Staff Complete For Clarkston Schools

The Clarkston Community Schools is one of the fortunate districts in this area in that they have completed their staff for the 1959-60 school year. The professional staff consists of one hundred forty-three teachers and administrators. To supplement this core of workers there is a total of fifty-eight secretaries, custodians, cooks and bus drivers.

The student enrollment is expected to climb to over 3800 students, which is an increase of approximately 300 over last year. The custodians have been very busy cleaning the 175,000 sq. ft. of floor space in the buildings in addition to the walls, ceilings and windows. They also have to maintain over one hundred acres of lawn and yard space.

The football bleachers have a fresh coat of paint, as well as the bus garage, and the trim on several of the buildings. All of this work is being accomplished by the custodians without employing additional personnel.

Three new buses have been purchased to take care of the additional riders and the retirement of two old buses. Twenty-three drivers will travel about a quarter of a million miles this year to pick up and take home children.

The new high school is progressing as scheduled and will be completed in adequate time for classes to begin in the fall of 1960. Very few changes have had to be made in the building since construction began, because of the fine work of the Citizens' Committee and the Board of Education. Time was adequate pre-planning, thereby saving many costly changes as the building is being constructed.

The Andersonville driveway and parking area has been black-topped. This will eliminate much of the mud which deteriorates the floors so quickly. The Board of Education has been improving the driveway at one building each year.

Every effort is being made to provide a safe and clean building which is well-lighted and ventilated for your children to obtain the best education possible.

U. S. Navy Band To Appear In Oxford

Many times hearing music played or actions described, promotes a desire to see the play, the band, an individual, or a place, in person. We live in a land once removed from reality. We know popular plays and books through the eyes of the motion picture producers. We know many pieces of famous music through the mediums of recordings and the radio. We are familiar with the names of famous musicians and groups of musicians but we seldom see any of them first hand.

A group of outstanding musicians, the United States Navy Band, will present two concerts in Oxford on Thursday, September 24. Music lovers, and those who enjoy good band music, will be able to see this band perform in person. The matinee will be a program planned for the high school student. An additional attraction will be the ten high school bandmen who will play with the Navy Band at the matinee.

The evening concert will be highlighted with classical and semi-classical compositions of great composers and also modern numbers.

The concerts will be held in the gymnasium of Oxford's Senior High School.

The United States Navy Band has made thousands of radio broadcasts during the past quarter of a century—the best known of these broadcasts is the UNITED STATES NAVY BAND HOUR. The Band is no stranger to television audiences, having appeared on several national telecasts.

As you listen to this glorious blending of the woodwinds and brass, and see the mastery of the percussion instruments, you cannot help but swell with pride, for this is "The World's Finest"—THE UNITED STATES NAVY BAND.

Get your tickets from any member of the Oxford Lions Club. The president of the Club is William L. Sisty and his phone is OA 8-2717.

UNITED FUND CAMPAIGN GOAL SET

The 1959 Pontiac Area United Fund Campaign Goal of \$647,698, representing a 7.2% increase over the amount raised in 1958, was announced by Leonard T. Lewis, president of the Fund. \$604,000 was collected during the 1958 campaign.

The figure was set by the Fund's Board of Trustees at a meeting at the Waldron Hotel. In presenting the figure to the Board for their approval, Lewis pointed out that the increase in the Budget recommendation and hence the campaign goal, reflects the true and clear-cut basic needs of the 52 health, recreational and family care agencies and simultaneously presents a real challenge to the people of the Pontiac Metropolitan area.

The Board of Trustees is the final hearing board for the final budget figure and hence the campaign goal. The basic budget figures had previously been presented to eight panels of business people, homemakers, professional etc. by each agency involved. The Chairman of each panel is a member of the United Fund - Community Chest Budget Steering Committee.

Budget recommendations are then passed on to the Budget Committee. This committee also hears the request of the Michigan United Fund agencies and the American Red Cross and American Cancer Society. After further review and recommendation, the budget figures are passed on to the Administrative Committee and then finally to the Fund's Board of Trustees for final passage and authority to set the campaign goal.

Merle Bennett of Clarkston is a member of the Board of Trustees.

Two Chevy middleweights prove their rawhide stamina!

Top hands on high-country hauls!

Ask any trucker who's been over Wolf Creek Pass, 10,850 feet up in the San Juans: a 9-mile pull to the summit and low gear all the way down. Mr. C. H. Phillips of Alamosa, Colorado, has a 6408 and a 6503 Chevrolet truck that are up over this route the year round, taking sheep and beef to pasture, later marketing the stock in Denver. In less than a year, his Chevy middleweights have averaged about 50,000 miles of this kind of treatment—and they're going stronger than ever!

Watch Chevy trucks at work out in range country. It's a sight to see the way they pack into high-up mountain pastures and handle through brush and rock like a cowman's favorite cutting horse. Take any truck work for that matter. Chevy middleweights probably handle a bigger variety of jobs than any trucks alive. About anything you name, including work that used to be reserved strictly for bigger rigs. When a truck's built the way a Chevy is, lean-muscled and rawhide-tough, it takes to ugly trails the same way most trucks roll over the highway. It just keeps going, without a big to-do, but looking good every mile of the way. How they do it is your Chevrolet-dealer's department. He'll be glad to supply details and specifications on the type of models you need.

