

Waterford

Mrs. Jack Hall, Correspondent Phone OR 3-0261

Mrs. Marjorie Skinner and son Larry left last Thursday for a 10 day visit in Wilmington, Delaware.

Mr. and Mrs. Emerson Mitchell and two children left for their home in Harrisburg, Pennsylvania early Monday morning.

Mrs. Agnes Flickinger will entertain the Waterford 500 Club on Wednesday, May 14th instead of on Tuesday the usual day.

Ronald Callahan, EmFn, is spending a 40 day leave, at his home in Waterford.

A pink and blue shower honoring Mrs. Chester Voliva was given by Mrs. Marjorie Skinner last Wednesday evening.

Mrs. Mary Ann Rath who is staying at the home of her son-in-law and daughter, Mr. and Mrs. Bruce Witherspoon, spent several days recently visiting her son in Buffalo.

Mr. and Mrs. Merle Collins of Walled Lake were Sunday visitors at the Robert Van Maters.

The Waterford Moms will meet Wednesday, May 14th, at the home of Mrs. Anna Gesch, 3966 Airport Road.

Mr. and Mrs. Fred Fuchs spent the weekend with Mr. and Mrs. Edgar Kellar in Pleasant Ridge, on Saturday evening. They attend-

ed the annual spring concert given by the Rheingold Male Chorus, Inc., in the grand ballroom of the Harmonie Society.

Mr. and Mrs. David Mehlberg of 3269 Sashabaw Road are the parents of an 8 pound 6 1/2 ounce daughter, Linda Marie, born Saturday, May 3rd, at Pontiac General Hospital.

Mrs. Alton Goll who suffered a broken collar bone in an auto accident a week ago Monday has returned to her home from St. Joseph's Hospital.

Mrs. William Jacober left Monday night for Mountain Iron, Minnesota, where she will spend 10 days with her parents Mr. and Mrs. Sam Saari.

Mr. and Mrs. Leo Horton (June Callahan) of Minneapolis, Minnesota, announce the birth of a daughter, Linda Joy, born April 25th.

A pink and blue shower honoring Mrs. Chester Voliva was given by Mrs. Marjorie Skinner last Wednesday evening.

Guests present included Mrs. Joseph Helman, Mrs. Robert Amos, Mrs. James Seesterlin, Mrs. Marvin Downing, Mrs. Ray Everett, Mrs. O. D. Anderson and Mrs. Ada Campbell, all from Waterford.

Mr. and Mrs. Jack McCaffrey are the parents of a 7 1/2 pound son, Michael John, born Monday morning at St. Joseph's Hospital.

Grandparents of the baby are Mr. and Mrs. Philip Morris of Pontiac and Mr. and Mrs. Robert Amos of Waterford. Mr. and Mrs. August Jacober, Sr., are the great grandparents on his father's side.

A daughter, Susan Lynn, was born Saturday, May 3, to Mr. and Mrs. Earl Lambertson (Norma Jean Terry) of Airport Road. Mr. and Mrs. LaVerne Terry of Drayton Plains and Mr. and Mrs. Edwin Lambertson of Waterford are the grandparents.

Mrs. Ida Beattie will celebrate

her 77th birthday next Wednesday, May 14th.

The annual business meeting of the Waterford Community Church will be held next Tuesday evening at the church at 7:30. Yearly reports will be given and election of officers will be held.

Mrs. James Sutton left Sunday evening on the first lap of her long awaited trip to Japan where she will spend several weeks with her son Jim who is stationed there.

Fourteen members of the Ladies Auxiliary of the Waterford Community Church met last week Thursday at the home of Mrs. William Weix on Monrovia Street.

The June 5th meeting will start with a planned picnic at the home of Mrs. Frank Schultz. Mrs. Olga Parcels, Mrs. Carl Hulet and Mrs. Weix are on the committee.

Waterford Township

Camera Guild

The next meeting of the Waterford Township Camera Guild will be held on Tuesday, May 13th, at 7:30 P. M.

