EVERYTHING FINE AT GOLF TOURNEY

Sunday's Event Participated In by Forty-three Players

The community golf tournament held on the Thendara course at Walters Lake last Sunday was carried out exactly according to the plans as announced in the News last week. This means that it was a big success, with much enthusiasm manifested and a spirit of good sportsmanship prevailing throughout.

Forty-three players were entered in the tournament and they were well matched as proven by the fact that there was but a difference of 70 strokes in the total scores of the two sides. One team was captained by Lew Chamberlain and the other by Roy Alger, the latter winning.

Vin Van Denny was low score with 93 for 18 holes, and won the dozen golf balls offered by W. D. Stearns.

A large gallery followed the players over the course. The weather was threatening in the morning and a slight shower came during the play, but it soon cleared, cool weather prevailed and it was just fine for golfing.

Following the tournament the players sat down to a fine dinner served in the club house at the expense of the losing side.

No business depression is apparent with the Clarkston Bakery, judging from the fact that they have just purchased and put into service a new International truck for delivery work. The machine is much finer and larger than the one it replaces. The Bakery has also improved their salesroom by putting in a glass enclosed window for the sanitary display of their products.

D. P. POSTOFFICE IS NOW RATED AS THIRD CLASS

The Drayton Plains postoffice has been advanced from fourth to third class, and is now privileged to issue international money orders to all parts of the world. The increased business of the office brought about the advance and W. E. Oakes, the postmaster, in order to accommodate the patrons better, has closed out the grocery stock that formerly occupied part of the building. The coal office alone remains in addition to the post-office.

Mr. Oakes entertains the hope that he will soon be given rural routes out of Drayton Plains. At present all routes covering the Drayton Plains area go out of Pontiac, and at least one serves no one outside of the Drayton Plains community.

LARGE CROWD OUT AT SCHOOL MEET'G

Attendance Was About Three Times as Big as Usual

With an attendance of 119, as recorded in the voting, as against about 40 in previous years, the annual school meeting held at the old school house on Monday evening evidenced the increased interest the people of Clarkston are taking in school matters since the building of the new school house was authorized.

There was a somewhat spirited contest in the election of a member of the school board to succeed Lee R. McFarland, whose term had expired, but no acrimony developed. Everything went off smoothly and harmoniously, which augurs well for a successful school year.

The 119 votes cast for school trustee were divided as follows: Lee R. McFarland, 65. Dr. C. J. Sutherland, 50. Louis F. Walter, 4.

Mr. McFarland again enters upon a term of three years. He is now president of the board, but a new organization will be effected at a meeting of the board to be held some time next week.

The question of continuing the health service given by the Oakland County Board of Health for another year was discussed at the meeting, and it was voted to continue it another year.

Yesterday a number of the Clarkston brethren visited the Holly Valley Country Club course near Holly with a view of selecting it as the scene of the coming encounter. The choice of the course is with Cedar Lodge this time.

It is understood that Holly Lodge is considering challenging the winner of the series between Clarkston and Commerce.

NEW SCHOOL BOARD HAS FIVE MEMBERS

Change in Waterford District Necessitated the Increase

The Waterford school district having been advanced from the primary to graded class, it was necessary at the annual school meeting held on Monday night to elect an entire new board of education of five members, instead of one of three members.

Percy King was chosen for one year; Lewis Washburn and Edwin Campbell for two years, and Kenneth McVittie and August Jacober for three years. Messrs. McVittie and Jacober were members of the retiring board. H. B. Mehlberg, the other member, goes out after serving the district as director for the past nine years.

Evidence of the great growth of this community is contained in the announcement that the school census of the district now numbers 218, while six years ago it was only 65. In 1927 a four-room addition was built to the school house, and the teaching staff now totals six, an increase of four since 1924.

A new superintendent has been engaged for next year. He is R. C. Lunger, for the past 13 years head of the Utica schools. His assistants will be Mrs. Kenneth McVittie, English and Latin; Mrs. R. C. Lunger, 6th and 7th grades; Miss Marieta Heins, of Battle Creek, 4th and 5th grades; Mrs. Norman Smith, of Pontiac, 2nd and 3rd grades, and Mrs. Baker, of Pontiac, primary. Mrs. Lunger and Mrs. Baker are new members of the staff.

DRAYTON CHOOSES SCHOOL TRUSTEES

Two New Members Elected on Plains Board of Education

The Drayton Plains school is but a ten-grade school.

