"They Follow On" To Be Shown Friday

A new sound-color film, "They Follow On," is to be shown at the First Baptist Church Young People's meeting Friday, (Sept. 30), at 7:30 p.m.

Premiered recently before an audience of 3,300 in Chicago, "They Follow On" is a 30-minute story based on the experiences of a young Bible student. When he arrives at school, Bill Williams has many adjustments to make—

and a life work to choose. It is not easy to decide between a career at home and on the mission field. But with the help of his roommate and other counselors Bill finally makes up his mind.

Major parts in the story are portrayed by actual students at Moody Bible Institute, Chicago, where "They Follow On" was filmed. In real life, the student who played the part of Bill Williams intends to become a medical missionary.

Producer of "They Follow On" was Henry Ushijima, who also filmed "Against the Tide" and other 16 mm. color productions. The sound track for the new film was recorded in New York by RCA.

On Monday evening the Clarkston Bethel of Job's Daughters and the Joseph C. Bird Chapter, No. 294, O. E. S., held a joint dinner at the Masonic Temple. The parents of the girls were the honor guests.

Dinner was served to sixty-eight persons by a committee composed of Mrs. Gordon Boeseman, Mrs. O. L. Kern, Mrs. Don Harris and Mrs. Howard Johnson.

Joan Palne, treasurer, announced a gift of \$25 received from Cedar Lodge, No. 60, F. & A. M. This money will be used to help buy robes.

For the evening's entertainment the girls conducted a regular form meeting. This was exceptionally interesting because the girls proved themselves very competent.

The Benefit Party at Harmony Valley has been postponed until Oct. 8. Some unusual talent has been obtained for this new date. Then too, the colors in the Valley will be at their prettiest and all in all everyone will have a much more interesting time. At this time the heating facilities for the dormitory and play room are practically assured, according to the Valley's master mechanic, neighbor George Miller.

Rally Day was held in the Methodist Church School last Sunday morning. Promotion exercises were held and were directed by Edmund Gunter, superintendent. He presented certificates of promotion to those being advanced to the next department. The beneficiaries held graduation exercises. They sang special songs. Letter Received From Cairo, Egypt

Last week Mrs. David Newlands received an interesting letter from the Reverend Dwight S. Large who went to Egypt this summer. Mr. Large spent a year in Clarkston as pastor of the Methodist Church. His many friends here will be interested in the following letter:

Gaza, Aug. 23, 1949

Dear Mrs. Newlands:

Well — I'm here! Been here one week tomorrow; flew here by United States plane from Cairo. Had 5 days there and enjoyed Cairo which is a modern city. My boat took 13 days from New York to Alexandria, Egypt, but I found the trip very relaxing. Yesterday, the chief here gave me the records, keys to two mosques and jeep No. 11, and my job — the feeding of 33,000 people (men, women, and children). I have two food distribution centers, 18 helpers in one and 20 in the other, and lots of worry. One mosque is beautifully located on the Gaza beach of the Mediterranean Sea. I like my assignment although I have some of the poorest of the poor. As soon as I learn my job, I'll go visiting as we want to distribute 10,000 tents to families which have no shelter — and to select those who need tents most within our total group of 225,000 is a big job. We have 47 on the staff (12 of these are medical). I have a clean place to sleep, good food and a pleasant roommate who is in charge of the educational program (UNESCO supported). The entire group here is sincere, mature, young adults, most of them married. Some were war officers, and volunteered to help because they wanted to correct some of the terrible suffering. About half of them are Quakers. All are anxious to work. We rise at 4:30 a.m.; eat breakfast at 5:00 a.m.; start to work at 5:30. People start getting food from our 13 food-distribution centers about 6:00 a.m. We can only work until 12 or 12:30 because of heat and merciless sun. At night we have two hours of electricity in our 4 buildings, as we have set up our own generator. Mail will be most irregular as this region is under Egyptian military, and to play safe we truck or fly our mail from the Cairo address, which takes time.

Best regards
Dwight Large

Mrs. Buehrig then unwrapped the lovely handkerchiefs and thanked the members profusely for their kind thoughts and best wishes. She expects to leave in a few weeks for the west coast where she will join her husband, Dr. Robert Buehrig and with their family will sail for Japan. Dr. Buehrig will leave here Oct. 12th for California where he will remain for a couple of weeks before the sailing date.

