CLARKSTON, MICH., JAN. 30, 1931

**CLARKSTON**

Mr. and Mrs. Cramer Judd spent the week-end in Detroit.

Mr. and Mrs. Ward Sly and children, of Pontiac, spent Sunday with Mrs. Ada Mills.

Mr. and Mrs. Floyd Talmadge, of Pontiac, spent Sunday with friends here.

Mrs. Judd Skarritt and Mrs. Raymond E. Miller spent Tuesday and Wednesday in Jackson.

David Stewart, a student at the Ferris Institute at Big Rapids, was home over the week-end.

Mr. and Mrs. J. P. Ferguson and Mrs. Pearl Ireland, of Detroit, spent Sunday with the latter's parents, Mr. and Mrs. T. L. Parker.

Miss Louise Dunston and Miss Doris Terry spent Wednesday and Thursday in Grand Blanc with Mr. and Mrs. Bruce Terry.

Mrs. Joseph Seeterlin entertained the Thursday Bridge Club at Green Acres on Thursday. Luncheon preceded the afternoon play.

Mrs. Clarence Ainsley, of Miller Road, who has been in failing health for some time, was taken to Goodrich Hospital Thursday morning for treatment.

J. H. Alger and daughters, They expect to spend a couple of months motoring to various points of interest in the state.

Misses Isabel and Phyllis King were home for the week-end. The former is a senior at M. S. C. and the latter a student at Central Michigan Teachers College at Mt. Pleasant.

There was a regular meeting of Independence Grange at the Grange Hall, Wednesday evening, Jan. 28, but owing to inclement weather and icy roads the meeting was not very largely attended.

Mrs. Reta Lewis, president of the Wayne Association, will be in Clarkston on Monday evening to organize a young people's union. The meeting will be held at the Baptist church at 7:00 o'clock sharp. All young people of the community over 12 years of age are cordially invited to attend.

Sidney Turner, who was recently arrested in company with Stewart Newson, of Pontiac, on a charge of breaking into a house at Walters Lake for the purpose of robbery, was sentenced in Circuit Court Monday to 1 to 20 years in the Michigan State Prison at Jackson, with the minimum term recommended.

Tighten up your belts, loosen your purse strings, cause the inevitable has happened. The new Majestic Radios are at Winglemire's Warehouse Store.

**BURIAL PERMITS MUST BE HAD FOR SOME ANIMALS**

Lansing, Jan. 29.—While the owners of property or their authorized agents have the right to take or kill carnivorous animals without permit at any time of the year, if these animals are doing damage to their property, they can dispose of these animals only on instructions from the Director of Conservation.

Disposition of the carcasses and pelts of all bears and other animals caught in the act of destroying property is entirely in the hands of the Department, according to the Law Enforcement Division, and instructions for disposition are given when the case is reported to the local conservation officer.

**NEW DIRECTOR FOR "Y" CAMP AT HALE**

Oakland County Y. M. C. A. Has Engaged John G. Fleming

The first announcement concerning the new Northern Y. M. C. A. Camp at Hale, Michigan, promoted by the Oakland County Y. M. C. A. Camp, Inc., concerns the employment of the new Camp Director. The experience of John G. Fleming in camp work has been unique and varied.

In high school he attended Camp Nelson Dodd, the State "Y" Camp in Ohio, as delegate from the Hi-Y Club in Springfield, Ohio, of which he was president.

His first two summers of college vacations were spent at Camp Douglas, the Oak Park, Illinois, "Y" Camp, located at Twin Lakes, near Muskegon, Michigan, as leader and program-director.

Between Junior and Senior years of college he was leader and athletic director at Hayo-Went-Ha, Michigan State "Y" Camp.

JOHN G. FLEMING

On graduation from Oberlin in June, 1928, he became full time Director of Hayo-Went-Ha until September, 1930. He was director while reorganization of camp and improvements in equipment were made, lodge, cabins, tennis courts, etc.

He entered Harvard Medical School in September, 1930.

His school activities were: football, 3 years, quarterback, All Ohio selection as Senior in 1927; basketball, 3 years, captain Senior year, 1928; president, Senior year, Men's Social Club, Delta Lodge.

