**An Evolution of 100 Years**

ONE HUNDRED YEARS of progress in the building of American passenger locomotives will be vividly demonstrated by the public exhibition of these two locomotives at Detroit on Tuesday, July 29, when the Baltimore & Ohio Railroad inaugurates Diesel service between Detroit and Washington.

D. C. on its crack passenger train, the "Ambassador". The famous old "Atlantic", built in 1832, hauled the first passenger train into the City of Washington over the B. & O. in 1835. It developed approximately 20 horsepower, and ran at a top speed of 25 miles per hour. The modern

new General Motors streamlined Diesel locomotive contains 4,000 horsepower and has a top speed of 117 miles per hour. It will be the first Diesel passenger locomotive in regular service in Michigan. Similar locomotives now power more than 140 crack passenger trains on American railroads.

**SLEEP LIKE A PRINCE**

*in a house cooled for 5¢ a night!*

If you have ever tossed and turned in a hot, stuffy bedroom until four o'clock in the morning, trying in vain to sleep, you will be thankful for a discovery that brings the cool outdoors right into your room... making it refreshingly comfortable. You will be doubly thankful when you find that this method of cooling your entire house costs only about 1/2¢ an hour!

So effective is this type of cooling—lowering the temperature as much as 7 to 14 degrees in the evening, depending on the outdoor temperature—that it is hard to believe you can accomplish it with nothing more than a giant fan in the attic. Do not confuse this fan with an ordinary fan, however. It is a special type of fan—very large—and its quiet, powerful blades are capable of producing a complete change of air in your house every few minutes. Prices vary from \$50 up (installation extra).

The principle on which it operates is simple. The attic fan draws the warm air in your rooms upward to the attic and discharges it out-of-doors. At the same time, a flood of cool night air is pulled in through the windows and gently circulated through the house—making the rooms delightfully comfortable and assuring long hours of restful sleep.

Department stores, electrical dealers, and fan dealers will gladly give you full information about this low-cost method of house cooling. Telephone today. The Detroit Edison Company. (We do not sell or install this equipment.)

**FINAL CONCERT  
JULY 31**

The last concert of Symphonies harmonic Orchestra of Pontiac, at Under the Stars, given by the Phil-Cranbrook Greek Theatre, will be held Thursday evening, July 31.

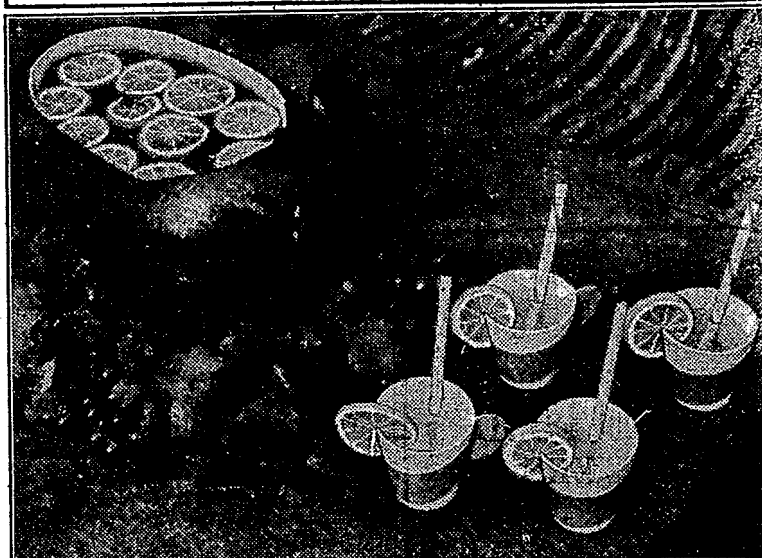

This marks the close of the second successful season played at this beautiful theatre. Music lovers may extend praises to Mr. Henry Booth, of Cranbrook, for he has made these concerts possible.

The feature of this coming concert will be the appearance of Margaret Pelican, Pontiac's own talented pianist. Miss Pelican will play Maestro Chanfone's Piano Concerto in G Minor. This concerto was given the world premiere last May and was received very enthusiastically by a large audience. The score of this beautiful musical work was completed in Pontiac, by Maestro Chanfone, and so is a part of the community cultural development.

There are a few tickets available, and may be purchased at the gate of the theatre. A capacity house is expected.

Out of every 200 men applying for the Royal Air Force 150 are rejected.

**Watermelon Bowl Lends Outdoor Atmosphere To Lemonade Punch**

By BETTY BARCLAY

For church socials or in your own back yard, what could be more tempting than a green watermelon punch bowl filled with pink lemonade? You'll adore this unique way of presenting the cooling beverage for it adds eye appeal as well as taste enjoyment. Imagine the colors exhibited by placing the melon bowl on a wreath of grapes and grape leaves and floating waxy yellow lemon slices in it!

Pink lemonade adds often needed dietetic balance of foods customarily served in picnic fashion out-of-doors, such as cold meats, sandwiches, potato salad and cake which, while excellent, require as supplements the mineral elements and vitamins, especially vitamin C, provided by citrus fruits — oranges and lemons.

The pleasantly tart fruit acid of lemons, truly a thirst quencher, stimulates the appetite and promotes digestion as well as produces an alkaline reaction in the body. So with the universally favored flavor of the lemon, it's no wonder a drink using lemon juice as the base is so popular.

Children enjoy this pink lemonade with a candy stick placed in it. The candy, a minor favor for the entertainment, makes little tots feel that they've had quite a treat.

To prepare the watermelon punch bowl and pink lemonade:

Cut a piece from the top of the watermelon and with a sharp edged spoon, scoop out pink meat down to the shell. Measure capacity of hollow shell. (A medium sized watermelon should hold one gallon or more). For one gallon of lemonade allow: 2 cups lemon juice, 2 cups pink watermelon juice drained from the scooped meat (if necessary mash or sieve part of the meat to make required amount of juice) and 1 to 1½ pounds sugar, depending upon the sweetness desired. Combine ingredients and add cold water and ice to make one gallon and pour into shell. Float lemon slices for garnish on top. Serves 16 large or 32 small glasses or punch cups.

If the occasion demands variety, the following recipe also makes an ideal beverage for a watermelon punch bowl:

**Golden Gate Punch**  
1½ to 2 cups sugar  
3 cups lemon juice  
2 cups orange juice  
4 cups juice from berries — strawberry, raspberry, loganberry, etc.  
12 cups water  
Ice to chill  
Combine in order given. Garnish with lemon slices. Serves 20 to 24.
