Drayton Plains Graduating Class

The graduating class of 1933 had a very pleasant trip on Monday, May 15. Starting from the school at 7:30 a. m., their first stop was at Lansing, to see the Capitol and through the campus of the college.

After dinner the class drove to Jackson Prison, first going through the building with the cells in. These cells are set off in blocks which contained 470 cells 3-decks high. Each cell is furnished with a bed, stand, wardrobe, stool and wash bowl.

The next was through the factory where some of their clothing was made, then to the chapel where the band was playing. In the chapel is a beautiful pipe organ and a seating capacity of 800.

Next was where men were coming from their school work and examination rooms. Some were drawing and painting pictures. Some of these were very beautiful. The bakery was next. 1200 loaves of bread are baked a day, 50 bushels of potatoes are cooked a day and one ton of meat is eaten a day.

Several other topics were brought up and discussed and a group meeting each Thursday afternoon for a while will be held. The first meeting will be held at Mrs. John Watkins' home and the Book of Romans is to be the basis of study for the present.

BIG ATTRACTIONS AT BOYS' CAMP

Location Easily Accessible to Many Points of Interest

Camp Mahn-go-tah-see, the Oakland County Y. M. C. A. Camp, has a site that is peculiarly adapted to camp use.

Hills and bluffs some 50 to 65 feet above the lake level insure adequate drainage; plenty of woods with a wonderful variety of trees—pine, spruce, beech, hemlock, maple, elm, hazel, birch—give a setting of wilderness. A sandy beach which provides splendid swimming facilities; a beautiful lake well stocked with pike, bass, and some perch brings joy to the fisherman.

The 427 acres were last year dedicated by the state as a game sanctuary. Already 40 pheasants have a habitat on the property. Partridge, wild duck, a deer as a camp pet, porcupine, squirrels, rabbits, loons on the lake, and birds of great variety are the campers' delight.

Within easy hiking distance (less than five miles distant) is the famed Au Sable river with its high banks, power dams, Jargo Springs, Roll Ways Camp, deer in abundance, old lumber camps, occasionally a bear, and many points of interest to the boy who enjoys exploring. This part of the Au Sable is in the midst of a 500,000 acre National Forest Reserve in which are found the fire towers and the forest ranger and where are planted thousands and thousands of small pine trees. One tree plantation now about sixteen years old has beautiful Norway and white pine trees over sixteen feet in height.

Not far from the camp is the Silver Creek Trout Rearing station where millions of small trout are annually fed a liver mixture until they are large enough to stock trout streams. The venerable keeper of the trout, Captain Ellsworth, who has a name for the freak trout, and who in the midst of his garden of wild flowers has set his tent, is a constant source of delight to the campers as he spins yarns of lumbering and sailing days.

Twenty miles away is East Tawas, on Tawas Bay, Lake Huron. Here the boys may visit the U. S. Coast Guard Station, the Light House on the sandy point, swim in the big lake, or fill up on sodas.

Camp Mahn-go-tah-see with its enchanting location plans to have 98 boys in each period of camp. Many boys stay thruout the whole season. Enrollments may be made with the nearest Y. M. C. A. Secretary, or any trustee of the camp.

THIS SHOULD ECLIPSE THE 3.2% PRODUCT

Representative Earl Berhans of Van Buren county, a veteran legislator who knows his fruit and their juices, has just won an outstanding legislative victory. He has had passed by both the house and senate a bill which will save farmers and fruit growers many thousands of dollars each year.

If weather conditions happened to be unfavorable and these juices were not sold within three or four days, sometimes there might be a slight fermentation. Mr. Berhans saw an opportunity to help these farmers by making it possible for them to sell their cider and grape juice in bulk and fixing a limit within the law of fifteen days.

try. Representative Berhans had the same kind of a bill passed two years ago but Governor Brucker vetoed it.

