### Community Activities

Have you been over to see how the new building is progressing lately? It's coming along just fine. We'll be in a part of it at least before we realize it.

About thirty members of the Women's Club met last Thursday evening at the home of Mrs. James Stites for the July meeting with Mrs. Gordon Bryce presiding, The group made plans to serve a dinner for the Sportsmen's Club on their property on August 9th. Plans were also made to have a bazaar in the new building as soon as it is completed. The next meet ing will be held at the home o Mrs. Almyra Dryscoll on August 21 with Mrs. Iris Patton, Mrs. Nancy Hawks and Mrs. Dale Mc-Clellan as co-hostesses. Several received gifts from Sunshine sisters. Refreshments were served by Mrs. Otto Duguid, Mrs. Lester Mrs. Harold Sturgis and son, McFarland, Mrs. L. T. Kaines and

save grain on every acre cut: the home of Mrs. O. L. Siegman It is possible to lose from three to four bushels of grain per acre due to faulty adjustment of the combine. All wearing parts should be checked, with special attention to the bearings. Combines require a good job of greasing to avoid Ambulance

costly delays by breakdowns when harvest is in full swing. Grain losses can be determined by counting the loose grains on the ground before the combine passes a given area and then recounting the grain and heads after the machine has passed. Adjustments can be made in lowering and raising the cutting bar, spacing cylinders to concaves, amount and direction of air blast, setting of shoe sieves, the forward speed of the combine and suitable cylinder and rack speed for the particular grain combined. The rack losses on the average, far exceed other combine losses. Experimentation will prove the best adjustments to

The Original Company to Pay for Dead Stock

### Phone Co. Proposes best possible service to as many Rate Increase

The Michigan Bell Telephone Company today formally announced its intention to file a petition with the Michigan Public Service Commission for a general rate increase.

Pointing out that it will mark the first time in 21 years that the company has sought a general increase in its charges, President Thomas N. Lacy declared that "prewar rates are no longer enough to meet postwar costs."

Beyond the indication that as a matter of fairness to all our customers", the proposed increases will be applied to all types of telephone service, Lacy did not reveal the extent of the proposed rate boosts. In accordance with the statute, the company will advertise its specific proposals during the week of August 3 preliminary to the filing of its petition with the Michigan Public Service Commission later that month for approval.

"Michigan Bell today is operating under a general rate schedule established by the Commission in the latter part of 1936" Lacy continued. "Except in towns where local rates have been lowered still further and for tollrate reductions, the rates of 10 years ago are still in effect. Meanwhile, the cost of everything used in furnishing telephone servicewages, taxes, and supplies--has

"Postwar wage increases alone, for example, have raised Michigan Bell costs nearly \$11,000,000 a year.

"Although-the amount of business that we have been doing has risen sharply, the increased income has not kept pace with the rapid upward movement in costs. Since 1937, our income has gone up 2½ times but cost of operating the business are now hree times the level of 10 years

"As a result, our return on innvestment has slipped far below he danger mark.'

"Any decision to increase rates is a hard one to take. It reverses trend in our operations which has brought rate reductions that are now saving our customers \$20,000,000 a year compared with rates of a quarter of a century

"We have held off this decision as long as possible. Rate increases already have been requested in 29 other states. In 17 of those states, increased rates have been ordered by regulatory authorities. Sixteen independent telephone companies have been granted increases by the Michigan Public Service Commission and two more such applications are still pending. "Michigan Bell-has a legal and moral obligation to provide the

# LAMBERTON BROS. SERVICE

CORNER AIRPORT AND WILLIAMS LAKE ROAD

Phone Pontiac 3-2901 Waterford

# When is a rate increase a good thing for telephone users?

HE right price is "the lowest possible price that will assure you of good quality." That's true of everything you buy, including telephone service.

So-answering the question above -a rate increase is a good thing for telephone users when it is needed to protect their interests from a service standpoint.