Twenty-Six
The sun shines bright, its peaceful rays
Are symbols of our married days
The waves that ripple on the shore
Are happy days inside our door.
The maple leaves of gorgeous red
Are highlights of the lives we've led.
Like children, whom our home
Have blessed,
And friends who've come to be our
guests,
The shadows cast by shade of fall
Are anxious days that come to all.
The wind that gently blows from south
Are kind thoughts passed by word
of mouth.
The warmth of earth and air so clear
Are like the love we've kept, my dear.
Outside our house are cords of wood
Bespeaking work we've done so good.
The haze that settles o'er the hills
Preserve the glory and the thrills
That come with living all this time
With you, my dear, in peace sublime.
So, we shall keep the memory well,
Of days like these and things they tell;
And thank our God that he has made
So much of sun and little shade.

HOG CHOLERA
 Of all farm livestock diseases, hog cholera is one of the most serious when it gets started, reports Dr. Lee Davison, Acting State Veterinarian, Michigan Department of Agriculture. It continues to break out occasionally in Michigan. Last week two cases of hog cholera were located, one in Oakland County and one in Berrien County.
 Dr. Davison cautions farmers buying hogs for feed lots and corn fields to be careful in their selection of hogs and also careful in their vaccination program, if they vaccinate. As much as possible hogs should be selected from farm to farm, and should be carefully watched so that any time a sick hog is discovered, the veterinarian may be called to eliminate the possibility of cholera. Do not guess and do not wait, warns Dr. Davison, but call your veterinarian as a few days may mean the difference between saving or losing an entire swine herd.

NAME SPRAY FOR CHICKWEED USE
 Chickweed in strawberry plantings can be killed by spraying with a new weed control chemical, says R. F. Carlson, Michigan State College horticulturist.
 Chickweed often becomes a serious problem in Michigan strawberry plantings, particularly on the lighter soils. Many plantings become completely overrun with the weed.
 Chickweed seed germinates in September in Michigan, Carlson states. The plant grows vigorously during fall and winter, producing a seed crop the following spring. Because the weed creeps among strawberry plants, becoming a solid mat both in and between the rows, it is impractical to remove it by hand or mechanical tillage. Carlson has found that IPC (Isopropylphenylcarbamate) at the rate of 10 to 15 pounds per acre, applied in September, October or early November, will control this weed. IPC is available as a 50 percent wettable powder. Twenty to 25 pounds of the 50 per cent material should be mixed with 50 to 100 gallons of water and applied as a spray. The material does not injure the strawberries but effectively kills the chickweed.

APPLE HARVEST BRUISES CAN BE CUT WITH CARE
 Apple bruising can be reduced in every step of the harvesting and packing process, scientists say, but the greatest opportunity for bruise reduction is in the apple packing house.
 Roy E. Marshall, Michigan State College horticulturist, cites a recent U. S. Department of Agriculture study to find ways to cut bruise losses.
 Close supervision of picking operations is listed as a necessary

beginning. Another important point is the handling of apple boxes on pallets — wooden platforms on which 24 or 30 boxes of apples are placed for mechanized handling. Only one-fifth as much bruising was found when apple boxes were handled on pallets as when the boxes were handled during storage of loose fruit was also found to be less with apples handled on pallets.
 Researchers found bruising damage greater after apples were taken to the packing line than in the combined operations of picking, hauling, and handling. Dumping, dropping from one level to another on conveyor belts, and hitting various parts of moving equipment accounted for the greatest number of bruises. Apples dumped into a water bath showed fewer bruises than those carefully dumped on a canvas belt as it passed over a solid surface.
 Studies now under way in Michigan by H. P. Gaston, MSC horticulturist, are showing similar results.
 The apple authorities also emphasize the importance of having the various parts of moving equipment accurately timed.

BOW HUNTING STARTS SATURDAY, OCTOBER 1

The largest bow hunting army in history will kick the lid off the deer season Oct. 1.
With more liberalized hunting regulations and more bow hunting converts, the conservation department expects about 12,000 or nearly 25 per cent more archers than last year. On the basis of 1948 report cards returned, the department estimates 9,875 bow hunters bagged 583 deer.
Archers are becoming more skillful for in 1947 only one in 20 got a deer, last year one in 17, and as high as one out of every 15

hunters is expected to bring home venison this season.
Last year three-fourths of the archers limited their stalking range to a half-dozen counties. With the higher hunter concentration in Roscommon, Allegan, Crawford, Oscoda, Isosco and Montmorency counties, 85 per cent of the deer were harvested in these locations.
Male deer may be taken in any county from Oct. 1 - Nov. 5. Liberalized regulations this year provide for taking of deer of either sex in this period in Alcona, Antrim, Alger, Baraga, Benzie, Charlevoix, Crawford, Delta, Gogebic, Grand Traverse, Isosco, Iron, Lake, Leelanau, Luce, Mackinac, Manistee, Mason, Montmorency, Ontonagon, Oscoda, Roscommon, Schooner, Wexford, Drummond Island in Chippewa county, and in that part of the state lying south of the north line of Townline 16, except Allegan county. Special bow season in Allegan county on deer of either sex runs from Oct. 1 to Dec. 15.

