

Blue and White Flash

The Staff is now as follows:
 Editor-in-Chief—Betty Huntly.
 Assistants
 Grade reporter—Cecilia Beeterlin.
 Seventh Grade—G. Beardslee.
 Eighth Grade—Billy Parker.
 Ninth and Band—Stanley Spencer.
 10th & Chorus—Mary K. Hammond.
 11th Grade—Lucy Molter.
 12th & Girl's Sports—Betty Huntly.
 Boys' Sports—Floyd Hursfall.

Back Again

After a glorious vacation it seems good to be back to school. It sounds like everyone had a grand time during vacation.

Among the teachers, we hear that there were a few trips and numerous interesting activities. Miss Gray was married to William Dunston. Mrs. Rockwell spent the vacation at home. Mrs. Beardslee's vacation activities are not known at this time, but she is ill this week with tonsillitis. Betty Huntly has been substituting for her. Mr. and Mrs. Winn spent a few days in Detroit and Tecumseh. Miss Hyde was a guest at Walled Lake and at her home. Mr. Waters spent some time in Manistique. Miss Buchanan was here and in Detroit and Miss King was in the village and spent a little time in Lansing. Mrs. Huttenlocher stayed in the village.

Baseball

Baseball season is here and the boys began their practice on Monday evening. Tuesday evening they had their first real outdoor workout and are practicing hard for that game with Milford which will be there on Friday, April 15. That's next week and the boys are certainly after a title.

Ninth Grade

In Biology we are starting the study of plants.

In Algebra we are studying fractions.

In English we are reviewing parts of speech.

In History we are studying Books and Science in the Middle Ages.

Sophomore News

A party is being planned for this Friday night in the gymnasium.

In History we are studying about Egypt. In English we are having sentence drill work and in Industrial Geography we have been studying Canada and Mexico.

Junior News

In American Literature we have just finished studying Lanier and have just started on the works of Grady. Both men are in the Civil War period.

In American History we have just finished studying Roosevelt's administration. After vacation we began the chapter on Progressive Movements.

Senior News

English Literature: We have studied the lives and works of Charles Dickens and George Elliot.

Chemistry: We have studied the chapters on "Oxides of Carbon" and "Gaseous and Liquid Fuels".

Economics: The class is starting work on Part 4, on the chapter "Money and Banking".

And then Again

My bathroom has all the colors of the rainbow. The tub is a delicate robin-egg's blue. The walls are a vivid red with quaint splashes of orange and old gold. The door is a spotted and speckled affair in seventeen hues. The faucets are green and the shaving cabinet is purple.

It serves me right. I should have kept my eye on Junior and the home-painting outfit he got for Christmas.

Lady Jane: Have you given the goldfish fresh water, Janet?

Janet: No, mum, they ain't finished the water I give them yesterday.

"Mama, I've got a stomach ache," said Peggy, aged five.

"That's because you haven't had any lunch yet," answered Peggy's mother. "Your stomach is empty. You would feel better if you had something in it."

That afternoon the minister called, and in the course of conversation remarked that he had been suffering all day with a severe headache.

"That's because it's empty," said Peggy, brightly. "You'd feel better if you had something in it."—Children.

"A scientist says that we ought to eat food that will develop the cranium."

"Well, I suggest an appropriate menu."

"And that is?"

