A review of the district's current financial position snows that the school district can float a bond issue in the amount of \$3,000,000 without changing the present debt tax levy. This year, the school district spread a tax of \$11.00 per thousand of state equalized valuation. The district can absorb the additional \$3,000,000 bonded in debtednes: without an increase in taxes because of increa ed vatuation and decreased bonded indebtedness since the passing of the last bond issue in 1958.

Immediate construction of additional elementary facilities and additions to the Senior High School must be begun if children are to be retained in school full time and educated in the manner in which the Clarkston School District public wants and expects.

Gift Suggestions for Wental Patients

duals contact the nearly 3,000 bed Pontiac State Hospital regarding Christmas gifts for the patients.

Donald W. Martin, medical superintendent of the state hospital believes that the patients needs can best be met through the issuance of a suggested Christmas gift list.

Dr. Martin said "The needs for mentally ill patients do require adherence to a few rules in the best interest of the patient's safety and comfort. The traditional suggested Christmas gift list seems to be the best possible plan whereby the public can most adequately decide what is needed and what they can provide".

It was felt by Dr. Martin that all Christmas donations should be new, because of the therapeutic effect it would have on patients who quickly realize that their presents are of a personalized nature and not just used "hand-me-down"

All donations should be mailed or brought to Ted Panaretos, director of community relations department, Pontiac State Hospitar, Pontiac, Michigan. Futher information may be obtained by calling FEderal 5-8146 and ask for the community relations department.

Panaretos said it would be appreciated if presents were sent unwrapped, accompanied by gift paper and ribbon, in order that employees and volunteers may personalize each item for the individual patients' needs. "
