From where I sit... by Joe Marsh

Where Does Your Money Go?

Read the other day where country folks and farmers spend more money, proportionately, on their homes than city dwellers do.

Doesn't seem hard to believe when you think it over. Take the folks in our town, for instance: They're home-loving people—who'd rather spend an evening by the fire with a mellow glass of beer than go out in search of entertainment or diversion.

So it's only natural they put more into what means most to them and to their children: their homes. They may not have too much to spend—but it goes for those permanent, abiding comforts that make home a nicer place to be.

And from where I sit, that budget calls for some of the niceties of home life too—like cider and popcorn for the kids from time to time, and a friendly glass of beer for Mom and Dad... things that belong with what we mean when we say "Home."

THE CATHARTIC HABIT

★ Too many people are influenced by stories concerning "intestinal cleanliness" or "stimulating the flow of bile." Many cases of simple constipation do not require a laxative at all, but only a minor change in diet and habit.

The habitual use of cathartics is dangerous. Such misuse is often followed by chronic ill health. Strong laxatives are particularly dangerous when taken to relieve abdominal distress. The source of the pain should always be accurately determined by your physician. The safe procedure is to consult him. If a laxative is needed, he will prescribe a safe preparation with proper instructions for dosage. Then bring your prescription to us for expert compounding.

Guernsey Owners To Have Meeting

The Thumb District Guernsey Association will hold its annual meeting at the Bruce-Armada

Grange Hall, 3401 McFadden Rd., Romeo on March 2, it was announced by H. L. Wadsworth, Romeo, president.

"The welcome mat is out for all farmers," said Wadsworth, "We

have prepared rather an extensive and interesting program and are planning on a good turnout."

At 11 o'clock in the morning, the county agents of the Thumb will participate in a round table discussion of subjects vital to dairymen. Karl D. Bailey of Oakland County will handle the problems of soil conservation and crops. William Murphy, Macomb County Agent, will act as moderator, allowing plenty of time for questions from the floor.

Following a catered luncheon, to be served in the hall, several of the broadcasting stations serving the Thumb area will make audience participation transcriptions.

A major portion of the afternoon session will be devoted to the business meeting. Officers will be elected, a show site chosen and breed matters generally will be discussed. Representatives of the State and National Guernsey organizations will be on hand to render their reports.

"Everyone who owns a Guernsey, has owned one, or, who hopes to own one, is invited," said program chairman Vince Fitzgerald of Lenox. "The watchword for the meeting and for 1948 is 'PROGRESS'."

4-H Clubs Observe National Club Week

Members of 4-H clubs in Oakland county are cooperating in many ways to make this year's observance of National 4-H week successful.

The dates for the week have been set from March 1 - 7. County 4-H Club agent R. Lynnox Lewis states that this county has 1545 boys and girls enrolled in 4-H work with over 2100 projects.

The theme of the 1948 4-H is: "Creating better homes today for a more responsible citizenship tomorrow." During the observance, 4-H members will be given the opportunity to inventory their 4-H activities to date as a "check-up" on their efforts in carrying out any 4-H programs already started. Parents will be invited to get acquainted with the work of 4-H members in the community.

Among the events planned by Oakland county 4-H boys and girls are: window displays, special 4-H club meetings and exhibits of posters, according to R. Lynnox Lewis, 4-H Club Agent.

ANIMAL LIFE IN AUSTRALIA TO BE SHOWN SUNDAY

Freakish and funny wild animals of Australia will be featured in color motion pictures when Commander John W. Hess gives a World Adventure Series public lecture on "Australia Today" at 3:30 next Sunday afternoon, Feb. 29, at the Detroit Institute of Arts.

The new color film shows the modern cities of Sydney, Melbourne and Canberra, as well as vast sheep and cattle ranches. But most of it is devoted to Australia's unusual and comical wild life. Shown are: the duck billed platypus and young, the engaging kaola or teddy bear, the tree kangaroo, the dingo pup, the Tasmanian Devil, the clownish "Willie Wagtail" bird, the hilarious kookaburra, the ridiculous "Cuscuss" and scores more. Commander Hess spent three years filming these widely acclaimed pictures.

BUILDERS' MEET AT MSC, MARCH 11-12

The third annual farm building conference sponsored by the Michigan engineering department has been scheduled for March 11 and 12 at East Lansing.

A builder's show especially for farm structures has been planned in conjunction with the meeting. A display of new equipment and building materials will feature the show which will be held in the agricultural engineering building. Discussion topics at the meetings include heating systems, planning and structural design, building materials and related subjects.

CHECK EQUIPMENT FOR MAPLE SYRUP TIME

Get your maple syrup equipment ready. That's the advice of Ira Bull, forestry specialist at Michigan State college.

Early runs of sap, which come when the weather warms, are worth collecting. Waiting until the mild weather to wash out equipment may mean that the first run is over before you can get the pails out.

An adequate supply of cans or glass containers and labels should be purchased. Felt filters should be examined to see that there are no holes in them.

The forester also advises that thermometers be tested in boiling water to see if it reaches 212 or 211 degrees. The boiling point of water will decrease approximately one degree with every 500 feet above sea level. If you use a hydrometer, see that it is in good condition.

An adequate wood supply is also a necessary part of syrup making. There is little time to cut fuel when the sap finally begins to flow.