JARRENDT NAMED AS DRAIN COM'R

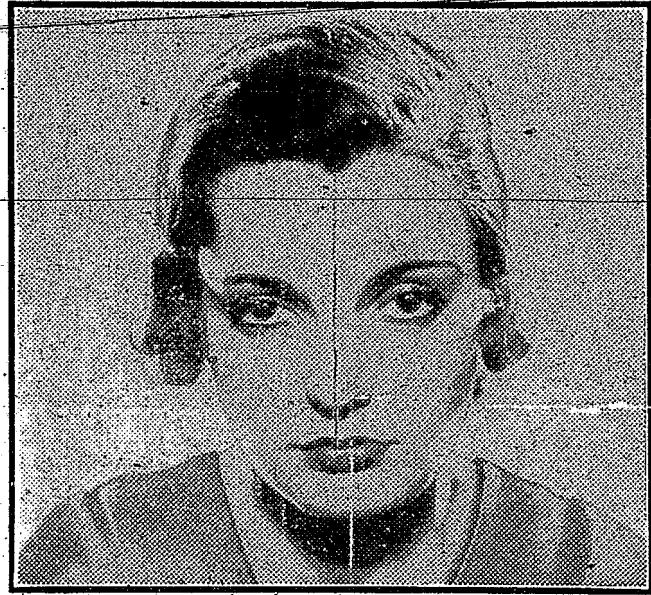

Deputy Selected to Succeed Murray D. Van Wagoner

Judge of Probate Dan A. McGaffey, County Clerk Lynn D. Allen and Prosecuting Attorney Arthur P. Bogue, the board empowered by law to name a successor to Murray D. Van Wagoner, county drain commissioner, who resigned the office effective June 1, to become state highway commissioner, met on Monday and appointed Lewis C. Jarrendt to the position. Judge McGaffey and Mr. Allen, the two Republican mem-

bers of the board, disagreed on their choice, the former favoring W. R. Ransom, who was defeated last fall by Mr. Van Wagoner, and Mr. Allen favoring Mr. Jarrendt. Mr. Bogue thus held the balance of power and he cast his vote for Mr. Jarrendt. The new drain commissioner has been deputy commissioner for the

past 10 years and his knowledge of the job is considered important in view of the cases growing out of drain construction which are now in federal court and involve upwards of \$3,000,000 of drain bonds. His salary will be \$3,000 per year and the office of deputy drain commissioner has been abolished.

MICHIGAN BELL TELEPHONE CO.

"I WONDER WHAT'S DELAYING JOHN"

"Something must have happened. Dinner's been ready over an hour. Oh, if we only had a telephone so he could call and let me know what's keeping him!"

BEATTIE BROTHERS Ford Sales and Service Day Phone 116 Night Phone 134 Main at Church Street, Clarkston

Louis Borst Announces the Opening of a First Class Barber Shop in the Klintworth Bldg. On S. Main St., 2nd door S. of Washington CLARKSTON MICH.

Henry Ford Dearborn, Mich. May 15, 1933 Time and again I am told—by my own organization and by others—that I penalize myself by quality. Friendly critics protest our putting into the Ford V-8 what they call "twenty-year steel." They say such quality is not necessary; the public does not expect it; and that the public does not know the difference anyway. But I know the difference. I know that the car a man sees is not the car he drives—he drives the car which the engineer sees. The car which is seen, comprises beauty of design, color and attractive accessories,—all desirable, of course. The best evidence that we think so is that they are all found on the Ford V-8. But these are not the car. The car proper, which is the basis of all the rest, is the type of engine and its reliability; the structure of chassis and body, ruggedly durable; the long thought and experiment given to safety factors; the steady development of comfort, convenience and economy. These make the car. A car can be built that will last two or three years. But we have never built one. We want the basic material of our car to be as dependable the day it is discarded as the day it is bought. Ford cars built 15 years ago are still on the road. It costs more to build a durable car—but two items we do not skimp are cost and conscience. A great many things could "get by"—the public would never know the difference. But we would know. The new Ford V-8 is a car that I endorse without any hesitancy. I know what is in it. I trust our whole thirty years' reputation with it. It is even better than our previous V-8. It is larger, more rugged and mechanically a better job all round. I readily say this in an advertisement because I know the car will back it up. Henry Ford

