This locality is greatly blessed by hills, swamps and valleys and bird life is very abundant. It is the haven for many birds throughout the season. Early in March we can look for the robin, the purple grackle, the red-winged blackbird, the pine grosbeak, the phoebe, the meadowlark, the swamp sparrow, the fox sparrow, the kingfisher, the mourning dove, the cowbird and the bluebird.

To the music-lovers the musical event will be the song of the swamp sparrow. When the ice leaves our ponds and lakes we can expect a migratory visit from the wild geese and soon the wild ducks will appear. The most cheerful song is the song of the bluebird.

The Bluebird

The bluebird like the robin belongs to the Thrush family. It was called the blue robin by the pioneers. It is a smaller bird than the robin and like the robin its song is always associated with the return of spring. Poets and song-writers have written about the qualities of this bird, of its message of love, adoration and the song that tells of a happier day. Its disposition is always sweet, gentle, and amiable. Its spring song contains all the gladness of spring and its plaintive notes in the autumn declare the passing of the seasons.

When the first warble of the bluebird is heard early in March, the farmer starts his plowing, the sugar camps reopen and we know that spring is here. The glad notes of "truly truly" comes to our ear with welcome.

The bluebird winters just a little south of us and its arrival starts activity in the orchard and scattered timber. English sparrows have driven the bluebird from our door and made them resort to the neighboring woods and orchards. It is the first of our birds to begin housekeeping and very early after arrival explores the holes in fence posts, hollow trees or bird boxes and lays her bluish white eggs.

The bluebird is a very beneficial bird and should be protected. It is an

insect eating bird and protects the orchards by eating cutworms, beetles and caterpillars. It is of inestimable value to the farmer and fruit grower.

Various devices like an old fence post with a hole in it, a hollow log placed high above the ground or a home made bird house are attractions to bring the bluebird back to nest near our door.

The bluebird because of its beauty, cheerful song and benefits to mankind is protected in Michigan and has been chosen as the representative bird in New York, Missouri, and Nevada.

A LOT OF CAR for a VERY LOW PRICE. The Ford effort to make your dollars buy a constantly better car is well illustrated in the Standard Ford V-8. It has all the basic Ford advantages. It is built on the same chassis as the De Luxe Ford V-8. It gives you a choice of smooth 85-horsepower or 60-horsepower V-8 engines. But it sells at low prices, and includes bumpers, spare tire, cigar lighter, twin horns and other equipment that make it a still bigger bargain. With the thrifty 60-horsepower engine, the Standard Ford V-8 is priced especially low and gives the greatest gas mileage in Ford history. Hundreds of owners report averages of 22 to 27 miles a gallon - of even more. Your pocketbook will approve of the Standard Ford in every way. And so will you when you drive it! Ice Cream Celebrates Fifth Anniversary Friday. Special Sales Event Announced by White Gold Company. The White Gold Ice Cream company is having a birthday party today. It was just five years ago that Robert E. White, owner-operator of the firm, set the wheels in motion to start production of one of the finest ice cream products coming out of Flint. This birthday celebration of Bob White's will affect not only his own employees, but the general public as well. For today only, he has ordered 8,000 pints of buttered pecan ice cream to be sold through the independent drug stores which are his distributors at nine cents a pint. The delicacy is the regular grade White Gold ice cream. White's reason for the special sale is simple. "The druggists and people of Flint and neighboring towns have been so good to us that we want to do something for them to show our appreciation," he avers. "Our ice cream is retailed only through independent drug stores." The White Gold firm supplies its products in bulk and package form to 82 dealers in Genesee, Shiawassee, Oakland, Livingston, Lapeer and St. Clair counties within a radius of 60 miles. Of the two forms of his product, White says, "In this plant, bulk and package ice cream are made from the same identical ingredients. There is no more modern ice cream manufacturing plant I know of, and it is the only plant I know of in Flint where ice cream is made within easy view of the public." White's history includes 18 years spent in the ice cream manufacturing business. He was originally employed by such a firm in Erie, Pa. His first venture on his own came with the inception of the White Gold plant March 11, 1933. Ten persons are engaged in the plant proper. White, who believes in a close personal contact in his business, does his own selling to the retailer. "It is my belief," he explains, "that when the owner of a production unit meets the owner of a retail firm, the two know within 15 minutes whether they are going to do business."
