Aiding Farmers to Secure Help

What Oakland county farmers can do to help assure themselves a labor supply adequate for the production of essential farm goods was outlined this week. The director of the Selective Service System has asked all local draft boards to give special consideration to deferment of men needed in agricultural production. In addition, the WPA is making special effort to supply demands for farm labor.

In case a man believed to be indispensable to the farm is drafted, here is what to do:

(1) When the selective service questionnaire is received, ask deferment in Class 2, occupational deferment; or, if there are dependents, Class 3, dependency.

(2) The employer or dependent should submit to the local draft board Form 42 or a letter properly witnessed and presenting the reasons for requesting deferment. The registrant should also present the facts and request for deferment by letter if necessary, in addition to the statement in the questionnaire.

(3) If the local board does not grant the requested deferment, the case may be appealed to the board of appeals by the registrant, by the persons who signed Form 42, by a dependent, by the government appeal agent, or by the state director of the selective service. A government appeal agent is attached to each local board, and he will assist in filing appeals.

Daily Vacation Church School at Methodist Church

The First Methodist Church of Clarkston is having its annual Daily Vacation Church School next week, beginning at nine o'clock on Wednesday morning, August 13th. All boys and girls of the Community and vicinity are urged to attend the School. There will be no charge for registration. Boys and girls from 3 to 14 are eligible.

The program of the School consists of Worship, Classes in Bible and Morality, Supervised Recreation, Handcraft and features sermons in magic. The last day of the School will be given over to a picnic following the morning hour.

Clarkston Locals

Mrs. F. G. Ford of Detroit spent Tuesday as the guest of Mrs. Ray Ainsley.

On Tuesday night Mr. and Mrs. Pat O'Brien of Pontiac were forced to land their airplane in the wide open spaces back of the W. H. Stamp home south of town on account of motor trouble. In a very few minutes Dick Seeterlin was at the scene ready to assist. He helped drag the machine to a vacant lot near his home and then drove the couple to Pontiac. The repair work is now being done and the couple will be able to take off in a few days.

On the 15th and 16th of August the 4-H clubs will be represented at a judging contest at the college in Lansing. The team from Oakland County will be Eugene Hubbard, Kenneth Beard, Mary Edgar, Honor Stickney and Robert Hubbard of Clarkston and Kirk Simons of South Lyon.

Idle Corners

A man is driven in these times
To his wits' ends to find excuses,
Just why he should compose some rhymes

In lands o'er run with war's abuses,
And yet man finds it is amusing

When he is faced with such a test,
How little brains he had been rising
When everything was at its best.

It's not within my scope of thinking
Just how a man when forced to meet

Some situation that is sinking
Will rise above a sure defeat.

The best in man must lie there sleeping
During times when weather's fair,
Reserves of force that man is keeping

And used upon occasions rare.

I hate to think how much construction
Would take place, if man should find

That he could turn into production
The idle corners in his mind.

Let's hunt around and do some thinking,
I'm sure we'll find it quite amusing,

How we can keep our world from sinking
With just the brains we've not been using.

Rotarians Help Make Aluminum Collection Succeed

On Tuesday night the din of many horns stabbed the community into the realization that a serious effort was on foot to gather in the scrap aluminum in this vicinity. Some big boys did what they were in the habit of forbidding their sons doing, namely holding down that horn just for the fun of it. Three cheers for all who labored and made the mountain of aluminum in the big crate.

Wedding

Rose Jean, daughter of Mr. and Eugene Richardson of Holly, and Basil Bird Jr., son of Mr. and Mrs. Basil Bird Sr., of Clarkston were united in marriage on Saturday, August 2, at Five Lakes Resort, Gaylord, by Rev. F. A. Burnett of Holly.

Since Rev. and Mrs. Burnett were vacationing at the Woodworth Cottage at Five Lakes Resort, the wedding party motored there for the ceremony. Planned for early twilight, it was really early starlight when the wedding party assembled in the cottage yard on the bank of the lake, which their hosts had lighted and in readiness for them.

The bride wore a street length white silk jersey, large white picture hat with veil, matching accessories and a shoulder bouquet of roses, carnations and baby's breath.

