Memorial Presented At Library Tea

Last Thursday afternoon an Elementary School Library Tea was held at the school. Those who attended enjoyed a short program and a delightful visit.

Mrs. Edward Thomson, chairman, presided. Mrs. William Mansfield sang "Trees" by Joyce Kilmer. She was accompanied at piano by Mrs. William Watson. Mrs. Thomson told about the two sugar maple trees that had been planted in front of the school in memory of Mrs. Ruth Vliet, who, at the time of her death was the elementary school principal, and who had been a faithful library worker.

The Reverend Mr. Robert M. Atkins, pastor of the Clarkston Methodist Church, gave a short address in which he eulogized the influence that Mrs. Ruth Vliet's life had had on her associates, especially the young children in the school. Mr. Atkins mentioned her father, grandfather and an uncle who had all been in the ministry and paid tribute to the culture that emanated in each generation.

Mrs. Belle Vliet thanked Mr. Atkins and the group for the lovely tributes to her late daughter-in-law.

Mrs. Thomson mentioned the fact that donations for the library were not being solicited at the Tea, but reminded everyone that as far as the Board and the workers were concerned contributions would be gratefully received at any time. She thanked the P. T. A., and all who worked at the fall carnival for the generous contribution made to the library. She stated that soon the books would be ready for the library shelves.

Tea, cookies and petits four were served from a table covered with a pink cloth and centered with a lovely arrangement of pink carnations and white snapdragons, flanked with white candles in silver holders. Mrs. H. W. Huttenlocher and Mrs. Mary Shanks, originators of the elementary library idea, presided at the silver service.

Among the guests at the Tea was Mrs. C. J. Murton of Detroit, former chairman of the library board.

Clarkston Locals

Mrs. Harry B. Yoh is a patient at St. Joseph's Mercy Hospital where she is under observation.

Martin Steiner of Clarkston and Rickard Jones returned from a hunting trip near Hillman, Mich., on Monday. They brought back their spoil which was a 6 point buck for Martin and a spikehorn for Rickard. They set their bucks early Sunday and would have returned later in the day but they found the traffic was so heavy they didn't like to face it. In Martin's three years of hunting he has bagged two bucks. He has been quite fortunate in view of the fact that some of the old timers go hunting year after year without even seeing a buck.

By The Way . . .

The weather, so far this fall, has been simply wonderful—this is for those of our subscribers who fled to other parts of the country to avoid our snow and ice. . . . Consistent advertising pays. Last week, through rushing, we omitted the signature in Boothby's Old Farm Shop adv. However, Mrs. Boothby reports many called her to tell her about it and to inquire about those precious little dolls. . . . Tickets will be out this week for the Senior Play at the Clarkston High School. Watch for further announcements and then plan to attend. . . . Hunters are returning from the northland. Quite a few deer were bagged by local hunters and any number of cars on the highway are carrying two and three deer. . . . This is to notify you that your next week's issue of The Clarkston News will be in the mail on Tuesday morning. Plan to have all ads in by Saturday noon and to be sure that your news gets into the paper you had better call by Saturday afternoon. . . . To those who would like to know what makes the government of the Village of Clarkston tick, it would be worth while to attend the Men's Club meeting at the Methodist Church tonight (Thursday) when the Village President and one of the Council members will discuss the problems of village government as applies to Clarkston. . . . Sometimes different meanings can be taken from the same words. For example: Witness: "He said that you were a sculptor but that you should wash more often". Attorney: "Give me his exact words." Witness: "He said you were a dirty chiseler."

HIGH SCHOOL ART CLASS VISITS FREDERICKS STUDIO

Last Monday afternoon, Nov. 9, the High School Art Class visited the Marshall Fredericks Studio. Mr. Fredericks is a well known sculptor throughout the United States. He is currently working on a piece of sculpture that is for the new J. L. Hudson Co., Center on Greenfield Road. It is a large bear with a child sitting on its back. Mr. Fredericks explained to us how he enlarges his small scale model to a model seven times the size of the small one. This was especially interesting to the art students who are taking geometry. Mr. Fredericks also explained that sometimes it takes him only two hours to sculpture someones head while at other times it takes him years to get an accurate modeling of his subject. It all depends on the mood

he, himself, is in. Our chaperones for the trip were Mrs. Vant'Roer and Mrs. Wilson and our art teacher, Miss Aber.

We are planning a trip, later in the year, to go to the Society of Arts and Crafts and the Institute of Art in Detroit.

CLARKSTON ELEMENTARY

FIRST GRADE—Mrs. Grover
The first grade was glad during Education Week to have visitors. They were Mrs. Embrey and Mrs. Sanford.

We have started planning on Thanksgiving and how to decorate our room to the spirit of this holiday.

Many of the children were out with colds last week, we missed Maynard Kizer, James Wheatley, and Karen King.

THIRD GRADE—Mrs. Connelly

We have had four new pupils in our room recently. They are: Marshall London, Sharon London, Joan Crowley, and Mickey Gilboe.

In arithmetic we have learned to add three numbers in a column.

SIXTH GRADE—Mrs. Forsyth

We have been working on a Thanksgiving poster showing the difference between the first Thanksgiving Day and today.

Payann Burley brought a petunia plant so we could watch it grow. Over this warm weekend several sprouts have appeared.

We have started a spelling team. At the end of this marking period we will see who has the longest train. Engineers are Jackie Powell, Frank Strothers, Prudy Hutchins, and Richard Mansfield. So far Prudy's, and Richard's teams are ahead by one point.

