Service

Everyone appreciates good service. That's especially true when you go to a bank.

It is our belief that a financial institution can be more than a place which guards your funds and occasionally loans you money.

It should be a place where you can drop in often for a friendly talk... Where you can ask for advice and get an honest answer and where all assistance is gladly given.
 That's our idea of SERVICE....

THE FINEST MEAL I EVER COOKED!

That's what Jim said after the first meal on our new electric range. And he's right. Postwar electric ranges are a vast improvement over older models. Ovens are better insulated. Heating units are more efficient. That means even faster cooking... lower cost.

You save extra time, too, with the automatic control that starts and stops your range by itself. Why, you can go shopping all day and have supper ready to serve when you return. And there's no heating up the kitchen... no soot or smoke to bother about.

These easy-to-use electric ranges are in stock right now at your local dealers. Be sure to see them soon.

STORING YOUR DEER

NOTICE to all successful deer hunters, if cold storage is being planned for your deer, attention is directed at this time to the provisions of the State Locker Plant Regulations. This prohibits "the storage of hides and skins, unless separate storage rooms with no open passages leading into the locker room, chill room, aging room, or sharp-freeze room are provided for this purpose", reports Miles A. Nelson, Chief of the Bureau of Marketing and Enforcement of the State Department of Agriculture.

In other words, deer with hides or skins on, constitute "Hides" or "Skins" as referred to in the regulation, and must be stored in a separate room than other meat or food products.

FOLLOW FEEDING METHODS TO AVOID WASTE

Farmers should be following feeding methods that waste as little grain as possible, points out county agricultural agent, Karl D. Bailey.

The following hints, recommended by the U. S. Department of Agriculture, will help to stretch the short corn crop and also to conserve other grains.

Bred sows can be handled in grain or corn fields to recover fallen grain that would ordinarily be lost, thereby saving a certain amount of harvested grains.

Pastures provide exercise, save approximately 15% or more of grain ration, and furnish valuable proteins, minerals, and vitamins. Temporary pastures of wheat, barley, and rye can be utilized for light fall and winter grazing.

Good quality leaty legume hays, such as alfalfa and the clovers are excellent feeds for the brood sow and can make up as much as 50% of the ration during the first half of the gestation period, and reduced amounts in the latter part. When feeding this quantity, it should be ground and mixed with some grain.

Agent Bailey says that minerals are necessary to maintain health and develop a good strong litter of pigs. A good mineral mixture be available to sows at all times.

Highway Crews Prepare For Winter Driving

Your driving safety is of vital concern to the state highway department. Winter weather prevents definite driving problems and the highway department crews work diligently each fall preparing for the snow, sleet and ice that are certain to follow.

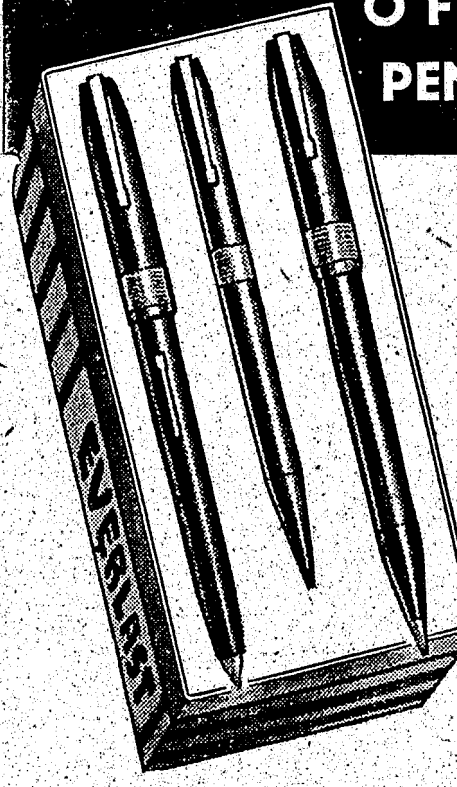

Sand trucks and snow plows are overhauled for later use. Bags containing a sand and salt mixture are placed at strategic points along the highways; snow fences are set up to keep driving snow from forming huge drifts. When bad weather does set in, highway crews will be on call 24 hours a day to help keep roads open and safe for driving.

You, too, can help cut down winter accidents by keeping an eye on driving conditions when you step on the accelerator. Any speed which is unsafe is unlawful. Sometimes the fastest one may drive lawfully will be only 10 or 15 miles an hour when ice or snow create driving hazards. On slippery streets, remember to reduce speed, keep the car in gear as long as possible, avoid sharp turns and hard application of the brakes.