Her sister, Eusebia, attended her, wearing aqua jersey with beige picture hat and veil, beige accessories and a shoulder bouquet of sweet peas and baby's breath.

Willis Bird, of Holly assisted his brother.

Mrs. Richardson wore a gown of green and white beamburg with white accessories and a corsage of sweet peas. Mrs. Bird Sr. wore black and white sheer with white accessories and a corsage of sweet peas.

The music was furnished by a whippoorwill, who, unheralded and unannounced, trilled his evening song.

Following the ceremony, refreshments that included two wedding cakes and ice cream, were served in the yard.

Mr. and Mrs. Bird, Jr., left for a short motor trip and on their return will make their home in Clarkston.

The guests included Mrs. Eugene Richardson of Holly, Mr. and Mrs. Basil Bird Sr., Rollin Bird, Eugene Hockey, of Clarkston; Eusebia Richardson, Willis Bird, Irene Bush, and Alene Sutton of Holly; Carl Meng of Dearborn and Betty Bailey of Drayton Plains.

New Films Now Ready

Release on August 11 of two new motion pictures, "Timber Harvest" and "CCC, Builder of Men," was announced today by the conservation department's education division.

"Timber Harvest," a one reel sound-on-color 16 millimeter film, photographed in Luce county, shows lumberjacks' life in one of the last of the old-style camps and their logging of big northern hardwoods, of which Michigan is still the biggest producer. The picture follows the log from the time the tree is felled until the sawed lumber is stacked in the mill yard.

"CCC, Builder of Men," filmed in cooperation with the Michigan State CCC office, is a two reel silent 16 millimeter film in color. It follows the experience of one CCC lad thru the enrollment in a big city to his work and play and education in a CCC camp in northern Michigan in winter.

Both films were photographed by Walter E. Hastings, staff photographer of the Michigan department of conservation. They will be available after August 11 from the department's film loan library for no cost except shipping charges.

One Match Can Start It

This is what a forest fire looks like. One match or cigarette carelessly tossed from an automobile in the Michigan pine plains country can set the "red demon" roaring through woods baked dry by prolonged hot weather. Conservation department forest fire fighters are preparing for emergency situations in many areas. In the last 16 years, smokers have caused more than 40 per cent of the forest fires in Michigan. These fires have destroyed thousands of acres of timber, killed game animals, even burned out the elements of the soil that support plant growth.

COOL YOUR HOUSE

this easy and inexpensive way!

When you leave your car standing in the broiling sun all day with the windows tightly shut, it DOES get hot inside ... a regular "bake-oven" temperature. But you can always cool it quickly by opening the windows and driving your car down the street.

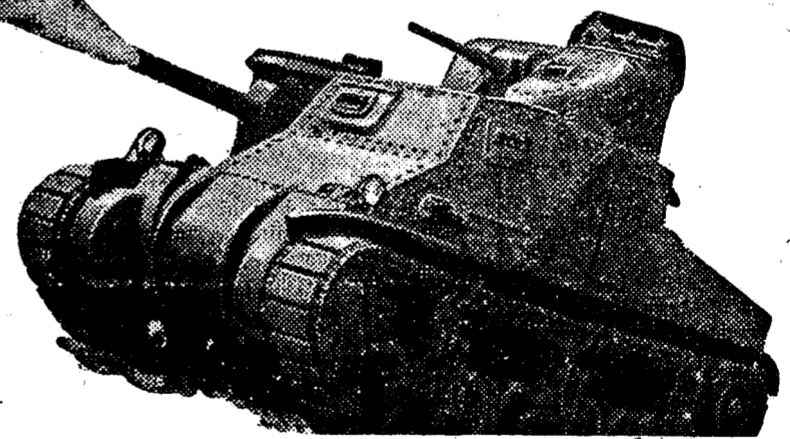

In just the same way, the attic of your house stores up heat on hot days, the temperature often reaching 130 degrees or more. But you can't very well "drive your house down the street" to cool it ... However, you CAN do what really amounts to this. You can install an attic fan and BLOW AWAY the heat in the attic at a cost as low as \$50 and up (installation extra).

