Rest Room Giving Village Trouble

There are persons in the village or that come into the village that are abusing the privilege that is offered in keeping the rest room open. It is causing much trouble with plumbing and general destruction and unless this is discontinued, the place will have to be closed, according to the council members. It is now under repair and will be in good condition, but it must be kept so. It will be closed at 9 o'clock each evening.

Village Looks Up Spring Cleaning Time

The village homemakers are not leaning—for the village itself is getthe only ones with thoughts of spring ting the "once over". The council talking over the cleaning problem and John Mann has been seeing to it that it is done correctly. After Mr. Mann has all the highways and byways cleaned, then Ted O'Roark is going to get out the fire engine and unwind the hose and wash the street down the Main way. What improvement a lot of ambition and elbow grease makes -another effort to make Clarkston a fine place in which to live.

Take Advantage of **Low Priced Wool**

The farm homemaker can take ad- terior of her home this week. vantage of the present low price of wool and replace her old, heavy cotton comforters with light wool ones made at an average cost of about 80 cents per comforter, according to Miss Oona Stautz, home management specialist.

As the medium grade of wool contains less grease than the very fine or coarser variety, it is easier to wash or scour. To wash fleece: Immerse entire fleece in clear, lukewarm soft water, 110° F. Leave only a short time or the action of the soap in the next solution will felt the wool fibers. Make a 1 per cent soap solution, using about one pound of neutral soap to either all the meetings of the cooking 12 gallons of rain water. Make luke- school at Pontiac last week, or some warm wash 110° to 122°F. Lift of them were: Mrs. L. Owen, Mrs. fleece from clear water and place in H. H. Pratt, Mrs. Harry Harrup, Mrs. solution, working carefully, but not Ernest Blimke, Mrs. Nelson Sinift, continuously for half an hour.

Next another lukewarm solution, same temperature, using one-third as fery, Mrs. A. Jacober, They reported much soap as in first solution, and that the meetings were much enjoyed about one ounce "soda ash" or sal and a lot of benefit was derived from soda, then work fleece gently in this for another half hour. If still not clean, put through another wash using less soap. Rinse in lukewarm soft water for three to five minutes, then rinse in soft water cooler than above. Dry in warm air.

Specific temperatures have been given and are important, as temperatures above 122° F, are apt to cause the wool to shrink and felt. A candy, dairy or any good mercury thermometer may be used. A washing machine should never be used because it will felt the wool and make it hard to card, as well as causing a waste of good wool. If the fleece is so large that it is necessary to divide it into two parts, wash the wool from the back first and then use the same solutions for the other wool. The solution given in the third step will need to be repeated for the second lot of wool as it will need a good, clean soap so-

Card about a handful of wool into a pad about 11 by 14 inches. About 50 such pads are necessary for a comforter, or about two and one-half pounds. When putting pads together in comforter, allow edges to lap over each other about two inches.

> In the spelling contest on last Friday our school was represented by Lyle Walker, who was our school champion. This contest was at the Drayton Plains school at 2:30. There were 12 contestants. Lyle received second place; he stood up for some time against one girl, striving to win first place, but he fell down on the "reverie". His teacher, Mrs. R. C. Lunger, accompanied him down to the contest.

Mr. and Mrs. Nelson Sinift attended meeting and banquet on Saturday which was held at Ford's Inn, which had been planned for those working for the same insurance company, and their wives.

Einar Kropp and Laurence Harrup two of our Waterford High School boys, of the graduating class of 1931, gained recognition their first semester at the Pontiac High School in their English by having their essays in the "Totem Pole", a small book published annually by the English Department Only a very small percentage of the essays are chosen, so we are very proud of our boys for the honor they have received.

At the session on Sunday of the Waterford Bible Class it will be discussed whether they will continue the class meetings of the adults during summer months. These meetings come the first and third Tuesday evenings of each month. Decision will be made and the announcement of it will be made. There was no meeting of the class this week.

The Waterford School base ball team played two games last week and were victorious in both. The game played on Thursday was with Davisburg on the Davisburg ball park. The score was 6-16 in our favor. Friday's game was played on the home dia-mond, with Waterford Center and the score was 3-16 in our favor. Russell Galbraith is coach.

Miss Nellie Stephens, the Director of the Circle, crowned the queen. As she placed the crown upon her head she gave a few words of tribute to her record. Miss Belitz attained this distinction as Queen Esther by securing the greatest number of points for the Circle.

A white cross was carried by Miss Ruth Walter. Guards were Beverly McFarland and Pearl May Prouse Miss Adele Gardner accompanied at the piano. Miss Marguerite Andrews played the Rugle Call. Delores Viering was crown bearer. Streamer bear ers were Betty Hoyt, Doris Reynolds, Mary Jane Gulick, Muriel Boynes, Betty Jean Delong and Shirley Viles.

Flower girls were Phyllis McFar-Gwendolyn Prouse, Marjorie McFarland and Ruth Belitz. Miss Helen Tindall sang a beautiful tribute to the Queen to the tune of "Ramona". The little train bearers were Mary

Cell and Betty Ash. Elizabeth made a beautiful queen and it was a pretty picture. Miss Margaret Harris was chairman.

LEAN!

"IMAGINE a stove so clean you can wipe it with a hand-kerchief ... and find the handkerchief spotless! A china dish isn't any easier to keep clean than the gleaming porcelain of my new Electrochef. Simply wiping with a damp cloth restores the original luster to the smooth, white surfaces. All corners are rounded, inside and out. There are no cracks or crevices anywhere to collect dirt.

