A special program has been arranged for the morning service.

Safe Drinking Water Easy to Obtain

Try This Simple Plan If Purity Is in Doubt

A simple protection against contaminated drinking water has been outlined by Dr. William DeKleine, state commissioner of health, for persons whose wells have been flooded by spring rains.

Two drops of chlorine solution will sterilize one gallon of water, Dr. DeKleine stated. The simplest source of chlorine is the common liquid laundry bleach, such as Clorox, Roman Cleanser, White Sail, Lizzie, etc., all of which contain 5 1/4 per cent chlorine. Put two drops of any of these products in a container and add one gallon of water, this assures thorough mixing. The water is immediately safe for drinking, according to Dr. DeKleine. Boiling for ten minutes will also sterilize water, but the use of chlorine is simpler. If exactly two drops are used to the gallon, there will be no taste of chlorine in the water, he said.

Wells in flooded areas should be assumed to be dangerous until a health department test proves them safe. Local health departments or the Michigan Department of Health in Lansing will test water without charge.

IT'S A big wash for the duration...

give your electric washer this PREFERRED TREATMENT

To help your washer stand up under the big load it faces for the duration, keep in mind these few simple rules:

- (1) Drain washer and rinse tub thoroughly after each washing. Remove agitator or suction cups and rinse.
- (2) Wipe dry with a soft cloth to remove any soap curd or lint that may remain. If your washer has a spinner dryer, this too should be cleaned, rinsed and wiped dry.
- (3) Don't try to force thick, bulky articles through your wringer—and especially don't run through belt buckles or other hard objects that might cut the rolls. They are rubber, and precious!
- (4) Release the pressure on wringer when not in use. This saves the spring and the rubber, and prevents the rolls from becoming flat on one side.
- (5) Don't overload your washer. Cramping in too big a wash simply puts a strain on the motor, and results in a less satisfactory job.
- (6) When you finish washing, dry the wringer thoroughly, also dry the connecting cord and wind it up carefully. Leave cover off washer to prevent it from becoming musty.

PHYSICAL FITNESS CONTEST

Last Friday five boys, John Ronk, Bill Sharp, Jim Burns, Basil Ash, Henry Huber, from Clarkston High School went to Farmington to enter the Physical Fitness Contest held in that city. This contest was held by the teams of the Southwestern Oakland County League, consisting of nine schools. Our boys scored 614 points which gave us sixth place. We could not enter the crab race, back-to-back relay or tug-of-war because these events required ten people. Jim Burns won fifth place in the chinning event, doing sixteen. In the push-ups Ash won second with 43 and Ronk tied for fourth with 41.

Farmington was the winner of the meet with 34 points, Milford second with 32, Walled Lake third with 15 1/2, Keego Harbor fourth with 10, Redford fifth with 8, Clarkston sixth with 6 1/2. Holly and Brighton did not place anyone.

It is felt that our boys did quite well in the events in which they were entered. Some unusual scores were made in the various events. The various branches of the armed forces should find the boys coming from high schools in fine physical condition as a result of the physical training programs being carried on.

9TH GRADE NEWS

The freshmen have been working hard for their dance tonight. It is to be called the "Storyland Fantasy." It will be held in the Clarkston High Gym. There will be refreshments and dancing from 9:00 until 12:00. The music will be furnished by Bill Radcy and his Band. The tickets are on sale now. Don't forget to come to night, May 5th to the dance, "Storyland Fantasy," sponsored by the Freshmen.

Senior News

The "Mighty Seniors" had another of their super class parties at the school last week. We have hit upon the idea of making the eats the main event of the evening. Ask any Senior how and they might tell you—it's not a military secret.

I will agree that the Seniors do have a knack for eating and enjoy it very much. However, we aren't coming to the banquet for the sake of a free meal. Being about the last big event in our high school life before graduation, we are coming to make better the memories of the days at C.H.S. We hope to help cement better union between the Junior and Senior classes. We hope that you will carry out the traditions of C.H.S. to the best of your ability.

Some of the most attractive jobs in the conservation department setup are going begging these days. The war, of course, is the reason.

Ordinarily, there's no lack of applicants for jobs as life guards—an occupation offering attractions that are distinctly out of the ordinary. And park rangers meet some mighty fine people. However, the department expects to recruit its state park staffs to operating strength by Memorial Day, May 30; when fifty parks will be opened officially.

Another Call for Salvaged Paper

Shortage Continues Acute Both Militarily, Commercially

Michigan's 1,396,206 housewives could conserve enough paper daily to make 72,719 containers for 75 mm. shells by saving one paper grocery bag a day, according to an announcement by Howard Cooney, director of the conservation division of the War Production Board. This daily saving would amount to 130,894 pounds.