NEED CARE IN CORN HARVEST
Mechanical corn pickers are at work harvesting another big corn crop. They can do it in record time if they are operated safely. Michigan State College agricultural engineers suggest these safety pointers:
Stop the picker to make adjustments. Keep guards in place—manufacturers provide shields for exposed parts. Watch out for fires—remove trash accumulations. Stop the picker before oiling or making any adjustments.

PLACE REFRIGERATOR FOR TOP SERVICE
Before your new refrigerator is moved in consider where it should stand to give you top service. The labor saving value and efficiency may be largely lost if a refrigerator is poorly placed.
You can save yourself steps, advises Lucile Ketchum, home management extension specialist at Michigan State College, by placing it near a food preparation center not too far from the sink. If this is impossible a small table nearby and a tray for carrying will help in putting away and getting out perishables.
Keep your refrigerator in the open with at least 2 1/2 inches of air space between the back of the refrigerator and the wall. If your box must be recessed, 3 to 4 inches at the back and sides is better and 8 to 12 inches at the top. Air circulation carries away the heat from the motor.
Avoid extremes of heat and cold. Although modern refrigerators are well-insulated, extra heat makes them run overtime as you will have noticed on a hot summer day. You won't want to duplicate summer heat by placing your refrigerator next to your range or a radiator or hot air register or in the sunlight.
On the other hand, an unheated back porch during winter months is a poor spot for the refrigerator because the extreme cold is hard on its mechanism. Be sure the floor is level. This is a point that may be overlooked but is as important for good operation as air circulation and moderate temperature.

MSC GRANTED \$1,500 FOR VITAMIN RESEARCH

A grant of \$1,500 for continuance of a study to more efficiently calculate potency of Vitamin "D" as used in fish liver oils and similar materials has been received by Michigan State College from the Parke, Davis Company of Detroit.
The money was part of gifts and grants totaling \$3,600 accepted for the college by the State Board of Agriculture at its regular monthly meeting held September 15 on the East Lansing campus.
According to Dr. Dwight T. Ewing of the MSC chemistry department, preliminary research has indicated that time required for tests can be greatly decreased and accuracy approximately tripled.

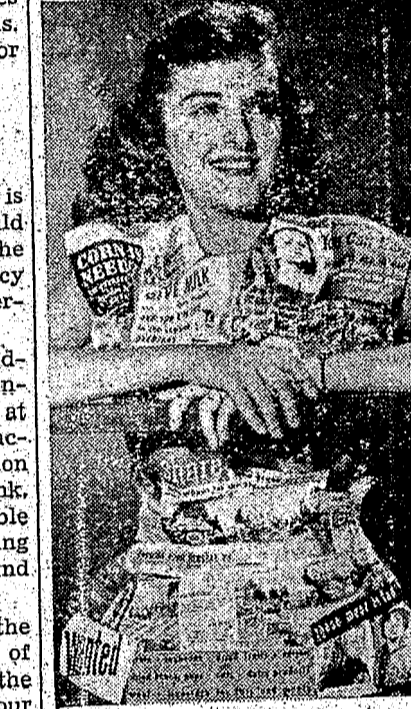

FIRE PREVENTION WEEK OCTOBER 9-15

The week of October 9 to 15, proclaimed by President Truman as National Fire Prevention Week, emphasizes the need for special care on farms where fires so often cause disastrous loss.
Estimates say that 3,500 farm people lose their lives each year in farm fires with 100 million dollars worth of property damage.

