CLARKSTON, MICHIGAN, THURSDAY, MAY 1, 1958

NUMBER 35

Another Michigan Week will start Sunday with Spiritual Foundations Day; Monday, Exchange of Mayors Day; Tuesday, Hospitality Day; Wednesday, Our Livelihood Day; Thursday, Education Day; Friday, Our Heritage Day and Saturday, New Frontiers Day.

Michigan Week was launched in 1954 by a group of civic leaders who felt that in efforts to sell Michigan's advantages to the rest of the country, nothing is more important than selling Michigan at home. From the first, the main idea has been to develop still greater knowledge of Michigan and still greater pride in Michigan among Michigan people, at the same time using Michigan Week to attract favorable attention to Michigan across the nation.

Education will share the top theme position along with water resources in this year's celebration. Schools should hold "Open House" and throughout the week should display the State Flag, and see that every child learns the history of this historical banner.

On Monday Edward Thomson, president of the Village of Clarkston and Mrs. Thomson, will go to Cassopolis and the president of that village, Charles O. Loupee and Mrs. Loupee will be in Clarkston. This will help these two communities to become better acquainted.

Mr. Loupee is a young man, 37 years old, and is in the oil business with his father. He served on the Cassopolis Council for several years before being elected President of the village. He is active in civic affairs, always anxious to promote projects for the betterment of the community. The Loupees have two children and so are deeply interested in the activities at their local schools.

In charge of the program for next Monday is Keith Hallman and working with him will be Robert L. Jones and Herbert Beach. At 10:00 A. M. the visitors will be met in front of the Clarkston State Bank and will be escorted to the office of Dr. Greene, superintendent of Clarkston Community Schools, where a "coffee" will be held before touring the schools and the growing subdivisions in the Clarkston area. At noon a welcoming luncheon will be served in the Community Center, with Earl Terry making the arrangements. In the afternoon a boat trip around the shores of Deer Lake is being planned along with other afternoon tours to places of interest in the area.

Mrs. Loupee will be escorted on the morning tour by Mrs. Don Stackable, retiring president of the Clarkston Community Women's Club and Mrs. Keith Hallman, president-elect of the Women's Club. In the afternoon she will be the guest of the Clarkston Farm and Garden Club at the home of Mrs. Rockwood Bullard.

The speaker will be Morley Fraser who is head football coach at Albion College and is much sought after as a speaker for young people and the committee feels very lucky to have him come for this final rally of the year.

B. & P. W. CLUB HEARS SCHOOL SUPERINTENDENT

On Thursday evening of last week the Waterford-Clarkston Business and Professional Women's Club enjoyed a very interesting evening. In the first place the meeting was held on the fifth floor of the Oakland County jail where a dessert was served at about 7:30. Following this the group had the pleasure of listening to Dr. L. F. Greene, Superintendent of Clarkston Community Schools. As the evening was in charge of the Career Advancement Committee, Dr. Greene outlined how the American School System, especially in elementary and high school, tried to lead the child to a decision for his future work. He compared the curriculum of today and its results with that of earlier years and tried to enlighten the group about many criticisms that are circulated in regards to the school system. Following Dr. Greene's talk a question period was held and he was kept busy for a while, which proved that his dissertation was thought provoking.

The group then went on a tour of part of the jail and the women were amazed to see how well kept the institution is. The place was exceptionally clean, free of dust and so well painted. Sheriff Frank Irons and Mrs. Irons were very hospitable and paid the Club a short visit in the assembly hall where Mr. Irons welcomed the group. At the business meeting the following officers were elected for 1958-59: president, Mrs. Oliver Dunstan; 1st vice-president, Mrs. Edmund Windeler; 2nd vice-president, Mrs. Ray C. Kingsbury; recording secretary, Mrs. William H. Stamp; corresponding secretary, Mrs. Basil Thompson; treasurer, Mrs. Everett Reese. Delegates and alternates to the State Convention on May 16-17-18, were elected.

48 Students Take Scholarship Test

48 students at the Clarkston High School took the National Merit Scholarship Qualifying Test, Mr. S. F. Goedge, Principal, announced today. The test was administered at the high school at 9:00 a. m., Tuesday, April 29.

