CLARKSTON, MICH., JULY 10, 1931

CLARKSTON

Mr. and Mrs. T. L. Parker spent the week-end in South Bend, Ind., with their son, Don Parker, and family.

Mr. and Mrs. C. G. Fiske entertained friends from Grosse Pointe, Detroit, Birmingham and Pontiac over the Fourth.

Mrs. David Newlands and niece, Miss Agnes Walter, leave today, Friday, for Traverse City, where they will be week-end guests at a house party.

Independence Grange held its July meeting Wednesday evening at the home of Mr. and Mrs. Casper Beardslee, instead of at the Grange Hall.

The Royal Neighbors are sponsoring a baked sale Saturday afternoon and evening, July 11, at the Clarkston Dry Goods Store.

Mr. and Mrs. L. R. McFarland and two daughters, Mr. and Mrs. Mark McCollum and son, Mr. and Mrs. William McFarland and daughter, Bernice, and Miss Elizabeth Belitz are spending the week at Lewiston.

Edward Steet, Bert Beebe and Floyd Andrews, who have been spending a few days at Mr. Andrews' cottage at Rogers City, returned home Wednesday reporting a fine trip and some good fishing.

Mrs. Martha Vaughn, of Portville, N. Y., accompanied by her granddaughter, Martha Muhirc, of Cleveland, Ohio, is making an extended visit at the home of her son, Harold Vaughn, and family.

Conservation Officer Crooks intercepted a local fisherman on Deer Lake Monday evening with undersized bluegills and rock bass in his boat. He was taken before Justice Morley and pleaded "not guilty", and was released on bond to stand trial Wednesday, July 15.

The Misses Isabel and Phyllis King opened their swimming classes on Tuesday with a class of 9 and Thursday 12, making a full class for the present. The class is held at their private beach and the youngsters are so enthusiastic it is hard to tell which is enjoying it most, the instructors or pupils.

pleted trucks will then be distributed to some 60 cities throughout the United States.

The order was placed with the Ford Company after an exhaustive test conducted by the Department with the co-operation of the Bureau of Standards. The tests were under the supervision of W. A. Jacobs, automotive engineer of the Bureau of Standards, and William Wolma, of Chicago, and Morris Carrier, of Brooklyn, motor vehicle engineers of the Post Office Department.

FOREST FIRE WARDENS MAY BE RECOGNIZED

Lansing, July 8.—Forest fire wardens may be recognized in the future by means of a distinctive shirt and badge. The Forest Fire Division of the Conservation Department has ordered all regularly employed wardens to wear a regulation shirt of forest green on the pocket of which is a Divisional emblem colored green and red.

"Give the old hens a ride" may sound like gangster talk, but it's good advice. Let them ride to market.

STATE PARKS SHOW BIG INCREASE OF VISITORS

Lansing, July 8.—With the advance of summer and the arrival of warmer weather, state parks in both the upper and lower peninsulas are filling up with campers, visitors and bathers.

Several of the parks have reported attendances higher than for the corresponding period last year and the Parks Division of the Department of Conservation is looking for a year's attendance exceeding that of 1930.

During the week ending June 20, for instance, the Bay City State Park reported an attendance of 174,000 people as compared with 92,400 for the same week a year ago. During the same week 73,000 people visited the Island Lake State Park near Brighton.

INFORMAL PARTY AT H. V. COUNTRY CLUB PLANNED

The Board of Directors of the Holly Valley Country Club has decided to postpone until later in the summer the proposed house party at the club house, and instead announces an "Informal Summer Party" for Saturday evening, July 18. All members are privileged to invite guests and persons not members who desire to attend may get tickets through some friend who is a member. A good time is anticipated.

An experiment in producing baby beef, conducted at the Havre, Mont., field station of the U. S. Department of Agriculture, showed that calves fattened on barley and alfalfa are likely to bloat when they receive up to 5 pounds of barley a head daily.

4-H BOYS AND GIRLS BACK FROM CAMP

Copneconic Lake Was Scene of Many Varied Activities

Oakland County 4-H boys and girls, 35 strong, have just returned from the 4-H camp with Genesee County 4-H folks at Camp Copneconic. The camp was filled to capacity with 70 campers, about equally divided between boys and girls.

Sheldon Latourette, Genesee County Club Agent, acted as director, with Mrs. Scott, of Flint, as girls' adviser and M. H. Avery, boys' adviser, who also had charge of the agricultural project work. Stanley Bennett had charge of Nature Study, majoring in birds; Ralph Woodham had charge of Handicraft, consisting of leather working and basket making. Mrs. Cormack Wiseman had charge of girls' soap carving and Mrs. Scott of the pageant which was the event of Thursday evening.