This meeting will be of special interest. The Guild has obtained a fine, recorded lecture entitled "Outdoor Photography" by D. Ward Fease, F. P. S. A., of the Photographic Society of America.

The public is invited and there is no charge for this session. So, why not come out and see how interesting this Camera Guild can be and listen to this highly prized lecture.

Archery

Archery is the main course every Monday night now at the Community Activities building on Williams Lake Road. Sessions start at 7:30 P. M. All men, women and children interested in the bow and arrow sport are cordially invited.

A special rubber back-stop has been built in the big gymnasium, against which the targets are placed. When the weather is right the shooting will be done out of doors.

The Waterford Township Archery Club is open to beginners and advanced shooters. The better shooters help the beginners, and all those participating are having fun.

The archery classes have been moved from Thursday to Monday evenings to give the shooters the later evenings of the week for other activities.

Softball League

A grade school softball league is being sponsored by the Waterford Township Recreation Board. This league is made up of one team from each school and the schools are divided into 2 groups, the north and the south.

Teams in the north end are: Waterford Village, Williams Lake, Drayton Plains, Adams, Covert, and the Children's Home.

The games will run over a period of 5 weeks. At the end of 5 weeks the south-end champs will play the north end champs for the league championship.

The teams played their first games last Friday after school. The results of the games were: Waterford Village, 16-Williams Lake, 17; Drayton Plains, 21-Adams, 12; Covert, 14-Children's Home, 8; Stringham, 36-Lambert, 9; Fourtowns, 5-Donelson, 4; Waterford Center, 16-Pontiac Lake, 15.

The schedule for next Friday's games is: Waterford Village vs Drayton Plains at Drayton Plains; Williams Lake vs Covert at Williams Lake; Adams vs Children's Home at Children's Home; Stringham vs Donelson at Stringham; Lambert vs Waterford Center at Waterford Center and Fourtowns vs Pontiac Lake at Pontiac Lake.

Knotty Problem

How more knot-free, higher value timber can be grown by maintaining a properly stocked stand is being emphasized at state woodlot demonstrations this spring.

Sashabaw News

Everyone enjoyed the very fine program at the Sashabaw P. T. A., meeting on the evening of May 1st. James Shedlowsky and David Dunlap were presented with gifts for being the outstanding boy scouts during the past year.

Seven little beginners sang 3 spring songs while they held pretty, yellow daffodils. Two seventh graders, Harold Parker and Donald Murphy played duets on their harmonicas.

At the business meeting Mrs. Byron Clements was made chairman of the blood bank. Mrs. Leonard Kimmey was named chairman of the next dance.

Mrs. Frank Vargo gave an excellent report on the P. T. A. convention held in Flint.

It was announced that there will be a dance demonstration by the dance class directed by Mrs. Helen Smith. This will be presented on the evening of May 20.

Remember your date for Saturday evening, May 10th.

The next meeting of the Sashabaw Women's Association will be on May 14th at the home of Mrs. F. E. Kuklaw, Pine Knob Road.

The Junior Choir of the Sashabaw Presbyterian Church is about to begin rehearsals for their Spring Musicale which will be presented late in June at the church.

The semi-final of 15 laps with 14 cars went to Skeets Roe. Ferrier in car 10 came second.

There were 15 cars in the feature race of 20 laps. Dick Dewey of Pontiac was the winner.

Joe Doyle holds the track record for the second week. He made a lap in 23.6 seconds.

SHIFTING TO GRASS DOESN'T MEAN DROP IN OUTPUT OF GRAIN

"Grassland farming" is not going "all out" to grass. R. G. Hill, Michigan State College Extension Specialist in soil Conservation, believes too many people have the wrong conception of the aim of those advocating grass land farming.

Shifting of more land to grasses and legumes or using more legumes in crop rotations as soil conservation measures would result in over-all fewer bushels of grain or row crops in the future, Hill contends.