Around this new Camp Director will be built a staff of 16 college men as tent leaders and activity directors, two cooks and a public health nurse.

The new line of Majestic radios are equipped with "Static Modifiers". The biggest improvement in years. Winglemire's.

**BASKETBALL TOURNAY FOR GIRLS OF COUNTY**

An Oakland County Girls' Amateur Independent Basketball Tournament will be held during the last two weeks in March under the direction of the Recreation Division of the Welfare Department of the City of Pontiac.

To insure that all players are bona-fide players of the team they represent, all managers planning to enter teams must send their lists of players to the Director of Women's Activities, of the Recreation Division, 35 Hill Street, Pontiac. These lists must be received not later than February 15. The entry fee is \$5.00 and payable on or before March 10. Managers interested in entering teams should get in touch as soon as possible with Miss Ruth Kimball, 35 Hill Street, Pontiac.

This tournament is not open to high school or college players.

**SHEEP, LAMBS AND CATTLE DECREASE**

Michigan Farmers Feeding Less and Reason Is Given Below

Michigan farmers were feeding 200,000 sheep and lambs on January 1, 1931, according to a report released today by the Michigan Co-operative Crop Reporting Service. This is 72 per cent of the 279,000 on feed one year ago and represents a small decrease in native and a sharp decrease in western stock. In the face of the feed shortage and the general depression, farmers have been reluctant to buy and the shipments of feeders into the State for the last six months of 1930 were only 43 per cent of those shipped in during the corresponding period in 1929. It is also probable that more sheep and lambs were marketed directly from grass feed in the fall than in most years because of the lack of feed. Stockyards receipts show 562,000 head marketed from Michigan during the last half of 1930 as compared with 484,000 during the last half of 1929.

For the principal feeding states of the country, the report shows a 15 per cent in comparison with last year altho, in actual numbers, more are on feed than for any other recent year. The decrease in the eleven corn belt states amounted to 10 per cent and in the far western states, 6 per cent. Lower prices for sheep and wool have caused some farmers to reduce the size of their flocks. Many ewe lambs are on feed in western states and these will undoubtedly be shipped to market if lamb prices should be relatively high in comparison with sheep and wool. In the eastern states, where some farmers were inclined to decrease their holdings because of lack of feed and unsatisfactory prices, these probably went to market before January 1 which would account for the relatively heavy marketings during the early winter months.

It is estimated that there were twenty per cent less cattle being fed on Michigan farms on January 1 of this year than one year ago. A shortage of corn and hay with less available capital has cut the number of western cattle shipped into the State during the last six months to 65 per cent of the number purchased during the corresponding period in the previous year. However, 85 to 90 per cent of the stock fed is raised within the State and the reduction in feeding is largely due to a heavier marketing of calves during the past season as evidenced by the reports of receipts at stockyards.

For the eleven corn belt states the report shows a decrease of ten per cent, and for the ten far western states a decrease of four per cent. This general decrease is due to the short corn crop in 1930, heavy losses sustained by the feeders in some sections last year and the difficulties in financing feeding operations. The total number on feed is the smallest since 1921 and probably the smallest since 1916. Purchases of feeders during the first three months of the period were very small but materially increased during the last three months. These feeder shipments included an unusually large proportion of calves. For these reasons, marketings are expected to be much slower than usual and will undoubtedly be made up of lighter weight animals. All

present indications point to a small market supply of fed cattle during the first few months of 1931.

Select female breeders from the poultry flock that conform to the standard qualifications for their breed and variety, says the U. S. Department of Agriculture. Don't pick out birds that show disqualifications such as side sprigs in single-comb varieties, stubs in clean-legged breeds, and "foreign" color markings. Choose females that have bright, full eyes, combs and wattles of good texture, wide backs and fairly deep bodies, and that are well fleshed.