9:30 to 11:00 A. M. was the project period though many were so interested they worked in other spare time. Among the articles made were 15 leather belts, braided and tooled with designs, watch fobs, necklaces and a number of reed baskets.

Regular periods were held for swimming in charge of Ralph Brown. The swimming periods were attended by nearly everyone, both campers and leaders. Colored caps were used to designate ability of swimmers, red for beginners, yellow for intermediate and blue for good swimmers. The tag system was used to keep track of the campers while in the water.

Outstanding events during the period were as follows:

Monday afternoon ball games were played between cabins. Cabins 1 and 4 of the boys played 2 and 3 in both hard and soft ball and the teams from 2 and 3 won in both cases. The girls had a soft ball between campers (not cabins).

The 4-H club pledge, Head, Heart, Health and Hand, was used for each day's schedule, using it for flag raising and each day one of the H's was used to build the program around.

Monday was health day and at camp fire a number of older campers and leaders gave short talks on health and its place in a normal life.

The outstanding feature of the day Tuesday was a treasure hunt around the lake, the older campers going one way and the younger the other. Both groups finally met on the opposite side where a campfire supper was held, followed by mass games led by Mr. Avery and a campfire at which time Mr. Latourette told of his visits in foreign countries, emphasizing the Hand H by international good feeling, following which all made the trip back to camp by moonlight and flashlight through the woods.

Stunt night program was the feature of the day on Wednesday in which each cabin put on a stunt. The crowning stunt of the evening was magic stunts given by a magician from Flint.

Thursday was the big day at camp when the campers played the leaders in soft ball and the losers had to go into the lake. Tradition was upset when the campers were beaten and had to take to the lake with their clothes on. Needless to say they enjoyed this part of the game most.

In the evening a pageant was put on by Mrs. Scott, all campers taking part. The pageant emphasized the head, heart, health and hand in the early life of a boy and girl seeking the adventures of life, coming to the cross roads and making their decisions on the basis of their knowledge of each by their previous experiences, training and instinct. About 50 visitors to camp witnessed the pageant and were very much pleased. The last event of the day was a moonlight buddy swim each boy or girl taking a partner in swimming to assure safety.

Friday morning after breakfast all made ready to leave camp though most campers were anxious to stay longer in spite of the downpour of rain.

All the milk of magnesia that Federal drug inspectors found on sale in a recent survey was of good quality and up to standard.

Silage made from corn, alfalfa, sweetclover and soybeans; and green alfalfa, cabbage, turnips, rape and kale markedly affect the flavor and odor of milk if fed just before milking. Give these feeds soon after milking.

POSTAL EXHIBIT AT COMING STATE FAIR

Interesting Display to Be Shown at Detroit, Sept. 6 to 12

Detroit, July 8.—The great part that the parcel post plays in the commercial life of the nation, especially in the prompt and safe shipment of farm products, will be illustrated by interesting displays and educational talks planned by Postmaster Charles C. Kellogg of this city as a feature of a postoffice exhibit at the Michigan State Fair and Exposition, Sept. 6 to 12.

Postal experts will emphasize the value of proper containers designed specially for the transportation of agricultural commodities. In conducting the public behind the scenes of the postoffice department Fair visitors will see how stamps are canceled by machines of great rapidity and will obtain an insight into other modern methods of expediting the nation's mail.

An interesting collection of many odd pieces of mail which have finally found their way to the Dead Letter Office in Washington and which have never before been placed on public view also will be exhibited, provided that Kellogg prevails upon department authorities to consent to their display here.

Preparations for the industrial exposition at the fair are taking shape in a most encouraging manner, according to Harry A. McDonald, member of the board of managers and chairman of the advisory committee of 14 appointed by Gov. Wilber M. Brucker. In addition to presenting for the first time a picture of the state's leading industrial products in the making, other special events are expected to draw record crowds.

In anticipation of the increased attendance steps have been taken to obviate traffic congestion at this year's fair through the speeding of the Woodward Ave. widening in the vicinity of the fair grounds and greater parking facilities.