We have another new girl, Sharon Gilboe, which makes the total number of students in our room 46.

To all the fathers who are hunting we hope you will bring back a deer.

KINDERGARTEN NEWS

We have made attractive leaf prints to decorate our room for Fall. We did this with the use of sponges and paint.

A family unit has been started. We are making booklets about the family and home.

The kindergarten is enjoying two new viewmasters and films which are used at the library tables.

In our aquarium we have a new family of guppies which we enjoy watching.

Mrs. Lockhart

SECOND GRADES

We are finishing up our Indian unit. We made our Indian village of wigwams, with a lake and canoes. Indian men of clay are fishing and hunting. Indian squaws are making baskets and pieces of pottery. We all participated in an Indian dance to the beat of drums made by the children. Various slides on Indian life were enjoyed during this unit.

Wednesday at 10:30 A. M. we listened to the Radio Workshop broadcast for Primary Grades. This week's story "The Little, Red Fire Engine" appealed to all of us and the discussion period that followed was very enlightening—proving that Justice will triumph.

Red Cross News

"Disaster is a community responsibility"
On this theme Terry Townsend, American Red Cross field service director for Michigan, built his address on disaster work to Oakland County Chapter, American Red Cross.

Cross sets up the framework within which the whole community can help—as individuals, as groups, as government agencies.
In any disaster—flood, storm, or air raid—it is the government's job to keep law and order and repair streets, sewers, water mains and other public property, he said.

Townsend emphasized that in a disaster, the Red Cross doesn't try to replace all property damaged or destroyed.
"There isn't money to do this," he said.
"We help on a basis of need—taking a person's ability to pay off his own losses, his insurance and other such factors into consideration."

No. 2: You Can't Stop in 10 Feet at 10 Miles Per Hour

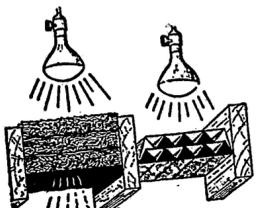

That pedestrian who pops out from between parked cars can put you on the spot. The parked car hides him until the last second. When you are far enough along to see him you may have only 10 feet in which to stop.
That fatal triangle in the drawing tells the story. See how close the car is before the line of sight of the driver can reach the pedestrian. He only has to move 5 feet to be in front of you.
At 10 miles per hour your reaction time of 1/4 of a second moves you 11 feet before your foot hits the brake. You will still skid 7.5 feet before you stop. In 1/4 of a second you would have run 16 feet.

ART SELECTED FOR FAMILY'S APPRECIATION

Many people use a picture as a mere decorative accessory. "The room will look bare if I don't put something up," they say. However, pictures are meant to be more than room fillers. Interpretation is what counts when selecting pictures for your home, points out Maxine Nordberg of Michigan State College's home economics related arts department.

"True enjoyment of a picture comes when the artist has said something worthwhile that appeals to the one who observes it. Pictures make their appeal in various ways—form, color, pattern, and subject matter" explains Miss Nordberg.

A good artist does not attempt to imitate nature. His picture is an interpretation rather than a literal representation of a subject. Frequently people say that they would like to buy contemporary prints and paintings but do not feel competent to choose them. Many museums and art schools, including the Museum of Modern Art in New York, have excellent pamphlets, brochures, and books on the subject of contemporary picture selection.

Some people live with pictures that were there when they moved into the house years ago. These people may fail to actually "see" the pictures if the artist's interpretation does not appeal to or "fit" the viewer.

"People outgrow pictures just as they do clothes," says Miss Nordberg.

Being aware of the many beautiful paintings available to you today can be more exciting than buying new clothes each season.

Miss Nordberg tells about some young married couples who are particularly enthusiastic about their method of developing aesthetic sensitivity. They trade paintings and pictures from time to time in order to enjoy several for the price of one.

HUSHED CHILD LOSES CHANCE TO BE CARUSO

Mothers interested in encouraging their child's interest in music should more often curb the urge to "shush" little pre-school Johnny when he is whistling or sing-singing around the house.

Johnny needs some opportunity to experiment with his voice, explains Elizabeth Page, director of Michigan State College's Spartan nursery school staff. However, you're justified in limiting Johnny's louder vocal experiments to more appropriate times than during Dad's favorite evening radio program, for instance.

A small child should be given an opportunity to "investigate" musical instruments in order to encourage his musical attempts. However, he will not be ready to enjoy playing musical instruments in a group until he is five or six years old, says Miss Page. She quotes Roma Gans of Columbia University: "We must let the child live this year of his life and not prepare him for the year ahead."

With all good intentions, some mothers and nursery school teachers make the error of pushing such activity before the child has enjoyed the chance to experiment individually.

Miss Page recommends provid-

Contrary to popular notion, potatoes need not be fattening. One medium-sized potato has about 100 calories—no more than an apple or banana and only half as much as a medium-sized piece of pie, points out Mary Lewis of the Michigan State College food and nutrition department. When you're watching weight, watch what you put on the potatoes or how they're prepared. It is the added fat or gravy that piles up calories, reminds Miss Lewis.

Before you think of buying an automatic washer, check the amount of available hot water, cautions Lucile Ketchum, extension home management specialist at M. S. C. In general, a 50-gallon hot water tank is the minimum for an automatic washer. Before you decide upon your automatic washer find out how much hot water it requires. This varies from about 15 gallons to almost double that amount.
