"Wallie" Weber is the head freshman coach at the University of Michigan and a developer of varsity material. He received his Bachelor's degree from Michigan in 1927 and his Master's degree in 1929. He joined the University staff in 1931 after a brilliant re- received at the time the church cord as football coach at Benton Harbor High School where he taught social sciences and coached. To his list of "to-be-remembered events he can add that he was the obtain necessary funds with which back field coach when Michigan won the national championship in 1931 and 1932.

Mr. Weber is one of Michigan's most outstanding "contact" men. He speaks at many banquets and in the fall after the games he is heard on the radio and also appears on television. His approach to the serious side of his lectures is indeed very individualistic, Listeners have said that he says more in five minutes than most speakers say in an hour.

Everyone will be looking forward to hearing Mr. Weber on April 11th.

* Devastating epidemics have ranked with war and famine as population levelers. Of these three scourges of man, pestilence was most dreaded. During the Black Plague epidemic of 1348, it was estimated that in some places over two-thirds of the population was wiped out. The discovery of bacteria as the cause of in-

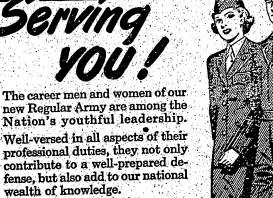

fectious disease is still within the memory of the living. Pasteur developed the first vaccine for rabies in 1885. Since that time many immunizing procedures have become routine. As a consequence, deaths from infectious diseases have been drastically reduced.

Everyone should be protected against smallpox and diphtheria as an absolute minimum. Do not wait for an epidemic to break out. Then it is often too late.

William Manska declares that running water is the foundation of his electrified farm—that he would never be without it. He points out that in addition to Increasing milk production 20%, milk house thores are done far more easily and quickly.

Mrs. Manska agrees, saying, "Our complete running water system saves us so much needless work! We know our running water is safe to use in any quantity ...it's always fresh and sparkling clear at the turn of the tap!"

Thousands of other farmers agree that running water is the most important hingle gift of electricity—that, truly PROFITS GROW WHEN WATER FLOWS

AUDITOR'S CERTIFICATE

I have made an examination of the cash transactions recorded in the books and records of the Treasurer of Independence Township for the period beginning March 21, 1948 and ended

March 20, 1949.

Cash balances at the beginning and end of period were verified by bank confirmation.

United States Treasury Bonds were inspected.

Cash receipts of delinquent tax and redemption collections were traced to remittance statements from the County Treasurer, and sufficient tests were made by reference to tax receipts to satisfy me that all receipts of 1949 tax collections were deposited in bank.

posited in bank.

Cash disbursements were all supported by proper authorization orders issued by the township clerk or warrants issued by treasurers of the school districts.

Therefore, I hereby certify that, in my opinion, the accompanying statement is a full, fair and complete report of the cash transactions of the treasurer for the period above stated.