Gullies ruin fertile land, interfere with farm operations, undermine buildings, encroach on public highways, endanger the life of livestock and often mar the appearance and lower the market value of a farm. They are also largely responsible for filling up reservoirs, streams and dredged channels, and for covering bottom lands with deposits of sand. To prevent gullies, say drainage engineers of the U. S. Department of Agriculture, increase the absorptive capacity of the soil, protect the surface from erosion, and make the surplus water run off slowly. To reclaim gullies, plow-in and seed to grass or timber, or build soil-saving dams that check erosion and cause the gully to fill with silt above the dams.

**MICHIGAN BELL TELEPHONE CO.**

**Long Distance is Fast, Convenient and LOW IN COST**

Long distance telephoning has three features which make it attractive to everyone.

It is fast. In a very few seconds, usually, you can be talking with your party; even calls to distant points usually are put through while you hold the line.

It is convenient. You need not go to any trouble—just pick up your telephone and give the name of the city or town and the telephone number you are calling to the long distance operator. If you do not know the number, ask information.

It is low in cost. You can telephone 100 miles for less than

The Yellow Pages of your Telephone Directory are a complete shopping guide

**Real Relief for the FARMER**

All the laws the legislators may pass and all their proposed farm relief measures are insignificant compared to the benefit the people themselves—you and I—can bring to the farmer right now. If you would have farm relief, do your share by building a normal prosperity. Buy the things you need, put your money in circulation—not only will it come back to you, but you will do more immediate good for the farmer than a dozen indefinite statutes.

**WORST DAMAGE DONE BY COMMON INSECTS**

Sensational Attacks of Locusts and Army Worms Small Compared to Those of Every Day Pests

East Lansing, Jan. 29.—The mass attacks upon farm crops made by locusts and army worms attracts a great deal of attention at the time of their occurrence but in reality the losses caused by them are small in comparison to the damage done by such unsensational insect pests as weevils, cut-worms, maggots, and the many varieties of beetles whose unfeeling appetites cause an unceasing stream of requests for help from the entomology department at Michigan State College.

Members of the department spend a great deal of their time in trips to farms about the State in answer to calls for help and to plan ways to control the damage being done. Most of the loss could be prevented if proper control measures were used before insects increase too greatly in numbers, according to C. B. Dibble, a member of the department.

To acquaint farmers with the proper methods to use to lessen the losses from insect pests, Mr. Dibble held 62 meetings which were attended by 2,001 farmers during the past year. It is possible to assist many more farmers by holding the meetings than by visiting individual farms.

The insects which cause the greatest damage have the same habits in every part of the State and it is possible to give advice to a large group of farmers at a meeting and the means suggested for insect control are equally effective upon every farm.

**BROKE INTO HOUSE AND TOOK JEWELRY**

**Is Charge Laid Against Frank Krause, Now in County Jail**

Frank Krause, 24 years old, who has been living in the vicinity of Mt. Bethel, about a mile west of the church, for the past six or seven years, coming there from Detroit, and who, officers say, has heretofore borne a good reputation, is in the county jail at Pontiac charged with breaking and entering the farm home of Nolton C. Bigelow, about six miles west of Clarkston.

It is alleged that Krause, who last year had charge of the big Bigelow apple orchard, entered the Bigelow house Sunday night when no one was at home, and forced open a large iron safe, taking therefrom a quantity of antique jewelry value at \$300, and a \$10 gold piece.

Suspicion was directed towards Krause when Deputy Sheriffs Walter Arnold and Clare Hubble, of Holly, compared the tires of his auto with the tracks made by an auto that had been parked on a side road east of the Bigelow farm. From there footprints led across the fields to the house, and back again. Krause was taken into custody at the Canteen Monday night, questioned by the officers, and is said to have acknowledged his guilt. With information obtained in this manner the deputies went to Krause's home to search for the missing jewelry. After a short search the valuables were found under some hay in a manger of the barn.

Only \$8.00 per month will buy a new Majestic radio with Super-Hetrodyne circuit. Wingle-mire's.

**DON'T CARRY A GUN IF YOU HAVE NO PERMIT**

Lansing, Jan. 29.—Permits are now being required by the Conservation Department of all persons desiring to carry any kind of hunting arms in all areas frequented by game on which the season is closed.

The requirement is being made in accordance with an opinion of the office of the attorney general and with Chapter 4, Section 5, of the General Game Laws of 1929.