No job's too tough for a Chevrolet truck!

GOOD DRIVERS MAY GET LOWER INSURANCE RATES

Motorists with accident-free and conviction-free driving records may get lower car insurance rates if a plan advocated by James M. Hare, Secretary of State, is adopted by Michigan insurance companies.

Hare pointed out, "It is high time that somebody gave the careful, law-abiding driver a break."

At a recent meeting in Lansing 60 representatives of insurance companies met to discuss the possibility of adopting a California plan of giving good drivers reduced car insurance premiums as a reward for operating their vehicles without accidents or moving traffic violations.

The plan could give good drivers a twenty percent rebate on their premiums.

John J. Savage of the National Bureau of Casualty Underwriters told the group that the reaction of the press and public in California was enthusiastic and that the plan tended to make individual motorists cognizant of the

savings advantages of lawful driving.

Savage exhibited California press accounts and editorials bearing such headlines as "A Premium for Prudence", "New Insurance Rates Justly Reward Safe Driving", "Break For Safe Drivers", and "Pays To Be Good".

The good driver rebate plan has many merits, Hare commented. "We will pledge our continuing cooperation to insurance companies and others in Michigan who may wish to adopt the California plan. By working together we may at last be able to give conscientious and careful drivers an extra break for their safe driving habits."

REGULATIONS OF INTEREST TO DEER HUNTERS

A hike in special deer season areas and shooting permits was approved last week when the Conservation Commission acted on Michigan's 1959 hunting regulations.

All special seasons will again run concurrently with the regular buck season except in Allegan county where it will be December 1-6.

Camp deer regulations and regular buck and bow and arrow seasons will remain the same as last year.

Several parties voiced opposition to the "any deer" measures, contending generally that they would jeopardize tourist

trade by reducing deer populations which, according to them, are already at low ebb. Others supported the Department's stand that these measures were biologically sound for the welfare of the state's herd.

Basically, the approved changes include: 1. an increase from 3,600 to 7,200 square miles of "any deer" hunting area in the upper peninsula which is almost blanketed by food shortage areas; 2. a 10 percent increase—10,000 to 11,200 square miles—in special areas of the northern lower peninsula plus an approximate one-third rise in deer kill quotas per square mile; 3. an increase from 88 to 217 square miles for the special area in Allegan county; and 4. an offering of 100,500 special permits. Approximately 55,265 were issued last year.

Some 60,500 permits will be offered in the northern lower peninsula. Based on previous hunter success this will raise special kill there from 19,000 to 31,300. Above the Straits, 35,000 permits will be offered to boost special take to 14,200.

These changes, coupled with regulations covering other deer seasons, are expected to raise the harvest of whitetails in Michigan to 116,600 this fall. This figure represents a 14 percent hike over last year's kill of 101,750.

TEN MILLION DOLLAR HOUGHTON-HANCOCK LIFT BRIDGE

This is an artist's conception of a structure described by the Michigan Highway Department as the world's most unusual bridge currently under construction between Houghton and Hancock on U.S.-41 in the Upper Peninsula. State Highway Commissioner John C. Mackie says the vertical lift center span will weigh 4.5 million pounds and will carry automotive and pedestrian traffic on one level, trains on another. It will raise to a height of 100 feet to allow ships through the Portage Ship Canal, a shortcut through the Keweenaw Peninsula. Completion date is December 15, 1959.

ing season on this bird", Hunt says. "The prairie chicken is now an uncommon bird in Michigan."

This year's crop of blueberries is not a record breaker, but there is plenty and supplies are especially good now. If you plan to freeze or can blueberries, why wait? asks Mrs. Josephine Lawyer, Michigan State University Marketing Agent. If you plan to use blueberries for pie or other cooking, you can pack them without sugar. For fresh fruit desserts, you'll want to pack them with a syrup made by combining 3 cups of sugar with 4 cups of water. Cool the syrup before using.

From now through September you can expect supplies of sweet corn fresh from nearby fields. The rule of a short time from the "garden to the pot" is most important whether you serve corn today, can it, or freeze it, reminds the Michigan State University Marketing Agent. At the store, choose corn from refrigerated counters and pick ears that feel cool to the touch. Rush corn home and into your refrigerator, for it loses flavor quickly at room temperature. For best flavor, use corn the day you buy it.

CRANBROOK TO HOST CARILLONNEURS

Carillon concerts for the public will be presented at Christ Church Cranbrook, Bloomfield Hills, by the Guild of Carillonners of North America, August 23-26.

More than forty carillonners and organists from all over North America will arrive at the church Sunday for their annual Congress, announced Maurice Garabrant, music director at Christ Church. Co-host for the four-day conference is Frederick L. Marriott of Detroit's Central Methodist Church.

Wendell Westcott, carillonneur at Michigan State University, will open the concert series Sunday at 8 p. m.

