to cancel the 13 county road projects, totalling 2 million dollars, which had previously been approved by the Board.

This record shows what splendid work Mr. Phillips has done and is doing.

Editorial

In last week's issue appeared an article captioned: "Confidence Expressed in Dr. Walter I. Werner", head of the Oakland County Tuberculosis Hospital, re-printed from the March 15 issue of the Business and Commerce magazine. In the re-print are statements against Dr. R. G. Tuck, a former staff member. Investigation shows these statements to be entirely too severe and unjust. Dr. Tuck has a good medical record and we feel that Business and Commerce is not in possession of complete information.

Pretty Wedding at Walled Lake

Mr. and Mrs. H. F. Buck and family went to Walled Lake on Thursday evening where they were present at the wedding of the latter's sister, Mrs. Lulu Seeley, to Titus Winslow, of Saranac, Mich. They were married at 7 o'clock at her home in a living room prettily arranged with potted flowers in one side of the room. Others who attended the wedding from here were Mr. Guy Disbrow, Mrs. Winslow's father, Mr. and Mrs. Clinton Disbrow, the former a brother, and Mrs. Eva Cornwall of Jackson. The marriage ceremony was performed by Rev. Ed of Walled Lake Methodist Church. His daughter was also one of the guests. Miss Anita Harris and Guy Disbrow stood up with the bridal couple. Mary Louise Buck was ring bearer. Following the ceremony a 3-course wedding supper was served. Mrs. Winslow lived here in Waterford for several years before she went to Walled Lake and had a house built there; her father, Mr. Disbrow, doing the carpentry work. Tuesday before the wedding Mrs. Winslow was honored with the choir giving a party in her honor and presenting her with a set of beautiful dishes. On Friday both Mr. and Mrs. Winslow were guests at a party arranged by the neighbors who gave them a lovely gift. On Saturday the Seeley family honored them, presenting an attractive clock. Sunday the Disbrow family was entertained in their honor at the home of Mr. and Mrs. Buck here at Waterford. Mr. and Mrs. Winslow and Mrs. Winslow's son, Roy Seeley, left Monday for the home of Mr. Winslow at Saranac, where he owns a farm on which they will reside. It is not far from Ionia. Mrs. Winslow has many friends and relatives there as that was her home as a girl.

World's Jewish Population

An interesting estimate of the number of Jews in the world has been made by the Jewish Chronicle. According to this account the world has roughly 15,000,000 Jews, their distribution being: Europe, 9,500,000; Asia, 600,000; Africa, 500,000; America, 4,800,000. The number in Australia and other parts of the South Seas is negligible, perhaps 25,000. In all countries the Jews make good citizens and contribute fine artists, musicians, writers, and statesmen.—Montreal Herald

Spring Lilies

Gardeners who neglected to plant lily bulbs last fall can plant some this spring, as there is a new way of storing bulbs in winter at temperatures a little above freezing that keeps them in good condition for spring planting. In the North it is best to wait until the frost is out of the ground, but in the South most species can be planted anytime during the winter. Good kinds of lilies for spring planting are the regal, the goldbanded, speciosum, umbellatum, Siberian, tiger, and many of the Elegans group.

Suggest Time Table To Boil Vegetables

Overcooking Harms Quality of Food and Makes It Harder to Digest

A time table for boiling vegetables will be of practical use to housewives in procuring the best results. The extension division of the home economics department of M. S. C. has prepared such a guide, which designates the proper amount of water needed and the time required for the vegetable to become tender.

A large amount of water is required for green beans, young and old beets, brussels sprouts, cabbage, cauliflower, fresh corn, onions, and turnips. Asparagus, parsnips, Irish and sweet potatoes require enough water to cover the vegetable, while young and old carrots, celery, and peas need enough to keep them from burning. Only what water clings to the leaves after washing is required for boiling spinach.

Over-cooking of vegetables lessens their palatability, destroys the delicate flavors and textures, destroys the vitamins, and lessens the nutritive value. Difficulty in digesting food is often the result of over-cooking, especially in the case of vegetables of the cabbage family.

The proper time for boiling the more common vegetables to tender point has been determined by the extension department as follows: asparagus tips, 5-10 minutes, ends, 15-25; green beans, 30-35; beets, young 30-35; old beets, 60-120; brussels sprouts, 8-12; cabbage, quartered or shredded, 6-9; young carrots, 15-25; old carrots, 20-30; cauliflower, 10-15; celery, cut, 15-25; fresh garden corn on cob, 3-5; fresh market corn on cob, 10-15; onions, quartered, 20-35; parsnips (quartered) 25-30; peas, shelled, 15-30; Irish potatoes, 20-30; sweet potatoes, 15-25; spinach with stems, 8-12; spinach without stems, 3-8; turnips, pared and diced, 20-30.

Grow Better Chicks

At Lowest Cost with Mermash

Nothing mysterious about it. Michigan soils and crops are very deficient in iodine.

MERMASH benefits chicks by adding Manamar to an outstanding poultry ration. Manamar is composed of kelp, an ocean plant, and fish meal, both rich in digestible iodine and other minerals essential for health and growth.

Chicks raised on Mermash simply walk away from those raised on other rations. They're healthier, grow faster, feather better. Chick losses are lower. Cost per chick is lower.

