Save electricity to save coal!

The government asks the utmost conservation of electricity to save coal, manpower, transportation and critical war resources. Turning off your office lights for an hour at lunchtime may not seem like much of a saving. But one or two lights in thousands of offices, turned off one hour a day, will save in a year thousands of tons of coal vitally needed today.

Electricity is not rationed and there is no shortage of electric power in this area. The Government asks you to reduce your use VOLUNTARILY as part of the national conservation program. Save electricity whenever and wherever you can-in store and office and home. The Detroit Edison Company.

### During the 4th War Loan Starting Jan. 18

This invasion business isn't a one man show . . . or even a job for any hundred men, or a million men! It's a job for EVERYBODY in America! Remember, we're all in this war together and it's up to each and every one of us, in the service or out of it, to do his utmost to make the invasion across the channel, a sure and certain success.

Make no mistake about it-we're in this war to WIN! All you are asked to do is to loan your government your money to buy the necessities of battle. That's a mighty small contribution on your part when you consider that you are comfortable, well housed, well fed and among your own family.

So, when the solicitor calls at your home or office for your EXTRA BOND purchase, remember that he is but one of an army of patriotic people who are endeavoring to raise the required 141/2 billion dollars for the 4th War Loan among the Victory-minded citizens of America.
