COMMENT AND CRITICISM

Such is life. Seeking something for nothing, some men play the stock market, some play the ponies; some play bridge, some buy sweepstakes tickets and some bet on Townsend.

After the welfare, relief or what have you in the way of government relief, has been kicked around the last six or eight years, who would not detest the idea of depending upon the Townsend Plan, even if such a law was passed.

It is reported that Floyd Kimball is no longer employed as an officer by Clarkston. We wonder when the good citizens of Clarkston are going to demand that the Council publish their proceedings, as provided by state law, so the public will be officially informed.

Inasmuch as Clarkston was to have a new postmaster, the temporary appointment of Mrs. Elizabeth Ronk and the change of the office to postmistress seems to be gladly accepted by all and the wishes are expressed that the appointment be made permanent.

Dixie Highway To Be Made Safer

Murray D. Van Wagoner, state highway commissioner, has taken steps to eliminate a natural hazard on US-10 just south of its intersection with M-15 in Oakland County.

The commissioner ordered a row of trees at the side of the road cut down. Two small trees will be planted further back from the road for every tree that is cut down.

The trees are within three feet of the pavement and a guard rail is inside the row of trees. The road shoulder is therefore less than two feet wide.

Reports to Commissioner Van Wagoner indicate the trees have been the cause of several bad accidents. Motorists have a tendency to "shy" away from the trees to the wrong lane of traffic.

"I realize that this may not meet with the approval of extremist conservationists but we believe the removal of the trees is justified from a viewpoint of public safety," the commissioner said. "Destruction of the trees is somewhat minimized to by the fact that we will plant new ones."

HOLLY THEATRE

A new and potent starring team heads the cast of the sprightly Metro-Goldwyn-Mayer comedy, "Petticoat Fever", coming Sunday to the Holly Theatre.

The team is Robert Montgomery and Myrna Loy, and this is their first picture since the memorable "When Ladies Meet", each having gone far in personal popularity since then.

"Petticoat Fever" was adapted by Harold Goldman from the famous Marx Reed play of the same name. George Fitzmaurice directed and Frank Davis has given it the benefit of a brilliant production mounting.

It is a story of a wireless operator in a remote Labrador station. When an airplane runs out of gasoline and lands near his lonely tower he sees a white woman for the first time in a year, and a beautiful woman for the first time since he left England, two years before.

By refusing to send their messages, he holds the couple, who are engaged, virtual prisoners, meanwhile making love to the lady but with such charm and grace that she begins to like it. His future seems rosy until a girl to whom he was engaged two years before appears, confidently ready to marry him. The ensuing complication leads to a smashing surprise finish.

Reginald Owen, ranking character actor, plays the English baronet engaged to Myrna Loy. Others in the supporting cast are William Stack, Otto Yamaoka, Iris Yamaoka and Bo Obing.

Mrs. Elizabeth Ronk Appointed Postmistress

New Appointment Is Effective the 16th of April

Word was received this week that Mrs. Elizabeth Ronk has been appointed temporary postmistress of Clarkston, replacing Floyd Andrews who has been Post Master for the past twelve years. Floyd's term expired sometime the last of March.

Mrs. Ronk is a graduate of the Clarkston High School and is not only well known here but is well qualified for this position.

Floyd Andrews had been postmaster for twelve years and at this year's township election was elected supervisor. Floyd says that he is thankful that he has enjoyed the confidence of the public as evidenced by being elected and enjoyed the co-operation of the public during his terms as postmaster.

Many Young People Attend Sunrise Service

Easter Breakfast Is Served at Methodist Church

On Sunday morning quite a number of young people gathered at the Methodist church to enjoy a co-operative Easter breakfast and sunrise service.

The breakfast table was very attractive, being trimmed in lavender and yellow with an Easter lily as centerpiece and lighted yellow candles at each end. Although the breakfast was co-operative, all the work at the church was done by Mrs. C. E. Edwards, Phyllis Boynes, Mildred Butters and Betty Walter.

After breakfast a very lovely service, led by Lewis Warden, was held. Mr. Warden not only gave a very interesting talk on "Life" but he led the group in singing the League songs. Two special numbers were enjoyed, a duet by Genevieve Beardslee at piano and George Beardslee on the flute and a violin solo by Bill Parker.

The whole service was a real inspiration to every young person in attendance.

SUBJECTS PRESENTED BY M. S. C. AUTHORITIES

Medium-thick honey can be substituted for one-half the sugar in cake or quick-bread recipes by reducing the liquid one-fourth, the Michigan State College Home Economics Department reports. If honey is substituted for all the sugar, reduce the liquid one-half. If the honey is very thin or very thick, this proportion may have to be altered accordingly.

Changing weather conditions this month are a blessing in disguise, according to C. B. Dibble, extension specialist in insect control at Michigan State College, East Lansing. Such insects as cutworms, grasshoppers, cucumber beetles, and squash bugs, which survived the winter because of deep snows, are now suffering severely from the rapid and frequent weather changes, he says.