This requirement means that a permit must be obtained now to carry either shotgun or rifle in any of the game areas of the Lower Peninsula. A permit will not be necessary to carry a shotgun in the Upper Peninsula until after January 31, when the rabbit season ends in that section of the state. During the closed deer season a permit to carry a rifle or a shotgun loaded with buckshot, slug load or single ball load in any area frequented by deer is necessary.

**NUTRITION FOLDER ISSUED BY TB ASSO.**

**Lists Proper Foods for Growing Boys and Girls**

As the first of its contributions to the efforts being made by Michigan health and education groups to protect child health against the results of depression, the Michigan Tuberculosis Association is distributing gratis thruout the state at the present time a complete nutrition folder entitled "Foods for Growing Boys and Girls".

The folder is so arranged that well balanced meals, including all the fundamentals of diet, can be arranged merely by selecting one item from each of several classes of foods. A unique feature of the folder is the fact that, altho meals prepared from it are well balanced, no technical nutrition terms whatever are used.

Emphasis is placed in the leaflet on inclusion of fruits, vegetables and whole grains in the diet. These items, probably the first to be dropped from the daily menu when less money is spent for food, are nevertheless of major importance in maintaining the health of boys and girls of school age.

Prepared particularly for families with children, the folder is being made available thru the school system. Housewives who wish copies and who cannot procure them locally may get them without charge by sending name and address to the Michigan Tuberculosis Association, Lansing.

**CIRCUIT COURT JURORS DRAWN FOR FEB'Y TERM**

Among the list of sixty persons drawn to serve as petit jurors at the February term of circuit court are the following from this part of the county:

- Clinton Burt, Springfield.
- Mrs. Anna Dilley, Holly.
- Fred Downing, Rose.
- Will Edwards, Independence.
- Ernest Mitchell, Groveland.
- Parthena Phillip, Commerce.
- H. A. Profrock, Brandon.
- George Richardson, Waterford.
- Hattie Schweizer, Highland.
- George Thompson, White Lake.

**FARMERS WILL GIVE ADVICE TO EXPERTS**

**Program at College Feb. 4 Features Five Prominent Michigan Farm Owners**

East Lansing, Jan. 28.—Experts who have been advising farmers how to conduct their business will have a chance to see how closely their ideas coincide with those of the farm owners themselves when five prominent Michigan farmers who represent five different lines of farms work speak on the evening program, February 4, Farmers Week, at Michigan State College.

The men, E. P. Reynolds, Olivet, dairyman; Otto Wegner, Riga, livestock producer; George DuVall, Fennville, fruit grower; E. W. Ruehs, Caledonia; and Fritz Mantey, Fairgrove, grain and seed grower, have successfully conducted their lines of work during a period when the agricultural situation has been far from attractive, and their explanation of business methods will be one of the features of Farmers Week.

Mr. Reynolds will be at home on the platform as he was a professor at Olivet College before engaging in the dairy business. He explains his success by stating that he follows good practices. George DuVall is not pessimistic about fruit growing. He has young orchards equal in area to the bearing orchards which he owns.

E. W. Ruehs grows good crops as well as livestock on his 260 acre farm and the crops are marketed through the livestock. Mr. Wegner, president of the Michigan Cattle Feeders Association, buys both hogs and steers to feed and grows a variety of crops for his livestock.

Mr. Mantey is one of the best known producers of certified seeds in the State and excellent crops of small grains have become an annual event on his farm near Fairgrove.

**PLAN FULL PROGRAMS FOR WOMEN VISITORS**

**Farmers Week Committee Arranges Series of Talks and Entertainments for February 2-6**

East Lansing, Jan. 29.—Meetings for farm women during Farmers Week, February 2 to 6, at Michigan State College will begin Tuesday morning in the Little Theatre of the Home Economics Building and each daily program will occupy the hours from 9:30 to 1:45 except Tuesday when an all-day series of meetings concludes with a banquet at 6:30 p. m.

Subjects listed for discussion by noted speakers range from the use of magic on the bank account to a detailed account of the newest kitchen devices. Music and drama are interspersed with the instructional talks.

