A SIGNIFICANT MILESTONE IN FREE ENTERPRISE was reached recently when Mr. and Mrs. Hugh T. Polson of Wichita, Kan., together became the 2,000,000th AT&T share owner.

Thus, the Bell System becomes the first privately owned business in history to be owned by so many people-people from all walks of life. This is a prime example of people's capitalism in action—a dramatic testimonial to the American economic systemdemocracy in action. Incidentally, just 10 years ago Mr. and Mrs. Brady Denton of Saginaw jointly became the 1,000,000th AT&T share owner.

WHEREVER YOU ARE this summer, chances are you'll be near a public telephone whether it's an indoor booth or the familiar outdoor booth, or the handy new Walk-Up or Drive-Up variety. Any one of them-and there are more than 45,000 in Michigan-is your "phone away from home."

PRODUCING A RABBIT out of a hat is a startling feat of magic-much like the "magic" produced by Bell System scientists. A good example is a new way to increase the capacity of transatlantic

cables. The equipment seeks out the pauses which are a part of every telephone conversation and uses them for extra calls. This remarkable achievement doubles the capacity of underseas cables. It's this kind of ingenuity that helps keep your phone costs low while providing you with ever-improving service.

## MICHIGAN IS AGRICULTURE

Michigan is rich in food stuffs. In fact, no state is richer and this is another reason Michigan ranks high in industrial opportunities.

By the variety and volume of its agricultural production, Michigan fills the family table and the pantry shelves more completely than any other state. Michigan is among the first 10 states in 30 agricultural commodities, and of course stands first in several of these.

Michigan is a rapidly advancing leader in food research — an ideal location for the research laboratories of nearly all food processors.

Where foods are produced, foods are processed. Michigan has many food processing industries and offers opportunities for many more.

A state which is built on such a sturdy and steady agricultural foundation is a good place in which to live and work and do business. That's Michigan.

Help carry Michigan's message to the nation. Clip this ad and mail it to someone in another state with your own comment. Let's talk up Michigan and its advantages for industry. Together, we can assure a greater future for all of us.
