Mr. Miller went down to see Sheriff Greenan and, while waiting to see Mr. Greenan, sat down in the ante-room. A young chap who was seated there turned to Mr. Miller and said, "Say, what are you in for?" Never having been asked that before, of course Mr. Miller was astonished, but replied that he was just a visitor and asked young Evans what he was in there for. So the chap proceeded to tell Ben Miller about the bank robbery at Clarkston and Mr. Miller said, "Clarkston—Clarkston? Let's see where is that?"—and had quite a chat with the boy, who was later released.

Friends of A. L. Moore File His Petition

A. L. MOORE

An unusual situation is presented in the candidacy of Andrew L. Moore, of Pontiac, for State Senator from the 12th Senatorial District on the Republican ticket. While Mr. Moore and his family were absent from the State on a motor tour of the White Mountains, friends circulated nominating petitions and in a day's time, over seven hundred names were secured. The petitions were then filed without Mr. Moore's knowledge or consent. On his return to Michigan, the time in which he could have declined to be a candidate had expired.

Yielding to the wide spread request he has consented to become a candidate and if nominated and elected, to serve the District.

Mr. Moore was born on a farm in the Township of West Bloomfield, Oakland County. Graduated from the Law Department of the University of Valparaiso, Indiana, and for many years has been a prominent member of the Oakland County Bar.

In 1907, he served as a member of the Michigan Constitutional Convention, and later was a member, and chairman of the Commission that drafted Pontiac's Home Rule Charter. He served one term as City Attorney of Pontiac. He is now serving his tenth year as a member of Pontiac's Board of Education and is President of the Board.

He is chairman of the National Property Owners Division of the National Association of Real Estate Boards. A member of the Taxation Committee of the National Chamber of Commerce of Washington, D. C., and a member of the Committee on School Costs of the National Educational Association.

Winners never quit; quitters never win.

Tell them to VISIT MICHIGAN

If your out-of-state relatives and friends like to picnic beside sparkling streams... wander along old Indian trails... or camp on the shores of picturesque lakes, tell them to vacation in Michigan.

The millions of dollars spent each year by Michigan's thousands of visitors add to the prosperity of the state. Let us also spend our own vacations in Michigan this year, thereby contributing still further to its prosperity.

And wherever you go, dispel worry by telephoning home and office frequently. Call friends to tell them when you will arrive. Telephone ahead for hotel accommodations. Long Distance rates are low

Candidate

HARRY J. MERRITT

Harry J. Merritt of Royal Oak, announcing his candidacy for the office of Circuit Court Commissioner at the Primary, September 18th, says:
"I desire to thank my many friends for their loyal interest in my campaign as evidenced by the signatures to my petitions.
I have conducted the office honestly and fairly regardless of color or creed and will continue to do so if re-elected.
Your vote is solicited and will be appreciated.
I am a Republican."

Have you a manufacturing process using a small amount of

HEAT?

Such jobs can often be done cheaper with electric heat because it can be confined nearly 100 per cent to its job—just as in large electric melting and heat treating furnaces. It isn't the heat you pay for but the efficiency of use that determines comparative economy. With electric heat there is no waste in heating up the surrounding atmosphere and it doesn't go "up the flue."

The cost of small electric industrial heating units is low. For example a small cartridge supplying a "spot" of heat costs only \$2. A "strip" heater which has a multitude of uses may be purchased for \$1.50. A liquid-heating unit that is adaptable to any number of jobs is priced at \$10. And these are only some of the more common devices. There are countless electric heating units designed exactly to suit your own particular needs.

It will pay you to investigate this subject. Our engineers will gladly discuss with you any heating problem you may have (no matter how small) and submit recommendations. There is no obligation—we do not sell this equipment. Simply call the nearest Detroit Edison office.

## Miss Brumfield in Nomination Race

MISS MARY BRUMFIELD

Miss Mary Brumfield, real estate and insurance woman for the past ten years in the Tribune Building, Royal Oak has qualified as a candidate for Representative for the new 17th Congressional District, in the Democratic primary September 13th.

Miss Brumfield is a native of North Carolina, and received her education in the schools of that state and Virginia College. She has real estate holdings in both Wayne and Oakland counties, and is a tax-payer.

The club and welfare activities of Miss Brumfield are well known throughout the state of Michigan and other states. She has been a member of the state board of Business and Professional Women's Clubs for the past eight years, two years as state president.

