Will the young swimmers who have been moving the Jayoee marker barrels on Deer Lake be satisfied when someone drowns because of their pranks? Moving the barrels out beyond the treacherous dropoiff that has claimed so many lives can't really be classified as kid stuff. One would have to have a pretty twisted mind to carry out this sort of prank.

I am sure the parents of the children whose lives you are endangering would not look lightly on this situation should one of their loved ones drown due to lack of knowledge as to where the dropoff is located. If there is another drowning this year, as there has been for lithe past 7 years, you might well be to blame.

The Clarkston Junior Chamber of Commerce has gone to a lot of expense and put a lot of man hours into making Deer Lake a safe

place to swim. This year they installed 13 buoys to mark off the swimming area as required by law. Already have been damaged. The barrels were then placed so as to keep swimmers from the drop-off. These have been moved. The emergency telephone has again been installed and undoubtedly will suffer some sort of abuse.

During a recent Independence Township Board meeting residents of Waldon Road who were in attendance were assured by Supervisor Hurshall that Waldon Road will be pavied to Sashabaw Rd. wiithin the next year and a half. Mir. Hursfall pointed out that because Waldon was a secondary road, paving expenses must be half paid for by the Township and the other half by the County Road Commission.

To pave Waldon Road the Township must appropriate \$40,000. Of this amount they have already squeezed \$30,000 out of the budget with \$10,000 yet to go. According to Mr. Hursfall the road should be paved by the fall of 1965.

seen in a long time. Following a Conference on Economic Opportunity in Marquette, I took part in two dedication ceremonies, one for a chapel in Marquette Prison and the other for a school for retarded children in Escanaba. Both were excellent examples of community pride and achievement.

The John W. Rice Chapel, built to serve the inmates of Marquette Prison, was named in honor of a man who had a warm and friendly concern for all with whom he came

Jack Rice published a newspaper at Houghton. He loved the Upper Peninsula and the resourcefulness of the people who live there. Long interested in prison rehabilitation and retraining programs, Mr. Rice served continuously on the Michigan Corrections Commission from its establishment in 1953 until his death this year. He was widely known and respected.

He believed in his fellow men and believed that every opportunity should be given to prisoners to straighten themselves out and to once again take their rightful place in society as conscientious

citizens. His methods were sincere and motivated by a deep sense of understanding and trust.

The chapel erected in his honor is a fitting memorial to a man who gave unstintingly of his time and efforts to live.

The dedication in Escanaba was for the new John F. Kennedy School for Retarded Children. This new school resulted from a thrilling citizen campaign, headed by the "Project Prile" Committee, to meet a growing community need and to serve nearby communities

The "Project Pride" Committee is comprised of public-spirited men the building construction field in Escanaba. Contractors, architeets, organized labor and trade unions are all represented on this committee.

The Committee raised the money contributed labor and materials and planned and supervisel the construction of this school. The people of the community gave donations and contributions to help fimance the school. The result was this new building, a community-inspired and completely communityfinancel project, an outstanding tribute to individual persosal initia-

A ecment truck invaded the waters of Loon Lake last Friday afternoon causing curious spectators to park along Dixie Highway and move in for a closer look.

According to Dick Gavette, superintendent of Beice Builders Supply in Pontiac, the truck was unloading concrete when one of the wheel blocks broke, causing the truck to back into the lake.

Although there were no injuries, it took six hours to remove the timek from the water.
