State Forests Pro-

d areas are protected by 20 miles All of the state forests are checker-boarded with fire lines which are heing constructed as rapidly as funds will permit and the lines have

proved valuable, in checking fire starting in growing timber. Fire lines in other areas are built by fire wardens during periods of low hazard, when the woods are safe from fire and the men are not need-

ed to actually fight fires. The fire lines are of a standard size, a brushed out stretch about 20 feet wide with a plowed and disced line down the center of from 12 to 16 feet. Re-discing is necessary once or twice every year to keep down the vegetation.

Fire lines have proved to have an increasing value as means of getting trucks and tractors into wooded areas during fires, according to the Field Administration Division of the Conservation Department, and as a result they are now being built with this utility in mind.

Dr. Poling to Address C. E. Young People

Young people from Detroit, Wayne County, and six surrounding counties plan a huge mass meeting when the president of the World's Christian Endeaver Union, Dr. Daniel A. Pol-ing of New York City, speaks at the Fort Street Presbyterian Church December 9th, on the subject, "New Days and New Ways",

Dr. Poling is a national figure because of his work as speaker of the National Youth Radio Confer ence, broadcast over a nation-wide network each Sunday afternoon He is also editor-in-chief of the Christian Herald, general director of the J. C. Penny Foundation, and President of the International Society of Christian Endeaver.

The program calls for musical numbers by the Detroit Union, 30 voice choir, under the direction of Jack Pflieger, union music, d'r ctor and special music by the Kriebel sisters, Helen and Betty, of the Calvin Presbyterian , Church, Detroit. Foster Jones, director of religious education at Immanuel Presbyteria Church, Detroit, will lead the congre gational singing Jason Moore organist at the Fort Street Church will play thruout the service. Ger ald D. Miller, president of the Detroit Union, will preside, "The church's seating capacity is limited to 1,500, therefore, everyone is, ad-vised to arrive well in advance of the starting time, which is 8 P. Looking in on the Team

The Boys made a flying start last. Friday by winning their practice game with Oxford. They played a nice game and had Oxford on the go from the start to the finish. If they will go on thru the rest of the year now it will sure be nice. The girls haven't had a chance to show us what they can do yet but judging by their practices I think that it will be something to see. Let's hope for the best.

There are quite a few boys who are ready to try out in the second "try-out for cheer leaders. Only three boys appeared at the first trial but quite a few are entering their names now and a second trial will be held this week.

Hi-Y

A group of eight fellows met at Mr. Winn's last night with Mr. Kim-ball and formed a Hi-Y club. The officers elected were, President, Rob-ert White; Vice-President, George Holmes; Secretary, Don Beach; Treasurer, Lloyd Patrick. The reg-ular meetings will be held on Mon-day nights at 7:30. One of the high-lights of the evening was when one of the boys said that he thought a Lynx was a Pole Cat. This was yeary soon settled by Bob who is now consoon settled by Bob who is now con-sidered as an authority on the subject.

Plan to Guard Young Christmas Trees

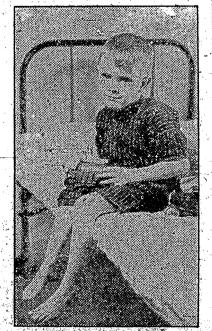

Conservation officers and other field men of the Department of Conservation have been notified by Di-rector George R. Pleading for Health

It is to bring a smile to sad, wistful faces like this little boy's—lifted from the sanatorium cot, his home for many long months-that the children on the 1932 tuberculosis. Christmas, seal are singing their song. They are just a pretty picture to this tiny child, but tuberculosis is a grim reality. Already in his Laby way he has learned to perform the acts of precaution taught every sanatorium patient that he may prevent his disease spreading to others. Tuberculosis, is the "great," big, black, bogey man" of the tales that such little children must hear until the "Good Feery," Health, has sent the shadow of disease away. Happy endings to all their stories are has-tened by the work done from funds which are built penny by penny, dur-ing the annual sale of tuberculosis Christmas seals.