Two years a member of the State Legislative Council of Women's Clubs. Three years a member of the Business Girl's Cabinet of the Y. W. C. A., Detroit. For the past year she has served as treasurer of the Southern Oakland County Milk Fund.

Miss Brumfield for years has been active in legislation, particularly in laws affecting women and the independent merchant, and for the past two years has been much in demand as a speaker among organized groups of men and women interested in legislative affairs.

Miss Brumfield makes the following statement: "If for no other reason, my own personal business problems would give me a complete understanding that the economic situation is of paramount importance in this campaign, and it is my earnest desire that I may be elected to the legislative body now challenged with the opportunity to embody into practice and law measures of economy, and modern, scientific principles to meet the needs of the machine age, which would bring relief to the unemployed, and those harassed with public and private debt. Many of these ideas and ideals are incorporated in the Democratic platform, and I am in sympathy with this platform 100 per cent."

## Prize Money Given to Best Grain Crop

Michigan farmers who believe their grain yields are exceptionally good can find how they compare with those of other growers and also qualify for considerable prize money by entering the crop in the Ira H. Butterfield grain growing contest conducted at the Michigan State Fair.

Any farmer growing wheat, oats, or barley is eligible to compete. The awards are based on yields per acre and the quality of the grain. No field less than five acres can be entered and the yield from the whole of any field is the basis for competition.

Certificates showing the yield and the number of acres in the field must be sent to the farm crops department at Michigan State College before August 29. Peck samples of the grain should be sent to the agricultural department, State Fair, Detroit, before September 4.

Blank certificates can be obtained from county agricultural agents or from the College farm crops department. These blanks tell the persons who can act as witnesses in certifying the crop yield. Liberal prizes are offered in the contest and awards are made down to twentieth place in each of the three classes.

## Demonstrating Electricity for Farms

Specially Equipped Truck and Trailer to Visit the County August 23rd

A truck and trailer equipped to show the many uses to be made of electricity on the farm will stop at the farm of Claude Croup, 2 miles northwest of Ortonville on Tuesday, August 23rd. The trailer is equipped with an electric range, refrigerator, ironing machine, washing machine and other appliances successfully used in many farm homes. A few years ago farmers regarded electrical equipment as too expensive for farm use, but under actual operation, electricity has been found to be one of the cheapest that can be used on the farm. The truck equipment will show proper system for farm wiring, water systems, motors, feed grinders, grain elevators, poultry house equipment, correct installation of equipment and the cost of operation.

