Wolves and Dragons In Tight Game

Practically an entire senior football team, playing their last game for Clarkston High, played to make a huge success of a Harthe highly favored Lake Orion vest Home Festival and Bazaar Dragons to a practical stand-still, in anticipation that it will become but in the end it was power in an annual affair. The Festival reserves and sheer speed that is being sponsored by the Student

A "dads' night" crowd saw their home team played even for over 20 minutes but with 3 minutes remaining to be played in the first half. The Green and White shoved district is needed. The date: next over the initial tally of the game Tuesday, November 23; the time: on a 3 yard buck. The half ended 6:30. You are asked to bring a with the score: Lake Orion, 8 -Clarkston, 0.

The Clarkston boys came ou' raring to go in the second half and -was short and when Joe Sutton gathered the ball in on his own 30 yard line, he saw a clear field ahead and he romped 70 yard: for the score. The play was called back when holding was detected but Joe's run will be remembered as a beautiful run by all who saw

As it turned out, this was the play which broke the boys' backs. The Orion team rolled over another score early in the fourth quarter and although the Wolves playing games and enjoying Carthreatened twice more, the double stripe could not be crossed and the gun went off leaving the score

at 12-0. Our two very fine quarterbacks Dave Leak and Joe Sutton will be lost for the team next year because of graduation, Bob friends. Fell, Gib Wells and "Big" John. Adams, who comprise the regular backfield will also be lost.

In the line, Leroy Johnson, Melvin Miller, Don Healy, Don Dubats, Dave Saxman, Dave Yoh, Richard Allen and Daniel Keating will also be graduating and will be greatly missed by next year's team.

Opening of the rogular gun season for taking of whitetailed deer in Michigan, November 15, marks the climax of the hunter's year. Continuing through November 30, the season may lure close to 400,000 hunters into the woods. This year, hunting of deer with shotguns and buckshot loads is legalized in southern counties but, as usual, heaviest hunting pressure is in the north. The conservation department's rame division actions to the Market and Mark game division estimates that Michigan's deer herd may exceed 900,000 animals. Only male deer with 3-inch antlers, or larger, may be taken legally. Above is shown a model deer camp set up in Leclandu county less season. Model deer hunters keep, and leave, camp sites clean, and guard against fire.

TOURIST SEASON THIS YEAR BUSIEST ON RECORD

Figures released this week by the Michigan Bell Telephone Company sustantiate reports that the tourist season this year was the busiest of any on record,

R. E. Poll, manager here for the company, said a new high in the number of long-distance calls to and from the state's resort areas was established.

During the season Michigar Bell handled 15 % or 145,000 more toll messages in resort areas than during the same months last year when a booming tourist trade was in full swing.

The record was made possible in part by an expansion of the state-wide, long-distance network. Hundreds of new toll circuits to resort areas were rushed to completion before the summer season got under way.

The largest installation was of \$3,500,000 cable between Grand Rapids and the northwest section of the state.

Although considerable progress is being made in building "plant" tó handle tourist telephone traffic Poll said the job is not yet com-

"Many more facilities will be built to handle this specialized traffic as Michigan Bell's part in encouraging one of the state's principal industries", Poll said.

Veterans may be disappearin from the American college scene but the college marriage, a custom made popular by the returning G.I., is definitely here to stay,

That's the opinion of Dr. Judson T. Landis, associate professor of sociology at Michigan State College, who has spent the past five years in research work in marriage and related fields,

Although Dr. Landis believes the number of student marriages will drop from the all-time high which followed World War II more student marriages now and future.

in the future than in the years before the war".

The availability housing at low rental rates; the acceptance of college marriages by non-veteran students and society as a whole; and the ease with which student-wives have been able to find jobs are cited by Dr. Landis as factors in this new trend on the college campuses of the nation.

Although Dr. Landis does no eliminate the possibility the some changes in the economic status quo might upset the predictions, he discounts this as imhe adds: "I am sure there will be probable, at least in the near

From where I sit ... by Joe Marsh

It's Your Fight, Too!

Bing/Crowley was "beefing" the other day about all that Our Town's doing in the way of sending food and clothes to Europe. Bing felt. that those struggling democracies should look after themselves.

But most agreed with Judge Cunningham who said: "So long as any family or individual in Europe is helping hold the line for freedom-against the forces of intolerance-it's common sense, and

common decency, to help 'em." Because that's everybody's fight: To see that individual freedom is

little-whether it's the right to vote, or the right to enjoy a temperate glass of beer or ale with

And from where I sit, no liberty's too small to overlook. Because the minute one small freedom is threatened, all the others are in jeopardy -just as the minute one small country loses freedom, all its neighbors are in danger!

PACK A GOOD LUNCH FOR YOUR CHILD

While your child is concerned with the three R's of school you are concerned with the three S's of his lunch bor, If you follow the three S's-sufficient, separated and seasoned—he will be better

Children feel the same about food whether it is in a lunch box or on the table, believes Miss Josephine Hoke, Home Demonstration Agent.

They want sufficient, they want it served separately and they want it well-seasoned but not over-seasoned. Wrap each food separately so that flavors do not mix and so that they stay fresh and whole until lunchtime.

