Achievement Day Program

The annual Achievement day program for Oakland County women who have been studying under the Home Economics Extension Department of the Michigan State College will be held on Friday, May 19th, at the Central Methodist church, Pontiac.

The meeting which is open to the public will begin at 10:00 o'clock followed by a luncheon and an afternoon meeting. A varied program will include an illustrated talk on cotton fabrics by Miss Ruth Guenther. A one act play by the White Lake group, a movie of the World's Fair at Chicago.

Since the main project studied has been "Clothing" with a special emphasis on make-overs, the exhibits will include hats, purses, scarves, and neckwear made by the group members. Former Clarkston Resident Married

On Sunday, April 30 a wedding of great interest to Clarkston friends took place at 6:30 in the evening at the home of Mr. and Mrs. W. J. Murray Boyes Springs, California when their daughter, Miss Agnes Walter became the bride of Mr. Hugh Thomas McDaniel. The ceremony was performed in the living room of the Murray home. The room was a bower of roses, syringas and other flowers. The fireplace was banked with flowers and the room was lighted by candles set in clusters of roses.

The bride was very beautifully dressed in white embroidered organdie. Her veil was of tulle with a band of orange blossoms around her head. She carried Cecile Bruener roses and Babies' Breath with tulle streamers.

Her two bridesmaids, Miss Blanche Ruggles, a pretty brunette, wore green organdie and Miss Margaret Dobbel, a lovely blond, wore pink organdie. Each carried a bouquet of Columbine blossoms.

Mr. Dan Ruggles sang "I Love You Truly" as the bride came in on the arm of Mr. Murray who gave her away. Mr. Bergan was Mr. McDaniel's best man. There were 20 guests present.

After the ceremony refreshments were served. A rather unique part of the refreshments was the individual ice cream molds in a shape of a bride and groom, hearts and cupids, Cinderella slippers, love birds and wedding bells.

Mrs. McDaniel's traveling gown was a light blue crepe worn with a darker blue coat trimmed with fur. Her accessories were to match.

The bride and groom left for San Francisco and will take a trip along the coast. On their return they will reside at Mt. Diablo near San Francisco where they have their home already furnished.

...Comment and Criticism...

No community can expect to make progress, unless it has at least one newspaper which can be ranked as first-class for the town of its type. Such a newspaper renders services that will not be rendered if the paper is not published, or if it is poorly supported. It attracts interest in the activities of the community, it enlists support for every good organization and movement.

It performs somewhat the same service as a band of music at the head of a procession. Silent and disperse those musicians, and the line falls out of step, the marchers become weary and discouraged, and soon the whole parade is called a fizzle and a failure. A good town must have a good newspaper, or all the life and snap goes out of it. —Coldwater Reporter.

Reorganization Taking Shape

Under the able and energetic leadership of Thomas J. Foley, chairman of the Depositor's Committee of the Clarkston State Bank, rapid progress is being made for bringing the Clarkston State Bank up to the new standard of solvency, demanded by State and National authorities.

Mr. Foley and Cliff Waterbury of the Depositor's Committee and Messrs. Walters, Alger and King representing the Bank called the early part of the week on the officials of the State banking department and were told they had an easy proposition to work out.

The sum and substance of the State's demands are "re-build your capital structure and separate your assets in accordance with the new values and regulations and we will open your bank for regular business."

We should be thankful for the co-operation of the people, the committee, stockholders and officials for saving this community from the distressing conditions that prevail in some other places.

GRAHAM-PAIGE CALLS MEN TO WORK BY TELEPHONE

"When we can reach them," says an official of Graham-Paige Motors Corporation, "we call our people back to work by telephone. When they have no telephones, we must fall back on post cards. The telephone gets immediate action; the post cards mean a delay of at least a day."

Other things being equal, applicants or former employees within easy reach by telephone usually are called first when workers are needed.

3.2 AIDS AUTO DEALERS
 Concrete evidence of the spurt to automotive sales pro-

vided by legalization of 3.2 beer was contained in the report compiled here today showing that Chevrolet dealers sold more than 1,500 new trucks and passenger cars directly to brewers and distributors during the first twenty days of new beer. Sales ranged from huge van-trailer type trucks capable of hauling several hundred cases of the newly legalized beverage to "Standard Six" passenger cars for use by salesmen and advance advertising men. In the first week dealers reported

selling 549 trucks and 76 passenger cars, mostly to distributors, in as much as most established breweries already had fleets of trucks and passenger cars in use for local transportation of by-products which they had been manufacturing during the long dry era, officials said.

A considerable volume of additional business was done with industries allied with the breweries, such as sugar supplies, pretzel makers, bottle and cap manufacturers and kindred lines, it was stated.

Stake and platform bodies mounted on the regular Chev. 131-inch and 157-inch wheel-base are in high favor for hauling case beer for retail delivery, while van bodies are preferred by many wholesale bottlers because the closed body keeps out rays of the sun, reduces possibility of theft in transit, and provides an opportunity for advertising display on the side of the body.

A noteworthy feature of the report was that sales in volume resulted only in those states where beer was immediately

legalized, distributors in states with pending legislation preferring to wait until they know where they stand before making automotive commitments.

THE DETROIT EDISON COMPANY

GENERAL OFFICES
 2000 SECOND AVENUE
 DETROIT, MICHIGAN

May 8, 1933

TO THE CUSTOMERS OF
 THE DETROIT EDISON COMPANY

This is the sixth of a series of weekly letters addressed to our 500,000 customers in 29 cities, 58 villages and 130 townships in the southeastern corner of the State of Michigan:

To meet the electric requirements of the people we serve, requires us from time to time to build extensions to plants, substations, distribution systems, warehouses, etc. Since the return on our investment is limited by State Commission regulation we cannot pay any great part of the cost of extensions out of earnings, but must get new capital. We secure this new capital by issuing new stock or bonds. Unless the credit of the Company is excellent, we will not find a market for these securities. When the prospective requirements of our customers call for new plant, we cannot delay. We must be ready to serve. Do you wonder that we are somewhat fussy about our credit?

At present, the relation of our stock and bonds is nearly 50-50. Since the beginning of the Company's service, the total return paid on money invested in the business by the stockholders and bondholders has averaged only 6.31% per year. During the last ten years this total return paid on our capital has averaged 6.42%. Last year it was 5.86%. This year it will be still less. And that is on money capital. It is not on all the money or value, only on real money.

This Company has never paid a stock dividend, even in the boom days when dividends of 200 per cent were far from rare. In the early years of the Company's history, the stockholders received nothing for the use of their money. Dividends were first paid in 1909, at the rate of \$4.00 per share. This dividend was gradually increased until it reached \$8.00 in 1916. Because of decreased earnings during these hard times the dividend was reduced to \$6.00 for the last half of 1932. Continued poor business has caused a further cut to \$4.00 per share per year at the present time.

Much has been said and written lately about a so-called "Power Trust." This is something which is perfectly safe for politicians and the press to discuss and condemn because no such organization exists. It is all a myth and myths cannot talk back. No one has named the officers of the trust, or even published its post office address. The Detroit Edison Company, however, is an entirely independent company. Contrary to the conception that every large public utility is controlled, this Company stands squarely on its own feet and has been locally managed from its beginning.
