### **Township Primary Election** Monday, February 20, 1961

ICE

To the Qualified Electors of the Township of Independence (Precinct Nos. 1,2,3), County of Oakland, State of Michigan. Notice is hereby given that in conformity with the "Michigan Election Law," I, the undersigned Clerk, will, upon any day, except Sunday and a legal holiday, the day of any regular or special election or primary election, receive for registration the name of any legal voter in said Township, City or Village not already registered who may APPLY TO ME PERSONALLY for such registration. Provided, however, that I can receive no names for registration during the time intervening between the Thirtieth day before any regular, special or official primary election and the day of such election.

NOTICE IS HEREBY GIVEN THAT I WILL BE AT THE FOLLOWING PLACE ON, Monday to Friday from 9:00 A. M. to 12 Noon, and from 1:00 P. M. to 5:00 P. M. at the Township Hall, 90 N. Main Street, Clarkston, Michigan, and on -

Monday, January 23, 1961 – LAST DAY

The Thirtieth day preceding said Election. As provided by Section 498, Act No. 116, Public Acts of 1954. From 8 o'clock a.m. until 8 o'clock p.m. on said day for the purpose of REVIEWING the REG-ISTRATION and REGISTERING such of the qualified electors in said TOWNSHIP, CITY or Village as SHALL PROPERLY apply therefor.

be entered in the registration book.

## Elector Unable To Make Personal Application, Procedure

SEC. 504. Any elector who is unable to make personal application for registration because of physical disability or absence from the Township, City or Village in which his legal residence is located, may be registered prior to the close of registration before any election or primary election by securing from the Clerk of the Township, City or Village in which is located his legal residence, duplicate registration cards and executing in duplicate the registration affidavit before a notary public or other officer legally authorized to administer oaths and returning such registration cards to the Clerk of the Township, City or Village before the close of office hours on the last day of registration prior to any election or primary election. The notary public or other officer administering the oath shall sign his name on the line for the signature of the registration officer and designate his title.

#### Unregistered Persons Not Entitled To Vote

SEC. 491. The inspectors of election at any election or primary election in this State, or in any District, County, Township, City or Village thereof, shall not receive the vote of any person whose name is not registered in the registration book of the Township, Ward or Precinct in which he offers to vote.

#### Transfer of Registration, Application, Time

SEC. 506. Any registered elector may upon change of residence within the Township, City or Village cause his registration to be transferred to his new address by sending to the Clerk a signed request, stating his present address, the date he moved thereto, and the address from which he was last registered, or by applying in person for a transfer. The Clerk shall strike through the last address ward and precinct number and record the new address, ward and precinct number on the original and duplicate registration cards, and shall place the original registration card in proper precinct file Such transfers shall not be made within the (30) days next preceding any election or primary election, (unless such 30th day shall fall on a Saturday, Sunday, or legal holiday in which event registration transfer shall be accepted during the next full working day), provided that no such transfer shall permit any person to vote in any Township, City or Village in which he had not resided (30) days next preceding any election or primary election.

#### Transfer Of Registration On Election Day

SEC. 507. Any registered elector who has removed from one election precinct of a Township, City or Village to another election precinct of the same Township, City or Village shall have the right to make application to have his registration transferred on any election or primary election day by executing a request over his or her signature for such transfer and presenting the same to the election board in the precinct in which he is registered. Upon receiving such request the inspector of election in charge of the registration records shall compare the signature thereon with the signature upon the applicant's registration record and if the signatures correspond then the inspector shall certify such fact upon said request and the applicant for transfer shall then be permitted to vote in such precinct for that election only. The application for transfer shall be filed with the Township, City or Village Clerk who shall transfer such electors registration in accordance with the application. When the name of any street in a Township, City or Village has been changed, it shall be the duty of the Township, City or Village Clerk to make the change to show the proper name of street in the registration records, and it shall not be necessary for the elector to change his registration with respect thereto in order to be eligible to vote.

## **QUESTIONS & ANSWERS ABOUT** BUILT-IN ELECTRIC HFAT

Electric heat is an advanced and superior concept of home comfort. Here are some of the questions we've been asked about it.

built in, there is little interference with

or on walls. in any length.

Forced air units can go Heating cable is buried in coiling plaster. in walls or partitions.

IS IT SAFE?

It's as safe and troublefree as electric light. Electric heat devices work very much like your toaster does. However, most of them operate at relatively low temperatureswithout glowing wires.

In June 1959, Detroit Edison added a new. lower step to the residential electric rate.

Now, kilowatt-hours of electricity over 750 per month cost 2¢ each, gross, instead of 21/4¢-an 11 percent reduction.

#### DOES IT NEED MUCH SERVICING?

No. There are no moving parts in the electric heating systems discussed here except in the forced air units where fans or blowers are used. Fans are not high velocity, so they are long lasting also. An added advantage of electric heat, depending upon the type, is its completely silent, or very quiet, operation.

