ALCOHOLIC TALK

GIVEN LAST FRIDAY On Friday of last week Mr. Joseph P. Laughrey, educational secretary of The Michigan Temperance Foundation, Inc., was present at the local school for the purpose of speaking on "Alcohol Talk From the Laboratory", to the grades 9 to 12 separately. Mr. Laughrey showed each grade a separate movie on the subject of "Alcoholism". Each class selected student to tell the next class about the movie which was shown to them. Mr. Laughrey distributed booklets to students in grades 10-12. He gave each student a paper consisting of 34 questions The topic on this paper was "What Do You Know About Alcohol"? The purpose was to inform the students what they did or didn't know about the factors of alcohol. At the conclusion of the movie, Mr. Laughery gave the students the opportunity to ask any questions pertaining to the use of alcohol. The following poem was stressed to the students: To every man there openeth

A. Way, and Ways and a Way, And the High Soul climbs the High way,

And the Low Soul gropes the Low, And in between, on the misty flats, The rest drift to and fro. But to every man there openeth Friday, April 6th. A High way and a Low

And every man decideth The Way his soul shall go. by John Oxenham

Peach growers profit from new, hardy, early-ripening variety

Peach growers who long have wanted an early-ripening fruit that would ship well are profiting from the new Fairhaven peach. This variety is the fourth peach developed at the South Haven substation of the Agricultural Experiment Station of Michigan State College. It is designed for the market period after Redhaven but before Halehaven, Kalhaven and South Haven. The new Fairhaven features a hardy bud that is resistant to cold and fog, and a fruit that is firm and ships exceptionally well. When ripe, it is freestone. Growers interested in a sturdy, early-ripening peach can get further information by calling, writing or visiting their County Agricultural Agent.

Plow Speeds Farm Telephone Service

A specially designed plow is used to bury wire along roadsides for telephone service in rural areas where this type of construction is less expensive than building lines on poles. The plow leaves no trench . . . buries the wire in a single operation. This is another example of telephone efficiency working for you ... peeding construction of more rural telephone facilities, and helping to keep cost of service low. It's one of the reasons why the proportion of farmers with telephones in Michigan is among the highest in the nation.

Don't Take Your Greatest Asset for Granted

★ Most of us throw every safeguard possible around our property. Homes, automobiles, and valuable personal property are carefully insured against losses by fire, theft, and storm. We insure our lives to protect the economicwell-being of our dependents.

Yet health, on which depends our ability to earn these material comforts, is often completely neglected. Good health is too frequently taken for granted until it is lost. It is wise to protect this priceless asset. Include a health examination for every member of the family in your yearly. budget. When medicine is prescribed, bring the prescription to vn for prompt, economical service.

WATERFORD

Spring time is garden time in Michigan. And after a spading, having, planting ... "The American Way" is to ease that pleasantly tired feeling with a cool, refreshing glass of Michigan brewed beer.

For beer belongs... to pleasant living, to good fellowship, to sensible moderation. And our right to enjoy it, this too, belongs . . . to our own American heritage of personal freedom. Beer Belongs ... Enjoy It
