Cub Scout News

During the week of April 4th and again the week of the 15th the Cub Scouts of Den 6 are learning about their home town. We visited The Clarkston News printing shop where we had a grand time watching the presses and learning how the linotype works. We stopped in at The Clarkston Bakery and saw the mixers and ovens and had a fine sample of their baking. Then we made a trip out to the Ground Observer Post where Mr. Bennett told us all about spotting planes. We think Clarkston people are pretty wonderful and as soon as we can get our achievements finished we are going to explore some more of our home town projects.

ANNIVERSARIES HONORED IN CALIFORNIA

"Mr. and Mrs. Chester G. Fiske, of Los Angeles, California, formerly of Clarkston, are celebrating their fiftieth wedding anniversary on May 1. Three of their children, Allen M. and Florence E. of Los Angeles, and Milton A. of San Francisco, with their families and friends, have planned several parties. Another son, Chester G. Fiske, Jr., of Minneapolis, is unable to attend. It is unusual and very interesting to note that their son and daughter-in-law, Allan and Dorothea Fiske are celebrating their twenty-fifth and their grandson and granddaughter-in-law, Richard and Janice Fiske, are celebrating their first wedding anniversary, also in the month of May. This makes possible a 50th, 25th and a 1st wedding anniversary in three successive generations all in one month. The heartiest congratulations of all their friends are extended at this time to all of the celebrants.

Bring a nose-bag lunch. Do not plan to cook.

SKYWATCH PERTS

GOOD WORK

Our Post, now in the middle of its third month of operation, is enjoying a reputation of which our community can be justly proud. The Post Supervisor, the Chief Observer and the seven Officers of the Day have all worked diligently in achieving these results—however they will all agree that in the final analysis its success rests entirely on the sincerity and faithfulness of the individual observers. Absenteeism has been practically non-existent. Vacations and sickness have made it necessary for Officers of the Day to occasionally fill in, but we have never had a case of an observer staying away without just cause.

Stick-to-itiveness such as this comes only from civic minded people who are completely convinced that the need exists, the purpose is right and who are vitally interested in the protection of the other fellow.

The G. O. C. becomes a highly important and much used function during tornado weather periods. The Filter Centers plot the course of all tornados through reports from the Observor Posts. We still have a few periods to fill—call MAple 5-9861 or MAple 5-4866.

Sunday School 11:00 A. M. Sunday Service 11:00 A. M.

The vital importance for men today of Christ Jesus' victory over death will be emphasized at Christian Science services Sunday.

Readings from the King James Version of the Bible and from "Science and Health with Key to the Scriptures" by Mary Baker Eddy will comprise the Lesson-Sermon entitled "Doctrine of Atonement". From John will be read the account of Christ Jesus' crucifixion and resurrection.

Correlative passages from Science and Health include the following (5:1): "Glory be to God, and peace to the struggling hearts! Christ hath rolled away the stone from the door of human hope and faith, and through the revelation and demonstration of life in God, hath elevated them to possible at-one-ment with the spiritual idea of man and his divine Principle, Love."

The Golden Text is from I John (4:10): "Herein is love, not that we loved God, but that he loved us, and sent his Son to be the propitiation of our sins."

TREMENDOUS CREDIT is certainly due all the boys and girls who last week brought 5 Superior ratings home to Clarkston High, Clarkston Elem., and Pine Knob Schools. They were competing in the Pontiac Science Fair against such schools as Bloomfield and Cranbrook and the judges who were University professors and business men saw fit to bestow upon our boys and girls 5 of the 10 Superior ratings given. This certainly is a terrific commendation on their ability and effort. **DAN CAMPBELL** of Clarkston High won Superior for his "Honey Processing" project; Mrs. Davison's 5th grade for its "Solar System" display, (class representatives were Terry Miller and Bill Kickery); Pine Knob School's **JOHN ALLEN** won individual Grand Prize in Elementary for his "Telegraph" project and **MRS. RAWLEY'S** 6th grade, also of Pine Knob, for their "Making of Soap" and "Processing of Wheat from Seedling to Bread". **DONNA VON-KOEHNEN** and **CHARLENE MILLER** received a Superior rating on their "prehistoric skull structure" project. There were over 100 entries in all from schools all over Oakland County. The aforementioned projects are eligible for entry in the State Science Fair which will be held May 4 at Hillsdale. Our most hearty congratulations to all the boys and girls participating.

