**Library Facilities**

**Open to Public**

The Drayton Plains Community Library Project which was started last fall by the local P. T. A. has been moved from the Appleton home to the school. One hundred and twenty-six books—mostly fiction—have just arrived from the Michigan State Library. These books combined with the present school library make about 800 books available to the readers of Drayton Plains.

The books are now being catalogued by Miss Frances Jones, who will be in charge of the library during the summer months. Opening day will be Tuesday, July 16, and will continue during the summer on the following schedule:

Tuesday 9-12 A. M.  
Wednesday 7-8 P. M.  
Thursday 9-12 A. M.

It is hoped that the people of this community will respond eagerly to this enlarged community library.

Once the world's chief source of fur supply, the United States is now the largest fur consuming market in the world and depends on imports for half its requirements, the federal Fish and Wildlife Service reports.

It is easy to mow your lawn with a Silent Yard-Man—the most modern of all lawn mowers. Light in weight, yet sturdily built for strenuous service, and really silent—no more noise or clutter. . . ASK US FOR A FREE TRIAL ON YOUR OWN LAWN.

**CHRISTIAN SCIENCE CHURCHES**  
 "Sacrament" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, July 14.

The Golden Text (John 4:23) is: "Thee hour cometh, and now is, when the true worshippers shall worship the Father in spirit and in truth: for the Father seeketh such to worship him."  
 Among the Bible citations is this passage (John 6:27): "Labour not for the meat which perisheth, but for that meat which endureth unto everlasting life, which the Son of man shall give unto you: for him hath God the Father sealed."  
 Correlative passages to be read

from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following: (p.30): "As the individual ideal of Truth, Christ Jesus came to rebuke rabbinical error and all sin, sickness, and death, to point out the way of Truth and Life."

**LEGAL NOTICES**

**JOHN L. ESTES, Attorney at Law,**

*business prediction*  
 FOR JULY AND AUGUST—

**CRISP, COOL WEATHER**  
 and profits all summer long!

No longer is there any doubt about the VALUE of summer air conditioning for retail stores, restaurants, theaters, beauty parlors, etc. It has proved its worth in cold cash figures through sales increases of anywhere from 10 to 50 per cent in many different types of business. Air conditioning is now so generally accepted by the public that a merchant who tries to get along without it is severely handicapped.

Why TRY to get along without it? Air conditioning is not an added expense: It is a paying investment that can earn its way in increased profits. Besides, it offers many other worthwhile advantages: **MORE EFFICIENT EMPLOYEES**—your sales force is more cheerful, more alert and attentive, can do a better selling job. **LESS HOT WEATHER SPOILAGE**—reduces losses of perishable goods. Fewer mark-downs due to soiled merchandise, perspiration stains, handling, etc. **REDUCED CLEANING EXPENSE**—no open windows to admit dirt, dust and grit. Less frequent dusting of floors, counters, walls. **CUTS DOWN STREET NOISES**—excludes traffic din, makes for quieter and more attractive surroundings.

Any air conditioning dealer or distributor will gladly make a study of your cooling requirements and give you a free estimate. Telephone today. The Detroit Edison Company. (We do not sell or install air conditioning equipment.)

**Try Michigan for YOUR Vacation!**

Michigan's fine roads do much to account for our State's prestige as a far-famed vacation playground.

Land ahoy!... Five thousand lakes make Michigan a favorite gathering place for those who are interested in sailing, canoeing or motor-boating.

**HAVE you considered Michigan for your vacation?** There is much to recommend it. You can, for example, pitch your tent or park your trailer beside a lake no larger than a mill-pond, or one so vast that it resembles an inland sea. You can choose among thousands of trout streams. You can visit historic shrines and famous industrial plants... hike through splendid forests... or doze among picturesque sand dunes! A great vacation State, Michigan has this added advantage: It's nearer, so your money goes farther!

And while you are away, remember that you can be near home as the nearest telephone.

Those Strange Songs of "Rosemary," the Oxford Egyptologist Says, Reveal at Last How the Ancient Egyptians Talked, and Have "Revealed Her Memories" of Dreadful Experiences With Nero's Wife, France's Revolutionists, the Pilgrims, and Earlier, in the Court of a Pharaoh. By H. George Franks, Roving British Author and Journalist in the Sunday Herald-American, July 14, 1940.

**OPERATOR SENDS POLICE, WHO NAB BURGLAR**

Quick thinking on the part of Mrs. Donnie Mills, night telephone operator at Athens, Ga., led recently to the arrest of a burglar. When a call came through from a sandwich shop at 4:30 o'clock in the morning, Mrs. Mills became suspicious, as she knew that the shop closed around midnight. She called the police immediately and told them about the call, and then switched back to the shop and held the caller on the wire, under the pretense that she was trying to complete his call. When the police arrived they arrested a man who had broken in.

**Defense Needs Exert Influence on Road Programs**

Lansing, July 3—National defense needs are exerting a strong influence on highway construction programs in Michigan, it was indicated this week by State Highway Commissioner Murray D. Van Wagoner. Construction programs planned by the department for this year and next include \$6,000,000 to be spent for projects on 2,400 miles of state trunk-line highways designated as having special military significance by the U. S. War Department. This represents nearly 40 per cent of the total two-year program.

**Federal Aid Needed**

"The state highway department is attempting to allocate projects on regular construction programs to meet the military highway needs in Michigan to as great an extent as possible," the commissioner said. "Regular programs, however, do not permit us to bring our highways to

war department standards immediately. To accomplish this will require additional Federal help."