Two programs are planned for Monday, the first at 3 p. m. At 7:30 p. m. that day a carillon concert will precede an organ recital presented by Mary E. Grenier of Norwalk, Conn.

Tuesday at 8:30 p. m. Marriott will play the carillon. Wednesday's first concert is at 7:30 p. m., and the concluding concert at 8:30 p. m. will be given by Robert Donnell of the Peace Tower, Ottawa, Ontario. Donnell is Dominican Carillonneur of Canada.

Among events scheduled for the group is Tuesday's tour of Detroit, ending with a lakeside supper at Grasse Point Memorial Presbyterian Church and a carillon concert there.

cupido Americanus", says George Hunt, assistant professor of wildlife management at The University of Michigan.

"Actually, they make a booming sound", Hunt says. The males have large, brilliant orange socks on the sides of the neck. They can inflate these at will, and when air is expelled, a sound somewhere between booming and cooing is produced.

"These courting activities, performed by the males in a group, take place in the spring, mostly in the early morning from daybreak until seven. In areas where grouse are abundant, there may be as many as 100 males on half an acre of open grassland, performing for the benefit of a hidden ring of presumably admiring females.

"These booming grounds, as they are called, are sometimes grounds that have been used for many years. Generations of males come back annually for their spring pageant. The females establish the nest somewhere near the courting grounds in weeds and grass.

According to the U-M wildlife expert, "In addition to making these noises, the males strut and spread their tails and carry on a certain amount of just plain bluffing—not really fighting—in establishing the courting territory."

He notes that the prairie chicken reached its peak in numbers in Michigan in the 1920's. It was found in virtually every part of the state. "Depending on local populations in any one year there may or may not be a legal hunt-

GREAT OAKS FROM LITTLE ACORNS GROW

Just as great oak trees grow from little acorns, so do fine, big industrial plants have humble beginnings.

As with that sturdy oak, many things happen before a small plant becomes a large one.

The oak tree depends on favorable soil and weather during its early years. Our town, if it is to have good industrial payrolls, must provide a good climate for industry.

Climate for industry boils down to how present industry is treated. Good climate for industry makes our town grow stronger.

Good industrial climate helps small industry, like good climate helps the oak tree. And it attracts new industry.

**THIN COAT OF WAX
BEST FOR FURNITURE**

Wax gives a fine protective finish to most wood furniture. Jessie Marion, home furnishings specialist at Michigan State University, says there is a knack to applying a good coat of paste wax. She suggests using cheesecloth. Place a small amount of paste wax on several layers of cheesecloth and gather the corners together so the wax is enclosed.

Apply a thin, even film of wax to the furniture. First use a circular motion, then follow the grain of the wood. Friction causes the wax to melt and come through the cloth. A thin film of wax is all you need. A thick layer of wax—or blotches here

and there—are difficult to polish. Allow wax to stand, according to directions. Then polish with a woolen cloth until a hard film is formed.

You may test the job by rubbing your finger over the surface. If you can trace a path in the wax, rub some more. There should be no soft wax on the surface when the job is done. A small electrical buffer is excellent for polishing wax. This gives a much harder finish than you can get by hand rubbing.

Although most furniture is enhanced by a coat of wax, Miss Marion adds that some manufacturers do not recommend the use of wax on their furniture finishes. Check when you buy to be sure.

Forests, Foot Trails and Fun

Two hikers stop for a breather while enjoying a scenic foot through a state forest foot trail in northern Michigan. Foot trails are the latest addition to the Conservation Department's long-range program of multiple use in state forests. Although the program is in its infancy, eight trails have been completed and several others will be opened to public use this summer. In addition to their recreational values, these trails afford an excellent opportunity to acquaint the public with forestry, game management and other wild land uses.

From where I sit... by Joe Marsh

A Real "Novel" Idea

Had a call from Whitey Fisher, head of the Town Library's Emergency Committee. He's asked me to explain the situation. This is the "emergency." The Library's moving into its new building next week—over on Bridge Street. Moving all those books will cost more than \$200. At that rate we won't be able to afford any new books for a couple of years. Whitey's got the solution—have everyone in town borrow at least five books, keep them

a week, and return them to the new address! From where I sit, cooperation among neighbors is the life-blood of a town. People should work together... whether it's to help a library or fight intolerance. For instance, if you'll respect my right to an occasional glass of beer—and I respect the beverage of your choice... that kind of cooperation will do lots to help wipe intolerance "off the books."

This check for \$6,959,679.73 from Michigan Bell Telephone Company soon will be distributed among school districts throughout the state. The money, earmarked for the state primary school fund, represents Michigan Bell's largest single state property tax payment in history. It covers the first half of 1959. Another check for a like amount will be paid next November. Michigan Bell's property tax money is allocated to school districts on the basis of local school census figures.

Too Close for Comfort or... Safety

Although his capers may seem cute to his companions, this "whiz" of the waterways certainly is not impressing these anglers. Such antics not only spoil the fun of others but, more important, they invite accidents. On Michigan's waters as well as its highways, there is no room for hotrodging. When boating or water skiing keep a safe distance from swimmers, fishermen and other boaters. Respect their rights to summer fun. See your boat. Don't lose a life.