Of course, an attic fan does more than just cool the attic. After sundown, when you open all your windows, it pulls in a flood of cool night air from out-of-doors, and circulates it through the house, making all rooms refreshingly comfortable. Depending on the outdoor temperature, you can often cool your house 7 to 14 degrees by this method. The large, powerful blades of the fan produce a complete change of air every one or two minutes, and the cost of operation is only about 1/2c an hour.

Department stores, electrical dealers, and fan dealers will gladly give you full information about this low-cost method of house cooling. Stop in or telephone today. The Detroit Edison Company. (We do not sell or install this equipment.)

TO HELP THE TANKS START ROLLING!

The first tank from the U. S. Army Arsenal's production line "comes out fighting"—ready to put teeth in American defense.

On the outskirts of Detroit, the Army Tank Arsenal, the Navy Arsenal and the Dodge Truck Addition—all new plants—are rushing production of fighting equipment.

In January, Michigan Bell was asked to plan telephone service for those projected defense centers. That required, among other things, the construction of 4 miles of subway, and 7 1/2 miles of large underground cable in conduit. Manufacture and delivery of the cable alone normally would not be expected in less than 4 months.

But defense must not wait. Western Electric produced the cable and began delivery in 5 weeks! In spite

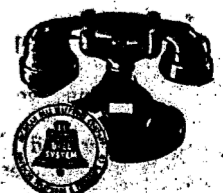

of frozen ground, and with a great part of the cable laid under concrete streets, the job was ready for service in 14 weeks.

Plans under way to date involve expenditures by this Company of \$11,000,000 to serve camps, arsenals, factories and others engaged directly in defense work. In addition, business and home telephone demands are growing at the fastest rate in history. To meet all those needs, the Company this year will expend more than \$26,000,000.

The telephone has a little part in almost every National Defense effort. And a little part in every effort adds up to pretty big figures.

Hay Fever Is Here Early

"Hay fever sufferers are advised to take whatever precautions they can," said Dr. H. Allen Moyer, State Health Commissioner, "and communities which have ragweed pulling and cutting programs should speed up their plans. Ragweed pollen has not yet appeared in the daily counts, but ragweed is in flower and all vegetation is early this year, from weeds to apples. The start of hay

fever is usually about August 15." According to reports from the 48 pollen counting stations of the Michigan Department of Health, the hay fever sneeze is ahead of time this year. Michigan's first state-wide pollen taken last year, showed that the farther north one goes in the state the greater freedom there is from ragweed pollen, chief cause of summer hay fever.

Fisherman's Luck

Winter and summer, the percentage of fishermen who go home with empty creels is fairly constant, O. H. Clark of the conservation department's fish division reports in presenting figures for six seasons' intensive creel census on five typical southern Michigan lakes.

On three or four trips in every ten the average angler may come home empty handed, and it will be nearer three in the winter, nearer four in the summer, if the five lakes censured are a fair sample.

The percentage of luckless fishermen fluctuated widely on different weeks—from 15 to 70 per cent—through the season averages kept a constant level.

Evidence that even expert fishermen cannot catch fish when weather and other conditions on the lakes are not right may be found in the graphs showing both the catch per hour and the percent of fishermen catching no fish. The charts show that when many anglers are unable to

land any fish, then the catch per hour of those who do creel them is correspondingly low. When even the duffers are landing a few, then the catch per hour of the other fishermen is high.

In other words, in the light of the census figures, "fisherman's luck" is a community asset, widely shared

The largest hatchery in the world is at Vineland, New Jersey, where 1,500,000 eggs can be hatched at one time.

Let us labor for that larger comprehension of truth, and that more thorough repudiation of error, which shall make the history of mankind a series of ascending developments.

—Horace Mann.

A pretty girl's fatal love for cripples. Because he hunchback father was so lovable, she became engaged to a young hunchback, but when she shifted her affection to still another cripple, a target rifle suddenly "exploded" and killed her. Read of this

strange real-life drama, and how psychologists explain it, in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.
