Parkway Proposal Explained at Meeting Sponsored by Rotary

On Monday evening, October 14th, motion pictures and slides were shown by Col. Sidney D. Waldon with the assistance of Mr. Fred Shaw and Mr. Thomas Sweeney. The presentation brought to light that if any other county contiguous to Wayne voted "yes" for the proposal along with a "yes" voted from Wayne that the project could begin.

The information was given that in the next few years large sums of gasoline and weight tax money will be available for the parkways because the Covert indebtedness and other road debts will soon be paid off.

The value of the parkways in the metropolitan areas will be (1) Faster movement of traffic to and from Detroit, (2) The reduction of delinquency in the counties where parkways are built for recreation. This value has been amply demonstrated in other parts of the nation where adequate provision has been made for recreation; (3) The enhancement of property value immediately adjacent to the parkways, as well as to property further away.

OLD BILL says
"Here's what I think—"

"I see by the papers that the Gallup poll shows one out of every three persons hasn't made up his mind whether to vote four years for Willkie or nine, ten, eleven and twelve years for Roosevelt.

"Well, if I were a veteran, I'd remember that Willkie volunteered within 24 hours after we got into the last war. He won his captaincy by overseas service on the front line, not by White House pull. He didn't warm a swivel seat at Washington, either.

"If I were a mother, I'd surely want to know how far the Brain Trust has involved us down a costly and bloody road to war. Who and where are those 2,000,000 American boys going to fight, anyway—in France again, or Japan?

"If I were a laboring man, I'd want a steady job with good pay and reasonable hours. I can trust a man like Willkie, who rose humbly as a worker himself to responsibility as an employer of thousands of folks. He served even as legal counsel for labor unions, wants to preserve and extend our social security laws, and otherwise give the worker a real deal. I'd believe in a man who proved during the depression that it could be done—lowering consumer costs and putting more men to work, both at the same time! After all, you've got to have a job first before you can bargain with anyone.

"If I were a business man, I'd certainly remember the staggering debt of 60 billions spent in the past seven and a half years, the mounting burden of taxes, and the un-American inciting of class against class. Let's give business a chance!

"If I were a farmer, I'd think twice about today's low farm prices, our threatening national bankruptcy, and I'd support this next-door Hoosier just because it makes good horse sense. Here's a man who owns his own farms. You can't go wrong with Willkie.

"It was Churchill, a few years ago, who said Roosevelt had failed to solve the depression here and was hurting world recovery. What did the British do when Chamberlain got them into the middle of the stream, even after war was declared? Why, they turned to this man Churchill!

"I feel we're in the same fix now. It's high time we turned to our American Churchill, Mr. Wendell L. Willkie, while there is still time for us to keep out of war.

"Yes, they threw rotten eggs at him in some of the automobile towns. Well, some radical agitators threw more than that at the good name of Michigan in 1937, and you remember what we folks did in November, two years ago? We made no mistake then.

"Let's finish the job on Nov. 5!"

MECHANIZED PREPAREDNESS

Mechanized and motorized forces are essential to telephone preparedness. In Michigan there are 1,275 telephone trucks and cars — most of them equipped with tools, power units and material. Their day-by-day work may not seem dramatic. But in time of emergency . . . flood, tornado, sleet storm . . . these mechanized forces can be mobilized like an army. For instance, following the 1938 hurricane in New England, Michigan's trucks and trained crews worked side by side in the storm area with others from as far west as Nebraska. Mechanized preparedness is but one of many reasons why this Company is ready to do its part in the program of national defense.
