## Clarkston Pastors Honored Wednesday

### Large Crowd Gathers for Reception

On Wednesday evening a fine crowd attended the reception for Clarkston's new Pastors, Rev. Ballagh of the Baptist Church and Rev. Large of the M. E. Church. The reception was held in the parlors at the M. E. Church.

While the reception line formed shortly after eight o'clock Mrs. W. W. Watson presided at the piano and everyone was happy while folks of every sect greeted Rev. Large and Rev. Ballagh and said farewell and thank you to Rev. and Mrs. Edwards who have served this community so faithfully for the past six years. Mrs. Albert Lawson presented Mrs. Ballagh, Mrs. Large and Mrs. Edwards with lovely bouquets of sweetpeas.

As they left the receiving line the guests went to the refreshment table where they were served punch and cookies. Back of the refreshment table were hollyhocks arranged as in a garden.

A short program was then presented. Miss Margaret Harris sang "Your Song from Paradise" and this seemed to harmonize perfectly with the occasion. Mr. Shackley Boynes then welcomed the new Pastors and expressed the appreciation of the whole community to Rev. and Mrs. Edwards for their untiring work during their stay here. Rev. Ballagh and Rev. Large spoke briefly and expressed their delight in being here. Lewis Warden in his usual capable manner sang two numbers, "The Clang of the Hammer" and "It's Quiet Down Here".

For an hour or more the crowd lingered and visited and made the newcomers feel that they were joining a big happy family.

Besides Clarkston folks there was a very fine representation from Seymour Lake.

## Water Safety Measures Needed in County

### Many Take Advantage of Red Cross Swimming Lessons

857 individuals took advantage of the Water Safety program of the Oakland County Chapter last week according to Mr. Kline Hartman, Chairman of Life Saving Committee, at twenty-one beaches and pools in the county.

Classes are held once a week during the summer months. This program is made possible by the Red Cross Roll Call held annually.

With 7,000 death-by-drowning accidents in the United States last year the need for Water Safety measures is apparent. The American Red Cross Life Saving Service is endeavoring to reduce the annual occurrence of water accidents.

Mr. Hartman suggests the following tips to prevent drownings:

"Do not dive into water that is muddy or of unknown depth without first exploring the bottom with your feet.

"To keep the feet from sinking in a vertical position when floating, relax elbows and knees and open arms and legs to the sides. As the arms are brought sharply to the side and held there, the legs should be pressed together, forcing the water out. If this is done slowly and smoothly, it is possible to stay afloat for hours.

"When wading breast-deep in a stream, go against the current and not with it to avoid being swept into deep holes. If you lose your footing, swim with the current, making for the shore at an angle, instead of fighting the stream.

"If you come up beneath a float, hold your breath and open your eyes. There is probably ample air space there, and if you don't give way to panic you will be all right.

"It is best to wait at least an hour and a half after eating before going into the water, to insure against cramp.

"When boat or canoe overturns, stay with it. Any rowboat has the buoyancy to support its regular load of people whether rightside or bottom up. Bottom up it furnishes a floating air chamber that will sustain the heads of more people above water than could have possibly been in the boat before it capsized. Right side up and full of water the boat will sustain the heads of its passengers above water if they will sit on the floor and not try to rise as the water creeps toward their chins.

"Do not try to show off skills which you do not possess. Statistics show men and boys are usually at fault here. About ten males drown for every female. No one is superior to safety regulations."

To train the experts who train the life guards and swimming instructors, Mr. Hartman said, the Red Cross conducts during the summer months 14 aquatic schools in 13 states, each with an enrollment of more than 100 persons. Student range from novices to trained swimmers, he added. Many are people responsible for the public safety at swimming places; while others are safety directors at parks and waterfronts who have already qualified as experts.

Numbered among Red Cross instructors at the schools are former Olympic swimming champions, Mr. Hartman added. The majority are men with an impressive record of Red Cross experience in teaching others the safety measures and skills found most effective by the organization during nearly a quarter-century of "Waterproofing" America.

Red Cross classes:  
Bald Eagle Lake, every Tuesday—10:00 to 11:30.  
Deer Lake, every Tuesday—12:30 to 2:00.  
Waterford, Craiges Beach, Windate Park, every Tuesday—2:30 to 4:00.

Baseball seems to be the big topic in scouting at the present. In the last series the team supervised by George Cervenka won 5 games out of the five played. This team is seeking more opponents and is serving notice on all teams who wish to play. Kenneth See who is supervising a scout team will play anywhere and at any time. For further baseball information get in touch with George Cervenka or Kenneth See or the Scout Master.

It also appears as though we would have a large group of first class Scouts, judging from the number of second class scouts passing the test.

**when you buy a new stove today!**

Electric cooking is the up-to-the-minute cooking method in use today. The modern electric range represents the last word in fine cooking equipment. But what about tomorrow?

Twelve years is the average length of time a family keeps a stove. This means that the stove you buy today will be cooking for you in 1950. If you buy an ELECTRIC range, you can be sure that it will be as modern then as it is now. The trend is to electric cooking: Sixty thousand of your neighbors now cook electrically. Last year alone, 10,000 families in and around Detroit switched to electric cooking.

What are the reasons for this rapidly growing popularity? An electric range offers 6 proven advantages that you get in no other stove:

- (1) CLEANLINESS—An electric range cooks with pure heat from a glowing wire—heat as clean as sunlight. Your kitchen walls and curtains stay fresh for a much longer period of time, with less frequent redecorating. Cooking utensils remain bright and shiny after long use.
- (2) COMFORTABLE COOKING—An electric range will not raise the kitchen temperature even one degree, no matter how warm the weather. It is a boon during the hot summer months.
- (3) BETTER FLAVOR—Electric cooking has a deliciously different flavor—a natural flavor in foods. Meats and vegetables cook to melting tenderness in their own juices.
- (4) WATERLESS COOKING—The waterless cooking method seals in precious minerals and important food values. On an electric range, vegetables are steam-cooked: Half-a-cup of water is ample.
- (5) MORE LEISURE—An electric range is time-saving . . . it gives you extra hours of freedom away from the kitchen.
- (6) MODERN COOKING—This modern cooking method is fast, simple, safe—and convenient. Snap the switch and start to cook. Thanks to the accurate-oven heat control, you can get the same perfect baking results time after time, without guesswork.

Let your dealer tell you about these features of the 1938-model electric ranges.

**ONLY AN ELECTRIC RANGE GIVES YOU ALL THESE IMPORTANT FEATURES**

Electric Heat As Clean As Sunlight	Cooking Utensils Stay Spotless Forever	No Flame, No Matches — No Baking Failures	Accurate Heat Control Cook Your Dinner While You Are Out	No Food Values Poured Down the Sink	Kitchen Temperature Is Not Raised	Healthful Waterless Cooking