The last time there was an increase in telephone rates was 21 years ago. From 1926 until 1937, rates went down substantially. Since 1937, there have been still further local reductions in a number of exchanges and decreases in toll rates. Except for those further reductions, 1937 rates haven't changed, although the cost of most thingswages, taxes, supplies - has gone up.

Just since the war, wage adjustments alone have upped our costs \$11,000,000 a year. This includes settlements reached during the recent strike.

Lump all our costs together and you'll find they've gone up much faster than our income. Since 1937. our income has gone up 141%. But costs have gone up 193%. And our return on investment has dropped more than a third.

Now we face the fact that 1937 rates won't work in 1947.

We don't like a rate increase any more than you do. We've waited until the last possible moment to ask for one. But that moment has now arrived.

There's a lot of work to be done and a lot of money to be spent to give more and better service to everybody who wants it. The money will have to come from investors. They will furnish it only if they can be sure of a fair return, which our present rates are simply too low to provide. A growing business, especially, has to earn a good return in order to attract the capital needed for growth.

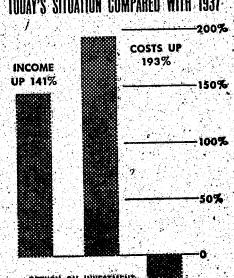

Telephone rates are regulated by the Michigan Public Service Commission, a body established by State law and appointed by the Governor. We're going to ask the Commission for a public hearing to review our proposed new schedule of rates. During the week of August 3, we'll publish details of the proposed rates throughout Michigan Bell territory. After that, we'll file a petition with the Public Service Commission.

NOTE: Where the term "Income" is used above, its meaning is the same as "Refenue" or "Gross Income." Where the term "Investment" is used, it means the original cost of the telephone property less the depreciation reserve accrued against the ultimate retirement of the property.

The whole future of Michigan's telephone service depends on raising rates enough to assure the financial stability of your telephone company. We're sure you want us to take this step to assure you the kind of service you want.

1937 TELEPHONE RATES WON'T WORK IN 1947

### Cover Crop Can Be In Corn

. A wet year, such as 1947 has and Alton Goll in charge of the been so far, is a good year for sowing a cover crop when corn is cultivated for the last time. sponsoring a Singspiration at the B. R. Churchill, specialist in farm crops at Michigan State college. says that either domestic rye grass or sweet clover is good for this

> Domestic rye grass produces an excellent cover crop for over

can be plowed under the follow- should be made with moss, not come. Select one which will haring spring as a green manure excelsior. New cotton felt used to monize with your room. crop. It is not suitable for pasture use. It should be sowed at the grade and white in color, not rate of approximately 10 pounds greyish.

Sweet clover does not thrive as well when sowed in corn as does the domestic rye grass, but if a good stand is obtained it can be pastured the following summer or plowed under as a green manure crop. Ten pounds to the acre is the rate for seeding sweet clover. Mixtures of rye grass and sweet clover sometimes produce good stands.

Churchill points out that the use of these cover crops is particularly important on slopes where erosion is a factor and in fields where green manure is needed:

### Make Furniture Better Than New

What to do about furniture that is in a "state" and can't be replaced because of high prices, is a problem for most homemakers.

Your old furniture is very likely to have better framework than that on the market today, especially the low priced pieces. So Ruth Peck, home furnishings specialist at Michigan State college, suggests that you consider a good reupholstery job to make the old pieces ike new.

You will be able to get satisfactory work from your upholsterer if you know what to ask from him. If you can tell him what you want, you are more apt to have a better job done.

Loose cushions with spring units in them will probably, need to be rebuilt with a new unit and new cotton. To replace the old webbing, ask that L. M. C. be used as it is the best. Springs in the lower part of chairs are rarely broken. Each spring should be tied with eight knots. String should go lengthwise, crosswise and two go diagonally. The front row of springs and friends, Rev. B. W. Case and should be reinforced with extra

New burlap used to replace the old should be 10 ounce, or even 14 ounce. Old padding may be used over again if it is moss or hair and