Methods of maintaining the health of the younger children will be described by Dr. Lillian Smith and the best means of keeping the pocketbook healthy during shopping tours is the subject assigned to Miss Ruth Guenther.

Color schemes for the farm home will be explained by Miss Janet K. Smith, and the ways to beautify the lawns and farm grounds with flowers and shrubs are to be discussed by O. I. Gregg, who has made model plantings for many Michigan farm homes.

The daily programs are arranged to permit attendance at the general programs during the afternoons and evenings or to spend this time in examining the various shows and exhibits which will be among the most interesting features of the week. Several of the exhibits deal directly with the use of home conveniences.

**HEALTH REPORT IS FAVORABLE IN U. S.**

**Reduction Shown in Nearly all of Most Common Diseases**

In a report recently made public by the United States Public Health Service, Surgeon General H. S. Cumming points out that for the past fiscal year health conditions thruout the United States were generally good, with the exception of certain diseases. The prevalence of influenza and pneumonia was comparatively low during the year, and there were comparatively few deaths from these conditions.

Yellow fever did not appear in the United States or its possessions during the year. Gratifying progress has been made in the control of this disease, which has not appeared in epidemic form in the United States since 1905, but the presence of yellow fever in Brazil and Colombia in South America during the year showed that its introduction into the United States is possible, and the mosquito which spreads the disease is known to abound in certain areas in this country.

Plague infected rodents were found in the State of California, but no human cases were found in the United States or its possessions. Cases are likely to occur, however, as long as the infection exists in rodents. Plague was reported in many of the ports with which the United States has commerce. It was present during the year in all the grand divisions of the world, with the exception of Australia.

Preliminary figures show a decrease in both the birth and death rate as compared with the preceding year. This is a continuation of the trend which has been noted in the statistics for most civilized countries for several decades.

In 1928 there was an increase in the incidence of malaria. This disease has been disappearing from many parts of the United States where it was once prevalent. For 1929 the reports from 45 States showed a slight decrease in malaria deaths from the high figures of 1928, but in some of the southern States

where malaria is a serious problem, the reports of cases and deaths show increased prevalence in 1929 as compared with 1928.

The case and death rates for diphtheria have been decreasing for many years, and in the calendar year 1929 these rates reached new low records. Forty-five States reported 71.4 cases of diphtheria and 6.6 deaths per

100,000 population. Ten years ago, in 1919, 37 States reported 137 cases diphtheria per 100,000 population, and the diphtheria death rate in 32 States was 13 per 100,000. These were low rates at that time, but the 1929 rates are nearly 50 per cent lower. There is no doubt that the use of antitoxin and immunization against diphtheria has contributed to the remarkable

decline in the number of diphtheria cases and deaths. If these agencies had been more generally used, the improvement would have been greater.

The incidence of meningococcus meningitis has steadily increased since 1924 to the winter of 1930. But in the Spring of 1930, the number of cases dropped below the figures for 1929.

The prevalence of pellagra has been increasing for several years. In 1924 the pellagra death rate computed from reports to the Public Health Service was 2.5 per 100,000 population. The rate rose steadily until 1928, when it was 5.7 per 100,000 (based on reports from 45 States). For the calendar year 1929 the pellagra death rate was 5.5 per 100,000 population.

During the calendar year 1929, the incidence of infantile paralysis was lower than it had been since 1926, but by the end of June, 1930, there was a marked increase in the number of cases reported. Reports of unusual prevalence of this condition were received from communities in widely separated parts of the United States. This disease normally reaches its greatest incidence in this country in the late Summer and early Fall.

For three years, at least, the incidence of smallpox in the United States has been increasing. Forty-five States reported 34,685 cases of smallpox in 1927, 38,114 cases in 1928 and 41,458 cases in 1929. The disease was of the mild type and in the 45 States only 442 deaths were recorded during the three years; yet, the 114,000 cases of smallpox represent an incalculable amount of suffering and a large economic loss to the country, all of which could have been avoided by vaccination and revaccination. One danger in smallpox lies in the fact that the virulent type of the disease may appear at any time in a community not protected by vaccination, and before the disease can be checked it may take many lives.