From where I sit... by Joe Marsh

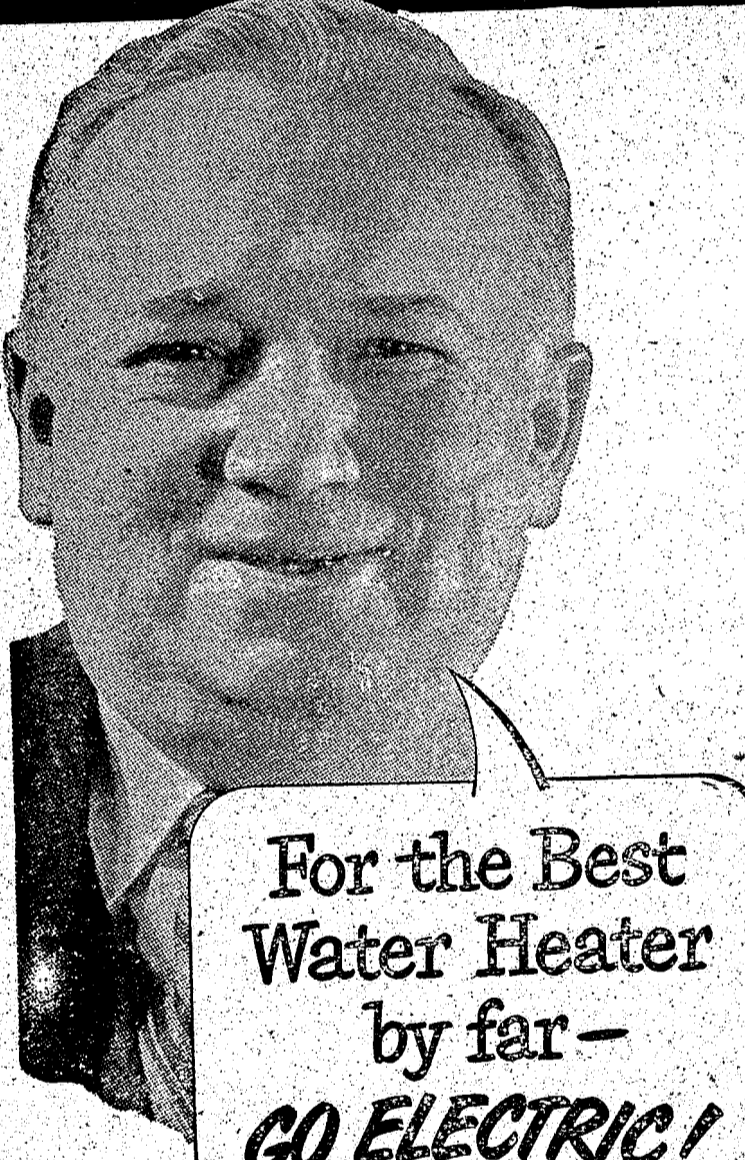

A Big Boost For Smitty!

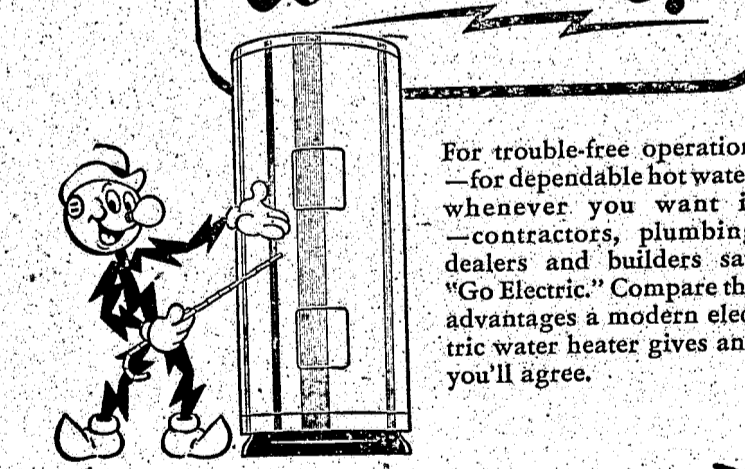

Stepped into Smith's Department Store the other noon and saw the "strangest thing." "Sis" Davis was coming up the stairs from the basement with a bundle of wash.
"Is Smitty taking in washing these days?" I asked. "Not quite," she says. "He's just put in a new automatic washing machine, so the girls who work here can get their laundry done while they're eating lunch. Means more time to relax at night and on weekends."
I thought what a swell boss Smitty must be. Human relations between the boss and employees have certainly taken a big step forward during my lifetime.
From where I sit, people seem to be doing a better job of seeing our neighbor's viewpoint these days. Though his ideas and tastes may not be ours, we can understand his preference for a certain breakfast cereal, a favorite movie star, or for a temperate glass of beer or ale. That's the way it should be in a free country.

The Hilltopper

The Wolves of C. H. S. were defeated by Avondale High School of Auburn Heights by the score of 18-0.

The Wolves forward line, riddled by injuries let the Bees get around them on a "sleeper" play and then a short line plug made the score 6-0. They missed the extra point.

Early in the 2nd period the Bees scored again on a series of line plunges, they then made the extra point to make the score 13-0.

Again the 3rd period a series of short line plunges set up a touchdown with an Avondale player sprinting 18 yards to score.

In the last period the light line of Clarkston stood up to the challenge and held the Bees scoreless.

The starting line-up was as follows:

Right-end — Clark Morgan

Right-tackle — Earl Lamberton

Right-guard — Jim Huttenlocher

Center — Warren Hagyard

Left Guard — Chuck Henry

Left Tackle — Albert Poffer

Left End — Cecile Miller

Quarter Back — Hank Shell

Left Half Back — Ed Olson

Right Half Back — John Curry

Full Back — Dale Jacobs