Hill pointed to results of experiments conducted by the Michigan State College Soil Science Department at the Ferden Farm near Chesaning. In 1951 on plots where alfalfa-brome preceded corn, the average yield was 63 bushels an acre.

was used in the rotation, the average yield was less than 14 bushels an acre. All plots were fertilized alike.

Another consideration is the fact that there are thousands of acres of rolling land on which corn is being grown where the average yield is too low to justify its continued production.

"If we would put more of our eroded fields that are yielding an average of 40 bushels of corn per acre per year or less, into grass and legumes, and if legumes are used in regular crop rotations, our over-all production could be increased without adding more acres in crops. At the same time, we would be conserving our soil for future use.

SELECT COUNTRIES TO BE VISITED BY MICHIGAN YOUTHS

Four Michigan young people will spend the summer in Sweden, Switzerland, Ireland and the Netherlands, as representatives of 4-H members of the state, according to A. G. Kettunen, state 4-H Club leader.

They will take part in the International Farm Youth Exchange project along with young people from several other states. The exchanges range in age from 20 to 28. The program is financed by 4-H members and community organizations, along with philanthropic business concerns and individuals. No government money is involved.

Jean Helene Richards, 20, of Fenton, will spend the summer in Sweden; Raymond Eugene Borton, 20, of Lansing, will go to the Netherlands; Charles Wilson Gruner, 21, of Coldwater, is readying for the summer in Ireland; and James Hamlin Reilly, 28, of Brown City, will be in Switzerland.

Kettunen, chairman of the board of trustees of the National 4-H Club Foundation, has been granted a leave of absence by

Michigan State College to work with IFYE delegates in European countries this summer. He will spend the major part of his 4-month leave in Finland, where Finnish 4-H Club leaders have requested his assistance.

Several young people from Europe are expected to live and work with farm families in Michigan this summer in the other half of the exchange program.

The 1952 program has been greatly expanded in the state. Previously, only one representative from the state has traveled to Europe on this "grass roots" diplomatic mission.

ADULTS CAN REDUCE CHILD ACCIDENT TOLL U-M DOCTOR STATES

Warm weather lures children out to play and demands that every parent caution his offspring again and again to be careful -- for accidents cause more deaths among pre-school children than any single disease.

Dr. James L. Wilson, chairman of the Department of Pediatrics and Communicable Diseases at the University of Michigan, points out that the toll of polio, appendicitis, tuberculosis, heart disease, cancer,

leukemia, or any other disease among children, is dwarfed by the high number of fatal accidents among juveniles.

Actually, such accidents to children, he states, cause one third as many deaths as all child diseases combined.

These accidents don't just happen by themselves, Dr. Wilson explains. They are caused, for the most part, by adult carelessness. Since they are caused by this human factor -- they can be prevented.

Stop being too pre-occupied about diseases, Dr. Wilson advises, and start thinking about accidents and "we'll have more living children."

Recommendations for safety measures around the home can be listed by the dozens, he says. The best method is to inspect the house and yard. Any situation that looks dangerous should be removed; pull nails from old boards; see that clotheslines are high enough to keep children from running into them; hoes, rakes and sharp instruments should never be left around with edges up; keep handles of vessels on hot stoves turned back out of the way so they can't be hit; and leave nothing loose in dark hallways or stairways to be tripped over.

You can expect your child to meet some of the normal wear and care of living, such as bumps, bruises, cuts, sprains or even a broken bone, he explains. These are minor in a sense because they can be repaired or even chalked up as educational, for lessons learned in pain are not soon forgotten. However, fatal accidents that happen to children inside and around the home dim the feeling of security found there and call for something to be done about it.

Discipline is a valuable step in the right direction, Dr. Wilson asserts. It plays an important role, not only in accident prevention but also in the character building of a child by helping him to obtain a sense of security, for children are imitators and investigators. They absorb the attitudes of their parents and copy their behavior. Therefore, a careful parent sets up in the child a form of behavior and as such it can be shaped and developed into safety patterns that saves young lives.

