

Waterford

Mrs. Jack Hall, Correspondent Phone OR 3-0281

Mrs. L. V. VanSycle is convalescing at her home following a stay in St. Joseph's Mercy Hospital.

Mr. and Mrs. William Schmidt and children, Rickey and Sandra, went to Kalamazoo over the weekend where they attended the Saturday afternoon wedding of their sister, Barbara Lynch, of that city.

Mrs. Warren Allen's troop of Girl Scouts are enjoying a four-day camping session this week at the Pontiac Lake recreation area.

Little Becky Enden, daughter of Mr. and Mrs. Carl Enden, had her tonsils removed Thursday and is now home from the hospital.

Mr. and Mrs. Fred Fuchs of Waterloo Street spent last week near Luzerne with Mr. and Mrs. Paul Jubelt of Davisburg.

Mr. and Mrs. Wallace Brown and daughter, Deloris, left Saturday for a two weeks vacation trip through the Smoky mountains. They were joined by their daughter, Sheila Amos in Bowling Green, Ohio. They will go on to Portsmouth, Va., to see the Bill Barron family (Nancy Brown) and also visit Washington, D. C., before returning home.

Mr. and Mrs. J. Thomas Peterson and three children are leaving this Saturday for a three weeks vacation trip to Colorado. Mrs. Peterson's parents live in Fort Collins, Colorado and she has not seen them in several years. A real reunion is planned and joining them while they are there will be a sister from California.

Mr. and Mrs. Joseph Helman and Dick drove to Comins over the weekend and paid a surprise visit to the August Jacobers.

Virginia Studebaker of Andersonville Road is spending the summer with her grandparents.

Mr. and Mrs. L. W. Everly at Augres.

Another new home is being started on Andersonville Road. The Don Whites are going to build on the lot between the E. J. Lally's and Mrs. Bessie Owen's home.

Mrs. Percy King will entertain the Good Will Club on Thursday, June 25th.

The Cheery Chum Group will meet at the home of Mrs. John Watchpocket next week, Friday, June 26th. A picnic supper at 6:30 will start the evening. This will be followed by the business meeting and program. Each member is asked to bring her own table service, a passing dish and a gift for her Cheery Chum. Mrs. Louis Dorman Sr. is chairman for the party. She will be assisted by Mrs. Fred Tuck, Mrs. Henry Mehlberg, Mrs. Henri Buck and Mrs. Marcella Medlyn.

The Waterford MOMS met last Wednesday at the home of Mrs. Will Hunt. At their recent "white elephant" auction held at the home of Mrs. Charles Richards a total of \$80 was realized and this all goes to the veterans in the hospitals. Another auction is planned for September and they ask everyone to keep it in mind and to start saving their "white elephants" for this affair.

Daily Vacation Bible School in both Christ Lutheran Church and Waterford Community Church will open on July 6th and run through the 17th. Both churches need teachers and helpers - and anyone able to assist for these two weeks is asked to get in touch with the pastor of his own church.

The great Boston Youth Convention will be held on June 24th to 28th and a group of Luther Leaguers from Christ Lutheran Church will be leaving the last of this week to attend.

Mrs. Joseph Helman will write the Waterford news for the paper next week and anyone having any news is asked to call her at OR 3-8749, and it will be appreciated. The Halls will be on a vacation trip through the Smoky mountains for the week.

WATERFORD TOWNSHIP RECREATION BOARD SWIMMING INSTRUCTIONS

The Waterford Township Recreation swimming classes started Monday at Williams Lake with 65 youngsters participating. Approximately 100 children were on hand at Elizabeth Lake on Monday afternoon.