CONGRATULATIONS to all book review winners in the Clarkston Elementary School Contest. . . Miss Hoffman, school librarian, gave an interesting talk on the function of the library and stressed the further need for volunteers and money for books. . . 23 new books were purchased at last Thursday's P. T. A. meeting. . . New officers were installed and Miss Darlings' room won 1st prize for attendance. . . Mrs. McCrary, 2nd.

BAPTISMAL in the Methodist Church was held last Sunday. . . there was a large group of Youths, Children and many infants. . . Also 63 adults. Mr. George Harris of N. Main Street, was in what could have been a very serious auto accident last week. . . Fortunately he was only bruised and shaken. Mr. Harris was enroute from a visit to his daughter Mrs. Nelsey of White Lake Road.

"21" CLUB members and their guests seemed to have a wonderful time last Saturday night at their regular monthly dance. . . Fenton Weaver and his orchestra provided the music. There were 200-250 present (including several pint-sized Marge and Gower Champions). Chairmen were Jan and George Gray; Chaperones included the Ronks (Tink and Mary), Duncans, Christiansens, Walters (Ron and Virginia), Jo Nickora, Mel Varra, and Christians.

PAUL AND MARYLEE ELIASON are leaving Sunday for a trip to Williamsburg, Virginia. . . the children will be left in the care of relatives and friends.

DANA (CHIPPER) BUEHRIG celebrated his 2nd birthday last Thursday by taking his family to Ted's for dinner. . . Jerry (Mrs. Buehrig) spoke of him as her "two years ago Easter egg".

WEDNESDAY NIGHT Dance Clubbers much enjoyed their "Hard Tax" dance Wednesday, April 10. Food was served in buckets and wash tubs and tables were covered with butchers paper complete with jottings and scratchings a la tax returns. . . Centerpieces were large fruit juice cans containing stalks of celery (seems the committee members gorged themselves with liquid in order to empty the cans not realizing they could probably have obtained all they wanted from a restaurant). Paul Eliason had what could have been a serious accident when a full can fell on his foot. Other members of the committee included the Volberdings, Buehrigs, Pettengills, Dean Smiths and the Bud Hawkes as chairmen.

PHYL STACKABLE'S mother, Mrs. Chester Goddard of Altadena, California, is here on an extended visit.

VYVYAN PHILLIPS left last Monday with her youngest child, for a visit with her parents in Florida.

BUD YOH, son of Dr. and Mrs. Harry Yoh, is in William Beau-

mont Hospital (Royal Oak) having suffered a stroke last week. His sister, Helene Russell, tells me he is making wonderful progress and hopes to return home this week.

JOSEPH C. GARDINER of Monterey Dr., now serving with the U. S. Coast Guard stationed in Cleveland, is home on a short leave.

BUD YOH, son of Dr. and Mrs. Harry Yoh, is in William Beau-

and mathematics in high school, an accelerated pre-college program is offered by the Lawrence Institute of Technology.

Under the program, students are able to make-up their deficiencies in the shortest possible time. In most cases high school students are not completely short of the engineering requisites which include 1 1/2 years of algebra, a year of plane geometry and a year of physics or chemistry.

Usually such a student can completely qualify for engineering college entrance in one semester.

At present the pre-college program is being offered on Tuesday and Thursday nights but Lawrence Tech will inaugurate a 12 week program during the summer, if there is sufficient demand, according to Mordica Ryan, Dean of Academic Administration.