GET MOST FOR YOUR MONEY WHEN BUYING TURKEY

How much you pay for your Thanksgiving turkey will depend somewhat on the quality of the bird. High prices do not always mean quality, so you should know how to pick one that is worth the money.

Some points to look for in a good turkey are suggested by Gladys Knight, Michigan State college home economist. The skin should be clean, waxy, unbroken and tender with few pin feathers and no bruises. Stocky bodies and broad breasts indicate a high proportion of meat to bone.

The best turkeys have a plump appearance and breast, thigh and legs are well-fleshed. There is a good covering of fat under the skin of these parts. Don't buy a turkey that is much too large for your Thanksgiving day guests and waste what you have saved by selecting good quality. You may be able to buy a half-turkey. One pound of turkey, dressed weight, should be allowed for each person to be served.

Another point to consider to get the most turkey for your money is the way it is dressed. If the head and feet are on, it is picked but not drawn, and the tendons are not removed from the drumsticks, you will have to count on 15 percent of the weight as waste. If it is full drawn there will be no waste and less labor.

Full-drawn turkeys may or may not be individually packaged. Most of them are government-inspected and quick-frozen. If you decide to buy half a turkey, you can roast it just like a whole bird. Allow about 4 1/2 to 5 hours to roast a half turkey weighing 7 to 9 pounds.

E. W. ALCHIN TO GET PROMOTION

Opportunity to become a full fledged county agricultural agent in Cheboygan County, is given for the reason for resignation of E. W. Alchin, assistant county agricultural agent for Oakland County. Mr. Alchin has served Oakland County farmers ably and well during the past 15 months, according to Karl D. Bailey, County Agricultural Agent. Mr. Alchin has had charge of all livestock projects in Oakland County which includes the 5 Dairy Herd Improvement Associations, the two Artificial Breeding Associations, the Dairy Health program and the sheep, hog and poultry programs.

Oakland County has nearly 20% of its cattle in herd improvement work as compared with 4% for the entire state.

Mr. Alchin began work in Oakland County in September of 1946, shortly after his release from the U. S. Navy. Previous to his being in the Navy for 3 1/2 years he was a vocational agricultural teacher at Chesaning. He became county

ARMY CAREER Above Average Pay

The Soldier receives a pay check plus his food, clothing, living quarters, and medical and dental care. What's more, he pays NO federal income tax.

That's why it is estimated that it requires a civilian income of \$211.50 to equal the buck privates pay of \$75.00 a month.

But the private's pay will climb. It increases with each promotion, with each re-enlistment, with overseas duty, with dependency allowance.

Fires In North Temporarily Eased

Rains, heavy in the south central part of the upper peninsula, medium in the west, light in the east and light in the northern half of the lower peninsula, with none at all near Atlanta and Gladwin, have temporarily eased Michigan's acute forest fire hazard.

Conservation department men fought 170 separate fires last week. The fires burned over total of 5,115 acres. In the critically dry period that began in the previous week, a total of 248 fires has burned 7,100 acres to date.

Fires still burning all were under complete control and the hazard lessened by increased humidity, but the emergency ban on open fires and tobacco smoking outside homes, cars and authorized camp grounds in the northern two-thirds of the state continued in effect.

The fight to keep the fires within bounds on the days of great danger cost three lives, those of Conservation Officer Thomas J. Mellon and Conrad Oberg, drowned in Manistique river when hurrying to a blaze inaccessible by road, and Riley Hopkins, killed by a falling tree while fighting the Little Girls Point fire in Gogebic county.

TO THE VOTERS OF SPRINGFIELD TOWNSHIP
For a long time the residents of this Township have been without adequate fire protection. Now, thanks to the sales tax diversion amendment, there are ample funds on hand to provide that long needed fire protection.

Your Town Board has called a Special Election for December 9, 1947, so that the voters of the Township can decide whether or not they want the Town Board to spend not to exceed \$9,000.00 from funds now on hand for the purchase of fire fighting equipment. We urge every voter in the Township to vote that day and express his or her desire in the matter and your Town Board will, of course, follow the results of the ballot.

