In the former case, the observer will only look and laugh; in the latter, he will shun any thought of it as if no creature really existed at all. C.S. Early American Maple hard-to-find, high-styled accent pieces

all solid maple and at very modest prices This is the sort of furniture that is usually hunted down, piece-by-piece in those expensive little out-of-the-way shops. They're conversation pieces that take a room out of the or-

dinary-give it a finished look . . . the decorative gems found in low-ceilinged places with sky high prices. We've collected a number of beautiful examples, many more than we pictured here. All are of solid maple with a lovely, soft, Fireside finish. All are carefully detailed and superbly constructed. All are at very special prices. Come see.

The Russian children aged seven and up go to school six days a week. This movie was very interesting.

"Our Legs Don't Get Cold Anymore!"

"With electric heat, there are no drafts or cold spots-even the floors are nice and warm," says Mrs. William Albert of Nankin Township, Michigan. "We saved \$300 on installation when we converted from the old system. Electric heat saved us space, too-now we have an extra closet where our chimney used to be. There's nothing to worry about or take care of. My draperies stay a whole lot cleaner. For all the electric appliances we have-range, water heater, clothes dryer, air conditioner-we think our \$35 per month electric bill is a real bargain. Believe me, once you have electric heat, you won't want anything else."

What about your home? Do you have a hard-to-heat room? Are you adding on a room? Are you buying a new home? Is the heating system in your present home more trouble than it's worth? One of the types of electric heating units shown below may be the answer to your heating problems. One easy way to find out is to ask your electrical contractor. Another is to call your Edison office. We'll be glad to send you a copy of our free booklet "Electric Home Heating" and will answer any questions you may have about the modern, worry-free way to heat your home-electrically.