BE WISE WHEN CHOOSING RAINWEAR IS SUGGESTED

Though raincoats are a good year-round investment, April-shower weather makes them almost a necessity, Mrs. Josephine Lawyer, county home demonstration agent observed.

To help select the kind of rainwear you want, Lola Belle Green, Michigan State College clothing specialist, has explained the terms of "water proof" and "water repellent."

Fabric in a water proof garment is coated and sheds water completely... even in a driving rain. Plastic coats and "slickers" come in this class. The drawback of a water proof raincoat, however, is that it does not "breathe"... no air penetrates the garment so it is sometimes hot and uncomfortable.

A water repellent coat, on the other hand, remains comfortable because it has a porous quality, Mrs. Green explained. It will shed water satisfactorily except in a prolonged, hard rain.

Mrs. Green urges the buyer to look for a close, firm weave in a water repellent raincoat whether it is made of cotton, rayon, silk, nylon or a blend of those fibers. Look, too, for a tag that indicates whether the water repellent finish would mean you must have the finish restored with each dry cleaning or laundering -- an ex-

or better than those for the 1951 crop," Cravens warned that this does not mean that all Michigan potato growers will make money in 1952.

Among limiting factors is low production. He said that farmers who got an average of 180 bushels or less per acre did not make much money on potatoes in 1951, and they aren't likely to do so in 1952.

"With costs even higher than in 1951, some growers may try to cut costs by using less fertilizer, by using seed of questionable quality, or by spraying less," Cravens said. He warned that such cost-cutting procedures will prove unwise if they seriously affect yields.

He summarized by saying that "for the grower who can expect to get yields well above the state average, 1952 looks like a good year to expand potato acreage."

WOLVERINE BOYS' STATE OPENS JUNE 19

Arriving by bus, train and family car, 1,000 Michigan youth will assemble June 19 on the Michigan State College campus for the 15th annual Wolverine Boys' State sponsored by the American Legion.

Called the mythical 49th state in the Union, the nine-day program is slated to run from June 19 to 27. Each boy will be assigned to one of two fictitious political parties for experience under both the convention and caucus systems.

City and county governments will be set up under a Constitution patterned after Michigan's. After elections are held, all further business will operate on a non-partisan basis.

A "Boy-Governor" will fill various appointive posts with the approval of the "Senate." These posts correspond closely to those of Michigan.

While sponsored by the American Legion, other civic groups are invited to sponsor outstanding high school students through Legion posts at a cost of \$35 for the nine-day session.

Opening day activity will be highlighted by addresses from Michigan's Governor, Williams, by MSC President John Hannah and Department Commander Thomas Rounell.

On Friday, June 20, the boys will hold city elections, followed Saturday by county and state elections. Later in the day they will set up mock governmental organizations.

Dwight H. Rich, president and camp director for Boys' State, has arranged a program which will keep the boys busy from 7 a. m. until 10 p. m. when two buglers will sound taps.

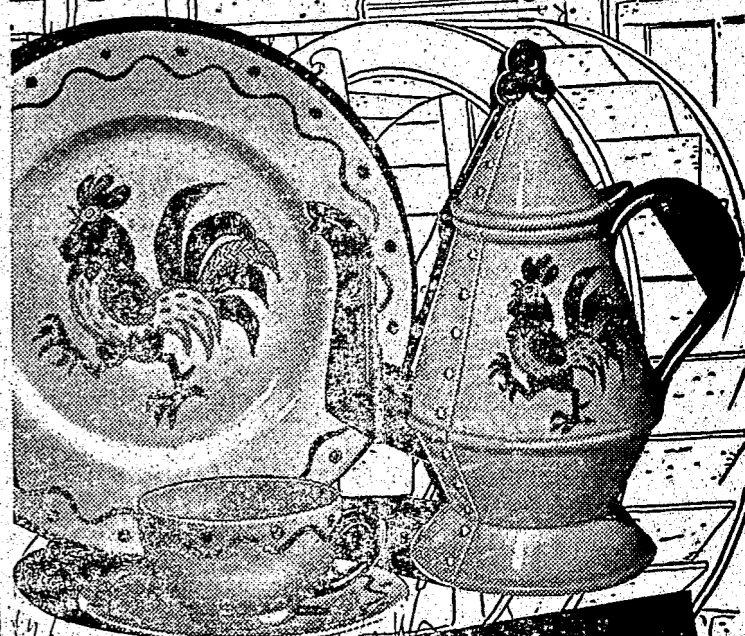

Besides the law classes and practical government lessons throughout the day, MSC officials

have arranged clinics in sports to round out the brief education period.