These Red Cross approved swimming instructions are being

Auto Travel at New Peak TOP TOURIST MECCAS\* 1-Blue Ridge Parkway... 2-Great Smoky Mountains... 3-Lake Hood... 4-Lincoln Memorial... 5-Shenandoah Park... 6-Bundy Mountain Park... 7-Yellowstone Park... 8-Colonial Historical Park

More than 40,000,000 people visited national parks last year and the figure is expected to go higher in 1953 as America prepares to spend a whopping nine billion dollars on motoring vacations.

sponsored by the Waterford Township Recreation Board at five different locations over a six weeks period.

Williams Lake—Monday, 9 to 12 noon; Wednesday, 1 to 4 p. m.; Thursday, 9 to 12 noon; Crescent Lake—Tuesday, 9 to 12 noon; Thursday, 1 to 4 p. m.; Watkins Lake—Tuesday, 1 to 4 p. m.; Friday, 9 to 12 noon; Oakland Lake—Wednesday, 9 to 12 noon; Friday, 1 to 4 p. m.

Beach locations are: Williams Lake, Mrs. Kerns, 8777 Desmond; Elizabeth Lake, Family Beach, Mrs. Orlick, 4290 Cass-Elizabeth Road; Crescent Lake, at the Crescent Lake Beach Association across from the Crescent Lake Inn; Watkins Lake, at the Watkins-Lake-Lake Beach Association off Forest to Circle Drive; Oakland Lake at 3820 Athens Road off Sashabaw.

in fewer hands and it has become a specialty with growers. Now, less than 4 per cent of the growers are producing 60 per cent of the crop.

Acres costs have gone up, Clananhan points out, and present day producers can't hazard the lower yields of their forefathers. The efficient producer, he reminds, helps his crop along by doing these things:

- He selects the best variety for quality and yield and sees to it that it is free of disease and in good condition. He uses as large an amount of the right analysis fertilizer as possible. He prepares the right kind of seedbed with use of green manures and early planting for maturity quality. He protects his crop from disease and insect injury by frequent and careful spraying. This may mean spraying every few days instead of every week or 10 days. He uses careful harvesting and storing methods so that, through grading and packaging, the consumer will receive a satisfactory product.

LUNCH TIME FOR LAWNS HERE AGAIN

Even though it may seem just a short time since spring fertilizer was applied, the grass may need another booster now.

If your grass isn't dark green and growing rapidly, one pound of 12-6-6 or 10-6-4 per 100 square feet will help, according to James Tyson, a Michigan State College soil science specialist in turf grasses.

He advises applying fertilizer evenly over an area of 200-500 square feet at a time. The grass should be watered immediately after application of the fertilizer to prevent burning.

If the lawn is shady, Tyson recommends that the fertilizer should be added once a month during the growing season. Here are some of his other recommendations:

Mowing is important to good lawn care. If you have a one-inch lawn, it shouldn't grow to more than one and a half inches before it is mowed.

Our heating engineers will study the plans of your home, then develop a complete heating plan to exactly meet the requirements of your home. Take advantage of our skilled service. smart homeowners do.

SMALL SCALE SPUD GROWING DOESN'T PAY

Small scale commercial potato growing no longer is economical in Michigan since new techniques in production have become common, according to a Michigan State College potato specialist.

D. L. Clananhan says potato production has become concentrated

Kentucky bluegrass and red fescue lawns should be kept at about one and one-half inches on sunny lawns and from two to three inches in shady areas.

Water grass only when it needs it. Water when the leaves are slightly wilted and one good soaking is enough until the grass starts wilting again.

**SECOND GRADE NEWS**

Last Tuesday we went to the zoo. The day was perfect. We had three train rides. We saw Joe Mendis' show and lots of other animals and birds. We want to thank the mothers, Mrs. Mansfield, Mrs. Rockwell, Mrs. Hagen, Mrs. Torr and Mrs. Bullard, who gave their time and care to take us there.

We also want to thank our room mothers, Mrs. Allen, Mrs. Hinkley, Mrs. Mansfield and Mrs. Gregory, for the several holiday parties they arranged for us. They were fun.

