**THIS TRIAL PLAN!**

Have you heard friends or neighbors talking about the advantages of an electric range, and wondered if you could afford one? Is the question uppermost in your mind the subject of cooking cost? Have you deferred buying a range for this reason? Here is the answer to your problem!

You do not need to guess at the cost of cooking electrically. You do not need to take any one's word for it. You can find out definitely for yourself without buying a range or making a penny's investment. We will let you use a range in your own kitchen, and you are under no obligation whatever.

The plan briefly is this: We will install an electric range in your kitchen without initial charge, and let you use it for six months, removing it without charge if you do not like it. During this trial period, you pay for the service as registered by your meter, plus a monthly charge of \$1 for the range. If you decide to keep the range, your monthly payments will be applied toward the purchase price. If you decide that you do not want it, the range will be removed at our expense.

Since this trial plan was begun a short time ago, over four thousand of our customers have taken advantage of this offer. Send in your application for a trial range today!

A study of one thousand families using an electric range showed a cooking cost of less than 1 cent a meal per person.