Yes, all costs are lower because Mermash is undoubtedly the lowest priced, good, chick starter-growing mash on the market.

Pen Against Pen

Mr. Allen G. Cummins of Calhoun County compared the average weight in ounces of chicks raised on Mermash 6% and on " " ration, as follows:

Age of Chicks in weeks	Mermash 16% Chick	" " Ration Chicks
2	3.40 oz.	3.12 oz.
3	6.05 oz.	5.17 oz.
4	10.15 oz.	7.02 oz.

Wedding Custom Vetoed

Wedding-eve celebrations have been prohibited at Camburg, in Thuringia, Germany, in their customary form. Usually friends of the couple gather outside the bride's house and celebrate the occasion by the smashing of crockery, but this has caused such havoc to motor-car tires that the authorities have been compelled to intervene since the town is liable for the damage.

Growing Cigar Boxes

More than 40,000 Spanish cedar trees, known also as cedro, were distributed for planting last fall by the Forest Service of the United States Department of Agriculture from its principal nursery in Porto Rico to coffee planters of the island.

The Spanish cedar is one of the most highly esteemed lumber trees of the West Indies. Its most important commercial use is for the manufacture of cigar boxes. Planted as a protection on the coffee trails it grows rapidly but not so large as to completely shade out the coffee plants.

Many of the large coffee-shading trees of various species were blown down by hurricanes of recent years. Old cedro trees 4 to 6 feet in diameter and 50 to 100 feet were common in Porto Rico before the virgin forest of the island were cut.

In the stomach of an eight pound "lawyer" caught by Oscar Kurzer near Sebermaing a mud turtle was found, so large that it could not be pushed back through the mouth of the fish.

Waterford

The Ladies' Auxiliary is planning an evening for April 8th at which "The Plain Folks" from the Webster are to be present and give their program which has been very successful. They feel very fortunate in being able to obtain them as they were broadcast over the radio. There will be a free will offering. So everyone is invited to attend this program and help. The place will be announced later.

Harold Jacober, student of Lansing State College, is home this week enjoying his Easter vacation.

Miss Elisabeth P. Weld Suggests

Here is an interesting suggestion from the last issue of "The Housewife" sent out by our County Demonstration Agent, Elisabeth P. Weld. "How much reading have you done? Perhaps a more important question is, do you read to your children? Here's a poem along that line.

The Reading Mother
I had a mother who read me the things
That wholesome life to the boy heart
brings—
Stories that stir with an upward touch
Oh; that each mother of boys were
such!

You may have tangible wealth untold;
Caskets of jewels and coffers of gold,
Richer than I you can never be—
I had a mother who read to me.

Strickland Gillilan.
Read biographies of great men to the growing boy. James Morgan's two books are in the dollar edition—"Abraham Lincoln, Boy and Man" and "Theodore Roosevelt, Boy and Man." For your own reading try Mazo De LaRocha's two stories of a Canadian family. They also are in the dollar edition and are called "Jalna" and "Whiteoaks of Jalna." I'm sure you'll enjoy them.

MY MOTTO:
Economy in Township and County Business, and Lower Taxes
Your Support Solicited

Outstanding Facts Concerning My Record

I reduced the cost of operating the Supervisor's office over \$600.00, approximately 33% as compared with 1930.

I voted to reduce Board members' salaries from \$7.00 per day to \$5.00 per day plus mileage, which effects a considerable saving.

As a member of the salary committee, I secured a reduction of the county officials' salaries of approximately \$110,000.

There has been some criticism of this work because the salaries of some of the higher officials were not reduced. Permit me to say in this connection that Michigan has a law which provides that it shall be unlawful to change the salary of an executive public official during the term for which he is elected. The Salaries Committee did, however, summon every County official whose salary they could not lawfully reduce, to appear before them and they were asked to voluntarily take a cut in their salaries.

I introduced the only resolution on the Board asking the Governor to call a special session of the legislature to consider the question of the Covert Tax Relief.

I voted to cancel 13 Covert road projects, totaling two million dollars, which had been approved by the previous Board.

Study These Figures

The 1931 tax roll was more than \$14,000 less than in 1930.

From 1925 to 1930 the taxes levied in Independence Township increased over 100%. The following are the levies beginning with 1925:

1925.....\$ 54,835.23	1929.....\$123,535.28
1926.....66,497.95	1930.....180,845.19
1927.....91,866.24	1931.....\$116,833.07
1928.....108,407.34	

This shows an increase of over \$76,000.00 in a period of five years. The 1931 tax roll brought a saving to the taxpayers of over \$14,000. These figures may be verified by the County records.

May I also direct your attention to the fact that on April 10, 1931, there was a deficit of over \$700.00 in the township funds after all bills were paid. On the same date in 1932, after all bills are paid, there will be a cash balance of over \$3,000.00.

I appreciate the fine cooperation I have received from every member of the Board. They have greatly aided my purpose in keeping down the expenses of the township and in having an efficient office.

To those who may be interested permit me to state that my bill for services to March 25, 1932, is \$1,372.16. This amount is the entire cost of operation of the office to the above date.

If elected, I pledge that I will do all in my power to secure lower taxes, maintain the utmost efficiency and conduct the affairs of the office in a courteous and business like manner.