"Many students realize too late in high school that they would prefer to become engineers, scientist or technicians," Dean Ryan explains. "Our pre-college program was organized four years ago and is becoming more popular as the need for scientifically trained men appears in the news."

Students are invited to contact counselors now at Lawrence Tech between 9 a.m. and 9 p.m., Monday through Friday.

The college is located on its new 65 acre campus on Northwestern Highway and West Ten Mile Road.

BANQUET IN PROGRESS

Plans for the Junior - Senior Banquet are near completion. The banquet is scheduled for April 27th.

MOON DETERMINES DATE OF EASTER, ASTRONOMER NOTES

How is the date of Easter determined?

"The date of the full moon of April 14 this year is important," Hazel M. Losh, University of Michigan associate professor of astronomy, says. "It is the determining factor in the fixing of Easter."

"In 325 A. D. the church fathers gathered in council at Nicea, and among other things set the date of Easter once and for all," the astronomer explains. "It was set as the Sunday following the first full moon that occurs after the Sun enters the equinox." As a result, this year Easter comes late—April 21—with the full moon on the 14th.

"Perhaps one reason for choosing the time of full moon in fixing this date was to afford pilgrims safe travel on the roads to the Holy City for the Easter festival," Professor Losh points out. "The light of the full moon enabled them to travel in comparative safety by night as well as by day."

This day fluctuates over a period of 35 days between the equinox and April 25, the latest date that Easter may occur. "In 1943, it occurred on this latest day, April 25, but this will not happen again until A. D. 2038", professor Losh maintains. A March 22 Easter will not take place until A. D. 2285.

RELIGION NOT DATING FACTOR

Religious differences have little influence on dating by college students, according to a Michigan state University psychologist.

In a survey of 600 students, "we could find no relationship between dating behavior and religious affiliation", reported Dr. Milton Rokeach.

On first dating, students may want their date to be a Venus or a handsome football hero, but they simply don't ask "What church do you attend?" Dr. Rokeach explained.

The study, however, covered only dating patterns and not marriage. Choice of marriage partners may be the subject of another study, he indicated.

SCULPTURED CARS MAY GRACE ROADS

American automobiles someday may look like pieces of moving sculpture on the nation's highways.

"It would be a good thing if auto design were turned over to sculptors," stated Richard Gregg, Kalamazoo Art Center director in a symposium at Michigan State University. "I am convinced that we would have better cars than anything on the road today."

Gregg called for fine arts training as "the best background for the car stylist."

With sufficient art background, he said, "we could hope in time to make a car which would satisfy aesthetic as well as functional requirements."

U. OF M. HAS LOST ONE OF ITS BUILDINGS

The University of Michigan can't find one of its buildings—but it's recognizing a centennial for it this year anyway;

So says F. Clever Bald, assistant director of the Michigan Historical Collections.

The Chemical Laboratory, first building in the country entirely devoted to chemical experiments, is now completely embedded in

MICHIGAN BELL

TELEPHONE lines

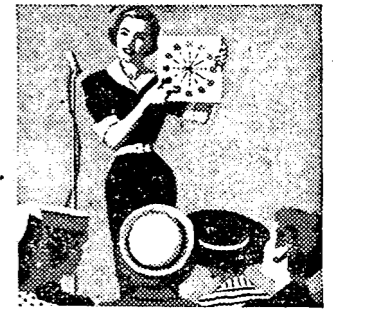

EASTER SUNDAY IS ONE of those days all of us like to be with our loved ones. A thoughtful, personal way to remember those who are far away on Easter is with a Long Distance telephone call. Your voice over the telephone will be welcome as Spring. And it will cost

you very little. For a dollar or less you can call places a day's drive away. The usual low "after 6 p.m. or all day Sunday" rates apply all day Easter. Make a list now of those you want to phone a "Happy Easter."

