why there's ELECTRIC no kitchen like an KITCHEN

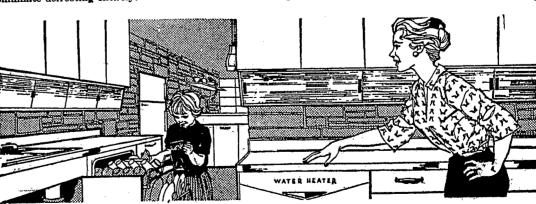

ELECTRIC COOKING IS CLEAN, COOL, QUICK. All the heat goes into the food from direct contact electric elements, none escapes into the air. Super speed units bring liquids to a boil in seconds. You never see blackened pans in an electric kitchen for electric cooking is white-glove cle counter top units and ovens or from many styles of free-standing electric ranges.

ELECTRIC REFRIGERATOR-FREEZERS HAVE BIG CAPACITY. Two wonderful appliances in one! Refrigerator and freezer. The freezer compartment is big enough to hold worthwhile quantities of food. Buy foods at seasonally low prices and safely store them. Save time by preparing foods ahead—make three pies and freeze two. New frost free refrigerator-freezers eliminate defrosting entirely.

COUNTER TOPS DO DOUBLE DUTY with an electric appliance center. Pullout extension cords and extra outlets, all on one central panel, give you Housepower at your fingertips. Simultaneous operation of many counter top appliances-waffle iron, fry pan and coffee maker, for example-is possible without blowing fuses. Automatic timing is another feature. All together, it's just like having extra range capacity.

DOING THE DISHES WAS NEVER SO EASY. The process is simple—toss food scraps into the disposer. They just grind up and wash away, never have to be handled or wrapped. Then slip dishes, glasses, flatware, pots and pans into the dishwasher. Everything comes out sparkling, and much cleaner than you can wash them because most dishwashers use hotter water than your hands can stand.

PLENTY OF HOT WATER where and when you need it. What better place for a water heater than in the kitchen where you use lots of hot water? A tabletop model fits flush with counter top, or it can be placed in a hard-to-use corner of the kitchen cabinets. This is the water heater without flame or flue, so you put it where it's most convenient. The 50-gallon size supplies normal hot water needs of 4 out of 5 families.

From where I sit ... by Joe Marsh

Ever Have That "Sinking" Feeling?

You probably know that "Chip" Wallace was just appointed swimming instructor at the Boys Ciub.

Seems in his first group, he had three youngsters who were hesitant even about the shallow end of the pool. They said "we'd sink." Of course, Chip didn't try to force them -- he demonstrated. He jumped in, popped right up, explained that body buoyancy had pushed him back to the surface.

However one of the oungsters shook his head in disbelief, "Gee," he said, "I suce hope Mr. Buoyancy is still down there when I jump in."

From where I sit, whoever said "experience is the best teacher" was right. For insiance. I think all of us knowthrough experience - how important "tolerance" is between neighbors. In little things too, like my respecting your right to choose a favorite beverageand your respecting my choice of an occasional glass of beer. That way we'll swim not sink -as friends!

NEEDS HELP

Dramatic proof of the need for aid for Chilean earthquake victims is evidenced by this Puerto Montt orphan-his only belongings heaped in a string bag- shown waiting a mercy plane trip to a refugee reception center in Santiago.

Nations throughout the world are responding to appeals for help. President Eisenhower appointed American Red Cross President, General Alfred M. Gruenther, as coordinator of U. S. voluntary relief efforts. Numerous religious and welfare organizations are engaged in the massive relief project. The Red Cross, which is conducting a nationwide fund appeal, made an initial allocation of \$175,000 and provided \$250,000 worth of donated medical and other supplies.