## Sink Looms As Strong Factor In State Race

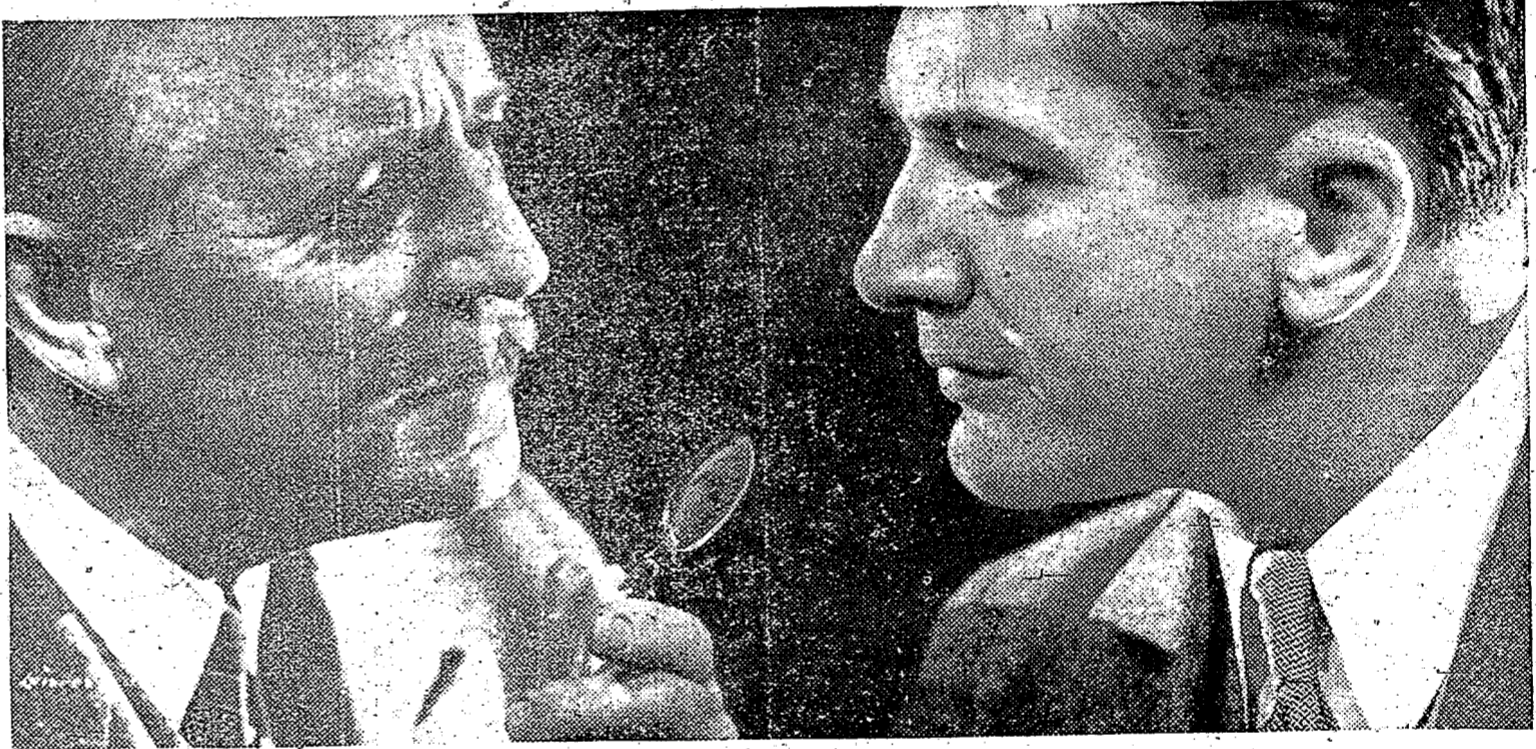

Following the withdrawal of Theodore A. Thompson, Williamston Publisher, in favor of Charles A. Sink, Mr. Sink now looms as a leading contender for the office of Lieutenant Governor of Michigan.

CHARLES A. SINK

Mr. Sink recently opened his speaking tour of the state with a large meeting at Charlotte where 5,000 citizens of Eaton County turned out to hear him. He is actively engaged in an extensive campaign that will carry him to every county in the state.

Having served for ten years in the Michigan legislature as both Representative and Senator, Mr. Sink is well acquainted with the routine of law-making. In addition to his legislative career he has been active in civic affairs in his home town of Ann Arbor. He received the "King Albert" medal in recognition of services in behalf of the starving Belgian children during the War. Recently he was cited for meritorious peace time service by the Erwin Priesskorn Post of the American Legion.

# "SIX CYLINDERS

## THE HAPPY MEDIUM BETWEEN TWO EXTREMES"

With more you sacrifice economy—  
With less you sacrifice smoothness

It certainly does make a whole lot of difference—how many cylinders you have in that low-priced car of yours! With too many, you're bound to spend too much for gas, oil and upkeep. With too few cylinders, you're bound to get inherent engine-vibration.

But with SIX cylinders—no more, no less—you strike the happy medium between "too many" and "too few". Everything's in your favor—with a new six-cylinder Chevrolet!

Economy? Take the word of leading American business firms—the six-cylinder Chevrolet costs less for gas, oil and upkeep than any other car.

Smoothness? Take the word of motor car engineers: SIX is the fewest number of cylinders you can have in a car, and still

get built-in smoothness. And built-in smoothness is vital to your satisfaction.

Durability? Take the word of millions of owners: the new Chevrolet Six stands up! Stays dependable and trouble-free season after season. Its high gas and oil mileage stays high. Its low maintenance cost stays low! Especially after ten thousand miles, you'll be glad you bought a Chevrolet Six.

Evidently, from the way sales are going this year, America knows the facts about cylinders. Because the records show that since January 1st, more six-cylinder Chevrolets have been bought than any other make of automobile!

In addition to a fast, spirited, six-cylinder engine, the Chevrolet Six has Free Wheeling, Synchro-Mesh gear-shifting, a new, stabilized, front-end construction, four parallel-mounted springs, four shock absorbers—plus the modern styling and fine car luxury of beautiful, new Bodies by Fisher.

**Just Smile**  
by Mrs. Eli Fisher

This world is in a turmoil,  
There are troubles here and there;  
And you and I, as soldiers  
Must each one bear our share.

Because times are depressing,  
Is no cause for you to grouch,  
Just smile and say how lucky  
That I am to be about.