The Ladies' Literary Club, of Clarkston, met for their monthly meeting at the home of Mrs. Charlotte Smith, on East Washington St., Tuesday afternoon. A splendid program including two well prepared papers on Alaska by Mrs. Wendelborn, of Pontiac, and Mrs. Earl Walter, of Clarkston, was given. Mrs. Lee M. Clark was the soloist accompanied by Mrs. C. E. Edwards.

Says Her Husband Lost 16 Pounds In 4 Weeks

"I have never found a medicine that 'peps' you up like Kruschen Salts and, better still, leaves you 'pepped up.' I take it two or three times a week—not to reduce but merely to feel good and clean. My husband took it to reduce, he lost 16 pounds in 4 weeks." Mrs. E. A. Ferris, Washington, D. C. (December 29, 1932). To lose fat and at the same time gain in physical attractiveness and feel spirited and youthful take one half teaspoonful of Kruschen in a glass of hot water before breakfast every morning. A jar that lasts 4 weeks costs but a trifle at any drugstore in the world but be sure and get Kruschen Salts the SAFE way to reduce wide hips, prominent front and double chin and again feel the joy of living—money back if dissatisfied after the first jar.

THE DETROIT EDISON COMPANY

GENERAL OFFICES 2000 SECOND AVENUE DETROIT, MICHIGAN May 22, 1933

TO THE CUSTOMERS OF THE DETROIT EDISON COMPANY

This is the eighth of a series of weekly letters addressed to our 500,000 customers in 29 cities, 58 villages and 130 townships in the southeastern corner of the State of Michigan. There are power houses in which electric energy is produced for us by steam power, at four different places: at Delray and at Connors Creek in Detroit; at Marysville on the St. Clair River, just south of Trenton; and on the Trenton Channel of the Detroit River, below Trenton. The last named is the largest of the four. These are interconnected by transmission lines on high steel towers, out in the country; and by cables laid underground in the cities, so that each power plant can help out its neighbor on either side. The electric current does not go directly from the power houses to your house connections. There are 164 switching stations and substations where the high pressure current is received and transformed to an intermediate pressure of 4800 volts, to be distributed to the transformers which serve most of you. Too many rules are not a good thing in business. We have one that comes pretty close to being observed as if it were holy writ. It reads — "The Service Must Not Fail." That is not always as simple as it sounds. Sometimes, storm and lightning and sleet and snow make it a difficult job. And acts of God (as our legal friends call them) are not our only worries. We must keep the plants in condition. We must keep our lines in repair. We must have enough generators to meet unforeseen demands for current, no matter how sudden, and it takes two years to build and install a generator. We must ever be ready for the unexpected. Sometimes the unexpected turns out to be calamity and there is — well, you can say the rest. In that case we must be ready to clean up the mess and get service going smoothly again. The men employed by us are thoroughly trained to control and regulate and test the lines and machines. Whether it be a 70,000-horse-power steam turbine or a five ampere fuse plug, the Edison man assigned to see that it functions properly must know his job and must attend faithfully to his job. The Detroit Edison Company is an important factor in the social, commercial and industrial life of Detroit and southeastern Michigan. It recognizes its unique position and fully appreciates that it could not exist except for the support of the community. The Detroit Edison Company's interests are identical with those of its customers. We cannot succeed except through your success. Therefore, we believe that we should render adequate electric service at an acceptable price — a price that is fair. By the measure that we accomplish this, our own success will be measured. We do an honest job because we know that is the one way that we can have a continuing successful business.

Walter Dorey President