**Report Filed**

Improvements on military highways are left to the discretion of state highway officials. The War Department emphasizes roads linking industrial areas with each other and with sources of materials; airport and railroad connections; and routes to vital defense plants along lake coastlines. These roads are the same ones that now are serving the bulk of Michigan's pleasure and commercial

traffic. Commissioner Van Wagoner said that a condition report on these highways had been filed in Washington in the hope that Congress would provide funds for their improvement for military purposes.

**CARD OF THANKS**

We wish to thank our friends and neighbors for the lovely gifts, cards, flowers and best wishes we received when we celebrated our silver wedding anniversary two weeks ago. Mr. and Mrs. Clarence Drake.

**Transportation**

Come in and look these over. We will try and fix you up with good transportation.

**Careers in Engineering**

By R. T. Strohm

Dean, International Correspondence Schools

SOME authority has determined that out of one hundred engineers, thirty-five will be working as civil engineers, twenty-five as mechanical engineers, twenty-two as electrical engineers, seven as chemical engineers, four as mining and metallurgical engineers, two as industrial engineers, and one each in such fields as architectural, agricultural and ceramic engineering. Under each of these "broad" headings, the young man may specialize. For instance, the civil engineer may devote his efforts to surveying and mapping; or he may turn to highway and railway engineering in the design, planning, location, construction and maintenance of roadways, bridges, culverts, tunnels and grades. He may find that his interests lean toward the building of hydro-electric dams, draining swamp lands, irrigating desert areas, deepening the channels of rivers and harbors, constructing reservoirs and canals; or he may specialize in sanitary engineering.

Engineering covers almost every phase of human activity. There is research, design, experimentation, construction and manufacture, sales, adaptation, application, service and operation. There are opportunities for men of ability in many special fields. It also is possible for a young man to change from one field to another. The world has need of the trained man today and the demand is increasing.

By BETTY BARCLAY

When Grandfather succumbed to spring fever, Grandmother prescribed plenty of sulphur and molasses. How much more palatable are the fresh fruits and greens which constitute today's prescription for that seasonal complaint!

Combining fruits and greens such as lettuce, chicory or watercress to make a salad is distinctly twentieth century American. At the top of the list of salad fruits is the orange. Oranges are available the year around from California groves where the Naval variety ripens during the winter and Valencia oranges are picked all summer. This season the fruit is unexcelled.

In addition to the healthful minerals and vitamins in which oranges abound, making them among the most potent as well as the most palatable of spring tonics, they are marvelous mixers with seasonal fruits. Naval oranges are easiest to divide into sections; when using the summer Valencia it is usually better to slice them. In any case the entire outer skin and membrane should be peeled away from the fruit, down to the juicy meat, as shown in the photograph.

There are so many ways in which a simple salad of orange slices on a bed of greens may be completed that this one was left unfinished for you to center as desired. Here are some suggestions for topping the salad in the making.

- Any berries in season.
  - Melon and cantaloupe balls.
  - Tablespoon each minced celery and green pepper.
  - Tablespoon each minced celery and sweet onion.
  - Prunes or dates stuffed with cream cheese.
  - Walnut-cheese bonbons.
  - Avocado balls or slices.
  - Fresh cherries.
  - Banana slices.
  - Frosted grapes (grapes dipped in egg white and sugar).
  - Mayonnaise and pimiento strips.
  - Tablespoon cottage cheese.
  - Sherbet of any variety.
- An excellent dressing for fruit salads uses:
- 2 tablespoons lemon juice
  - 3 tablespoons orange juice
  - 4 tablespoons oil
  - ¼ teaspoon salt
  - 1 tablespoon sugar
- Mix all ingredients thoroughly.

**REMOVE FAMED PHONE LINE OVER HIGH PASS**

Poles Permanently Set in Ice at 13,000 Feet; Maintenance Was Difficult in Mountain Area

When the telephone line which crossed Imogene Pass in southwestern Colorado at an altitude of more than 13,000 feet was removed recently, a famous landmark of communication passed into history. It has been replaced by a new line over a less difficult route.

**Special Construction Was Necessary**

The line over Imogene Pass was one of the highest and most difficult to construct and maintain in the entire Rocky Mountain section. Because of high winds, sleet, and heavy snow, a special type of construction was used on the pass and its approaches. For the longest wire spans, of approximately 1,000 feet, sturdy structures of three poles each were used.

Near the top of the pass there is a covering of slide rock, and just beneath this is a glacier-like formation where the ground is perpetually frozen. Here the poles were originally set in ice and remained so through the years.

**Snowshoes Needed in Winter**

All patrolling and repair work had to be done on snowshoes in winter. A shelter house was maintained at the top of the pass, containing a telephone, stove, wood and emergency supplies. This was anchored at four corners to keep it from blowing away in the intense gales that swept the high peaks.

The line passed through a rugged, narrow canyon of perpendicular walls and rock points, some more than 2,000 feet in height. Entrance could be made only by descending from the top, holding on to cables placed there for the purpose when the line was built. In other places, hand lines had to be used because of the steep slopes.

**First Built Prior to 1900**

This is a region of unsurpassed scenic beauty, innumerable waterfalls, and peaks in excess of 14,000 feet.

In the early days, prior to 1900, this telephone line was constructed between Ouray and Telluride, in Colorado, over the San Miguel mountains, to extend telephone service to the growing town of Telluride and the prosperous and active regions in that vicinity.