**4,000 TO ENROLL IN MSC SUMMER SCHOOL**

Michigan State College's 40th annual Summer School will begin Thursday, June 25, with an estimated 4,000 students enrolled.

Registration will be held June 23 and 24 for the six-week and nine-week sessions. The six-week session ends July 31 and the nine-week session and 24 special workshops for teachers and administrators will be offered during the summer.

Classes will begin on June 23 at Leelanau, in Leland, Mich., for M. S. C.'s popular Summer Art School, which will continue through July 31.

The school, established in 1939, will be directed by Prof. Erling Brauner. The Leelanau studio, donated to the college by the wo-

men's club of Leland, is situated on the picturesque channel which connects Lake Leelanau with Lake Michigan and offers a variety of subject matter for artists.

**HEALTH DEPARTMENT SAYS GUARD AGAINST POLIO**

"CC" — common sense — not "GG" — gamma globulin — will be every family's safeguard against polio this summer, the state health department says in urging parents to be on the alert as usual to guard their youngsters against the disease.

The polio "season" usually gets underway in Michigan about the middle of June and reaches its peak late in August. A few common-sense precautions will help to protect your youngsters during the coming weeks:

1. Don't get panicky. Remember that even though the number of cases of polio may be high, the number of persons paralyzed is usually low. Half of those who are diagnosed as having polio recover completely—most recover without being seriously handicapped.

2. Don't isolate your youngsters, let them play with their usual playmates, but don't let them mix with new groups.

3. Try to get the youngsters to rest or at least play quiet, sitting-down games part of the day. Don't let them swim to the point of becoming chilled, or to become chilled in any way. If they should have polio virus in their bodies, being over-tired or chilled may result in more serious infection.

4. Keep the youngsters clean—be sure they wash their hands thoroughly before eating. Cleanliness is of utmost importance because polio may be transmitted through contaminated food and other contaminated substances, as well as through close personal contact with a carrier.

5. Consult your doctor at the first sign of illness, particularly if these symptoms appear: headache, fever, sore throat, upset stomach, stiff neck or back.

Globulin is a new and effective weapon in fighting paralysis from

polio, but there isn't enough of it to go around, according to the state health department which is responsible for the distribution of supplies allocated to Michigan by the Office of Defense Mobilization. The basic allotment to Michigan is enough to treat approximately 13,000 persons, only a fraction of the two million youngsters in the state in the most susceptible age group—those 15 years of age and younger.

The Department also points out that globulin will not prevent polio, but can, if administered under favorable circumstances, prevent the development of paralysis in those who get the disease.

In order to use the limited supply in the most effective way, the Department has set up priorities. The bulk of the available globulin will be distributed to those who run the greatest risk of being infected—the members of a household where a case of polio is diagnosed. Inoculations will be limited to household members who are 30 years of age and under and to pregnant women of any age.

If enough globulin is available, persons outside the household who have been in close contact with the polio case will receive injections, and special allotments of globulin may be obtained from the national supply for mass inoculation in areas with an unusually high number of cases.

**From where I sit... by Joe Marsh**  
**Heard About the Electric Weather Predictor?**  
 Squint Smith built up quite a reputation last month by predicting the weather. What he said usually came true.  
 It got so that folks would sit around his little Antique Shop just to get his opinion.  
 Last Monday, though, he said he didn't know what the weather was going to be like next day. That surprised us and when we asked what happened, Squint said, "Slipped up on my electric bill and was turned off. I'll get to my radio again tomorrow though." Squint had been getting the weather over the radio—just like anyone else!  
 From where I sit, that's the way it goes with some "experts." They often don't have any more inside information than you can get for yourself. Like those who "know" cider is the only thirst-quencher after a day's work. Far as I'm concerned, I'll take a temperate glass of beer. But—I won't try to "predict" your choice for you.  
*Joe Marsh*  
 Copyright, 1953, United States Brewers Foundation