In the election of new trustees to succeed E. W. Giers and Joseph Hanggee, whose terms had expired, there were six candidates, the two retiring members of the board, George Richardson, Stewart Kudner, William F. Monroe and Mrs. Bertha O'Dey. Mr. Richardson and Mr. Kudner were chosen.

The new board of education will meet next week and elect officers. Should the school enrollment in September equal or exceed last year's, the board will be confronted with the problem of finding additional accommodations.

CANDIDATE FOR CORONER

(Political Announcement)

"More at this time than ever before the office of coroner of Oakland County demands a man of experience and ability. The growth of the county's population combined with unsettled business conditions has led to troublesome times, and necessitates a coroner equipped for an efficient and thorough administration of the office.

"It is with recognition of this situation that I again present myself for nomination of coroner in the primary elections September 9. I believe the voters of Oakland County should be sure the office is placed in safe and experienced hands, and in the care of one who cooperates with physicians and undertakers of the county.

ORA C. FARMER

"My record for the past two years has been one of thoroughness and efficiency. I have held it my constant policy to see that justice is done, that every care is exercised in the safe-keeping of the property and valuables of a tragedy victim until they may be transferred to his immediate relatives. In carrying out the duties of my office I have at all times been fair and have held the interests of my electors foremost.

"By reaffirming their confidence in me in the September primaries, the people of Oakland County will but be following in the footsteps of other leading counties and cities in the state. A clean and efficient record in office is a much higher recommendation than the promises of an uncertain candidate.

"The office of coroner is an important one, and only an experienced person can accomplish the careful and painstaking investigation necessary to it. He is the attorney of the victims of tragedy who can no longer speak for themselves. Out of chaos the coroner must, with patience, intelligence and tact, draw the essential facts."

Coroner Farmer is a member of a pioneer family of Oakland County. He was born in West Bloomfield township and has been in business in the county for 33 years.

"Medicine Woman" Still Has Faith of Mexicans

More curious types, echoes out of the long past, exist in Mexico than in any other country in Latin America. One of these is the "medicine woman" who, more than four centuries ago, was an institution through the land and since then all have continued to depend on her to fight disease, real or imaginary. But the medicine woman has ever been more than a vendor of medicinal herbs. She was and still is believed to possess the power of witchcraft and this power she gives to certain of the herbs she offers for sale. She is, therefore, a strange and potentially important personage in the lives of the masses of ignorant Mexican Indians and peasants and not infrequently she is held in respect by middle class families. The medicine woman is still an institution from one end of Mexico to the other, and where the native Indian languages are still spoken, approximately 30 per cent of Mexico, she has lost little if any of her pre-conquest prestige.

No Two Are Alike

In the Book of Job are words which forecast the discovery made so many centuries later that the finger prints of not two people in the world are alike. The words are in chapter 38: "He sealeth up the hand of every man, that all men may know his Work." The text was quoted by a Scotland Yard official at an inquest at Portsmouth on the body of a man whose name and business had been unknown till prints of his fingers were sent to the finger print department in London. There they were identified, and the man's name and dwelling were made known. In 30 years 300,000 persons have thus been traced.

Fish Anyhow

At the regular convocation of the high school, Mr. —, the principal, introduced to the assembly the winners of the district Latin contest. In his remarks, he called them "the Latin sharks" of — high school.

Several days later in one of the roll rooms, the teacher and her pupils casually mentioned a certain girl, who was one of the Latin winners.

"Oh yes," said George, "I know her. She's one of those Latin whales."

"You don't mean whales," said a pupil. "You mean sharks."

"Well, anyhow, it's some kind of a big fish," answered George.—Indianapolis News.

Dogwood Blossoms

The vagrant wild apples that fill our country Mays with bloom are English born and came before the quota laws with the daisy, the buttercup, the dandelion and the lilac, of which two famous American poems have been made. But the best of May is native, a shrub that knows the unties, a modest tree that seeks the light and screens the inner woodlands with ordered clusters of leafy candelabra from the oak branch to the meadow turf. In May in four pointed flame from green to white to tip of rose, its flowery candles are lit, and not even the rhododendron clusters hung over Allegheny torrents excel the lucid blossoms of the dogwood.—Henry Seidel Canby, in "American Estimates."

SPRING WORKERS FORM GLEE CLUB

New Organization Is Under the Direction of Edward Hides

A chorus of fifteen of the male employees of the American Spring & Manufacturing Corp., under the leadership of Edward Hides, has been practicing for several weeks. It has been christened the "Larry Limber Glee Club".