An estimated \$5 million in Merit Scholarships and other awards are at stake in the national competition, now beginning its fourth year. Some \$12 million in Merit Scholarships have been awarded in the first three years of the program.

Merit Scholarships are provided by some 80 corporations, foundations, professional societies and individuals, as well as by the National Merit Scholarship Corporation itself, which conducts the competition.

The National Merit Scholarship Qualification Test is a three-hour measure of educational growth and aptitude. Emphasis is on broad intellectual skills, and understanding and ability to use what has been learned, rather than on sheer knowledge of facts.

A group of 10,000 students, composed of the highest scorers in each state—will advance to the Semi-finals when the results are reported to all participating schools next fall. Semi-finalists will then take a second examination. Those who repeat their high performance on the second examination will become Finalists in the program and will indicate their choice of college and course of study. Further evaluation of their grades, citizenship, and extracurricular achievements will follow, and the winners will be announced in the Spring of 1959.

The test results will be available at the beginning of the senior year, in time for use by the seniors and their class advisors. The scores may also be used in many high schools to help students make decisions about college and the most appropriate courses to major in. Many students throughout the country who do not expect to win have registered for the test, in order to learn more about their individual strengths and weaknesses.

Dr. John M. Stalnaker, president of the National Merit Scholarship Corporation recently cautioned that there are many reasons why test results cannot be used to evaluate school performance. The distribution of the population throughout the state, the size of the school, the native intelligence of its top students, the percentage of students taking the test, the nature of the community where the school is located, the purpose of the school, and many other factors having nothing to do with the total effectiveness of the school can influence its number of finalists.

The test results will however, enable students as individuals, to compare their scores with other students across the nation. The test has been constructed by the Science Research Associates of Chicago, and will also be scored and reported by the testing agency.

Each Merit Scholarship carries a stipend based on the need of each individual winner, and is renewable annually without any further competitive examination. The average stipend in past years has been \$650 per year. The minimum award in the 1958-59 program will be \$100 a year and a maximum will be \$1,500 a year.

The names of all program Finalists will be sent to colleges and universities and other scholarship organizations throughout the country. In this way many non-winning finalists are helped in winning scholarships awarded directly by colleges and other organizations.

About 1000 Merit Scholars, winners of the 1957-58 competition, will be named on May 1, 1958. They are winners in the third Merit Program which began last October.

The National Merit Scholarship Corporation directs the annual competition. It was founded in 1955, on grants of \$20 million by the Ford Foundation and \$500 thousand by the Carnegie Corporation of New York.

How sin and suffering are overcome through spiritual understanding of God will be brought out at Christian Science services Sunday. Reading from the Bible in the Lesson-Sermon entitled "Everlasting Punishment" will include the following from James (4:8): "Draw nigh to God, and he will draw nigh to you. Cleanse your hands, ye sinners; and purify your hearts, ye double minded." From "Science and Health with Key to the Scriptures" by Mary Baker Eddy will be read the following (239-16): To ascertain our progress, we must learn where our affections are placed and whom we acknowledge and obey as God. If divine Love is becoming nearer, dearer, and more real to us, matter is then submitting to Spirit. The objects we pursue and the spirit we manifest reveal our standpoint, and show what we are winning.

Fire Fighters Ready

Conservation Department crews get fire fighting equipment into condition for distribution to "keymen," 1,000 private citizens throughout the state who aid the Department in discovering and controlling forest and grassland fires. C. H. S. JUNIOR-SENIOR BANQUET HELD

by Frances Hancock

The Junior-Senior Banquet was heralded as a success as members of both the junior and senior classes plus members of the faculty and administration were in attendance.

The tables were decorated with the colors of the Class of 1958—blue and white. The favors, miniature suitcases marked Washington, D. C., were filled with mint candy and peanuts and placed at each individual setting.

Toastmaster John Tisch started the banquet with the introduction of Joe Jennings who gave the invocation, after which a delicious chicken dinner was served by a select group of sophomore girls.

Following the dinner Jackie Brown, Anita Haddrill, and Diane Taylor, the girls' trio, sang "Tonight You Belong To Me" and "Bless This House".