Remember the seasonings for such foods as hard cooked eggs and ripe tomatoes.

If you serve youngsters a meal that really appeals to them, they can make short work of causing it to disappear. Lunch box meals need to follow and help fill out the basic food needs of the child. The box lunch should be enticing enough to keep a youngster on the job of eating from the time he lifts the cover at noon until he gets a full noontime meal under

EONIHAC!

Above everything else..a *good* car!

Pontiac has one manufacturing principle which takes precedence over all others: Pontiac must always be a good carl

There is no other motor car quality which people value so much as goodness. That's why Pontiac engineers and production specialists spend so much time and energy and money to insure Pontiac quality. Pontiac cars must last long-and they must last welland they must function through the years with a minimum of upkeep cost.

Owners have been quick to appreciate this. Some of the testimonials they send to the factory, and to Pontiac dealers, tell of performance feats that seem almost impossible of attainment.

Pontiac has many other outstanding virtues, of course. It is a wonderful performer. It is delightfully comfortable and easy to handle. It is a great beauty, and unusually distinctive in appearance.

But its greatest virtue is goodness. This year, or any year, you just can't beat it for faithful performance.

DAIRYING SEEN AS PROFITABLE IN 1949

Farm prices of dairy products in 1949 that will average close to the 1948 levels are predicted by Michigan State college agricultural economists. Supplies will be higher, they believe, but with a strung continuing demand, net farm income from dairying should be good.

Dairy prices are expected to follow the usual seasonal pattern declining about ten percent from December to June and rising after that. Milk output will probably be higher by about two to three percent.

Dairy specialists advise feeding balanced rations to cattle to maintain full production in the coming year. High-producing cattle should receive enough extra feed to kee them producing well. Culling and attention to feeding of young stock are also indicated. The feed ing situation will be improved they believe. Each pound of milk will buy one-third more dair ration than a year ago.

Demand for all dairy product will continue strong, the economists say. Fluid milk sales will continue at about the same levels as in 1948. Increased milk supplies will be diverted to manufactured products such as butter and cheese:

In looking ahead to 1950 and 1951, farmers are advised to start building up milk cow numbers. Dairy prices are expected to hold up longer than hogs, poultry or

Good decoration need not mean dramatic or bold interpretation.

Often simple, warm decorating is much more effective. For instance, this Early American master bedroom combines warmth and charm in

this parity American master oeuroom combines warmin and charm in the old chair and footstool, quilted bedspread, rag rug and chintz draperies. The James Cagney home in Beverly Hills (above) features unsophisticated detail that makes it inviting and livable throughout.

unsophisticated detail that makes it inviting and livable throughout. The plain white shades at the windows complement the patterns of the other fabrics. Again, the antique wash basin and ewer are featured alone to avoid a cluttered look and to retain the utmost simplicity.

FACT FINDS ABOUT

If you have wondered why some china or pottery dinnerware is more expensive than others,

you will be interested in some of

Part of the cost of dinnerware

depends on the amount of work-

manship, the method of handling

the clay, the skill of the crafts-

man and the time used in making

the article. The time used in turn

depends, on the detail and beauty

of the design and the glaze.
For example, reminds Mis

Josephine Hoke, home demon-

stration agent, red glaze is almost impossible to get in porous ware

and thus greatly increases the

Additional costs might be de-

termined by the producer—

whether the dinnerware was

turned out by mass production

or by studio potters. Mass pro-

duction reduces the cost since one design can be used thousands

of times. Another advantage is

that it makes uniformity of table

service and stock can be replaced

Studio potters stress original-

ty of design, careful workman-

ship and unusual glazes and dec-

oration. Often the design of a

studio potter may be contracted

by a large manufacturer who then

produces the designs on a mass

cost of the object:

fabrics with a "tweedy" look are also being shown.

Two new fabric contrast combinations are wool jersey and taffeta and wool crepe and satin. Scarf and cuffs of taffeta give the jersey a "rustle".

Another fabric is wool chiffon which is being used for daytime wear. This material looks like jersey but neither sags or stretches. It is used for simple sweaterlike bodices joined to slim stitched accordian pleated skirts.

New fall trimming idea is the use of embroidered eyelet on black wool used either on the skirt or bodice of dresses. Novelty vestee effects on daytime dresses with tucks, braid, or a reflection of the skirt trimmings picked up in the vestee are also being used.

This home adds up to good taste in decorating.

— have you made sure that thoroughly understand the rules of the road? Do you, yourself, know that cyclists, too, must obey every rule of the road?

Bicycles ... driven by unthinking, unknowing boys and girls can be street and highway menaces. These children can endanger their own lives — as well as those of the passengers in autos about them, if they do not practise good, commonsense safety — the safety that every parent should "teach and preach" to his children.

The parent who chuckles at the sight of Jim riding his bike with Tom perched on the handle bars is as much a danger menace as the car into whose path Jim, swerves.

as much a danger menace as the car into whose path Jim, swerves, Why? Because that sight spells DANGER—and because it is dangerous, it is against the law! Get a copy of "What Every Driver Should Knoy" and go over the driving rules with your youngsters. Make sure that each of your bicycling children know the rules of the road and the special rules governing bicycles. Play safe in the future by learning safety now!