MUSHROOMS THAT GIVE LIGHT ARE DISCOVERED

Reading by the light of mushrooms is a novel experience. A striking phenomenon shown by certain fungi is luminosity or phosphorescence, according to Vera K. Charles, pathologist of the U. S. Department of Agriculture, and an Australian species is said to give out such a clear, emerald-green light that it is possible to read by it. The phosphorescence sometimes noticed in dead wood is caused by the underground or vegetative part of the mushrooms, which often gives off a bright glow that may be seen from some distance. Phosphorescence is also sometimes shown by the mushroom itself, as in the cases of Clitocybe illudens, commonly known as jack-o'-lantern, and Panus stypticus, a very common species. Phosphorescence in mushrooms has been the basis in some countries for fairy stories and superstitions about ghosts.

Several Kentucky counties are driving hard to get rid of all the scrub and grade sires.

This Matter of Accommodation . . .

A CONSERVATIVE Bank—and no other bank is worthy of the name—must be cautious in making loans. It cannot afford to take even the ordinary risk of the business man. The business man in extending credit is doing so with his own wares. But a bank is loaning the money of its depositors.

THE safe bank—the conservative bank—the one that must be assured a loan will be promptly repaid and is properly secured is one that is a benefit to the entire community—absolutely safe for its depositors—wholly just to those who borrow.

WATERFORD

Kenneth Miller, of Dixie Road, spent the week-end at Flint.

John Miller and son, Samuel, were in Port Huron, Tuesday.

Mr. and Mrs. Lyman Girst were in Fenton Wednesday.

Mrs. M. C. Friday is ill at her home on Maple St.

Mr. and Mrs. Huey were Monday callers at Novi.

Rev. and Mrs. H. A. Huey entertained the Farmers' Club of Vernon Thursday.

Mr. and Mrs. Carl Terry and daughter, Joyce, spent the Fourth at Labe Lake.

Robert Huey had as his guest on the Fourth Russell Jencks, of Clarkston.

Milton Robertson, of Clarkston, was a recent caller at the Fox home.

The Waterford Ladies' Auxiliary has Ready-Jell for sale at the home of Mrs. H. B. Mehlberg.

Mr. and Mrs. Byron Howland, of Maple St., called on Mr. and Mrs. E. D. Spooner, of Williams Lake, Tuesday night.

Mr. and Mrs. Cleve Collins, of Detroit, visited at the home of the former's brother, Elmer Collins, and family, on the holidays.

Walter Mehlberg, of Auburn Heights, called at the home of his brother, H. B. Mehlberg, Friday evening.

Mrs. Irving King, of Williams Lake Road, was a Tuesday evening caller on Dr. and Mrs. F. M. Thompson.

Mrs. Charles Calhoun and son, John, of Barnes subdivision, are visiting in Virginia at the home of her parents.

Mr. and Mrs. E. R. Miller, of Fowlerville, were the week-end guests of Mr. and Mrs. Carl Terry.

Mrs. A. McCaffery and son, Jack, and Mrs. A. Wyckoff and son, Billy, spent Wednesday at Bois Blanc.

A number from Waterford, including some members of Campbell-Richmond Post, attended the parade at Pontiac on Saturday.

WATERFORD

R. Fletcher, of Ypsilanti, a prominent clothier of that city, was a guest of Frank Byrne Fox, of Maple Leaf Lodge, on Wednesday.

Mrs. George Bowers, of Minneapolis, was a house guest of Mr. and Mrs. Frank Byrne Fox, of Maple Leaf Lodge, over the Fourth.

Mr. and Mrs. Homer Van Atta of Detroit and Mrs. J. M. Donaldson, of Pontiac, were guests at the home of Mr. and Mrs. E. D. Spooner, of Williams Lake Road, Saturday.

The Waterford Goodwill Club were entertained at the home of Mrs. William King Thursday for a 9 o'clock breakfast. The program was conducted by the hostess with roll call of current events, music and program.

Mr. and Mrs. Andrus Bradley, of Grand River ave. at Pond st., are on an outing with their son-in-law and daughter, Mr. and Mrs. B. Miller, of Clarkston, at Lewiston, Mich. They motored through.

Frank Byrne Fox, of Maple Leaf Lodge, and George Bowers, of Minneapolis, are in Ypsilanti conducting sales for five different firms and also an automobile company. They represent the T. K. Kelley Sales System of Minneapolis.

A picnic was enjoyed July 4th at the home of Mr. and Mrs. C. Johnson. Guests were: Mr. and Mrs. L. Dessinger and family, Mr. and Mrs. C. Penwright and family, Mr. and Mrs. E. Wanor and family and Mr. and Mrs. D. Johnson and family, all of Detroit; Mr. and Mrs. S. Gowdy, of Mansfield, O., and Mr. and Mrs. H. Hoag, of Inkster, Mich. Diversions of the day were swimming, fishing and feasting.

