# BANQUET IN A BOILER....

Back in 1914 The Detroit Edison Company framatized the installation of a great rew steam-generating unit by staging a "Banquet ur a Boiler."

Up until that time the capacity of boilers rarely exceeded 50,000 pounds of steam an hour. Detroit Edison engineers had been at work with manufacturers in an effort to develop greater size and otherency. The result was this new boiler of three times previous capacities -175,000 pounds an hour.

That was a beginning—a Detroit Edison FIRST. Ioday, boilers delivering a million pounds of steam an hour are in use.

The first big boiler, built 32 years ago, turned out to be something more than a place for a

banquet. Its construction developed a line of thought, experiment and accomplishment which has increased the size and operating efficiency of steam-electric power plants.

This development has meant lower costs for The Detroit Edison Company, LOWER PRICES TO THE CUSTOMERS OF DETROIT EDISON, AND HIGHER WAGES FOR DETROIT EDISON EMPLOYES.

It was one of the accomplishments of this company, serving in its capacity as a citizen of the community, which helped to bring the average price of current used in the home down from 6.04 cents per kilowatt-hour in 1915, to 3.03 cents in 1945.

TRANSITION Was made way to pelicer, it amfilled orders for new tele-phores continued to sear, reaching 127,500 in November As Mericae Bell's Potwar Expansion and Improvement Program gains o ment in, the number of applicables wasters for service was reduced to 113,20

**WELCOME** 1,295 of Michigan Rell's 3,056 war veterans had returned by Dec. 31. Montred were 57 who had hed in service. During the year, total employees had climbed 3,400 to an all time high of 16,500. The prewar ratio of about 50.50 between mer and a mon had shifted so that 2 of every 3 employee

the prewar average. Service, although not up to prewar quality in some respects, was generally g d.

MORE TELEPHONES By Dec. 31, telephones in service totaled 1,174,518 compared with 742.118 in 1.00. In the last 2 months of 1945. the thouse was 27,000 telephones, largest 3-month gain in M - r gar Dell Estery.

**GOAL** To return as quickly as possible to the kind of service wanted, when and where it is wanted. - Michigan Bell's aim. By year's end, work was being ushed on nearly 100 major projects which will boost entral office capacity by 85,000 lines and add about 550,000 miles of subscriber lines. 2,600 miles of open ire were built in 1945.

PROGRAM BOOSTED The figure for Michigan Bell's 5year Postwar Expansion and Improvement Program was boosted from \$120,000,000 to \$150,000,000 after experience gave a clearer picture of increasing public needs, rising costs of materials and labor. Money for the program must come largely from the sale of Bell System securities to investors.

EARNINGS DOWN While Michigan Bell's total revenues While Michigan of \$80,806,000 in 1945 were 101% over the prewar 1936-1939 average, costs were up 137% to \$71,-254,000. The amount left over to pay for the use of investors' money was about \$569,000 less than the average of prewar years, although an additional \$36,000,000 had been invested in the busi ness since 1939. So the average return on the stockholder's dollar dropped from 71/2 to 5% cents.

To attract the investor's dollar, the rate of Telephone Company earnings must compare favorably with the average of other industries not substantially less as has been the case in recent years. The future quality of telephone service, then depends on earnings attractive to inves tors. So Michigan Bell in January, 1940. appealed to the courts for relief from a Michigan Public Service Commission order calling for retroactive reductions of \$3,500,000 a year for 1944 and 1945, and lower rates for local service in 1946.

FUTURE Unlike most industries, we have no alternative but to expand our plant when necessary to meet service demands. With earnings attractive to investors, we can continue to improve the quality of service and use future, technical research developments to help keep rates down in the face of rising costs. It is to everybody's interest that we give the best service at the lowest cost which will protect the future of the business.

ANNUAL REPORT The full story of Michigan Bell's operations for 1945, complete with all the facts and figures, is contained in an interesting, illustrated booklet, entifled "War to Peace." Copies may be obtained at any Michigan Bell business of

THE OLD JUDGE SAYS...

Mar. 15-22-29; Apr

ESTES & COONEY, Attorneys At Law, 812 Peoples State Bidg., Pontiac 15, Michigan.

STATE OF MICHIGAN — The Probate Court for the County of Oakland At a session of said Court, held at the Probate Office in the City of Pontiac, in said County, on the 11th day of March, A.D. 1946.

Present: Hon. Arthur E. Moore, Judge of Probate.
In the Matter of the estate of Albert

Judge of Probate.

In the Matter of the estate of Albert William Downer, Deceased.

Dorris E. Joseph, executrix of said estate having filed in said court a petition praying that the time for the presentation of claims against said estate be ilmited and that a time and place be appointed to receive, examine and adjust all claims and demands against said deceased by and before said court

It is Ordered, that two months from

GEORGE: "Yes, I certainly would like to hear why you call that an old fashioned idea, Judge.'

OLD JUDGE: "Glad to tell you, George. Until recently, a person known as an alcoholic was generally treated as a social outcast. Little if anything was done to understand him or help him. But, during the past few years, medical research and study has developed that alcoholics are really sick people...that there is usually a deeprooted physical, social or emotional reason behind their behavior. That's why today so much is being done to help them by finding out and correcting the condition that leads them to excess."

GEORGE: "How many folks are there like that, Judge?

OLD JUDGE: "Well, according to scientific research, 95% of the people who drink, drink sensibly. 5% do so unwisely, at times. Included in that 5% is the small percentage of the sick people I'm talking about."

GEORGE: "That certainly gives me a clearer picture. It's the most sensible approach I've ever heard on the subject."