SOIL EROSION PROJECT PLANNED IN MICHIGAN

Plans are being made for planting 225,000 trees and 100,000 seed spots in the Berrien County soil erosion project sponsored by the federal government. Woodland improvement work, conducted in collaboration with the county agent and with extension specialists from Michigan State College, East Lansing, has been completed and planting will begin soon. The project is being conducted as a demonstration of proper soil conserving crops and frequent clinics are held for interested farmers. Trees are used for the steeper slopes which are badly eroded and lower slopes are being converted into permanent pastures.

SOIL CONSERVATION ACT GIVES TWO OPTIONS

To illustrate how the Soil Conservation Act may be applied to a farm, classes of grants to be paid, and how much, County Agricultural Agent K. D. Bailey has prepared a chart of diagrams that apply to any farm, according to information now available. They show two general options the farmer has if he accepts the Soil Conservation Act program for 1936.

Basically, the Act proposes: (1) To pay farmers a federal soil conserving grant of about \$11 per acre for changing part of their 1935 Soil Depleting Crop Acres to Soil Conserving Crops for 1936. Limit for such payment is 15% of acres classed as soil depleting crops in 1935. (2) To pay farmers a Soil Building Grant of \$1 per acre on soil conserving crops or soil improvement-crops now in, or to be put in. Provided, that each farmer earns the \$1 per acre by performing certain soil improvement practices anywhere on his farm at certain rates to be set for such work.

MICHIGAN RURALIST HAS MANY POPULAR FEATURES

Michigan's new bi-weekly farm magazine is unique—it is printed in the country in connection with an experimental farm. Articles written on the farm after trying new methods, new strains and breeds, are educational and helpful to all. Market gardening, roadside and public markets, and news of the co-ops are among the departments not found in other farm papers. A postcard request to Michigan Ruralist, Grand Rapids, will bring a sample copy.

Durand Ogden Adds New P. A. System

Will Enable Overflow Attendance to Hear Services

Always striving to please, Durand Ogden, Funeral Director, of Clarkston, has added a public address system which will enable the largest attendance at a funeral to hear every word of the service. This system can even be turned on in such a manner that should the attendance be forced to stay on the front lawn it will still be possible to hear the service very easily.

The system permits the organ being picked up and broadcast throughout the whole mortuary, and by having the loud speakers located throughout the building echo organ effects can be realistically reproduced.

BASEBALL

Baseball season opens Friday in the Southwestern Oakland County Athletic League. The local high school team travels to Keego Harbor to meet them in the first game of the season for each team. Keego will present a strong line-up of lettermen from last year's championship team which tied with Milford for the Co-Championship of the League.

Both Keego and Clarkston will be far from top form as outside practices have been held only 3 times so far due to the cold wet weather.

Clarkston line-up will probably be as follows:

Mann catching.
Molter on first.
Secord at second.
Souby at third.
Parker at short.
L. Rexford field.
Yost field.
Newman field.
Russell or McReynold will probably be on the mound.

The squad numbers about 20 players, and a half a dozen or more boys not mentioned above will no doubt break into the line-up.

The infield looked as though they had the makings of a good combination in practice. The outfield will be fair in fielding and if Yost can turn the catching duties over to Mann and patrol in left field the hitting of the outfield will be materially strengthened. Mann has had very little practice so far and may not be ready for duty by Friday. In such a case Yost will catch, and another outfielder named.

The following Friday Brighton comes to Clarkston for the first home game of the season.

"The Ford V-8 uses less fuel and oil for the power it gives than any other car we have ever made"

AND ITS UP-KEEP COST IS THE LOWEST"

ENTHUSIASTIC sales talk often begins and ends with gasoline mileage. Some salesmen would like you to believe it is the whole story of automobile economy. But drivers ought to know better. For the fact is, it's way down the list. The big items of car economy are low first cost, low up-keep cost and low depreciation. Savings here can make a great deal of difference in cost per mile. Gasoline mileage is more of a talking point than an economy factor. Check up and you will find that the difference between 17 and 19 miles a gallon is less than \$10 for a whole year's average driving (8400 miles at 18 cents a gallon). Here are the big items that make the Ford the most economical car: More value for every dollar you pay. Lower cost for repairs and service. Long life. Slow depreciation. Quality means economy and the 1936 Ford V-8 gives you more real quality than any other low-price car. No other car under \$1645 has a V-8 engine. No other low-price car has Center-Poise Riding, safe, sure mechanical brakes and Safety Glass all around at no extra cost.

\$25 A MONTH WITH USUAL LOW DOWN-PAYMENT. BUYS ANY NEW FORD V-8 CAR ON NEW UCC 1/2% PER MONTH FINANCE PLANS.

Who is to administer the spending? What does this business improvement mean? Will it continue? Why is there another side to so many questions? All this makes you ask yourself—"How can I keep abreast of the times, understand what events mean, discuss national affairs intelligently?"