The club made its first public appearance Thursday evening, July 10, at Taylor Lake, on the invitation of Mr. Canfield, and presented four of the new numbers upon which it has been working. A picnic dinner was arranged and Mr. and Mrs. Hartz, Mr. and Mrs. J. A. Cox and the wives of the singers were invited as guests of the evening.

Several of the younger ladies of the group enjoyed a swim in the lake early in the evening and everyone present voted the entire affair a success and voiced the sentiments that the Larry Limber Glee Club has a brilliant future as a singing organization and also that Mr. and Mrs. Canfield are ideal hosts.

The club has an invitation to sing some evening in the near future at School Lot Lake. Watch for the date when it will broadcast across Simonson Lake.—Holly Advertiser.

CANDIDATE FOR CORONER

(Political Announcement)

Establishment of an Oakland County morgue, thus eliminating the office of county coroner as a possible source of embarrassment in the selection of an undertaker, is the promise of G. Dewey Kimball, of Birmingham, who, this week announces his candidacy on the Republican ticket at the September 9 primary election. Mr. Kimball, for 23 years a resident of Oakland County, is a funeral director in Birmingham.

"I have found that, in certain cases, the survivors of some person fatally injured are met with embarrassment when they select a funeral director to

G. DEWEY KIMBALL

officiate for a loved one, and I propose to remove the source of this embarrassment by instituting a morgue", stated Mr. Kimball, who, incidentally, is 32 years of age, and married.

Mr. Kimball's plan would place the county morgue outside of a funeral director's own establishment, he states.

He is a member of the American Legion, Veterans of the World War, Masons, Knights of Pythias and Lions club.

Many and Varied Tricks Known to Fur Traders

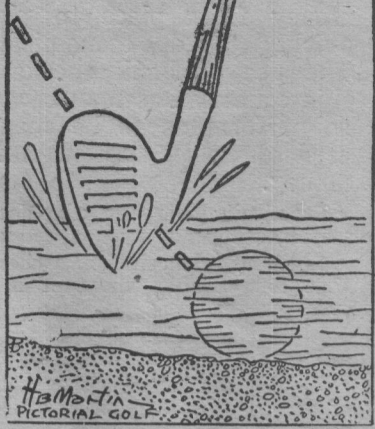

Unlike the American fur crop, the greatest part of which is taken off ordinary farms, Canada's fur harvest—apart from that of the fur ranches—is still gathered at the cost of hardship and life from the great open spaces and thickly wooded forests. And it is here, strictly speaking, that romance is forever lurking around the corner.

The first collecting of these skins—when the ambitious trader pushes as far into the wilderness as he dares, for instance—in order to meet the outcoming Indian family, usually develops into a battle of wits and words. And the buyer, in many cases, must get up mighty early in the morning if he hopes to circumvent the breed's cunning and trickery. Many a pale, fifteen dollar marten is transformed into a dark, fifty dollar skin by the skillful application of a little balsam smoke. More than one black housecat finds its way amongst the hundred dollar fishers, while mink and lynx skins having damaged flanks and shoulders are conveniently turned with the fur inside and the leather side out.

PICTORIAL GOLF INSTRUCTION

By H. B. Martin

PLAY A BALL IN THE WATER AS YOU WOULD IN A SAND TRAP. WATER WILL NOT OFFER THE RESISTANCE ONE MIGHT EXPECT

Blast Ball From Water as in Sand Trap

MOST golfers believe that something unusual must be done when the ball is to be played out of water. In reality it is just about the same as the shot out of a sand trap. There is a limit, of course, to the depth of the water in playing from a pond or a stream. It is quite easy to get the ball out of the water if it is not more than six inches in.

Permit the club to come straight down and do not check the blow until it has picked out the ball. Some times there is difficulty in obtaining a stance. One must make sure of his footing before attempting the shot.

(Copyright.)

Follow Through Most Important in Putting

THE scientific putter who is always the successful putter is never guilty of lifting the putter and dropping it on the ball. Neither does he draw the club back further than is absolutely necessary.

The stroke is firm and well in hand all the time. One thing that is absolutely necessary is to follow through. One professional expressed it just right when he said permit the club in putting, to escort the ball. This means, of course, to let the club continue on in the line to the hole which should make sure of certain direction.

