School Dance To Be Held Saturday Night

Night Changed on Account of Basketball Schedule

The regular school dances which have been taking place on Friday nights will be held on Saturday nights until after the basketball season. The dances will be conducted in the usual way with Don Smith's orchestra furnishing the music. The dancing instructor will be present at 8:00 o'clock and the regular dancing will start about 9:00 o'clock.

These dances have been attracting the youth of the town and the surrounding districts and many of the older folks who have attended have had an exceptionally good time. There are parents in charge and they see that everything is conducted in an orderly manner.

Filmed in spectacular Technicolor, he exciting and stirring climax to the daring exploits of the world's most famous outlaws comes to the screen the Holly Theatre Sunday and Monday in "The Return of Frank

The millions of moviegoers who thrilled to last year's "Jesse James" will find this new Darryl l. Zanuck production even more coloriu tion-packed. These same millions will also find many familiar faces in the cast, for "Jesse James" players fill most of the important roles.

Henry Fonda, who created the part of Frank James, Jesse's grim older brother, is cast in the title role. Others appearing in the production, who were also featured in "Jesse James". include Henry Hull, John Carradine, J. Edward Bromberg, Donald Meek. Ernest Whitman, Charles Tannen and George Chandler.

The cast is completed by Gene Tierney and Jackie Cooper, who are featured, and such popular favorites as Eddie Collins and George Barbier.

The story of "The Return of Frank James" is the story of Frank's determination to avenge the cowardly murder of his brother Jesse, shot in the back by the traitorous Ford brothers. Railroad money paid the Fords, and a gubernatorial pardon set the Fords free after a jury had convicted them, so Frank realizes the only way he can revenge Jesse is to return to outlawry.

Always maintaining a high pitch of excitement, the picture then follows Frank over all the lawless West, with tremendously stirring scenes of robbery, murder, gun-fights, man-hunts, train hold-ups, escape and pursuit. Too, there are scenes of gentle romance. In Denver Frank meets and

falls in love with Eleanor Stone,

played by Gene Tierney. The girl per-

ceives Frank's real character and attempts to persuade him to give himself up. The picture's climax is tense and dramatic-as Frank at long last

For Homemakers

Stubbing a toe is a misdemeanor. At least that's the rating given to he mishap by members of the home economics staff at Michigan State

For the bruise usually means that nore and better lights are in order. Good lighting is termed a step toward increased home safety, comfort and onveniences.

For farm homes the start of better lighting probably is out in the yard, where a light on high pole san safeguard the home from prowlers and ntruders and can make it easier to get to and from the house on a dark

Indoors, such things as a threeway switch for a stairway are reommended. Falling downstairs in he dark is a common and serious ome accident. Bruises from colliding with furniture usually result from maccessible switches or insuffcient

A switch at the doorway of each oom prevents much of these common ollisions with furniture.

Another safety suggestion is the se of a small night light in an uptairs hallway. Other dim lights isually are not recommended, especially when they involve the use of colored bulbs. Better light for readng costs less nowadays, which means no economy in having poor lights and defective eyesight.

More than seventy years ago a postage stamp was "sliced" to provide a lower official value. Today history repeats itself.

On November 30, a letter was received in Toronto, Canada, with a special delivery stamp of 20 cent value cut in half diagonially by a postmaster in a small western town, not having a 10 cent denomination in stock. The service rate had been 20 cents but the rate was cut in half a few months ago, so the stamp was cut accordingly. Evidently the cut stamp was officially recognized the letter was delivered.

Working Toward a **New Day**

NEW note of understanding has come A into the American Public's thoughts concerning the railroads.

It is now recognized that the coming of new forms of transportation has brought about disruption of the normal transportation situation. These new agencies must be properly fitted into the nation's distribution system if the best interests of the public are to be served. And certainly that program must include attention to the present disordered and unfair regulation requirements under which the railroads are the worst sufferers.

Armed with this new sympathy, the public in recent years has sought to rectify this injustice. Congress, in 1935, and the various states have passed laws to this end. This year Congress enacted the so-called Transportation Act of 1940.

But much additional progress along this line must be made before the railroads are on a parity with their competitors. To achieve equality will not harm other forms of transportation; is no more than justice requires; and definitely will be in the public interest.

Our members of the Michigan legislature and our representatives in Congress are urged to exercise justice, fairness and common sense in considering any legislation intended to bring equality into our transportation industry.

Mrs. Walter: I was quite pleased with their final performance and thought that Chester Morgan was outstanding. I was sorry that it was not a better night.

Marjorie Lindsey: I believe that Chester Morgan "stole" the show.

Betty Ash: I thought that the whole cast was good and Chester Morgan's acting was exceptionally well done.

Stewart Baynes: Rastus was the 'life of the pray,'

A squirrel is perhaps the last thing you'd think of as a menace to telephone service . . . but he can do a lot of damage by gnawing through the lead sheathing of a telephone cable. To guard against damage from punctures, many cables are kept filled with gas. The instant gas escapes, the lowering pressure automatically sounds an alarm in a central office. The location of the break is determined within a few feet, and often the damage is repaired without interruption of your service. Whether the emergency is large or small, this Company is prepared to protect telephone communication, a vital factor in national defense.