Barbara Rockwell and Gail Weston read the Senior Class history, which they had written themselves. The boys' quartet, Danny Althouse, Ron Porritt, Joe Jennings and Jack Miner, under the direction of Mrs. Peterson, entertained the guests with "I Had a Dream" and "Faith Unlocks the Door".

Mr. William Coulaeos, former director of the Pontiac Boys' Club, was the guest speaker. He related an inspiring interpretation of the important position the members of both the Junior and Senior Classes will hold in the future.

Following the speech Mr. Coulaeos, Mr. S. F. Goedde, principal of C. H. S., presented the highly esteemed citizenship awards to the outstanding boy and girl in the Senior Class.

Jerry Wilmot, vice-president of the Junior Class brought the banquet to a close with his farewell address to the Seniors.

CHAR WILSON OUTSTANDING IN JUNIOR CLASS PLAY

by Dianne Chapman

Junior Play acting honors were captured this year by Charlene Wilson in "Men are Like Streetcars". Char played the lead in the play with a naturalness which carried the scant and rather stoic audience through the emotions of hilarity, sadness, subtlety and surprise.

Another player who should receive commendation for her work in the play is Pat Crosby, who was the most improved player. After a bout of stage fright for the Thursday matinee, Pat came through with flying colors on Friday evening and stood out as a capable actress.

Others who did well in supporting roles were Joe Courier as Mr. Mason; Perry Smith as Jerry; Chuck Hancock as Davy; and Barbara Jackson as Sylvia.

Susan Johnson, Karen Jennings, Barbara Sexton and Barbara Gillis were naturals in the parts of typical teen-age girls, and Jerri Minton, Donna Von-Koehnen and Beverly Jennings as their mothers created quite a stir in the last act with their magnificent ad libbing.

Carolyn Warrick did an outstanding job as the maid, and Jim Hennig and Gary Ash were also effective in their parts.

The Juniors who worked on this year's play should be proud of their work and the play directors, Miss Marcia Klausner and Miss Hilda Benjamin deserve commendation for an excellent production.

POWER BOATS DON'T BOTHER FISH, BITING

If you're one of those fishermen (and who isn't) who curses loudly above the roar each time a motor-powered boat passes nearby, Prof. Karl Lagler of The University of Michigan has news for you.

Motorboats, seldom, if ever, keep fish from spawning; 3. Motor noises do not appear to disturb fish; 4. And—most important to fishermen—the noise of nearby motors has not been shown to affect the rate at which fish bite.

Smelt Dipping Time

Smelt spawning runs are a sure sign of spring in Michigan as thousands of persons line streams to dip these tasty little fish each year. Dip nets, not more than five feet in circumference, may be used to take smelt from designated Michigan streams during the March 1-May 31 season. A list of these streams can be obtained from Conservation Department district offices.

The beginning of trout season also opens all trout waters in the state to fishing for other species, except bass.

In addition to the \$2 resident fishing license, Michigan trout anglers also must purchase a \$2 trout stamp. Other regulations are listed in the "1958 Guide to Michigan Fish Laws", available from license dealers or Conservation Department offices.

HOUSE PLANTS LIKE WARM, MOIST AIR

Your house plants need air—and not just any air will do! It must have enough moisture and be the right temperature, cautions Fred Widmoyer, extension specialist in horticulture at Michigan State University. Humidity is often a problem with house plants because heating systems tend to dry the air. Here are some ways you can add moisture to the air in your house. You can put the potted plant in a saucer or metal tray which is filled with coarse sand or gravel, pieces of broken crocks or charcoal. Fill with water to the top of the gravel. Moisture will evaporate into the air surrounding the plant. Try giving your plants a bath! It not only gives them some moisture but also opens their pores. Do this in the morning on a sunny day so the plants are dry by afternoon. House plants like a temperature that is fairly constant. They do well at 70 to 72 degrees F. in the daytime and around 60 degrees F. at night. Sixty degrees is too cool for some plants, however, ask your county agricultural agent or florist about yours. If you are growing plants with different temperature requirements, put those that need a cooler temperature near a window, and those that like more heat toward the center of the room.