With registrations closing the day the lessons in practical government begins, latest figures released by the ruling body of the annual event, Boys' State, Inc., show that 722 boys have been sponsored by Legion posts throughout the state.

pensive process. If the finish is labeled durable, then find out if the durability lasts the lifetime of the garment or needs to be restored after several cleanings, Mrs. Lawyer suggested. Some raincoats are guaranteed water repellent for the lifetime of the garment.

HOUSECLEANING HELPS CIVIL DEFENSE

Your spring housecleaning can do a job for Civil Defense.

That's what the Michigan Office of Civil Defense said today in urging every Michigan Housewife to remove flammable articles from her attics, closets, basement and grounds.

Experience has shown that fires following enemy bombing raids cause more deaths and destroy more property than the bombs themselves, Civil Defense officials said.

Clear out the old papers, rags, discarded articles and broken furniture which clutter your attic, they urged.

Don't let laundry, toys, magazines or trash pile up on your stairs or in your halls or cellar.

Give to the Salvation Army or destroy unused old clothes which are hanging in your closets.

Clean up your basement. Dispose of gasoline, benzene, other explosive liquids and old cans of paint.

Remove rubbish and brush from around your buildings and around your lawn.

Buy adapters for your kitchen and bath water faucets so that the garden hose can be attached to them. Make a place, close to your door, for your ladder and garden hose.

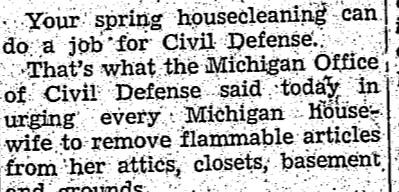

Get a pail of sand and a water pail or a handpumper for your attic.

Prepare yourself a Civil Defense home first-aid kit.

These measures will protect your family and your home from ordinary fires as well as from fires started by enemy bombs, the Civil Defense officials said.

Remove rubbish and brush from around your buildings and around your lawn.

OTTO HAZARD

STOP-LIGHT RACERS WHO SPIN THEIR WHEELS WASTE MONEY, LIVES, AND AUTOMOBILES!

Remove rubbish and brush from around your buildings and around your lawn. Buy adapters for your kitchen and bath water faucets so that the garden hose can be attached to them. TAKE DANGER OUT OF WELL REPAIRS

The Detroit Edison Company stands ready to help take the danger out of well-repairs where overhead electric lines are a hazard in the raising or lowering of drop-pipes and casings. Arrangements may be made with the company for protecting well-drilling equipment against contact with electrical conductors. Harold J. Keith, Edison's Oakland district manager, explains that well-work near electric lines is particularly dangerous because the men handling the equipment usually have a perfect "ground". "People tend to forget that unwieldy pipes are likely to topple against overhead wires", Keith notes. "Lives can be saved each year if the electrical hazard is eliminated from well repair work". Detroit Edison's offer applies to all its customers, and the company will take care of the hazard whether the wires are on the customer's own property or are on a public right-of-way. All Detroit Edison farm service advisors are being asked to carry this information throughout rural areas, with the request that persons needing the service call the nearest Edison office.

SPRUNG UP HOME FOR SUMMER SEASON

Why not arrange to bring the outdoors inside this summer? Give heavy draperies and hangings a vacation for a season and dress up your windows with plants.

