Preparedness

The country faced with signs of war, Builds up a most imposing store Of guns and ships to guard its shore, Forever.

A country shaken from its rest, Arises now to meet the test, And every man will do his best, Forever.

It bothered me to know just why, The war clouds cluttered up the sky, And men in battle had to die, Forever.

But I have noticed thru the years, That oftentimes some soul appears, To be doomed to a life of tears, Forever.

So sickness wakes a wayward soul, So it might reach a higher goal, And make life greater as a whole, Forever.

The meals were all planned, prepared and served by the girls.

The weather was perfect overhead and not too bad under foot for many hikes upon which many mysteries of nature were solved. Some found coons; others saw robins, red winged blackbirds, and since we came back saw and heard a blue bird.

We had a regular Sunday School Class on Sunday A. M. with their regular teacher, Mrs. Carter in charge.

Besides having fun some passed some of the tests in first aid. Six or seven passed their hospital bed-making test with Mrs. Bunker as instructor, who is an able teacher as she has had nurse's training.

As the roads were too soft to enable to the bus to get into camp the party had to hike, with our packs out to the main highway but were relieved of some of them through the kindness of Mr. and Mrs. Beedle who were our Sunday callers.

The party arrived home at 5 o'clock very tired but all agreed it was well worth while. Those attending besides the chaperons were: Dorothy Bunker, Phyllis Woloox, Joann Spaulding, Virginia Carter, Dorris Eakle, Barbara Beetle, Sara Lou Layman, Henrietta Watson, Audry McEvers, Virginia Hall, Marion Roehm, Helen Williams, Mary Ruth Schenk, Ruth Ward, Evelyn Sanford, and Marjorie Anderson.

A REPORT to America

The Ford Motor Company's business has always been to serve the needs of the American people. In providing them with low-cost transportation for the past 38 years, we have developed one of the country's largest and most useful industrial units. During a national emergency, we feel that these facilities should be devoted without reserve to our country's needs. Toward that end we started rolling months ago, with these results:

1. A \$21,000,000 Ford airplane engine factory, started only 6 months ago, is nearly completed. Production will start with an initial order for 4,236 eighteen cylinder, air-cooled, double-row, radial engines.
2. We are building a new \$800,000 Ford magnesium alloy foundry, one of the few in the country. It is already producing lightweight airplane engine castings.
3. Army reconnaissance cars — military vehicles of an entirely new type — are rolling off special Ford assembly lines at the rate of more than 600 a month. We have produced Army staff cars and bomber service trucks.
4. The government has given the "go-ahead" and work is now under way for the fast construction of an \$11,000,000 Ford plant to produce bomber airframe assemblies by mass production methods.

5. Several months ago work was started, on our own initiative, on an entirely new 1500 horsepower airplane engine especially designed for mass production. This engine is now in the test stage and plans are being developed for producing it in large quantities when and if needed.

6. A Ford aircraft apprentice school has been established, to train 2000 students at a time.

That is a report of progress to date.

The experience and facilities of this company can be used to do much of the job which America now needs to get done in a hurry.

Our way of working, which avoids all possible red tape, enables us to get results and get them fast. This benefits users of our products and workers who produce them.

We are ready to make anything we know how to make, to make it to the limit of our capacity if need be, to make it as fast as we can go, and to start the next job whenever our country asks us to. And to this end, we know we have the full confidence and loyal support of the workmen throughout our plants.