Waste Paper is a vital weapon of war. Save it and save some boy's life!

The paper shortage is creating a critical scarcity of bags in grocery stores," Mr. Cooney explained. "So far during the emergency bags have been available because of inventories and the elimination of variety bags, but in the future stores will have to depend entirely upon current reduced production and buyers' cooperation."

100 pounds of waste paper will make 50 75-mm. shell containers. Start saving!

Food buyers and other shoppers are asked to conserve bags by having several items put in one sack, bringing their own bags for re-use, or carrying home packaged items unwrapped. Housewives are not asked to return bags for re-use by others than themselves. If all housewives in the United States saved one ounce-and-a-

half bag each day, the saving would amount to nearly 600,000 tons annually.

Containers for blood plasma are made of paper. Your waste paper is needed!

Allocations of pulp for the manufacture of wrapping paper and bags during the second quarter of 1944 have been set by WPB at less than one third the quantity used during a comparable pre-war period.

Recruit Youths For Farm Crisis

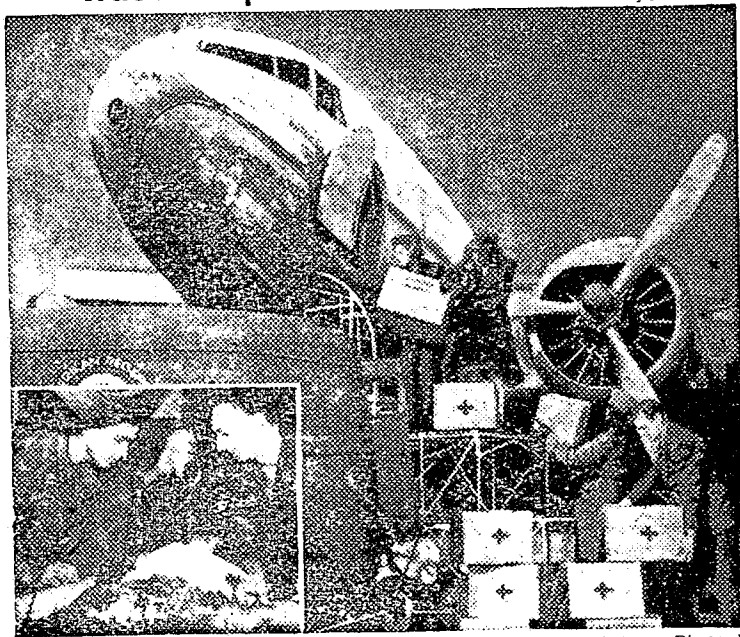

Fifty thousand Michigan boys and girls who had some farm experience in 1943 are being recruited with thousands of others to help win the battle of Michigan farm production in 1944, according to C. B. Dibble, state leader of the Victory Farm Volunteers.

Work of recruiting and training is a part of the emergency farm labor program directed by the extension service of Michigan State College. County agricultural agents, vocational teachers with training classes in schools, school superintendents and private individuals are among those participating.

Those boys and girls who got some actual farm experience in 1943 include more than 5,000 who lived temporarily away from home. Some of the in-school youths already are at work part time in nurseries and greenhouses. Others will soon be cutting asparagus. Special classes are giving extra instruction in such specialities as sheep shearing and poultry culling.

Conservation Notes

An appeal to parents and teachers to counsel boys not to kill songbirds is made by the conservation department as the airgun season opens. Interested adults may be able to center the interest of the boys on competitive target shooting rather than on live targets.

Eagles' nests, one constructed this spring, may be seen in four of Michi-

gan's state parks. The newest nest is in Muskegon state park, others are located in Ludington and Wilderness parks and in Sleeper state park in Huron county at the tip of the Thumb.

George Powell of Hillman, has two Walker hounds that are counted as the outstanding dogs of the north country, having been in at the kill when 42 bobcats, 10 foxes and 10 raccoons were taken in recent hunts.

**FIRESTONE EXTRA VALUES
ARE MORE IMPORTANT
NOW THAN EVER BEFORE**

While it is true that all tires are made with the same type of synthetic rubber, there is still a big difference in their performance. It takes more than good rubber to make a good tire—it takes Firestone's "know-how," which has developed the Extra Values in Firestone Deluxe Champion Tires that assure Extra Mileage, Extra Safety and Extra Strength—all at no extra cost.

• If You Are Eligible . . . Come In and We'll Help You Make Out An Application for a Tire Rationing Certificate

These prices apply to tires built of American-made rubber.