Elmer E. Roth, of the Michigan State College department of textiles clothing and related arts, is not suggesting a bare window graced by a lone plant on a window sill. No indeed — she urges unusual treatment of both plants and windows in order to spruce up home decoration for the summer season. An idea especially good for picture or bay windows is to frame the whole window with a climbing plant. It will take a surprisingly short time to get ivy or philodendron all the way around. Use inconspicuous string or wire trellises to lead the plant in the proper direction, Miss Roth advised. For a drapery-like effect, try using wall bracket pots on the sides of the window. The plants should be vine-type so they will grow gracefully downward. Miss Roth thinks that brackets placed quite close together will give the most striking effect because the vines will make a continuous line at the side of the window. Careful use of plants on window shelves makes striking treatment for curtainless summer living. The specialist suggests putting the shelves—probably made of glass—at structural points

that is, along natural divisions in the window. Interesting containers can be used for an inside flower garden on the window sill. Try using a long bread basket, for instance or a miniature window box made for the purpose.

FRUIT AND GARDEN NOTES
by Willard E. Rosserman
Assistant County Agr'l Agent

POTATOES
Date of planting potatoes has an important effect on the yield. This fact was proven by yield figures from a date of planting demonstration conducted last year on the Oscar Overholt farm near Levering. Three plantings were made on May 18, June 6 and June 21st. Potatoes were grown in a field under the same conditions and were handled the same. Three varieties were used in the test: Russet Ruralis, Sebago and 125-4 Seedling. All three varieties showed much higher yields from the earlier date compared to the two June plantings. Russet Ruralis planted May 18 made 614 bushels to the acre, those planted on June 6 made 403 bushels and the June 21 planting yielded only 378 bushels to the acre.

Pear Fritters Are Novel Entree

A smart entree for the thrifty homemaker is Bartlett Pear Fritters served with a tasty cheese sauce. Budget minded women are always looking for new ideas to keep the food dollar under control, yet give their meals a novel touch. Pear Fritters are so smart that no one would guess they are so economical to serve. The fritter batter encases canned Washington-Oregon Bartlett pears, drained from their juice, then dipped into flour so the batter will cling to the pear. Next they are dipped into the fritter batter, then slipped into the hot deep fat for their crust coating. Three to four minutes cooking and they are ready to take from the hot fat to drain and serve. The accompaniment for the Pear Fritters is important too. Since the pears are sweet, a contrast in flavors is important. If the day is a blustery one, a hot slaw is good. Strips of bacon, fried, dried beef or smoked salmon thinly sliced may also accompany the pear fritters. There is a wide choice of possible accompaniments to accent the goodness of the pears. For the fritter batter, a frying-mix batter may be prepared in a few minutes, or prepare a fluffy fritter batter from the recipe which follows:

BARTLETT PEAR FRITTERS
1 No. 2 1/2 can Washington-Oregon Bartlett Pears
Flour
Fritter Batter
1 cup milk
2 1/2 cups separated
1 1/2 teaspoon sugar
1/2 cup all-purpose flour
1/2 teaspoon salt
1/4 teaspoon mace

Combine the beaten egg yolk and milk. Sift together the dry ingredients into a mixing bowl and add the egg-milk mixture. Beat until smooth. Fold in the stiffly beaten egg white. Roll the pear halves in flour then dip into fritter batter. Fry in deep fat from 3 to 4 minutes at 360 degrees, or when a cube of bread turns light brown in 60 seconds. Drain on absorbent paper. Serve hot.

For the cheese sauce, make a white sauce, using 2 tablespoons butter, 2 tablespoons flour, 1 cup milk, 1/2 cup cheese, and seasonings of salt and pepper. In serving the fritters, put the sauce on the plate and the pear fritters on top of the sauce.

