#### Party Has Great Time Corner, Getting Deer

Last week Friday a group from here, Waterford and Royal Oak start-

ed out for Lewiston, toting guns, full of high spire of fun, thinking of all the good deer stories that they had been hearing from the returning hunters. The crowd included Mr. and Mrs. Ben Miller, Mr. and Mrs. Charles Chamberlain and two sons Bud and Cal, from Royal Oak, Mr. and Mrs. Walter S. Barrows, and Mrs, Fred Chamberlain of Waterford

Many of the hunters who spent a reek or ten days in the woods came back empty-handed but these hunters came out of the woods with a big eight-point buck in four hours. And they certainly had great sport getting it.

Exactly one and one-half miles out tions. of Lewiston the group got the deer. Charles Chamberlain parked his car on a little road down in one corner of the wooded strip and went into the posed almost entirely of simple sugwoods. The rest of the party was divided. Mrs. Barrows and Mrs. Charles Chamberlain had gone in to Cummings, but Mrs. Fred Chamber-lain, Mrs. Ben Miller, and Cal and Bud were with Ben Miller. Ben drove his car through this little wooded strip, down a little hill, and toward the corner where Chamberlain's car was parked. The group was looking for ground pine. They weren't even deer hunting. But little did they know at the time what an active part in the catching of this beautiful buck.

As Ben drove to the corner where his son-in-law's car was parked, he began to turn around in the road, not finding any of the ground pine they desired. As he did so, a Lewiston man yelled:

"Hey, you! Get out of here (only in stronger language). Don't you know they're shooting around here?' Ben made a reply and proceded to turn around prior to driving out of the wooded strip. They would look

for their pine elswhere. And Ben made his turn in the

right spot. As a fawn and a deer came through the woods, they saw Ben's car and Charles Chamberlain's car blocking the roadway, and that there was no other way to go, so they turned about and went back. The fawn dashed first into the open space and in a few minutes the big buck made his appearance, less than ten rods in front of Mr. Chamberlain. So it didn't take him long to shoot the buck.

#### Skeleton of 20.000 **Years Ago Found**

The skeleton of a 17 year old girl, almost perfectly preserved for 20,-000 years in the silt bed of a long dried up Minnesota lake and showing physical relationships to the great apes, may be the proof science has been awaiting that America was once and Mrs. Judd Skarrit. A tragedy of 20,000 years ago, recalling modern fiction "American tragedy" may be indicated by the nature of the find. Apparently the girl had been wounded by a spear or arrow, judging from a clearly defined gouge in the right shoulder blade and since the body had sunk into the soft bottom of the now extinct lake about half a mile from the shore, it is probable that she was crossing the water on a raft or in a canoe. The "kull of the practically complete skeleton was certainly of an early type of human' kind, with large teeth, nose openings reminiscent of the anthropoid apes and distinct resemblances to the modern Mongoloid races.

Humorist Uses His Pen

in Defense of Interest

If you think a humorist can't take the bit between his teeth, you are invited to read Robert Benchlev's "Horse-Sense Editorial" in the Golden Book Magazine. He savs:

The other day I' met an old schoolmate. He was crying. "Well, old timer," I said "what's that you've got. in your hand?"

"My other hand," he replied shaking it.

Now, the reason my old schoolmate. hadn't made good was that he kept one hand inside the other. He was drawing on his principal. He had never heard of such a thing as interest.

A lot of people think interest is a bad thing. They call people who take interest on their money "usurers" And yet Ezra was a "usurer." Job was a "usurer." St. Paul was a "usurer." Samuel M. Vauclan, president of the Baldwin Locomotive works, is a "usurer." Think that over on your cash register and see if I am not-right.

#### **DETECTIVE'S 400 TELEPHONE CALLS LOCATE WOMAN'S KIN**

Penniless and tired after a long ride to Philadelphia, Mrs. Rebecca Cohen of Chicago suddenly forgot the name and address of her brother whom she had come to visit. She was taken to a representative of the Traveler's Aid Society, and later gave Detective Lieutenant Greenhaugh two names she thought might he her brother's. The detective made 400 telephone calls before he got a clue. Then he talked with a man who knew another man who had a sister in Chicago, and this led to the finding of the brother, Morris Dubis, who had not met his sister for many years.

#### **INTERNATIONAL TELEPHONE VOCABULARY IS PUBLISHED**

Significant of the growth of international telephone communica-tion is the recent publication of a talephone vocabulary, entitled. Vo-cabulaire. Telephonique Interna-tional? - published under the aus-pices of the International Advisory. Committée on Long Distance Te-lephony. It is in seven languages. Its purpose is to provide a collection of technical terms which, in these languages, are commonly used in telephone literature.

In recent weeks, international telephone communication has been established, either by direct circuit established, either by unect church or by radio telephone, between the United States and South Africa; Germany and the Union of South Africa; Belgium and Spain; Bel-gium and Czechoslovakia; Belgium and certain transatiantic liners; Batsium and Capatown (Union of Belgium and Capetown (Union of South Africa); Germany and Greece (Saloniki); Hungary and Poland; and Jugo Slavis and TurMrs. Dunston's Room

southern boundary of Michigan and the plant has been of little value on this State although it has furnished valuable pastures in states further south. The Michigan field trials with the new strain were made at the W

K. Kellogg Farm at Augusta. Lespedeza is a legume high in pro-tein and is sometimes cut as a hay crop in southern states but its primary use is to furnish excellent pasture. The plant will grow on sour soils and grows well even on droughty soils.

Lespedeza is an annual and will have to be seeded each year except on fields where mature plants have produced enough seed to furnish a good stand the next year. No seed of the new strain is available for

distribution. Further trials of the plant will be made by the farm crops department of Michigan State College. The department can estimate the value of the crop in this State only after further trials. Probably the plant will not mature north of the south half of the State.

other miniature device developed by the same engineers, the so-called lapel microphone, which came into prominence during the broadcasting of the national party conventions at Chicago. When the orator arrives at his indoor or outdoor meeting, he need only set the case down in a good place, plug in on the electric light line, pin the tiny microphone on his lapel, step up on the platform and commence talking in his ordinary tone. The wire from the microphone gives him 30 feet in which to make dramatic strides and gestures.

A volume control is also provided, so that an attendant seated as far as 30 feet away from the loud speaker may adjust the amplification of the speaker's voice as conditions in the audience may require. The system can also be used with an electrical reproducer to amplify phonograph records of music or prepared speeches.

An Error

In a recent issue of the Clarkston News an error crept in stating that Mr. and Mrs. J. P. Crow of Water ford and Mr. and Mrs. Byron T. Howland motored together, to the south, with Charles Merritt accompanying them. This information was not correct, as Mr. and Mrs. Howland motored alone to Eustes, Florida, and Mr. and Mrs. J. P. Crow motored alone to Mt. Dora. Mr. and Mrs Fred Bryant of Springfield went to Florida, also, for the winter, as di E. S. Waterbury,

The Otter River Trout Feeding and Grayling Experimental Station in Houghton County, construction of which was started a month ago, will be ready for use when the trout fry are distributed from the various state hatcheries next spring.

The feeding station, located on what is believed to be the last stream in Michigan to contain grayling, will be used by the Conservation Department to continue experiments in the propagation of grayling in an attempt to preserve early Michigan's noted game fish:

Because of the fact that the station will probably see large numbers of visitors, the surroundings will be made as attractive as possible. A log cabin constructed entirely of Nerway pine is being erected at the station to house the caretaker and his equipment. The building will be en-tirely rustic, and will be of the type of the Fox River Feeding Sta-tion building which has gained wide attention because of its unique design.