SPRAYERS—We have a big supply of all kinds, including lime and sulphur, lead arsenate, calcium arsenate and Kolo wet-tex—all at reasonable prices. Get your supply in season and reap the benefit.

C. G. HUNTLY,
Clarkston.

WATERFORD

Dr. F. M. Thompson returned from the Ford Hospital to his home at Garden Place Monday after slowly convalescing for 5 weeks from a serious appendix operation.

Russell Galbraith, teacher in the Waterford school and Scout leader, was in Waterford Tuesday evening to attend a meeting of the Scouts, who enjoyed a swimming party at Williams Lake.

The Sunshine division of the Waterford Ladies' Auxiliary is requested by Mrs. Carl Terry, captain, to meet at the church Tuesday afternoon at 3 o'clock to talk over plans for the division. The members will turn in the money which was decided to be given in place of the baked goods sale scheduled for this week Saturday. All the division is asked to please respond and come to this meeting.

NEXT SUNDAY IS TIME OF BIG PICNIC AT DAVISBURG

Don't forget the annual Holly-Detroit picnic to be held at the Davisburg County Park next Sunday, July 12. And this admonition is addressed to everybody in Holly, and to all former Hollyites, whether living in Detroit or elsewhere. The Davisburg Park is an ideal place for such a gathering and it is likely to be made a permanent place for the picnic. All necessary conveniences are at hand, including shelter and tables, not to mention a golf course and a baseball diamond.

Mr. and Mrs. Charles McBratney, of Davisburg, who are making the arrangements for the picnic, are anxious that there should be a big crowd. Be there and meet your old friends and neighbors.—Holly Advertiser.

Lansing, July 8.—Orange and blue suits have been furnished the life guards at the state parks. The shirts are orange with the legend "life guard". The trunks are blue. The distinctive suits are being used to more easily identify the guards.

ARMY WORM HAS MADE ITS DEBUT

Is Found In Ingham County Not So Very Far from Oakland

East Lansing, July 8.—The last insect to declare war against Michigan farmers in 1931 has begun its invasion in Ingham county and, according to the entomology department at Michigan State College, this cut-worm, commonly called the army worm, is capable of seriously injuring crops if immediate measures are not taken to prevent its spread.

The army worm last appeared in the State 10 years ago and, at that time, damaged oat and corn fields. The College entomologists say that the worm is undoubtedly present in different sections of Michigan and farmers are advised to immediately examine their oat fields to find

out if the worms are working in the low spots.

The examination should be made at night as the worms do their feeding at that time. If the worms are found, the farmer should prepare to confine their damage to the small areas where they are at work.

The worms can be prevented from migrating by plowing three parallel furrows 10 to 12 feet apart to inclose the area where they are working. The soil from the furrow should be turned inward. The furrow should be clean, with a perpendicular side to prevent the worms from climbing out.

As the worms collect in the furrows, another furrow can be turned to bury the worms and to provide a new barrier. If the soil is muck or sand so the sides of the furrows crumble the worms can be killed as they collect by dragging a pole through the furrows.

SPRAYING RESULTS ARE MORE BUSHELS

Timely Advice Given to Potato Growers of Michigan

East Lansing, July 8.—The proper spraying or dusting of potatoes to combat insects and diseases will increase the yields of U. S. No. 1 tubers enough to pay a good profit on the cost of time and materials used in protecting the crop, according to the farm crops department of Michigan State College.

The basic spray used in Michigan potato fields is Bordeaux mixture which is made by combining copper sulphate, lime and water. Either stone lime or chemical hydrated lime can be used. The lime commonly sold as agricultural hydrated lime is unsatisfactory for use in the spray.

Four pounds of stone lime or six pounds of hydrated lime, four pounds of copper sulphate and 50 gallons of water are used to make the spray. Three to four pounds of calcium arsenate or five to six pounds of arsenate of lead are added to 100 gallons of the Bordeaux mixture which is used for the first two or three spray applications.

The Bordeaux mixture will control flea beetles, leaf hoppers and early and late blight. The arsenicals kill any chewing insects, such as common potato bugs, which may be working on the vines.

The first spray should be applied when the vines are from four to six inches high and subsequent applications should be made as frequently as insect attacks and weather conditions require. Five applications made from 10 to 14 days apart are usually needed. The certified seed potato growers normally spray at least seven times.