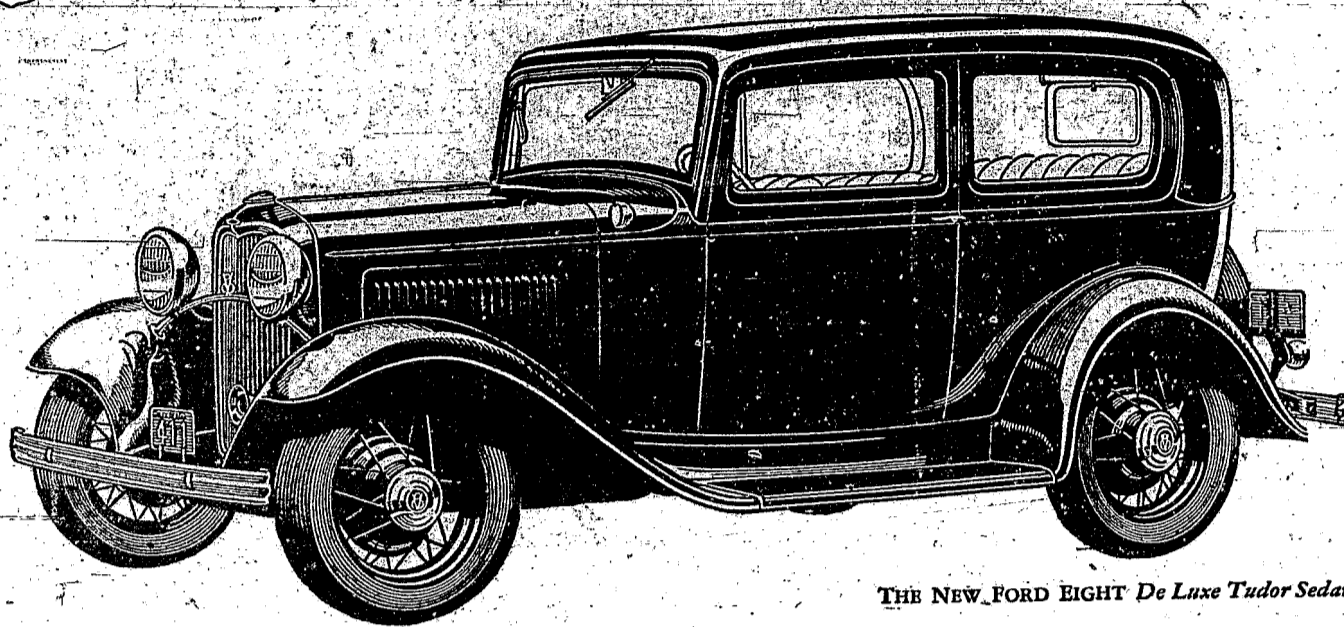

"Noodle soup, head cheese, coconut pie."

Strength of Wood

Dry wood is as much as two and one-half times as strong as the same wood in the green, or natural growing state, says the Forest Service of the United States Department of Agriculture.

The strength of the dry wood compared to green wood varies with the type of tree, the amount of moisture it contains, and similar factors. The Forest Service has studied the problem of moisture and strength in wood for the last 25 years and has worked out formulas for finding the strength of wood under different moisture conditions.

ANNOUNCING THE NEW FORD V-8 Cylinder

THE NEW FORD EIGHT De Luxe Tudor Sedan

Eight-cylinder, 90-degree V-type, 65-horse-power Engine * Vibrationless
 Roomy, Beautiful Bodies * Low Center of Gravity * Silent Second Gear
 Synchronized Silent Gear Shift * Seventy-five Miles per Hour * Comfortable
 Riding Springs * Rapid Acceleration * Low Gasoline Consumption * Reliability

New self-adjusting Houdaille double-acting hydraulic shock absorbers with thermostatic control . . . New rear spring construction . . . Automatic spark control . . . Down-draft carburetor . . . Carburetor silencer . . . Bore, 3 1/16 inches. Stroke, 3 3/4 inches . . . Piston displacement, 221 cubic inches . . . 90-degree counterbalanced crankshaft . . . Large, effective fully enclosed four-wheel brakes . . . Distinctive steel-spoke wheels with large hub caps . . . Handsome V-type radiator . . . Graceful new roof line and slanting windshield of clear polished plate safety glass . . . Single-bar bumpers, chromium plated . . . Low, drop center frame . . . Mechanically operated pump drawing fuel from fourteen-gallon gasoline tank in rear . . . Choke on instrument panel

. . . Individual inside sun visors . . . Cowl ventilation . . . Adjustable driver's seat . . . Choice of Mohair, Broadcloth or Bedford Cord upholstery in all de luxe closed types.

THE NEW FORD FOUR-CYLINDER CAR
 An improved Ford four-cylinder, 50-horse-power engine, operating with new smoothness, is available in fourteen body types at \$50 less than the corresponding V-8 prices listed below.