VOICE MAGNIFIER MAY BE CARRIED BY HAND

Portable Public Address System Is Boon to Speakers

The latest convenience for this year's political campaigners, which enables an orator to pack the shouts of a giant in a suitcase, was made known recently with the Western Electric Company's announcement that there is available a complete public address system so small that it may be carried around by hand. Designed by the Bell Telephone Laboratories, the system provides enough amplification to magnify the speaker's voice from one to many thousand times its natural loudness, according to the requirements of the surroundings.

Fon Use With Lapel Microphone

The entire equipment, including the case, weighs 70 pounds. It includes amplifier, loudspeaker, control unit, and the necessary connections. It operates from the regular alternating current electric power supply.

To make its convenience comliete, the miniature public address system is arranged for use with an-other miniature device developed by the same engineers, the so-called. lapel microphone, which came into prominence during the broadcasting of the national party conventions at Chicago. When the orator arrives at his indoor or outdoor meeting, he need only set the case down in a good place, plug in on the electric light line, pin the tiny microphone on his lapel, step up on a platform and commence talks ing in his ordinary tone. The wire

from the microphone gives him 30 feet in which to make dramatic strides and gestures.

Provides for Remote Control A volume control is also provided, so that an attendant seated as far as 30 feet away from the loud speaker may adjust the amplification of the speaker's voice as conditions in the audience may require.

The system can also be used with an electrical reproducer to amplify phonograph records of music or prepared speeches.

Wake Up Your Liver Bile

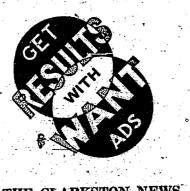

And You'll Jump Out of Bed | in the Morning Rarin' to Go

If you feel sour and sunk and the u you reel sour and sunk and the world looks punk, don't swallow a lot of salts, mineral water, oil, laxative-candy or chewing gum and expect them to make you suddenly sweet and buoyant and full of sunshine. For they can't do it. They only move the bowels and a mere movemeat doesn't get at the cause. The reason for your down-and-out feeling is your liver. It should pour out two pounds of liquid bile into your bowels

-Without Calomel If this bile is not flowing freely, your food lossn't digest. It just decays in the bowels. Gas bloats up your stomach. You have a thick, bad taste and your breath is foul, skin often breaks out in blemishes. Your head sches and you feel down and out. Your whole system is poisoned.

It takes those good old CARTER'S LITTLE LIVER PILLS to get these two pounds of bile flowing freely and make you feel "up and up." They contain wonderful, harmless, gentie vegetable extracts, amazing when it comes to making the bile flow freely.

But don't ask for liver pills. Ask for Carter's Little Liver Pills. Look for the name Carters Little Liver Pills on the red label. Resent & substituite. 25c at all stores. 01931, C. M. Co.

Breeding Ewes Need Good Winter Ration

Trials with the flock of breeding ewes at Chatham show that it is poor economics to try to run the ewes through the winter and lambing season on cheap roughages without supplementing the roughage ration with grain previous to the time the

lambs are dropped. Attempts to cheapen the ration by substituting two pounds of oat straw for an equal amount of legume hay resulted in the sheep refusing to eat a portion of the straw and a slow gain in weight during the win-ter feeding period. These ewes were given grain. A ration of four pounds of legume hay, four-tenths of pound of grain daily until five weeks before lambing, and seven-tentia pounds of grain daily during those five weeks allowed the ewes to make an average gain of 21.62 pounds dur-ing the winter months. The ewes on full feed sheared an average of one-half pound of wool more than the group which was fed straw. The difference in cost of the two rations was six-tenths of a cent per day. The weight of the lambs from the lot_of ewes which received. the more expensive ration was a little greater than the weights of lambs from ewes which were fed straw.