Low records were also reported during the year 1929 for tuberculosis and typhoid fever.

Nine hundred seventy-five cases of undulant (Malta) fever were reported to the Public Health Service for the calendar year 1929, with 41 deaths. The importance of undulant fever becomes more apparent as more is learned of the disease.

Tularemia is much more widespread than it was thought to be when the disease was discovered. The reports are not complete, but in 1929 461 cases and 36 deaths were reported to the Public Health Service.

The mild type of typhus fever which differs in some respects from the Old World typhus and from the form of typhus which is endemic in Mexico, was reported during the year 1929 in a number of States, especially in the southeastern part of the United States. Incomplete reports showed 239 cases of typhus fever and 16 deaths from this disease in 18 States during 1929.

**MICHIGAN MEN NAMED ON NATIONAL TIMBER BOARD**

Ann Arbor, Jan. 28.—Two Michigan men, Samuel T. Dana, Dean of the University of Michigan School of Forestry and Conservation who will serve in an advisory capacity, and John W. Blodgett, of Grand Rapids, who will be one of industry's representatives, have been appointed by President Hoover on the National Timber Conservation Board and Advisory Committee organized to suggest programs of public and private action to perpetuate forests and insure the continuance of industries based on timber production.

Unlike the Federal Oil Conservation Board which has been studying the oil situation for several years, the Timber Board is made up of men representing both the public and industry, as well as the ex-officio members from the President's cabinet. Dean Dana's position on the advisory committee will involve the furnishing of technical advice on phases of forestry and conservation to aid in the determination of facts of production and consumption of forest products.

**Conveyors Carry Ford Car Parts**

Trains unload in the plant.

Bodies starting through the shop.

Conveyors carry wheels with mounted tires over a line on which cars pass to completion.

The highly important part played by conveyor systems in all Ford Motor Company manufacturing and assembly plants is graphically shown in the above three pictures taken in the recently opened Edgewater, N. J., plant. One of the pictures shows how parts may be unloaded from freight cars within the plant only a few feet from the various assembly lines. Another picture shows automobile bodies starting their trip on a conveyor while

the third view is of the conveyor system used to bring wheels to the chassis which are also moving on a conveyor. As indicated in the picture, a constant flow of wheels on which the tires have already been mounted moves around and over the chassis assembly line. As a chassis enters the section, workers, in groups of four, each take a wheel from the hooks and fasten it to the chassis.

SASHABAW PLAINS

Miss Barbara Bird was a week-end guest of Miss Zetta Kuerbitz.

Mrs. William Grubb entertained in honor of her husband's birthday Friday evening. The guests were Mr. and Mrs. Everett Grubb, Mr. and Mrs. Russell Maybee and Mr. and Mrs. Grant Baerdslee. A very enjoyable evening was spent, after which the hostess served refreshments.

Mr. and Mrs. Bert Goodrich and son, Glenn, called on Mr. and Mrs. E. I. Burns recently.

Mr. and Mrs. S. T. Baerdslee and son, Grant, spent Friday afternoon at Fenton, calling on Mrs. H. Lawrence and Mr. and Mrs. Frank MacDermand.

Mr. and Mrs. George Stanaback and daughter, Dorothy, were in Detroit Saturday and called on Mr. and Mrs. F. Bernard.

In honor of her son Kenneth's birthday, Mrs. Wesley Stevens entertained the Misses Emily Swain, Louise Dunston, Madeline Crossdell and Gladys Anthony, and Raymond Jarvis, Glenn O'Berry, Lloyd Sibley and Mr. and Mrs. Orson Coe, Saturday evening.

Mr. and Mrs. N. W. Morgan had as dinner guests Tuesday evening Mr. and Mrs. C. J. Crawford, of Pontiac.

Mr. and Mrs. S. T. Baerdslee spent Sunday with Mr. and Mrs. E. T. MacNeil, of Pontiac.

Mr. and Mrs. Stuart Longmull and son, Mr. and Mrs. W. Barnett and Miss Mary Phillips were guests of their parents, Mr. and Mrs. C. K. Phillips, on Sunday.