kitchen tools. Handy for endless cutting jobs, this knife is five to seven inches in length and will cut a bunch of celery or string beans with one whisk. A long, thin slicer, Miss Wallace commented, has a ten-inch blade that is indispensable for cutting through cold meats or unsliced bread. The carrying knife is a strong tool designed to carve roasts, fowl or steak. But keep it sharp, Mrs. Lawyer urged, if you want to carve your meat and not saw it. The long-handled fork and flexible bladed spatula are important in kitchen operations and many homemakers find poultry shears, household cleaver and scalloped-edged bread knives are big helps. The cleaver saves wear and tear on knives when used for mincing vegetables or chopping or tenderizing meat. Perhaps most important of all, Mrs. Lawyer, concluded, is the knife-sharpening steel. Take time to keep your knives sharp and you will find your temper isn't, she said.

have been a little afraid that the temptation to put corn in early might be great. The usual planting date for corn is between the 20th and 25th of May and I would certainly recommend that you hold pretty well to those dates. We could still get a damaging frost on early planted field corn. Play it safe and don't take unnecessary risks. It may be true that your neighbor may have his ground ready and started in planting corn, and it may also be true that he may get by without any damage by a frost, but weighing the risks of planting now or during the week of May 19 indicates that the week of the 19th would be the best time to plant corn. Average last frost dates for the spring in this area usually have been the week of the 12th of May.

CORN PLANTING
The recent warm dry weather has put farmers in a favorable position to start plowing and getting their corn ground fitted. I

The best baked macaroni I've eaten in a long time had a generous amount of chopped chives in the cheese sauce. My was it delicious! *** Rub a starch-stained iron with a dampened cloth sprinkled with baking soda and that annoying sticky stuff will come off like magic. *** At today's prices one wouldn't want to think steak could be improved upon. But if you can, as you slip it out of the broiler, you place a big slice of vitaminized margarine on to melt while its hot. Adds so much flavor and richness. *** A word to young mothers: don't put a pillow in baby's crib. And don't take baby into bed with you even for the briefest morning nap. *** Ever make a list of the things you'll need on trips or vacations? It's so much easier to pack and one sure way you won't forget your sun glasses, a special hand bag or that all-important white shoe polish. About the latter, take along white paste shoe cleaner and it'll fit in the toe of one of your white shoes. Wrap the sponge in tissue and stick it in the shoe. *** Pretty petticoats are a-whirl in the fashion world. Besides being pretty to the eye when just a bit peeps from under your dress, their purpose is to give a voluminous look which is so popular this year.

The earlier planting of Sebago yielded 566 bushels, the June 6 planting yielded 403 bushels and the June 21 planting made 380 bushels to the acre. The 125-4 Seedling produced 611, 483 and 390 respectively in order of planting dates, with their May 18 date proving most profitable again.

ELECTROLYTIC BATH WILL CLEAN SILVER WITH LESS EFFORT

Silver polishing is a bug-a-boo for many homemakers. To help over that hump, Dorothy M. Grey, home management specialist at Michigan State College, suggests an easy electrolytic bath method. But before she would go on to explain the method she cautioned homemakers that it is not satisfactory for hollow ware or flatware that is soldered. Only one-piece construction silver, either plated or sterling, can be cleaned in this method. Tea service or silver serving dishes with soldered handles are not suitable for the electrolytic bath. Use a porcelain enamel pan lined with aluminum foil, she instructed. Put in enough quarts of water to cover the silver, bring it to a boil and add a teaspoon of washing soda and a teaspoon of salt for each quart of water. Lower the silver into the boiling water bath and boil for one minute. Rinse the silver in a pan of warm water. The home economist recommended using tongs for handling

KITCHEN CUTLERY

One of the best temper savers in your kitchen can be a good set of knives. If you hack away at a roast with a dull blade, or struggle to cut a big grapefruit with a paring knife, chances are you need to make an investment in cutlery, suggests Mrs. Josephine Lawyer, county home demonstration agent. Basic, of course, is the paring knife for small cutting jobs such as vegetable or fruit peeling and slicing. The blade of this knife should be three and a half inches long, she said. Margaret Wallace, Michigan State College foods and nutrition specialist, points out that utility knife is one of the most versatile

SOME GOOD NEWS ABOUT CANCER

★ Approximately one in four of the 158,000 lives lost each year in the United States from cancer could be saved if the knowledge already in existence could be made available to all—assuming that the knowledge is acted upon promptly. Here are the danger signals:

1. Any lump or thickening, especially of the breast.
2. Irregular bleeding or discharge from any of the body openings.
3. Any sore that does not heal.
4. Persistent indigestion.
5. Sudden changes in the form or growth of a mole or wart.
6. Hoarseness persisting for two or three weeks.
7. Regional pain.