**LIGHTNING SAFETY TIPS ARE OFFERED**  
 Do you know what is the safest place during a thunderstorm? These suggestions on what to do when a thunderstorm comes are from Harvey E. Kapphahn of Michigan State College's agricultural engineering department.  
 Don't go out of doors or stay out unless it is necessary. Stay inside a building where it's dry preferably away from fireplaces, stoves and other objects made of metal. In all cases stay away from open doors and windows.  
 If you're outside and have a choice of shelter, the best place to go is a large metal or frame building. In line of choice the next best is a house or other building that is protected against lightning. Next best is a large un-protected building and last, a small unprotected building.  
 If you have to stay out of doors, keep away from small sheds and shelters — if they are in an exposed location. Also, keep away from isolated trees, wire fences, hilltops and wide open spaces.  
 It's a good idea to seek a shelter in a cave, a depression in the ground, a deep valley or canyon, the foot of a steep overhanging cliff, dense woods or a grove of trees.  
 If you are in an automobile with an all-metal body, you're practically safe from lightning.

**SHEEP CAN BE INSURED FOR LOSS OF DOGS**  
 Sheep raisers now can buy insurance against losses in flocks from attacks by dogs or wild animals as well as policies that cover fire, wind and lightning.  
 That is pointed out by Graydon Blank, extension sheep specialist at Michigan State College. Such coverage is a standard policy, generally available from capital stock companies. Mutual companies generally do not carry such a policy.  
 The cost for complete coverage is about 90 cents per \$100 value of sheep insured. That cost is figured by adding the optional "attack by dogs or wild animals" clause to the usual coverage. The optional coverage also includes losses from accidental shooting, drowning, artificial electricity and collapse of a building.  
 The coverage also is flexible, Blank says, to allow for increases in the flock. The premium, however, goes higher as the flock increases in value. The premium, though, is cheaper when the insurance is taken for a term of three years.  
 The policy also can be made to apply to cattle and hogs. But Blank believes sheep men will be most interested in it because of losses from dogs. Purebred breeders will be especially interested in such a policy, he

**Tree Insects**  
 Warm weather is all that's needed to bring out many types of tree insects to bother Michigan's forest industry. Some of the insects cause considerable damage and may kill young or even mature trees. Others are merely obnoxious pests that do little permanent damage. Here a conservation department forester and a tree farmer discuss problems caused by a type of moth that de-forms young pine trees.

thinks, because the value of their animals often far exceeds the payments made by a county in case of loss.

**TRUE ADVENTURE**  
 Escape through the Iron Curtain. Read the exciting, first-hand account of a Czech family's desperate flight from the Communist secret police — in an American amphibious jeep. Begin "Our Escape to Freedom," in The American Weekly, the magazine distributed with SUNDAY'S CHICAGO AMERICAN.

**There's only one answer... Chevrolet trucks must be the best buy!**  
 Fleet operators, farmers, independent truckers—truck users everywhere—buy more Chevrolets than any other make. There can be only one reason for that: Chevrolet trucks offer more of what you want.  
 As the official registration figures keep rolling in, they keep telling the same positive story about truck popularity and truck value: Again in 1953, for the twelfth straight production year, truck buyers show a clear-cut and decisive preference for Chevrolet trucks.  
 If you're a truck user, this fact is mighty important to you. Why? Well, as you know, trucks are built and bought for just one reason—to do a job. So isn't it logical then that since Chevrolet trucks outsell all others, they must do a better job at lower cost?  
 That's why it will pay you to stop in and see us before you buy your next truck.

Reading Room at rear of Church,
open Wednesday from 2 to 4 and
7 to 8 P. M.

In this day of atomic energy it
is helpful to consider what Chris-
tian Science teaches about the true
creation. This is discussed in the
Lesson-Sermon entitled "Is the
Universe Including Man, Evolved
by Atomic Force?" which will be
read in all Christian Science
churches on Sunday, June 21.

