In order that I may see, first hand, the damage caused to livestock or poultry by dogs throughout the county, will you kindly assist me by notifying the Justices of the Peace in your Township to contact me, by phone, before viewing such damage and filing the claim with the Board of Auditors. In this way I have reason to believe that I may, in some instances, locate the owner of such dogs and save the County a bill of expense.

EXPANSION of telephone central offices has been halted for over two years because of the war, and many thousands of persons are waiting for telephone service.

When it comes to expanding a central office, mass production methods are "out." Cables. wires and intricate equipment must be connected individually without interrupting present telephone service., Millions of connections must be soldered by hand.

That is one reason why it may be two years after war's end before we will be able to supply telephone service immediately to every one who wants it. To meet demands for service, Michigan Bell is engineering a five-year program of expansion and improvement costing upwards of \$120,000,000. That program will start just as soon as war releases manpower, materials and manufacturing facilities.