We know these times are not the best  
But pining doesn't pay.  
Smile and plod along, my friend,  
You'll find it the wisest way.

It is easy to be pleasant,  
When life flows like a song,  
But give to me the one who smiles  
When everything is wrong.

Why trouble others with your woes  
They, too, have trials to bear—  
Just keep on smiling as you go  
There's a ray of light somewhere.

For smiles that each one scatters,  
Along life's broad highway,  
May bring a flood of happiness  
To a weary soul each day.

**EDITORIAL SPOTLIGHT**

**VALUE OF THE TELEPHONE—Fort Atkinson, Wis., Union**

Few people, perhaps, think of the telephone as insurance but nevertheless it is—insurance against fire, insurance against sudden illness, insurance against burglars, etc.

In estimating the average daily value of telephone service to the average farmer—a prominent Wisconsin farmer, in describing the need of the rural telephone, reached the following conclusion: As fire insurance and prevention, 5 cents; as accident and health insurance, 10 cents; as aid in most advantageous marketing of products, 10 cents; visiting with friends and relatives, 5 cents; getting important news quickly, 1 cent; getting long distance calls and telegrams more easily and promptly, 1 cent; arranging for extra help when needed, 3 cents.

It is to be noted that the chief value of the telephone, in the opinion of the farmer, is first the means for securing quick assistance in case of a serious accident or if someone is taken suddenly ill, and second, the opportunity it gives the farmer to seek the best markets and sell his products where he can realize the most for them.

**MICHIGAN BANKERS PRAISE PRESS FOR SERVICE IN CRISIS**

Newspapers of Michigan have rendered the state a signal service during the depression according to a resolution adopted by the Michigan State Bankers' association at its recent convention. It reads:

"Whereas, the newspapers of the state, under the most trying conditions, have preserved the detached impartiality of their news columns at a time when much of the news has been decidedly unpleasant, and

"Whereas, the publication of certain unpleasant facts brought a general realization of the necessity of drastic remedies, and

"Whereas, the newspapers of the state have not allowed themselves to become the victims of hysteria, but have maintained the high traditions of journalism, refraining from disseminating slander, malicious rumors and falsehood, and using their power to safeguard the interests of their communities from attacks by individuals and organizations essentially un-American,

"Be it resolved, that the Michigan Bankers' association highly commends the newspapers of the state for their major contribution in steadying the social, economic, industrial and business structure of the communities they serve, the state of Michigan and the country as a whole."

**Thompson out of Primary Race Will Support Sink**

Theo. A. Thompson of Williamston, republican candidate for nomination for lieutenant governor, belatedly and apparently reluctantly withdrew his name from the files of the secretary of states' office to announce that he would support Charles A. Sink of Ann Arbor, former state senator, who aspires to the position now held by Lieutenant Governor Luren D. Dickenson.

Following announcement of his withdrawal, Mr. Thompson issued the following statement from Williamston:

"I believe that principles are of more importance than personalities. I find that the principles for which Mr. Sink stands are identical with those for which I have always fought and shall continue to fight. And believing that the obtaining of these things can be better accomplished thereby, I have decided to withdraw from the contest for nomination for lieutenant governor at this time."

**Chevrolet Wins**

Nearly one out of every three new automobiles bought in the first six months of this year was a Chevrolet Six, according to registration figures for the period, which are now complete.

Latest State reports show that Chevrolet titled 215,811 new sixes in this period, while the industry as a whole was titling 655,704 new cars, giving the largest division of General Motors 32.9 per cent of the total.

This compares with 31 per cent in the same period of 1931, with 24 per cent in the first half of 1930, and only 20 per cent in the boom year of 1929 up to midyear.

Ten years ago, when the company was getting its start in the volume car field, it obtained less than ten per cent of total business.

**Why this Paper is a Valuable Advertising Medium for You**

Mr. Merchant, with goods to sell in Clarkston, The Clarkston News is an especially valuable medium for you to use because every reader is a potential customer.

The Clarkston News is welcomed each Friday morning in a large share of the homes of this community. From those homes come your customers. You are merchandising to your full capacity only when every home using the products you offer, buys them from you.

The merchant who advertises in a large daily paper has the opportunity of reaching more people, but a far smaller number of them are actually possible customers for him.

The daily paper is read one day and used for the garbage or to light the fire the next. The home paper is kept carefully for reading and rereading—because it contains the news of their friends.

Systematic advertising carried in the paper read by your possible customers is the mortar holding the bricks in the foundation of lasting patronage and good will together.
