is as follows: APPEARANCE, 20% - - color: even golden brown, 15%: surface, smooth, not wrinkled or cracked, 5%. CRUST, 40% texture: flaky, crisp, thin, tender, not soggy or doughy, 25%; flavor, tasty, not flat or rancid (must be a two crust pie, open or lattice pie not eligible), 15%, FILLING, 40% - - flavor: pleasing apple, not over-spiced or under-spiced or under-sweetened, 20%; consistency: creamy, smooth, not lumpy or watery, 20%.

No restrictions have been placed on the type of apple used in the apple pie contest but it goes without saying that the best quality apples add considerably to the quality of apple pies resulting herefrom.

Anyone need not be hungry for Michigan apple of high quality this year, states Karl D. Bailey. County Agricultural Agent. Mr. Bailey states that there are a million, two hundred thousand trees in 10 counties in southeastern Michigan, and it is expected that the crop will be about 50% of normal. Coming on the market this week is the Wealthy variety, suitable for dessert and cooking. The Wealthy is a good sized red apple of very good quality and comes in season during September and October, It has met with conand for those who prefer tartness it is considered good for dessert purposes as well.

GOOD RECORDS ARE MEANT TO BE BEATEN

* The infantile death rate in the United States is very low. From 1934 to 1936 we ranked seventh in the world, led only by New Zealand, Holland, Australia, Norway, Switzerland, and Sweden.

Yet 70,000 infants die annually in the first month of life, and 53,000 more from the second to the twelfth month. How many of these precious infants might have lived had their mothers had adequate prenatal care under the direction of a competent physician?

It is now up to the mothers to take advantage of the knowledge and skill of the physician during the trying months of pregnancy. We are ready to supply the needed dietary supplements and other medication ordered by your physician.

This Jack Horner isn't a first-grader who doesn't know any better. Grade school children have better safety records than adults. No-this Jack Horner is you.

Three out of every four pedestrians killed are breaking a rule—jaywalking—crossing in midblock—disregarding a traffic signal. What a tragic waste of 9,000 lives a year!

Next time you cross the street, wait for that green light! Cross only at crosswalks; don't rush out from behind parked cars. Where there are no signals, look both ways before crossing. Spend an extra second and stay alive!

CIRCUIT COURT COMMISSIONER

(Non Partisan)

- Cecil McCallum is an impartial and successful Pontiac attorney, educated at the University of Michigan and Detroit College of Law, with fifteen years experience in trial work, and is well qualified for the office of Circuit Court Commissioner. He deserves your vote!
- Attorneys are supporting Cecil McCallum because he will keep the office open full time and provide clerical help, thereby eliminating the irritating and expense waiting by litigants and attorneys.
- The present Pontiac Commissioner has held the Pontiac office for 12 consecutive years in spite of his statement before election in 1936, that no attorney should be allowed to hold this office longer than 8 years. He has held the office for 12 years and wants 14!

PLANT WHEAT AFTER SEPTEMBER 20 IN THIS AREA

A warning about Hessian fly, East Lansing, Mich., 5th grade, the insect that attacks wheat in the Miss Myrtle Bosma, Davison, fall and spring, was given this Mich., 4th grade; Miss Clara week by Karl D. Bailey, county agricultural agent.

In this area, planting whea before September 20 is dangerous. Lucille Frick, Ortonville, 1st grade; This date was established as bes for this area by Michigan State college specialists who set wheat seeding dates which avoid damage by the Hessian Fly.

Wheat plants attacked by the dark bluish-green in color. Infested plants finally die back from the leaf tips. The injury is done by the larvae (maggots) of this insect which feed beneath the leaf sheath usually next to the Ortonville Schools will open the day after Labor Day with faculty ground.

The only satisfactory control for the Hessian fly at this time is noon and again on Wednesday to plant wheat in the fall after morning. Students will not come most of the danger from the insect is past. Hessian fly does not live to lay eggs after late summer.

Some farmers claim to have first grade, 7th and 8th grades will report Wednesday afternoon planted earlier and escaped damat 2 o'clock. A little time taken to put the silo in good condition will result day, for a full day except the in better keeping of the silage kindergarten and perhaps the first according to agricultural engineers at Michigan State College.

The silo should first be cleaned by scraping off any old silage that registration in the spring, high may be adhering to the walls. All litter at the bottom of the silo should be taken out.

All kindergarten children should Air leaks in walls may cause silage to spoil. Walls should be of school. If this hasn't been done carefully examined and small cracks filled. Melted paraffin applied with a paint brush is good for this purpose. Since paraffin is inflammable when hot, care should be taken when using it, It should be brushed into cracks or joints while it is still warm:

FINDS PRACTICAL USE FOR DEAD RIPE FRUIT

Dead-ripe fruit which is too soft for canning or freezing can be made into fruit puree and preserved for use in many colorful and delicious recipes next winter, Excellent pies, puddings, whips,

ice cream and breakfast rolls can be made from frozen fruit purees states Pauline Paul, home economist at Michigan State College, who has worked out the recipes in laboratory kitchens.

Purees are easy to prepare and simple to freeze. Wash and trim the fruit and cook it for a short time. Then put it through a sieve or food chopper, mix with a small amount of sugar, package and

Purees should be cooled before packaging. Strawberries are the only fruit which do not need a little cooking. Packages should be frozen as soon as possible after Drayton Shoe Repair preparation and stored at zero degrees Fahrenheit until used.

Tomato puree will make delicious juice by adding water and seasoning or it can be used for tomato sauce or French dressing. Juice from puree can be left

in for a thinner puree, or it may be drained off and used separately. For further information about preparing purees and for delicious recipes, obtain a copy of the Michigan State College experiment station bulletin, "Fruit Purees". Request it from your county extension office, or from the Bulletin Office, Department of Public Relations, Michigan State College, East Lansing, Mich.

It's no trick to hit high F when your bath is warm . . . when you know there's an automatic electric water heater in the house to bring you all the hot water you need whenever you turn the tap!

For good health and good spirits, physicians say, try a daily hot bath. For dependable, low-cost hot water -thousands of your neighbors say -electricity rings the bell.

It's safe, for there are no flames, no fumes, and no soot.

It's clean and quiet and trouble-free. It's economical, too, because the current comes to you at a special low water heating rate.

And it's reliable—once installed, you. can forget all about it. For laundry, baths and dishes, and a dozen other uses, try water heated electricallythe modern, carefree way.