Only in the early stages can cancer be successfully arrested. At the appearance of suspicious symptoms see your doctor at once. For prompt, expert prescription service, call on us.

 That God is not the creator of a sinful man is clearly shown in the Lesson-Sermon to be read in all Christian Science churches on Sunday, May 11, under the subject "Adam and Fallen Man".
 The Golden Text is from I Corinthians (15:22): "As in Adam all die, even so in Christ shall all be made alive."
 Among the Bible citations in this passage, (Gen. 1:31): "And God saw every thing that he had made, and behold, it was very good."
 Correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy include: "Everything good or worthy, God made. Whatever is valueless or baneful, He did not make, — hence its unreality." (p. 525)

WARNINGS ISSUED FOR DEALINGS WITH ANTHRAX OUTBREAK

Michigan State College veterinarians issued warnings to farmers to be on the lookout for anthrax, a livestock disease which has invaded Michigan.
 They told farmers not to work with or open animals that have died from the disease. They also warned farmers to call their local veterinarian if they suspect the disease as a cause for livestock death on their place. The double warning came because anthrax is communicable to humans and if it gets a foothold on a farm without proper sanitary measures it may be years before the soil is free of the disease spores.
 The disease, which is believed to have come into Michigan from a shipment of imported bone meal, attacks animals so fast that the first noticeable symptom usually is sudden death. If you suspect the disease contact your local veterinarian or state disease regulatory officials immediately. If you try to post the animals or work with the carcass without advice you may contact the disease yourself.
 Animals which have died from the disease should be buried deeply or burned completely, along with manure and straw contaminated by the diseased animal. Anthrax affects all farm animals. It can be controlled if it is diagnosed before it strikes widely. If the disease breaks out in your community all dogs should be tied up, and traffic between farms of any kind eliminated as much as possible to avoid further spread of the disease.

FOR SEPTIC TANKS & CESSPOOLS!
NOW MAKE YOUR PRIVATE SEWERAGE SYSTEM A WELL BALANCED UNIT

CAMP CESSPOOL SEPTIC TANK CONDITIONER

- Starts Septic Action
- Stimulates Bacteria
- Eliminates Odors

Camp Cesspool and Septic Tank Conditioner works on a new and proven principle. It starts septic action immediately. It corrects the chemical structure of the material in the cesspool or septic tank. It feeds the bacteria and they work and reproduce by the millions to convert sludge into liquid. If your cesspool or septic tank is too small for your requirements, use Conditioner and see results.

Card Of Thanks
My sincere thanks are expressed to my many friends for the beautiful floral tributes, other expressions of sympathy and for the many kindnesses extended during the illness and death of my mother, Mrs. Elizabeth Skinner. Special thanks go to the Reverend R. M. Atkins, the Sharpe Funeral Home, the pallbearers and to the W. S. C. S., for the lovely luncheon.

Get The Most Of Your Money The Following Four Ways.

PROCESSING. All cutting, boning, trimming and grinding of all meat is best done at our locker plant, which has the equipment and experience to do your work economically and expertly - without waste.

WRAPPING. Proper wrapping is all-important. We wrap your food with approved, correct moisture-vaporproof wrappings for storing in your locker or home unit.

CONTAINERS. Always get your containers for frozen food at the locker plant - where you also can get the right kind of information for their proper use.

SHARP FREEZING. This rapid freezing at temperatures far below zero is the basis of correct food freezing, and our special sharp freeze room is the only place with temperatures low enough to freeze quantities of food rapidly before ice crystals get a chance to form. Any large quantity of food should be frozen in a sharp freezer.