CHEAPER HOUSES ARE POSSIBLE EXPERT SAYS

Cost cutting can help supply the good, low-cost housing the United States really needs, according to a Michigan State University specialist.
The selling price of the average house constructed is too high for the average income, contends

Byron M. Radcliffe, director of the four-year residential building curriculum at M. S. U.
"The average income is around \$5,000, limiting to \$12,500 the price of a home a prospective buyer with this average income can purchase," Radcliffe declared. He pointed out that only 27 per cent of U. S. houses built up to mid-1957 were at or below this price.
He said 44 per cent of new houses cost \$15,000 or more, taking an income of at least \$6,000 before an FHA-insured mortgage could be obtained. Yet only one third of American families have this income.

Because builders cannot control labor and materials prices, Radcliffe feels cost cuts in construction methods and techniques are the best answers in providing additional housing.
Some of his suggestions: eliminate the basement and save \$1,500; centralize plumbing to save extra materials; use "tilt-up" walls, built flat on the slab and then put up into position as nearly complete as possible; use dry wall, ready-built windows and other such components whenever possible; cut material and time waste.
"It has been demonstrated by the more progressive builder

that a very substantial sum of money can be eliminated from the selling price of the house", Radcliffe asserted.

CRITICAL FIRE CONDITIONS IN PART OF STATE

More than 95 percent of Michigan's forest fires are caused by man and usually can be traced to human carelessness, but some fires have mysterious origin.
Conservation Department looking out Edward Narva, of Reeder Hill tower near Lake City, recently spotted a small fire near the base of his tower and extinguished the blaze.
Narva said no sign of fire was evident when he climbed the tower to go on duty an hour earlier. The lookout does not smoke, nor was he carrying matches, and no one else was near the tower.

Although the cause has not been definitely determined, it is assumed the fire may have been started by the sun shining through a small piece of glass.
Fire control specialists said the incident illustrates the critical fire conditions throughout much of the state. Lack of rainfall, particularly in the northern lower peninsula, has increased fire hazards in recent weeks.
During the week ending April 13, some 65 fires burned 381 acres of state and private forests and grasslands in Michigan. The latest blazes boosted fire damage for the year to 2099 acres.

Land owners are reminded that anyone starting a fire outside city and village limits to burn brush, debris or other matter must first obtain a burning permit. These permits, required by state law, can be obtained from Conservation Department field offices, conservation officers, Department fire officers, or forest fire lookouts.

Fishermen, picnickers, hikers and others using the outdoors also are cautioned to observe fire prevention rules when a field.

Let's toss a salad for dinner, suggests the Marketing Information Agent. More Americans are doing this. In fact, 40 per cent of all fresh vegetables grown in the country go into our salad bowls. Production of salad vegetables has increased over 50 per cent since 1940. The most popular salad item is lettuce. Other choices high on the list are tomatoes, celery, cucumbers, green peppers, escarole and endive. According to Mrs. Josephine Lawyer, May will bring a larger supply of salad foods at lower than April prices.

Chocolate Clowns Get Coconut Ruff!

Even the youngster who "clowns" the most at a party, will give rapt attention to dessert when these fascinating ice cream clowns are served! Simple to do—simply scoop hard ice cream into balls and, with bits of marshmallows, make features. Place a cone on top at a rakish angle and then make the clown's fluffy ruff with plenty of snowy flaked coconut!

Chocolate Ice Cream
2 squares unsweetened chocolate
1 1/2 cups sweetened condensed milk
Dash of salt
1 cup water
1/2 teaspoon vanilla
1/2 cup cream, whipped until thick and shiny
Tender-thin flaked coconut for ruff
Marshmallows for features

Ice Cream Cones
Melt chocolate in top of double boiler. Add condensed milk and salt and blend. Cook over rapidly boiling water 5 minutes, stirring constantly. Add water gradually, stirring constantly. Chill. Add vanilla. Fold chocolate mixture into whipped cream. Turn into freezing tray of automatic refrigerator and freeze. When mixture is frozen on sides and bottom, turn into chilled bowl and beat with rotary egg beater until smooth and increased in volume. Return to freezing tray and freeze 2 to 3 hours longer, or until firm. Makes about 3/4 quart ice cream.

To make Chocolate Clowns: Form balls of the firm ice cream and place on serving plates. Cut marshmallows to make features for the face. Place a cone on each "clown face" and surround with coconut to form a ruff.
