NO MORE BILLS IN ENVELOPES

NO MORE BILLS IN DOORKNOB HOLDERS

Due to the restrictions on the use of automobiles and tires and the shortage of materials of war goods, we have scheduled in the past every two months this bill based on **ACTUAL METER READINGS** and automatically adjust previous uncollected bills.

*A gas unit is 100 cubic feet.

● **IN LINE WITH** the national policy of conserving manpower and materials, we are adopting the modern postal card type of service statement.

It replaces the old-style larger form of statement which in some parts of the territory served by this Company was sent through the mail in envelopes, and which in other areas was hung on customers' doorknobs by Company representatives.

Introduced in many parts of the country as a war measure, the postal card bill has been welcomed by customers, who find it simpler and easier to handle than the bill enclosed in an envelope or doorknob hanger.

Watch for your first postal card bill. The picture above will help you recognize it. We hope you will like this change which helps to conserve materials and to meet the wartime manpower situation.

FINAL INSPECTION:

Make sure it's right with good light

INSPECTION has always been an important step in production. But in war work where a soldier's life may depend on the accuracy of machined parts and the absence of flaws in a gun or shell or tank or engine part—inspection is doubly important. Final inspection must make sure that the product is RIGHT—and that no defective parts or workmanship are allowed to go out of the plant.

The more precise the work, the more critical the inspection—and the greater the need for GOOD LIGHT to help detect imperfections. Besides finding "rejects" when the work is finished, inspection helps to prevent losses by catching flaws early, as the work goes along. Periodic inspection saves wasted man-hours and reduces spoilage.

Good light for inspection is "tailored" to the needs of the specific job. What is satisfactory lighting for one job may be wholly inadequate for another. For example, inspection may involve the internal structure of a piece, or its composition. It may involve surface contour, or color and finish. In each case there is a particular kind of lighting to assure best results. Our industrial Lighting Advisors will be glad to discuss any lighting problem you may have, and study your requirements. They will then submit recommendations without charge. Call any Detroit Edison office. The Detroit Edison Company.

CLARKSTON OPENS SEASON

Clarkston's baseball team went to Holly last Thursday to open their delayed baseball season. After having two contests postponed because of weather and one cancelled, they finally got under motion. Here's the way they lined up:

Ross, Edwin—Catcher
 Ronk, Frank—Second Base
 Perrin, Stan—First Base
 O'Roark, Bill—Pitcher
 Waid, Tom—Third Base
 Ross, Edward—Center Field
 Tower, Ralph—Left Field
 Boice, Don—Right Field
 Adams, Wilbur—Shortstop

It was a scoreless game as far as Clarkston was concerned until the 7th when with one out Adams singled to right, Ross flied out but LaPlante and Perrin walked to load the sacks. O'Roark came through with his first hit, an outfield single to score Adams. Waid got his second hit of the day with LaPlante scoring. Edward Ross walked, forcing in Perrin with the third run of the inning. Holly sent in a relief chucker at this point and he stopped the rally, Holly winning the verdict 6-3. Holly scored their runs in the 3rd, tallying 3, one in the 4th and 2 in the 6th. O'Roark was the losing pitcher. Although he allowed only four hits, he was a little wild at times. The next game with Walled Lake is this Friday, April 30th on their diamond.

THE 2ND WAR LOAN DRIVE IS ON!

Buy an Extra Bond TODAY

THE big push is on! This is the fateful summer that we have been waiting for. Hitler knows he must win before another winter rolls around, or face inevitable annihilation. And you can be sure that he will hurl everything he has—every gun, plane, soldier and tank—into the summer struggle that is even now rising in tempo on every front.

And when the command goes out to our fighting men to ATTACK—you can be sure they don't look for excuses. They don't hesitate. They strike fast and hard—as they did at Guadalcanal, in Tunisia and in the skies over Europe.

NOW the command has come on the home front to attack! To attack with the dollars that buy the weapons of war our boys must have to meet the last desperate assaults of Hitler. Your government asks you to lend it 13 billion dollars during this drive. And this

historic 2nd War Loan Drive, which started April 12th, is the most urgent appeal America has ever made!

The time is short—act now!

When you attack with War Bonds you don't suffer pain or anguish—you don't risk your limbs or your life as millions of our boys are doing every day. All you do is make an investment—the safest in the world. You help to secure Victory now—and your own financial security.

During this drive if you are visited by a volunteer War Bond worker, welcome him. He will explain the 7 different types of U. S. Government obligations you may choose from. But don't wait for his call—go at once to your nearest bank or Post Office or place where they sell War Bonds. And answer the command to ATTACK by buying more War Bonds—and still more War Bonds!

THE OLD JUDGE SAYS...

"You can't imagine, Judge, how much comfort Louise and I got out of reading that recent report made by the government on drinking habits in and around Army camps. If you hadn't loaned us your copy we'd still be worrying about our Jim... all because of those silly rumors goin' around."

"I'm mighty glad to hear that, John. As the report says, no Army in American history has been so orderly, so well-behaved,

so well-trained. Why, even on pay-night, there's very little drinking done. I was particularly interested in that part which said the Army, with an eye to its own problem, usually prefers to have its camps in wet communities rather than dry communities because wet communities can be regulated... dry communities with their bootleggers can't. It's just more proof that prohibition does not prohibit."