#### WHAT MAKES ELECTRIC HEAT BETTER?

FLEXIBILITY-Each room has its own thermostat. So each remains at the temperature you choose without affecting other areas. Temperatures can be raised or lowered in any room without overheating or chilling the rest of the house. Just a touch on the proper thermostat does it.

SPEED-When a thermostat is adjusted to call for more heat, the response is fast! In the systems described here, the heat source is right in each unit-only inches away instead of many feet.

EVEN HEAT-There will be temperature difference between floor and ceiling. And, wherever possible, electric heat (except ceiling cable, of course) is installed in outside walls. Then there is a curtain of warm air between the cool wall and window surfaces and room occupants. This fends off chilling drafts.

Ann Huffman and Larry Black-A three minute overtime period Who Ya Gonna Yell For? Junior and Senior high school ett, Joan Mansfield and Denny was called for and Clarkston students. studying. HOW TO DO IT by Karen King

The English classes in Mrs. Wiseman's sections heard demonstration speeches all last week The demonstrations were very

interesting. Several were exceptionally interesting. Sue Hampshire gave a speech on ceramics. She showed the tools, paints, and brushes used. The students enjoyed her re-

port very much. A shot gun was taken apart and cleaned by Jim Ferguson and Vernon Vargo.

How to make a flashlight was demonstrated by Cynthia Hagemeister. She used one battery, Buddy Bruckman explained low to play hockey.

Golf was demonstrated by Ricky Wilson and Jerry Weid. Roberta Fortino gave her dem-

onstration on leathercraft. She howed how to carve and paint the picture in the leather and how to sew on beads.

#### GEOMETRICAL FIGURES

by Linda Foote Mrs. Shelton's eighth garde classes made geometrical figures teams played during half time from wood and cardboard. He selected the best from each class.

OPINION COLUMN

by Joyce Haiser **Rita Curtis** We thought it would be fun

this week to ask the boys and girls their opinion on what they thought of going steady. Here are

some replies we received: Carol Cinader: I don't think it's right to go steady when you're just fooling around but

go point man on the Globe Trotters steady? You have got plenty of

Shelby Boyce: I think its' OK if your not doing it because everybody else is.

Linda Walters: I think its nice. Butch Kirby: It's for the birds.

IS IT EFFICIENT? The heat produced by electric systems is usable heat; practically none of it is wasted within the heating equipment itself. Electric heat is just about as close to 100 percent efficiency as it's humanly possible to get. IS IT EXPENSIVE TO INSTALL? In general, the original cost of an electric heating system is less than that of any other type of quality equipment. Actual installed cost will vary according to type of heating unit used, home size, method of home construction and additional insulation requirements. A good time to install electric heat is when building a new home. But it's also very economical to install it when home alterations or additions are being made. Wiring is no problem. It's figured as part of the job. CAN I PUT IT IN JUST ONE ROOM? Yes, and economically, too, as indicated above. Typical examples: when you're adding a new room, finishing an upstairs, closing in a porch or breezeway. Electric heat is especially valuable when the new living space is a long way from the central heating system, or when the central system is already working to capacity. Another good time to use electric heat is when you have a hard-to-heat area. CAN I PUT IT IN THE WHOLE HOUSE? Yes, you can switch the whole house over to electric heat. In this case, additional insulation will be required, plus storm sash and storm doors all around. For greatest heating economy and summer comfort, regardless of type of heating system, good insulation pays off. Industryestablished standards for this area for insulation thickness is not less than 6" overhead; 3%" in outside walls; 2" alongside and partially under concrete floor slabs. Floors above basements also need insulation. WHAT DOES IT COST TO USE ELECTRIC HEAT? Various factors, including family living habits, affect operating cost, so a hard-and-fast answer is impossible. A rough rule of thumb is 256-28¢ per square foot of heated space, annually. But there's little need to guess. An electric heating contractor can calculate actual first cost and operating cost quickly and accurately. Electric heat will cost more. But the cost will probably not be as high as one would imagine. Like any quality product, you pay more for electric heat but you get more benefits!

CLEANLINESS-Nothing is burned to make smoke, soot or fumes. Air currents will carry only whatever dust may have been introduced by other means. Nor are large quantities of outside, potentially dusty air drawn into the house to support combustion. Result: walls, draperies, furniture and floor coverings stay clean longer.

#### ARE THERE OTHER TYPES OF ELECTRIC HEAT?

Yes, the flexibility of electric heat makes it applicable to many basic systems. For example, there are electric warm air and wet heat systems.

#### WHERE CAN I SEE ELECTRIC HEAT?

And a feature of every Gold Medallion Home is its electric heating system. Watch for announcements of Gold Medallion Home openings.

#### WHERE CAN I GET MORE INFORMATION?

The contractor who displays the emblem has had special training which enables him to estimate your heating needs accurately. He has also pledged himself to meet industry standards of installation.