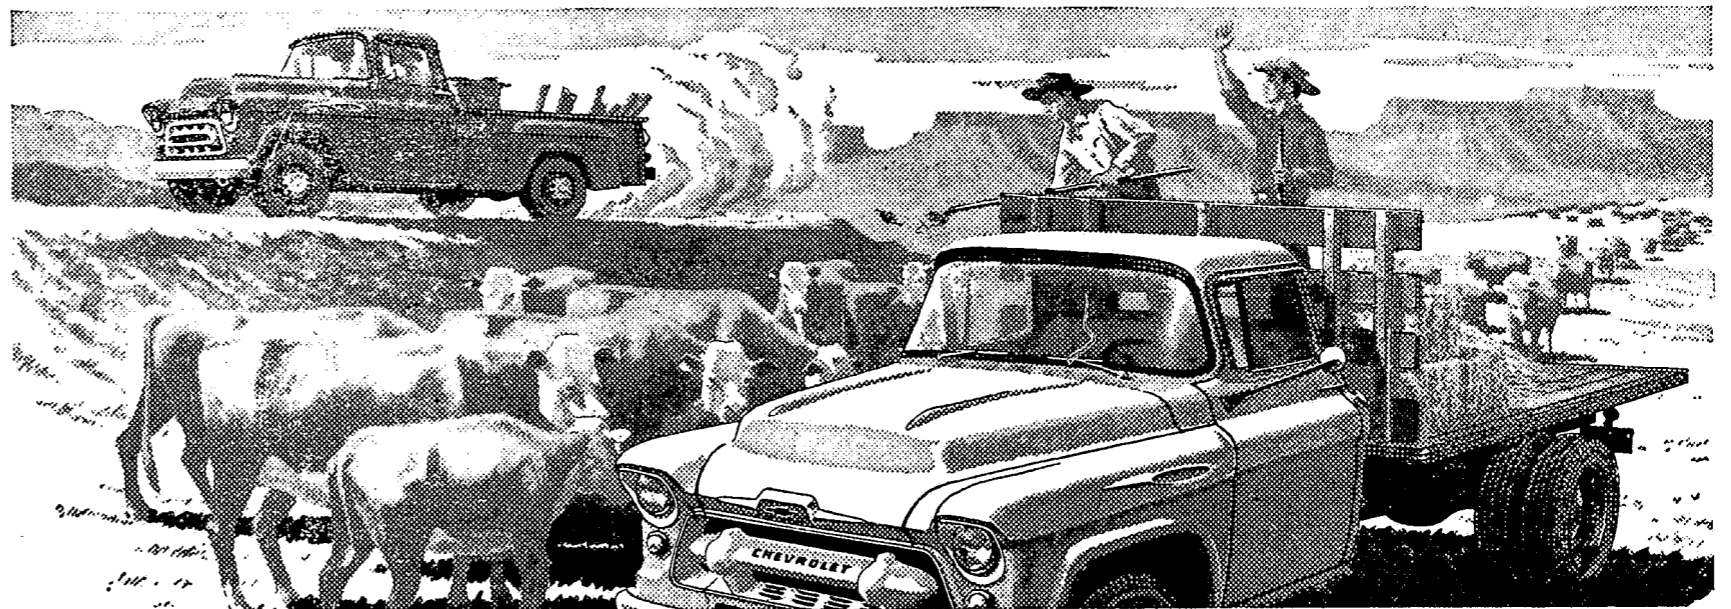

HAVE YOU NOTICED

how much more color there is around today? Even familiar objects, the telephone for one, have colorful new personalities. We have a talk on the subject called, "Color Comes Calling," that's available to clubs. In an entertaining 30 to 45 minutes, the audience learns a lot about basic color rules and popular color schemes in decorating. You'll hear how to use your color ideas, too. And men like the show as well as women. If you'd like to know more about "Color Comes Calling," call our Business Office.

FOR FORTY YEARS, Michigan Bell has given Red Cross First Aid Training to many telephone people. It has proved invaluable on many occasions. For example, a doctor's recent letter to us concerning an auto accident said: "It is entirely possible that a young lady involved owes her life to your employee. Your organization is to be commended for having such a person, and to have had a hand in his training in such an important matter as First Aid management of accidents." Telephone people in this area are naturally proud that so many of their fellow workers can perform such deeds.