Miss Lucile Goodrich spent Sunday with her parents, Mr. and Mrs. Bert Goodrich.

Mr. and Mrs. Wesley Stevens were visitors of Mr. and Mrs. Will Windiate in Pontiac Wednesday.

Melvin West and Mr. and Mrs. Harold Sherman, of Pontiac, were callers in this vicinity on Saturday evening.

FOR SALE—Country sausage. Grant E. Baerdslee.

DAVISBURG

A box social and entertainment will be held in the Davisburg schoolhouse on Friday evening, Jan. 30, the proceeds of which will help swell the piano fund of the school. The public is invited.

Regular meeting of Austin Lodge, No. 48, F. & A. M., Tuesday evening, Feb. 3.

DRAYTON PLAINS

Robert Sitts is on the sick list.

Miss Therza Gesch, of Dixie Highway, spent the week-end in Detroit with relatives.

Miss Mildred Beals, of Dixie Highway, is recovering from tonsillitis.

Norman Rowland had the misfortune to break his leg while coasting on Stroupe Hill.

James Sitts, of Pearl Street, has fully recovered from scarlet fever and has returned to school.

Frank Jones has returned from a business trip in the northern part of the state.

Born to Mr. and Mrs. Fred Stalker, of Walton Blvd., Wednesday evening, Jan. 21, a son.

Mr. and Mrs. Bert Holmes and family, of Lakeside Drive, spent Sunday with both of their parents at Hartland, Mich.

Mr. and Mrs. Roy Saiter attended the funeral of Ezra Robertson at Imlay City on Saturday.

Mr. and Mrs. Ed. Kerton, of Holly, spent Sunday with Mr. and Mrs. Vern Terry, of Warren Drive.

Mr. and Mrs. John Shultz and children, of Jackson, spent Sunday with Mrs. Martha Beals and family, of Dixie Highway.

Mrs. Harry Martinson and daughter, Betty Lou, of Sherwood Drive, have been spending several days in Detroit.

Mrs. George Chamberlain, of Dixie Highway, is spending several days with relatives at Waterford.

The West Side Circle will meet with Mrs. Albert Barnhart, Wednesday afternoon, February 4.

Mr. and Mrs. L. E. Baker, of Clawson, visited Mrs. Baker's parents, Mr. and Mrs. F. C. Gesch, of Dixie Highway, on Sunday.

Mrs. L. G. Rowley and daughter, Myra Catharine, of Dixie Highway, spent several days in Detroit this week as the guests of old friends.

Mrs. Glenn Kerton and sons, Keith and Ross, spent Sunday at Clarkston with Mrs. Kerton's parents, Mr. and Mrs. W. C. Ainsley.

The Pontiac and Drayton Plains choirs are planning to put on another Easter Cantata in both the Oakland Ave. and Drayton Plains churches at Easter time. The books are here and all set for practice.

Mr. and Mrs. John Wellington, of Mayville, Mrs. Fred Mosher and daughter, Martha, of Detroit, and Mrs. Bertie Coffren and granddaughter, of Pontiac, were visitors at the Will

Chamberlain home on the Dixie Highway the past week.

Bert C. Gundry, of Lakeview Drive, underwent an appendicitis operation in Goodrich Hospital, Tuesday, Jan. 20. Reports from the hospital are that he is doing nicely and expects to be home in a few days.

The ladies of the church have planned to have a short prayer service at 10 o'clock every Friday morning in the church parlors. They invited every lady to spend fifteen or twenty minutes with them. It is not necessary to dress up; just wear your morning dress, as this is just for a few minutes. They hope to see new faces each week along with the regular ones.

The Forensic Society of the Speech Department of the Pontiac High School, under the direction of J. M. Heaphy, will give the program for the Parent Teacher's Association meeting next Tuesday evening in the school auditorium. They will outline the work done through the speech department and put on a debate upon the question which has been used by the Michigan High School Debating League during this year: "Resolved, That the chain store is a detriment to Michigan."

SEYMOUR LAKE

George and Martha Miller were host and hostess Saturday evening to members of the Seymour Lake Sunday School at their home here. Forty young people participated in the event. Games and contests were directed by Mrs. R. H. Prouse and Mrs. Iva Miller and luncheon was served at the close of the informal program. Much interest is being taken in the Sunday School this winter, and the attendance is steadily increasing.