The Golden Text is from Psalms
(24:1): "The earth is the Lord's
and the fulness thereof; the world,
and they that dwell therein."

Among the Bible citations is this
passage, (Amos 4:13): "For, to
he that formeth the mountains,
and createth the wind, and decla-
reth unto man what is his
thought, that maketh the morning
darkness, and treadeth upon the
high places of the earth, The
Lord, The God of hosts, is his
name."

Correlative passages from "Sci-
ence and Health with Key to the
Scriptures" by Mary Baker Eddy
include: "God creates and governs
the universe, including man. The
universe is filled with spiritual
ideas, which He evolves, and they
are obedient to the Mind that
makes them". (P. 295)

TORNADO RELIEF
Scarcely had the debris from
last week's tornadoes settled
in Flint when Oakland County
Chapter, American Red Cross be-
gan to assist the National Red
Cross in aid to the area.
The chapter whisked into action
to organize:

- 1. Blood donations to replace
depleted reserves of Pontiac
General Hospital, which sent 125
pints of blood and four cases of
plasma to storm-stricken Flint.
2. A special tornado relief
fund which by the end of the
week included \$786.75 and was
growing rapidly.
3. Personnel to help care for
the injured, feed and shelter the
homeless, and keep records of the
missing.
4. A "telegram service" to
check on the safety of Flint rela-
tives and friends of local families,
unable to reach the stricken city
over tangled remains of telephone
wires.
"Blood donors turned out at
the hospital so enthusiastically that
a day later they had replaced

the hospital's blood stockpile,"
said Cross chapter chairman
Harold B. Euler said today.
"We're asking local people to
stand by in case more blood is
needed in Flint and other tornado
areas."
Office personnel said they put
the minds of some 100 local people
at rest Wednesday, when answers
to the telegrams were coming in,
while telephone calls were still
strictly limited to "emergencies
only."

Half a hundred local Red Cross
flags marked feeding and shelter
stations in Flint and some 50 arm
bands, also sent from the local
chapter, identified disaster work-
ers.
Mrs. Mildred Bennett, chapter
executive secretary and Mrs.
Bradlee Pruden of Birmingham,
vice-chairman of volunteers, left
for Flint early Tuesday morning
in answer to an appeal for work-
ers by the National Red Cross.
The national unit had some 30
staff and 600 volunteers at work
in Flint by Tuesday night.
Mrs. Hermindo Rodriguez, Royal
Oak, chairman of nurse recruit-
ment, was still seeking three
registered nurses to work in Flint
on two-week paid assignments.
"Our motor service corps and
other volunteers are standing by
in case they're needed," Euler
said today. "We're willing to col-
lect clothing if it's lacking in
Flint — up to Friday we had not
been notified of any need."

These services, all free of
charge, were a few of the "emerge-
ncy benefits" included in the
Red Cross package which Oak-
land County residents donated
\$147,000 to support in the recent
county-wide fund campaign.

FRUIT AND GARDEN NOTES
by Willard E. Bosserman
Assistant County Agr. Agent
SQUASH VINE BORER
It is a sickening sight to look
over the squash patch some late
July morning and find that many
of the vines are wilting and dy-
ing. When the vines are in this
state there is not much that can
be done, but if control measures
are started early enough the in-
sect that causes this damage can
be controlled. First of all, if you
know the habits of the insect it
is easier to find a control measure.

Around the middle of June and
through July a very brilliantly
colored moth lays its eggs on the
squash vine stems near the
ground. These eggs hatch into
little larvae which bore their way
through the squash vine. It feeds
and tunnels towards the tip of
the vine as it progresses. If an in-
secticide is on the vine when
these eggs hatch, the larvae are
killed. That is the control. Keeping
the vines covered with a stomach
poison keeps them under control.
It is important that 14 inches of
the vine from the ground out be
covered.

