Baccalaureate exercises will be held Sunday evening, June 6th, at the Waterford Community Church at 8 o'clock.

The graduation exercises will be Thursday evening, June 11th, in the High School Auditorium at 8 o'clock. The theme of the exercises will be "Waterford Community Club".

The graduating class has sixteen members. The officers are: Jack Jacober, president; Lorraine Coons, vice-president; Kuga Kojima, secretary, and Franklin Souls, treasurer. Class colors are lavender and gold, class flower is the yellow rose, and the class motto is "Not finished—just begun".

Final plans to be announced later. The tenth grade Skip Day was May 18th. The class went to Belle Isle in the morning. They spent the morning in enjoying the sights on the island. A picnic lunch was served at noon. In the afternoon we went to Navin Field to see the Detroit-Boston game. Everyone who made the trip had a pleasant day.

**Rubinoff Holds World Record for Broadcasting**

Rubinoff and his violin—and Chevrolet—are a combination that few, if any, radio listeners in the United States have not received in their homes via the air. The famous violinist and his Stradivarius, stars of the Chevrolet Musical Moments programs, have the distinction of going on the air from more broadcasting stations than any other program in the history of radio. Three hundred and seventy-eight stations broadcast Rubinoff three times a week, a total of 1134 fifteen-minute programs. That figures out at 283 hours, and if one week's programs were broadcast one after the other, day and night, it would require 11 days. The illustration shows Rubinoff, carrying his precious violin, posing with his car after a special appearance at Detroit.

CAPITOL BUILDING—LANSING

**HAVE YOU SEEN THE SIGHTS IN Michigan?**

To MANY PEOPLE, the ideal vacation is one devoted to sightseeing. In order to enjoy themselves fully, such vacationists require three things: Sights worth seeing; something to travel in; and good roads to get there.

Very few parts of the Union offer as much in these respects as the State of Michigan. Here are many spots well worth visiting—historic buildings and grounds, interesting cities, and open country of unsurpassed scenic beauty. The journey itself becomes a separate pleasure, a real addition to the joys of vacation. Splendid highways, fine lake liners, trains, buses,

planes—all these means of transportation, comfortable and economical, stand at the service of those who are planning to see the sights.

Have you considered Michigan for your own sightseeing? Have you told your out-of-State friends of the exceptional advantages here? If so, you have done them a favor—and promoted good will for the Wolverine State.

As our part in such promotion, this series of advertisements is being published throughout the State of Michigan by an organization that can prosper only as the other citizens of Michigan prosper.

**AUTOMATIC ELECTRIC HOT WATER!**

Electricity has provided so many comforts and conveniences for the home that it is not surprising to discover one more, the newest contribution to better living—automatic ELECTRIC hot water. This new service is *completely automatic*: It requires no attention whatever. Whenever you need hot water, simply turn the faucet—and there is your hot water on tap. This carefree service frees you forever from such bothersome details as running up and down stairs to light a manually operated heater, the annoyance of "tank patting" and waiting for water to get hot, the inconvenience and delay caused by having only lukewarm water in the pipes.

You will find a plentiful supply of hot water a great comfort in your home . . . for bath and shower, for shaving and washing, for cooking, cleaning, laundering, dishwashing and countless other daily tasks. You can make housework easier and pleasanter with the liberal use of hot water. Once you have enjoyed the convenience of this automatic hot water service, you will wonder how you ever did without it. **HOLLY THEATRE**

Faith Baldwin's ultra-modern metropolitan conflict of a millionaire husband caught between the loves of two women—his wife whom he adores and his secretary whom he respects—is recommended to all those in search of the best entertainment of 1936.  
 Above everything else, however, Metro-Goldwyn-Mayer's "Wife Versus Secretary", playing Sunday, Monday and Tuesday at the Holly Theatre, has the great starring combination of Clark Gable, Jean Harlow and Myrna Loy heading the admirable cast so ably directed by Clarence Brown.  
 "Wife Versus Secretary" is a most modern story of Van Sanford (Clark Gable), prosperous young magazine publisher; his wife Linda (Myrna Loy), and his lovely and capable secretary, Miss Wilson (Jean Harlow).  
 Gable in the polished big-business role of Van—a decided contrast to his recent vigorous roles as Fletcher Christian in "Mutiny on the Bounty" and Captain Gaskell in "China Seas"—establishes his right as one of three international leaders of the starring ranks.  
 Jean Harlow again appears minus her platinum tresses, and as the secretary reveals new talents in versatility. Miss Loy, the screen's ideal wife, proves that she can be just as faithful to Gable as she was in the role of William Powell's wife many times past.

**For Homemakers**  
 Only two things are certain and those two things are death and taxes, one philosopher once said. But many Michigan households have come to expect spring and summer to also make certain the raiding forages of ants in the cupboards and food containers.  
 Even if the pests do not enter the home, they may cause damage or unsightly conditions in lawns, in fields or gardens or on trees. Professor E. I. McDaniel of the department of entomology at Michigan State College, has prepared Extension Bulletin No. 166, "Ant Control in Houses and on Lawns". The bulletin will be available in a few days through the Bulletin Department, Michigan State College, East Lansing.

In brief form the simple practices which will control ants include two types of poisons for use against the armies that attempt to march into the home. For ants that are after sweets, Miss McDaniel suggests using dry poison sugar, liquid poison or powders such as fluorine compounds, pyrethrum or borax. The household "grease feeders" can be handled an enticing control of dry poison worked into grease, or commercial bait.

**ALFALFA CURING AFFECTS QUALITY**  
**Windrow Method Necessary Advises Expert at M. S. C.**

With more acres planted to alfalfa than in any other state, and with the 1936 crop expected to exceed all records, curing alfalfa becomes of major importance to Michigan farmers this year.  
 R. E. Decker, extension specialist in farm crops at Michigan State College, East Lansing, advises farmers against curing hay in swath. That

deprives alfalfa of two-thirds of its proteins, he says, and ruins the leaves where much of the food value is stored.  
 Michigan's alfalfa acreage has increased steadily during depression years. In 1930 there were 572,000 acres grown. Last year, it was 989,000. Mr. Decker believes that 1936 will have a larger acreage because of the abundant supply of good seed.  
 "Don't leave alfalfa in the swath", he says. "Cure it in the windrow. Curing it in the windrow saves the leaves and gives better color. Alfalfa can be left in the swath for about four to six hours but should be raked up after that."  
 Alfalfa should be cut when the

plant starts to bloom, which usually takes place in Michigan around June 2. In some cases, good hay is obtained if cut shortly before blooming time, but the stand is hurt if the second cutting is also made before blooming.