Investigate the new "Automatic Volume Control" on the Majestic Radios. Special display this week at Winglemire's Warehouse.

WATERFORD. Mrs. John Watchpocket, Jr., and son, Ellsworth, of Watkins Lake, were the guests Wednesday of Mrs. H. B. Mehlberg, of Andersonville Road. Mr. and Mrs. Charles Henry Clise and Mrs. Harold H. Roberts, of North Gate of Detroit, Royal Oak, were recent guests of their aunt, Mrs. Frank Byrne Fox, of Grand River Avenue. Mrs. August Burke, of Van Syckle Sub., who has been ill for a long period of time, has been removed to the Ann Arbor Hospital, where she is under a doctor's care. Mr. and Mrs. E. D. Spooner, of Williams Lake, attended the surprise birthday birthday party of Guy Newton, of Pontiac, on Friday night. Dinner was served at 6:30 to 16 guests. Mr. and Mrs. Earl Kniffen and family, of Armada, were visitors in town on Wednesday, at the home of Mrs. Kniffen's father, Guy Disbrow, and sister, Mrs. Henri Buck, both of Andersonville Road. Mrs. Percy King, of Williams Lake, is entertaining the Good Will Club, of which she is a member, at her home on Friday for a one o'clock luncheon. Roll call will be "Noted American Women". The Waterford Sunday School on Sunday had the highest mark of attendance that it has ever had, 125. The contest is in full swing, and the reds, under Jack Pratt, had 65, while the blues, Kenneth Miller, captain, had 60. Mr. and Mrs. Ray Slusser and daughter Betty are moving into one of the houses across the bridge on Waterford Blvd. The latter part of the week. They will be missed on Grand River avenue, where they have resided for several years. Misses Ruth and Evelyn Perry entertained the following friends from Detroit Sunday at a six o'clock dinner at their home on Maple avenue: Virginia Amerman, Ann Richards, Marjorie Darbe, Helen Soodwin, Mike Rossman, Teddy Schwarz, John King, Steve Costick, Joe Merkler and Herbie and Vern Fistahler. Farm woodlands should be made to pay their way from year to year, and good management and fire prevention will make the woodland produce regular crops of timber as well as firewood and fence posts, according to the Arkansas College of Agriculture Extension Service. Burning to "green up" the woods not only damages the trees and seedlings, but kills out the better grasses. ANNOUNCE RADIO SHORT COURSES. M. S. C. Radio Station Will Offer Opportunity for Study of Farm Enterprises. East Lansing, Jan. 28.—Radio short courses, offering an opportunity for intensive study of specific farm enterprises and some of the more important problems of agriculture, will open over WKAR, the Michigan State College radio station, Feb. 2, and continue thru March 27. Five departments of the agricultural division of the college will take part in the presentation of the short courses. The short course radio program will start at 7:30 and continue until 8 o'clock each morning except Saturday and Sunday. During the first week of February, the forestry department will offer a course under the title of "Making Money Out of the Farm Woodlot". The soils department will conduct a study of soils improvement practices recommended for the major soils types including the use of lime, manures and commercial fertilizers. Recommendations for the production of special crops will also be given. The soils short course starts Feb. 2 and continues through Feb. 27. The agricultural engineering short course will start Feb. 9 and continue thru March 6 and will include a study of farm buildings and equipment as related to efficient farm operation. Market and price outlook information on Michigan's principal farm commodities will be given by the agricultural economics department from March 2 thru March 20. The farm crops department will give information on growing, handling and utilization of alfalfa from March 9 through March 27. Ten minutes daily from March 23 thru March 27 will be devoted to answering questions on farm crops problems. Questions should be mailed to station WKAR or to the farm crops department of the college before or during the week of March 23. The soils department, the farm crops department and the dairy department will cooperate in presenting a course on pasture improvement which will include a study of the economic value of pastures, choice of pasture crops and recommended pasture fertilization practices. This information will be given from March 23 to March 27.