The hands alone will be sufficient to make the stroke on all short putts. It is only when we must travel across the green that the arms might be needed.

KEEP THE HEAD DOWN UNTIL THE BALL IS WELL ON ITS WAY IN PLAYING A MASHIE SHOT

Keep the Head Down in All Iron Shots

GOLFERS are constantly being warned about keeping the eye on the ball. This really means keeping the head down. It is very necessary to see that the head does not bob up while playing a mashie shot, as the club only takes a short sweep, and there is little chance of the club picking up the ball and carrying it along, as is the case sometimes with the driver or the brassie.

Lift the head, but do it gradually, not in one jerk as if looking to see where the ball is going to drop. Hold the head down till the club has come well around and you will have success with all your irons.

DRAIN COMMISSIONER

(Political Announcement)

Formal announcement by Arthur W. Spencer, county drain commissioner, that he will be a candidate for reelection this fall was made by Mr. Spencer today.

The county drain commissioner is a resident of Rochester and has made his home in Oakland County practically all of his life. Under his supervision during the past six years more than 55 miles of drains have been built in the county, some of them the largest in the state.

During the past year Mr. Spencer has been president of the State Association of County Drain Commissioners and as head of the association's legislative committee practically wrote the revised drain laws as adopted by the Legislature in 1929.

ARTHUR W. SPENCER

In announcing his candidacy for reelection Mr. Spencer points to his record in office and maintains that a policy of economy has been followed in all drain work. During the past year, and even before the period of industrial depression, the drain commission office had adopted a policy of constructing only drains that were immediately essential. Upon his recommendation the state association had followed a similar policy and deferred construction of drains which can wait until property owners are better able to pay for them.

Light Colors for Summer Footwear

Brown Is to Lead for Fall; Five Tones Have Been Placed on List.

Putting her best foot forward correctly shod is no small matter. It takes six months and some 2,000 votes from those in the know to complete the job. Twice a year a joint style conference of all the shoe and leather manufacturers, and many retailers, is held to determine colors, styles, height of heels, shapes of toes and vamps, materials and types of shoes for the season six months ahead. No sooner is this over than shoe men start to get ready for the shoes milady will wear a year hence. The style conference is held in October to determine what footwear will be worn for spring and summer, and in April to determine the same for fall and winter.

After a day in conference with leading stylists from fabric, hat, hosiery manufacturers, frock, suit and coat designers, leading fashion publications, the findings are compiled and brought before the assembled 2,000 for further discussion and vote. Colors are prepared prior to this as the leathers for the season six months ahead are on exhibition. Brown will go on leading shoe colors for fall. Five tones have been selected. They are dark prado, almora, acajou, true brown and taupe. Dark green, wine red and true navy complete the list, with, of course, black, which is not considered a color. However, black is even more important than it has been. The black kid

shoe is essential to the black costume, but it may also be advantageously worn with almost any color. It is now smart to have accessories match each other but contrast with the costume, and all the colors have been selected with this end in view. The browns are toned to harmonize with many of the fall fabric colors. Brown is smart with certain tones of green, with aquamarine, pink and beige, and will be smart with the deeper tones of fall. Brown kid trimmed with contrasting or self-dyed lizard, or a contrasting shade of kidskin, in pump, strap, oxford or step-in model is quite in the limelight, and brown has its influence on the white kid shoe in that the majority of white shoes seen at Palm Beach were trimmed with brown, and worn with all the soft pastels and prints of the season. Beige clair and suntan beige were also most frequently trimmed with brown, when trimmed with contrasting kid.

The introduction of contrast in dark hat, gloves and shoes with the lighter color of the costume has much to do with the colors planned for fall. It is a trend, and fashion is ever built on trends, provided, of course, the trend is accepted by the well-dressed woman. Naturally as summer rolls around, shoes lighten in color. The light beige and white kid models are particularly strong.

White kid shoes with black trimmings are smart with the town suit of black with white blouse and lingerie touches, and black and white, or white and black hat. In the trimmed white kid shoe, those with brown, rank first, those with black, second, and those with blue, third. The all-white kid shoe, or in combination with white lizard, will still have its place in the sun, for wear with frocks and bright-colored jackets, and with many of the pastels.

Ever Popular

It seems as if the popularity of the beret would never end and now it comes in straw carefully fitted to individual heads. One very charming model has a bow placed over the left ear. It is made of milan straw, very soft and supple.

