## COMMENT AND CRITICISM

It was a hot night last summer The council chamber was crowded. A big question was being settled. Every question has two sides and both sides were ably represented. Capable Casper Warden was in the president's chair. The Village dads were resent. The Clerk and Treasurer vere on hand. All were ."on the spot". Even if you were not there, you rested at home, confident that however difficult the decision, would be right-as they saw it. And do not forget you elected those men because you had confidence in them.

After due consideration of the evi dence presented, the question was decided. Right or wrong-they decided. But the minority would not accept the decision and a petition was presented for a rehearing.

Back on the "spot" went the village "dads". Despite the calm, cautious hand of Casper Warden, who tried to steer the meeting along in a decorous and impartial manner the meeting did considerable to add to the heat of the day. In fact some arguments were so personal that we felt the need of commenting in this column at the time.

And now, we are reliably informed the proponents of the motor boat are passing a petition to bring the question before the people at the spring election.

Regardless of the fact that Michigan has five thousand inland lakes of which probably four thousand five than, Parke lake for motor boating, the fact that the Council has decided twice that operating a motor boat on this sheet of water is a nuisance, and that the benefit of the many is more important than the benefit of a few will probably make it quite a task to secure a sufficient number of ballot.

• It isn't a pleasant fact . . . but figures PROVE the scarcely credible story of crippled eyes in the United States. At school age, twenty children out of every hundred have defective vision. At college age, the number has increased to 40 out of every hundred. And at the age of 60 years, 95 PEOPLE OUT OF 100 have

defective eyesight. This is tragic proof of the terrific strain put upon eyes by the needs of our present day civilization, and --oftentimes-of the needless abuse to which our eyes are subjected.

There are no substitutes for the services of an eyesight specialist, but proper lighting helps to protect eyes, good and bad, young and old. It will pay you to check the lighting in your home carefully . . . Consider every room and MAKE SURE that your