Every member of the Township Board is in favor of purchasing this fire equipment and if the

electors agree with them on December 9 we will promptly proceed to get the necessary equipment at the most favorable price. Sixteen men from the vicinity of Davisburg have already volunteered to man the equipment. Township Board Springfield Township

TRANSPORTING YOUR CHRISTMAS TREE

This is the season of the year when we begin to think of Christmas trees, and we must also remember the provisions of the Christmas Tree Law (Act. 124 PA 1933) which governs all cutting, removing and transporting of these trees within the State's boundaries. C. A. Boyer, Chief of the Bureau of Plant Industry, State Department of Agriculture, again this year will establish road blockades to check on trees being transported by car, truck, and trailers. For approximately six weeks these blockades will render 24-hour service for the convenience of anyone wishing to move trees.

Anyone wishing to cut or transport Christmas trees, holly, and evergreen or other decorative boughs, must first obtain permission from the property owners, securing a legal Bill of Sale, which must accompany the trees at the

time they are in transportation. Approximately 30,000 Bills of Sale have been mailed by the Bureau of Plant Industry to County Agents, County Sheriffs, Conservation Headquarters, State Police Barracks, and other cooperating agencies for such use. They may also be obtained free from the State Department of Agriculture.

Trees having roots attached come under the heading of nursery stock, and must be inspected on the premises on which grown, and a certification of inspection obtained before removal. A bill of sale is not sufficient for trees having roots.

The Christmas Tree business is a big one, involving several millions of dollars; annually from one and 1/4 million to one and 1/2 million trees are checked. In order to avoid violation of the movement of the type of material covered by the Christmas Tree Law, it is urged that buyers and/or cutters, be certain that they have their Bill of Sale from the person from whose land the tree is taken; and in the case of trees with roots, a certification of inspection obtained.

It pays to share the line

With telephone facilities still short, you may be one of those who share a party line. If you are, you'll want to co-operate with your telephone neighbors to get good service. Keeping your calls brief helps—so does spacing them some time apart. Remember, too, to put back the receiver after each call. And, if your neighbor has an emergency call to make, naturally you will let him have the line. Michigan Bell Telephone Company.

From where I sit... by Joe Marsh

Metropolitan Papers Please Copy!

Folks here were burned up over an article on Our Town I reprinted from a city paper. Made us sound like a bunch of "hicks" who whittled sticks and wore chin whiskers. (Last person I saw with chin whiskers was passing through on his way east.)

So I ran an editorial on how we spoke of city "slickers"—as over-dressed wisecracks, only interested in making money, and spending it in night clubs.

Fact is, if we got to know each other we'd probably find we're not much different, underneath. City folks work hard; like to come home at night to their families; and relax with a moderate glass of beer, like we do.

From where I sit, it doesn't matter if you live in an apartment house or on a farm—work in an office or a cornfield—the American tradition of quiet home life, temperate habits, and neighborliness is common to all of us.

Joe Marsh

YOUR HOME NEWSPAPER

All matters handled through the Probate Court require a certain amount of legal publication in one of the county papers. Foreclosing a mortgage entails publication of the foreclosure notice in a county paper.

Either the probate court officers or your attorney will have your legal publication carried in The Clarkston News if you request it.

We solicit the privilege of carrying such legal publications. This form of advertising is valuable to us. When you support us in this way we are able to give you a better paper each week.

Kroger
65 Years of Low Prices
Ever See a Cut Without a Tail?
No, we didn't say cut, we said out. In this case, a cut of sirloin steak. Such steaks are often sold with a long, stringy tail. But in the Kroger Beef Cutting Method, this tail is trimmed down before the steak is weighed and priced. Just another example of the money-saving service you get in Kroger stores.

the W.C.T.U. will be held at the home of Mrs. Grant Beardslee, 6650 Pine Knob Road.
Mrs. Ruth Helen Way, 55, of 4645 Dixie Highway, Drayton Plains, was dead on arrival at Pontiac General hospital after being struck by a southbound car on U. S. 10 near Sherwood avenue about 6:10 p. m. Saturday. Witnesses report the mishap occurred just after the woman had gotten off a northbound bus and started across the busy highway. Dr. I. C. Prevette, deputy coroner, attributed death to a basal skull fracture and broken neck. The victim's leg was also broken.

In the first two weeks of operation, the new state fox bounty cost the conservation department \$6,235 for 1,247 foxes. The rate at which applications for the \$5.00 bounty are being filed still is on the rise, the department reports.
An opinion from the attorney general confirms the necessity of notarizing every bounty application, and rules that when a township clerk is also a trapper his application for bounty must be made to the deputy township clerk.

John Phillip Sousa, world famous band leader and composer of "Stars and Stripes Forever" joined the U. S. Marine Band as second trombone player when he was 13 years old.