Two-Tone Bands

Fine felts for sports hats and fine straws for town have a way now of using two colors for banding themselves. Black and pink, brown and green, black and white and navy and gray are some of the popular combinations.

Mystery Solved

A customer once entered a New York bookstore and asked for "The Red Yacht."

The clerk looked puzzled. He had never heard of the title and asked what the book was about.

"It's poetry, and recommends you to burn up your old clothes in the spring."

"A little thought; and the line—"In the fires of spring your winter garments of repentance fling."

Yes, it was "The Rubaiyat."—Literary Digest.

STATE REPRESENTATIVE

(Political Announcement)

Editor: Having filed nominating petitions which qualify me to become a candidate for the office of State Representative, second district, on the Republican ticket at the primary election to be held Sept. 9, 1930, I wish to announce my candidacy on the following platform:

While the necessities of an industrial state call for the expenditure of large sums of money, yet the present financial condition of our people, particularly the farming section, small home owner and lot owner, demands that state officials in all departments of our government should insist upon not only rigid economy but the pruning out and lopping off of unnecessary offices and officers.

I believe that the assessed valuation of our county as set by the State Tax Commission is beyond all justice and reason when compared with the valuation of the same class of property in Wayne and Kent Counties; and while I have done and will do all in my power to correct this injustice, I am of the opinion that the quickest way to get relief is for us all to pull together and get an Oakland County man on the State Tax Commission or the State Administrative Board.

PHILEMON J. MILLER

I believe that our State Board of Equalization is a farce and that their meetings are a waste of time, that Hon. Herbert Powell (for whom I have the highest respect) has no legal authority to sit on said board, and that the membership of said board should consist of a member from each congressional district; all this I have already pointed out to the State Tax Inquiry Commission and trust that they will recommend legislation to our next legislature to take care of this matter as suggested by me.

I feel that to spend the money of the people on any basis other than one would spend one's own individual money is little, if any, short of treason.

The matter of transportation has become one of the great problems of our state. I believe the future of our state is very largely dependent upon the successful, intelligent extension of our highway system. But here as

elsewhere unless we are watchful enthusiasm will carry us beyond the limits of honest economy. I have particularly in mind the so-called Covert Road Act.

I am fully conversant with the work of the legislature based on a long period of service in that body, as a boy I served as a page in the House of Representatives, later I served as a sergeant-at-arms in the Senate and I am now serving my third term as a state representative.

The Handy Man of Business

THE BANK CHECK is truly the "handy man" of the business world. It transports money from place to place quickly and economically. The use of bank checks in this country has now become so uniform as to be considered almost a substitute for money.

Practically everyone who does not have merely a hand-to-mouth existence depends upon a checking account because:

- 1.—Money deposited in a checking account is safe and at the same time is available whenever needed by simply writing a check or order on the bank.
- 2.—Each check stub offers a convenient method of keeping a record of expenditures, deposits and balance in the bank.
- 3.—Payment by check avoids misunderstandings in the settlement of accounts because, when cancelled, it is complete evidence of payment.
- 4.—When properly used the checking account is an indication of business standing.

ROAD COMMISSIONER

(Political Announcement)

Petitions for Luther D. Allen, Republican candidate to succeed himself as member of the Oakland County Road Commission, were filed with the county clerk Wednesday afternoon. Names on the petitions included citizens from every section of the County, suggesting the universal support of the people toward Mr. Allen's candidacy, as well as placing the stamp of approval upon his six years of effort to administer the duties of his office.

Mr. Allen was elected a member of the Road Commission six years ago; for the last two years he has been chairman of that body. Prior to his entering the Road Commission, he was Supervisor of Bloomfield Township for five years, and was chairman of the Oakland County Board of Supervisors. He is 62 years old, and lives on East Long Lake road, Bloomfield Hills Village, the same road that his parents lived on when he was born.

When Mr. Allen was elected a member of the Road Commission six years ago, Oakland County had 136 miles of hard surface roads, and now has 369 miles; in spite of the fact, too, that a number of former gravel roads have been hard surfaced since then, there are 15 miles more of gravel roads today than six years ago, a total of 370 miles of this type of road surface.

Mr. Allen is a member of the First Methodist Episcopal church in Pontiac, a director in the First National Bank of Pontiac, and Birmingham Savings Bank, of Birmingham. Prior to his acceptance of the nomination of Bloomfield Township Supervisor 11 years ago, Mr. Allen had spent many years as a successful farmer on the lands where he was born.