"The polished metal reflectors on the cooking table can be lifted out for cleaning, and placed right in the dish pan, if desired. Scouring does not injure the bright chromeplate finish. The Electrochef oven may be stripped' completely, leaving only the round-cornered innershell to be washed out. Electrochef is a joy to the woman who likes to keep things clean. I'm proud of my modern, snow-white range!"

Poor Potatoes Grow. From Diseased Seed

Several Disorders of Tubers Are Controlled by Simple Treatments of Planting Stock

The selection of high grade seed potatoes and an inexpensive treatment of this seed will control several of the most important of Michigan otatoe diseases and will aid farmers n this State to produce the grade of table stock which consumers demand and for which they are willing to pay top prices, according to the farm crops department at Michigan State College

Potato scab, black scurf, and black leg can be controlled by treating seed potatoes with a solution of formaldehyde or corrosive sublimate. Fusarium wilt can be reduced to a minimum by discarding the seed piece cut from the butt end of the potato. There which show brown stains in the flesh should be discarded valess the grower is certain this discoloration is not caused by the wilt or: other. disease.

Y. M. C. A. Camp to Rout Mosquitos with New Tents

All campers dislike mosquitos Par-

ticularly Y. M. C. A. boy campers up at Loon Lake, Michigan, when they are ready for a good night's sleep after a day of full camp activities. "Of course, no camp near a lake anywhere is entirely free from mosquitos when the breeze dies down, but Trustees of the Oakland County Y. M. C. A. Boys Camp have plans to whip the mosquito from now on," said Robert D. Lynd, Director. "It took an automobile engineer to design a new type of tent with side walls which will be built at Loon Lake Y. M. C. A. Boys' Camp this summer." Mr. E. W. Seaholm, well known automobile engineer of Birmingham, and Trustee of the Camp, is responsible for the idea. Beginning this summer, boys at the Y Camp will have little concern for the humming pests if the breeze dies

A small model of the new mosquitoproof side-wall tents is on display at the Pontiac Y. M. C. A. office in the Masonic Temple Building. The model was built to scale by Frank B. Ruf, Secretary of the Pontiac Y. M. C. A. It has a small tent with canvas complete and has already made a big hit with scores of boys who have signed up for Camp.

"There is only one way to lick mosquitos, and that is to keep them out," said Mr. Lynd. "While there may be only one night in the week when the mosquito will bother us, it will be a keen satisfaction to all of us to know that they will not get to us."

Beginning June 25, through July 9,

July 9 to July 23, July 23 to August 6, August 6 to August 20, August 20 to August 30, another added convenience for boys will be provided, in that each camp period will be limited to 98 boys instead of 112 as of previous years, 98 being the happy unit.

Sheep Vat Construction To Be Demonstrated

Arrangements have been made to build a tank for dipping sheep on the farm of Bruce Lessiter, Clarkston,

May 10th. A similar tank was used by Arenac county farmers last year to dip 132 sheep in 100 minutes at a cost of one and one-fifth cents per head. The same men used an ordinary horse tank two years ago to dip sheep and the costs were four and three-fouths cents per head while the time required for dipping was nearly four times as

The tank recommended by the agricultural engineering department of M. S. C. has been built for as little as \$11.79 and as it will handle all the sheep owned by several farmers living in one community, these men can share the costs of building the tank and work together in dipping their flocks. Dipping is the only feasible method of controlling the external parasites of sheep which cut the profits of the flock unless they are eradi-

Models of Buildings and Equipment Carried; Talks Given

A truck equipped by the poultry department of Michigan State College to show some of the methods which should be used to grow healthy chickens will visit 25 counties in the State between April 25 and June 9.

Michigan flock owners see some prospects for better prices due to a decrease in eggs held in storage, smaller numbers of laying hens kept n farms, and fewer numbers of baby chicks bought this spring to be grown for layers, according to the poultry department at the College.

The College-department says, however, that profits from any flock, especially under present conditions, depend upon the quality of the birds in the laying flock and that good birds can not be placed in the laying house unless great care is exercised in raising the birds. The Better Chicks truck will carry models of all types of poultry houses and of poultry house equipment.

Some of these models show how home made equipment can be made. A watering device which is chown on the truck can be built by any poultry raiser and will save a great deal of time in watering the birds. feeders for mash or for grit and shell can also be built from plans shown. on the truck.

The truck will be at the College during the Egg and Chick Show to be held May 17, 18, 19 and 20.

Bailey Lake School

In the spelling bee held at the Bailey Lake School the winners were Irene Greenwald, school champion, Richard Wilson, sixth grade winner and Janet Stickney, fifth grade winner. Irene received an atlas and Janet and Richard a dictionary each. Irene represented the Bailey Lake School in the district contest at Clarkston, Friday.

An interesting note in the school is the new aquarium that has been installed and is being cared for by the pupils. It has attracted a great deal attention and Miss Beryl Brendel, teacher, is supervising the work. They also have a bird feeding platform which draws much interest and the pupils are having an opportunity to study the birds at close range when they come to the platform to eat.

Fifty Years Sees Marvels of Medical Progress

If a medical Rip Van Winkle, asleep ince 1882, had awakened to hear the recital of 50 years' progress in medcine and surgery, as given by distinguished members of Nu Sigma Nu at the semi-centennial celebration of the founding of this first medical fraternity at the University of Michigan He would have heard what any practitioner of five decades ago would have regarded as a fairy story, of medical marvels.

In the field of internal medicine Dr. Lewellys F. Barker, of John Hop ng University, reported a growth knowledge of the human body and e microscopic enemies that threaten as well as new methods of diagnos-