Materials to use on large acre-
age: 3 lbs. of lead arsenate in 100
gallons of water and half strength
bordeaux mixture (4-6-100). For
the home garden, rotenone dust
or spray will be satisfactory. The
rotenone should be applied every
week for effective control.

and even sweet red-ripe water-
melon. And think of the mouth-
watering menu possibilities.
Here is one to start with:
Fried Chicken
Parsley-battered New Potatoes
Kentucky Corn Pudding
Hot Biscuits Red Currant Jelly
Lemonade or Iced Tea
Kentucky Corn Pudding
2 cups fresh corn (about six
ears)
2 eggs, slightly beaten
1 1/2 cups warm
milk
2 tablespoons
chopped
pimiento
1 teaspoon
salt
1 teaspoon
sugar
1 tablespoon
melted but-
ter or margarine
Hold each ear of corn upright
on a flat surface, cut lengthwise
to remove a thin slice from top
of kernels. Scrape to remove pulp.
Combine with remaining ingredi-
ents.
Turn into shallow baking dish.
Bake in moderate oven (350°F.)
forty-five to fifty minutes, or un-
til a silver knife inserted comes
out clean.
Yield: Six servings.
Seeing an abundance of fresh
lemons on the market brings to
mind an especially good frozen
dessert.

Frozen Lemon Dessert
3 eggs
3/4 cup sugar
2 1/4 tablespoons lemon juice
1/2 pint whipping cream
12 vanilla wafers
Separate eggs. Beat yolks, add
sugar and lemon juice. Mix well.
Fold in whipped cream, then
well beaten egg whites. Pour into
refrigerator tray
which has been
lined with vani-
la wafer crumbs.
Cover mixture
with crumbs and
place in freezing
unit of refriger-
ator, set at coldest point. When
dessert becomes firm, turn refrig-
erator back to normal.
Yield: Six to eight servings.
Faithfully
Jean Allen

### NEWS AND COMMENT

#### CONGRESSMAN GEO. DONDERO TOLL ROADS VS. PUBLIC HIGHWAYS

Congressman George A. Dondero this week pointed to public acceptance of toll roads, such as the famous Pennsylvania Turnpike, as an indication that Americans want and are willing to pay for adequate highways, whether through taxes or by payment of tolls.

Owing to price inflation, vastly increased weight-bearing requirements and better construction, Congressman Dondero said, it costs far more today to build and maintain highways than it did a few years ago. But this plainly has resulted in no lessening of public willingness to pay for highways designed to carry the nation's rapidly expanding automotive traffic.

"In this connection," said Congressman Dondero, "testimony was offered last week, before the Public Works Committee of the House of Representatives by Charles M. Upham, consulting engineer for the Motor Transport Committee. His testimony was highly illuminating.

"The witness told the committee that increasing use of the turnpikes is evidence that the motorist is glad to pay for the service, because inadequate but alternate highway routes are available, and the use of the turnpike is completely voluntary."

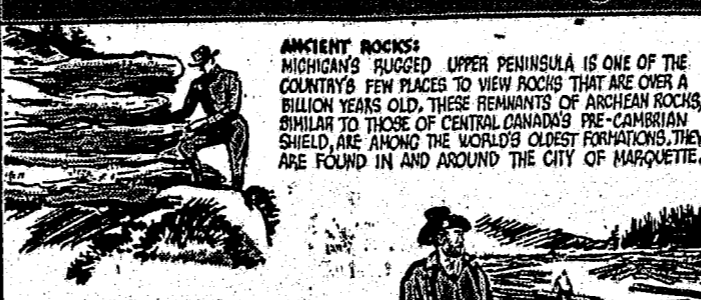

"These turnpike tolls, the witness declared, when added to regular gasoline taxes imposed by states and the federal government, make the motorist pay the equivalent of 22.5 cents to 33.4 cents tax per gallon of gasoline to ride over the toll roads.