Fly Time's A'Coming

Wet and dry flies, that is, Michigan's general trout season opens April 27 on lakes and streams throughout the state. This angler, busily netting himself lunch, was working the AUS-1's Moon Stream below Grayling early in the season last year.

One session will be from June 23 to July 20; the second from July 21 to August 17. The student campers will be known as Program Aides. They will not be considered counselors nor staff members, but trainees. A nominal fee will cover room and board, and at least two hours daily of formal camp training classes. Fun and participation in advanced camping skills will also be a part of the four week sessions.

Girls who will have completed the 10th or 11th grades by June may enroll in the more advanced course. Because this is the first time either course is being offered, applicants may enter the advanced course without having taken the first year's training. The older girls will camp separately and will receive a more specialized training. Each girl will assist for one week in the camping field of her choice; on the waterfront, teaching nature or crafts, supervising boating, or in the kitchen.

Accommodations are limited, and registrations will be taken on a first come first served basis. Application blanks and campfolders are available at the Girl Scout Office, 310 National Bldg., Pontiac. These forms must be returned to the office by March 29.

LETTUCE ADDS MEAL APPEAL

Is lettuce a worthwhile vegetable? Does lettuce contain vitamins and minerals which contribute to our good health? Are we wasting our time scrubbing and arranging these bits of greenery into a salad, thinking that we shall soon be filling ourselves with "health?"

A University of Michigan dietitian offers some answers to these questions. Miss Leila Presson, a member of University Hospital's Nutrition Clinic says, "Lettuce should be considered a worthwhile addition to the diet for its value in adding to the taste and decorative appeal of salads and for the added roughage one needs each day.

"Depending on the richness of the soil on which it is grown, lettuce does contain traces of calcium, phosphorus, and iron. Such small amounts of these minerals are supplied, however, that lettuce can hardly be considered an important source. "Vitamin A is the most important nutritive contribution of lettuce. In one average serving of leaf lettuce, about three leaves, we will receive about 10 percent of the vitamin A we need each day. One green leaf of lettuce will contain twice as much vitamin A as one leaf of head lettuce from the inner section.

"Since green vegetables are important sources of Vitamin A, it is of great advantage to serve the green outer leaves of lettuce since they have a more abundant supply of this vitamin.

"A small percentage of vitamin C is contained in lettuce, no vitamin D, and very insignificant amounts of the B vitamins. Lettuce is such a weak supplier of vitamins A and C that to depend on it alone for these would mean that we would each have to eat five heads of lettuce per day."

What may we do with lettuce, to make worthwhile the trouble of buying, washing, and serving it? One idea Miss Presson suggests is to use it in a mixed or tossed salad. It supplies the

necessary bulk, color and crispness. If the salad contains such healthful foods as green peppers, carrots, tomatoes, celery and cucumbers, then the individual will be fairly sure of getting all his vitamins A and C in a tasty fashion.

Lettuce adds to the appearance of other dishes; provides an attractive nest for cottage cheese, cold slaw or gelatin salads and makes sandwiches more tempting and fresh-looking. Large lettuce leaves form a cool background for relish plates of olives, carrot sticks, stuffed celery, and radishes.

"Keep these points in mind," suggests Miss Presson. "Lettuce grown in healthy soil will contain more minerals. Green leaves of lettuce have more vitamin value than white inner leaves. Lettuce should not be considered a good source of vitamins A and C, but it does add variety, attractiveness, roughage, and taste appeal to our meals."

Card Of Thanks

I wish to express my sincere thanks for the lovely cards, letters, gifts, flowers, special prayers in my behalf and especially Rev. Walter Gibson, Baptist Young People and high school students for remembering me while in Harper Hospital, and since my return home. Words could never express what this has meant to me and my parents.