A GREAT NEW CAR AT AN UNUSUALLY LOW PRICE

Roadster . . . \$460	Coupe . . . \$490	De Luxe Roadster \$500	De Luxe Tudor \$550	De Luxe Fordor \$645
Phaeton . . . 495	Sport Coupe . . 535	De Luxe Phaeton 545	De Luxe Coupe 575	Victoria . . . 600
Tudor Sedan . . 500	Fordor Sedan . . 590		Cabriolet 610	Convertible Sedan 650

(F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra. Economical terms through Authorized Ford Finance Plans of Universal Credit Co.)

MICHIGAN BELL TELEPHONE CO.

"A job for me? Gee, that's great! I'll report in the morning, sure"

The man who can be reached quickly and easily by telephone usually is the first to be called back to work.

A telephone in the home is protection, too, making it possible to summon aid instantly in case of fire, sickness or accident.

Seymour Lake

While completing the wiring of the church and community house last Friday, Mr. Dunlap, the electrician, fell and was injured. He was taken to the home of Lee McIntyre until he was able to be removed to the office of Oxford doctors where his injuries proved to be bad bruises and severe shock from the fall.

The girls of the Seymour Lake School, led by Miss Helen Fiske, teacher, have organized a sewing club of six members, called "The Merry Sitcher". They plan to meet every two weeks.

The Sunday School is planning to put on an old-fashioned program on Friday, April 22. Watch for the program announcement next week.

Holstein Breeders Meet

The Oakland-Macomb County Holstein Association has planned for a free oyster supper and program of entertainment for all owners of pure-bred Holstein Cattle in the two counties. The supper will be served in the Community Room of the Citizens National Bank of Romeo at 6:30 p. m. Wednesday, April 13th. Speakers on the program to follow the supper include Professor Anthony, of the Michigan State College, and Mr. McGrath, of the Detroit Creamery. Officers of the County Associations are:

C. F. Foster, Manager of Lakefield Farms, President
 Wilbur Priddy, Manager of Abru Farms, Vice President
 Miss Sarah Jones, of Stoney Creek, Secretary and Treasurer

Community News in a friendly paper—The Holly Advertiser.

"Master Fisherman's Club Organized"

The charter chapter of a "Master Fisherman's Club" has been organized by the Mason County Chapter of the Izaak Walton League. Buttons about the size of a fish license button will be issued to all persons fishing in the vicinity of Ludington who takes a one pound brook trout, a two pound rainbow or brown trout, a three pound bass, a three pound pike-perch, a four pound pickerel, or northern pike or any sized muskellunge.

The membership buttons, to be issued by the Chamber of Commerce will bear the legend "Member of Ludington Master Fisherman's Club, 1932."

The Mason County Chapter of the Izaak Walton League also plans to offer daily service to anglers using the lakes and streams near Ludington during the coming season.

Beginning about April 15 the Club will publish daily reports on the condition of all streams and lakes within a radius of 35 miles of Ludington. The bulletins will contain information as to the height of waters, condition of the roads to the streams, the particular fly that is proving the best attraction as well as whether or not other kinds of bait are luring the fish to the creek.

Feeds for Beef Cattle

Roughages and other home-grown feeds play an important part in the economical production of fat beef cattle. Many cattlemen find that it pays to grind or roll such grains as wheat, barley, and grain sorghums which are too small and hard to be thoroughly chewed. Coarse grinding is better than fine grinding for feeding purposes, says A. T. Semple, of the United States Department of Agriculture. Grinding or chopping roughage is not advisable unless the cattle will consume more roughage and make such profitable use of it as to pay for the cost of the grinding.

Attempt Made to Destroy Noxious Fish

Conservation officers will soon begin organizing spearing parties in a renewal of the battle against noxious fish. Dogfish, one of the most destructive species ordinarily begins spawning in April and because of a higher water temperature this year the species will begin laying earlier than usual.

Thousands of noxious fish, dogfish, carp and garfish are removed from Michigan waters every year through spearing parties organized or accompanied by conservation officers. These noxious fish may be speared at

any time of the year when a regularly employed conservation officer is present.

Most of the noxious fish speared in this way are taken at night and with the aid of an artificial light.

According to the Institute for Fisheries Research of the Department of Conservation, noxious fish, in common with other species, exhibit a peculiar reaction to water temperatures as their spawning season approaches.

JOB PRINTING

Send your job printing to The News it will receive prompt attention and our prices will be fair.