"This indication of public willingness to pay the high costs of adequate highways, the witness declared, has caused 30 states to consider proposals for toll roads. In addition to such roads, now operating in seven states, and which accommodated 68,000,000 vehicles last year, toll roads have been authorized in six states and have been proposed in 13 states.

"The Governor of Michigan, last week signed legislation providing for construction of toll roads from Detroit, south to the state line above Toledo, and west to the state line nearest Chicago.

"According to the witness before the House Public Works Committee, the Pennsylvania Turnpike, running from Philadelphia to Pittsburgh and thence to the Ohio state line, grossed \$21,600,000 in tolls during the

## Meet Your Michigan

**ANCIENT ROCKS:** MICHIGAN'S RUGGED UPPER PENINSULA IS ONE OF THE COUNTRY'S FEW PLACES TO VIEW ROCKS THAT ARE OVER A BILLION YEARS OLD. THESE REMNANTS OF ARCHEAN ROCKS, SIMILAR TO THOSE OF CENTRAL CANADA'S PRE-CAMBRIAN SHIELD, ARE AMONG THE WORLD'S OLDEST FORMATIONS. THEY ARE FOUND IN AND AROUND THE CITY OF MARQUETTE.

**INTERESTING INDUSTRY:** ONE OF MICHIGAN'S LITTLE-KNOWN INDUSTRIES IS THE MANUFACTURE OF PENCILS. IN THE CITY OF MARQUETTE, 50 EXHIBIT WORKMEN MAKE ABOUT 60,000 PENCILS ANNUALLY. THE INDUSTRY DATES BACK TO MICHIGAN'S EARLY LOGGING DAYS.

**DETROIT-NATION'S NO. 3 PORT:** DETROIT SAVED OUT CALISTON TEXAS AND CLIMBED TO THIRD PLACE AMONG THE NATION'S PORTS IN 1952. ITS EXPORT-IMPORT FIGURES TOTALLED MORE THAN \$1.5 BILLION DOLLARS TO SET A NEW ALL-TIME RECORD FOR THE CITY AND TO VIRTUALLY THE NEW ORLEANS FOR SECOND POSITION.

1952-53 fiscal year, and is 13 to 14 years ahead in meeting its construction bond obligations.

"The New Jersey Turnpike, he told the committee, had operated one full year on December 31, 1952, and in that year grossed about \$17,693,700 and netted \$15,956,000. This amount was two and one-half times the income estimated as a basis for bonding.

"These figures," Congressman Dondero concluded, "should not be taken to mean that toll roads are more desirable than public roads which are open to free use by the public. No man should be forced to pay tolls against his will for toll roads supplanting the tax-

NATIONAL PRESS BUILDING WASHINGTON, D. C.  
By Anne Goode

Sticking windows and dresser drawers—two products of the hot humid weather—can be so easily cured with an application of paste wax on the sliding surface.

Fresh green peas deserve extra special treatment and Milted Peas get it, like this: Cook 3 pounds fresh, green peas (shelled, of course) and 2 or 3 sprigs mint in a small amount of boiling salted water. Season with 2 tablespoons all-nutrition margarine, salt and pepper. Serves 6.

Nothing's easier nor more delicious than Golden Puff Tomatoes, made like this: Halve tomatoes, sprinkle with salt and pepper; then top each half with a tablespoon of real mayonnaise, seasoned with a little grated onion. Place under broiler until mayonnaise is puffed, about 5 to 8 minutes.

Don't forget to keep a bottle of witch hazel on hand during the sizzling days to come. It's so soothing to tired feet, and will surely come in handy on any vacation trip that includes much sight-seeing on shank's mare.

Also be sure if possible, to store new grain separate and away from old grain that may still be on hand. Use methoxychlor, 50% wettable powder—2 lbs. in 5 gallons of water and use an old broom. Scrub the granary thoroughly. Leave the doors and windows open on clear days over the next week or so to allow for complete drying of floors, ceilings, walls and bins which must be scrubbed.