Yield tests made at the College indicate that an increase of 40 bushels of No. 1 potatoes is the average profit secured from the use of sprays. There is an added yield of potatoes secured even when insects and plant diseases are not prevalent. The Bordeaux protects the vines in periods of hot dry weather.

Farmers who grow only a few acres can secure adequate spraying equipment by cooperating with neighbors in the purchase of sprayers. A power sprayer which applies the spray so that it strikes both sides of the potato leaves is required. Either traction or motor driven sprayers are satisfactory.

Dusts instead of sprays also give satisfactory control of insects and diseases, but the College experiments indicate that the increase in yields is not as great with the dusts as with the sprays. The grower with only a few acres can secure hand dusters that do good work and less time is needed to apply the dusts.

The dusts can be purchased ready mixed or the grower can buy monohydrated copper and hydrated lime and mix them in the proportion of two pounds of copper to eight pounds of hydrated lime. From one to one and one-half pounds of calcium arsenate should be added to each 10 pounds of the copper-lime mixture. The arsenate can be left out of the later applications. An acre of potatoes will require 25 pounds of dust for each application.

The dusts should be applied while the vines are covered with dew and while there is little wind. Early morning is usually the best time for dusting.

Extension bulletin No. 49, published by Michigan State College, gives complete directions for mixing sprays and will be sent to anyone requesting it from the Bulletin Clerk, East Lansing.

VACATION IN MICHIGAN

FOREST FIRES ARE MANY THIS YEAR

Notable Increase Is Reported by Department of Conservation

Lansing, July 8.—More than six times as many acres have been burned over by forest fires in Michigan so far this year as were reported for the same period in 1930, the Division of Field Operations of the Department of Conservation reported today.

According to the report, 165,239 acres have been burned over since April as compared with 25,723 acres that had been burned over June 25, 1930.

The increase in the number of fires reported this year as compared with the same period for 1930 was not in proportion to the number of acres burned over, indicating a greater average of acres burned over per fire this season.

The Division reported today 1,778 fires occurring since April 1. For the same period in 1930, the figure was 1,080. The upper peninsula suffered 787 fires and the lower peninsula 991 fires so far this year. Last season at

this time it was 405 fires for the upper peninsula and 675 fires for the lower peninsula.

The Upper Peninsula has received the brunt of the dry weather. Of the 165,239 acres burned over this year, 104,537 were in the upper peninsula and 61,302 acres in the lower peninsula.

Due to heavy rains during the month of June the fire hazard situation is now about at "normal", it was stated. Most of the fires reported this season occurred from April 14 to May 10. Since that time the number of fires and the acres burned over have dropped materially.

Dickinson and Iron Counties, where early fires destroyed one village and did considerable damage to second growth timber, report the largest number of fires for the state. Dickinson had 109 fires and Iron 110. Luce County, which suffered heavy losses in 1930, had but 11 fires.

In the lower peninsula Midland County leads with 101 fires.

The wet weather during June gave forest fire wardens an opportunity to build miles of new fire lines and to clean out lines built in previous years.

"FAIRS AND EXHIBITS" PROGRAM IS CURTAILED

Lansing, July 8.—Because of the increased obligations charged against the game protection fund during the coming biennium it will be financially impossible for the Conservation Department to continue its "fairs and exhibits" program. The Commission has ruled that the only exhibits that the Department will place this year are the two state fair exhibits, Detroit and Escanaba.

However, the department's personnel and facilities will be available to any fair association that will find the means to defray the entire expense involved.

office department Fair visitors will see how stamps are canceled by machines of great rapidity and will obtain an insight into other modern methods of expediting the nation's mail. An interesting collection of many odd pieces of mail which have finally found their way to the Dead Letter Office in Washington and which have never before been placed on public view also will be exhibited, provided that Kellogg prevails upon department authorities to consent to their display here.

MUSHROOMS THAT GIVE LIGHT ARE DISCOVERED Reading by the light of mushrooms is a novel experience. A striking phenomenon shown by certain fungi is luminosity or phosphorescence, according to Vera K. Charles, pathologist of the U. S. Department of Agriculture, and an Australian species is said to give out such a clear, emerald-green light that it is possible to read by it. The phosphorescence sometimes noticed in dead wood is caused by the underground or vegetative part of the mushrooms, which often gives off a bright glow that may be seen from some distance. Phosphorescence is also sometimes shown by the mushroom itself, as in the cases of Clitocybe illudens, commonly known as jack-o'-lantern, and Panus stypticus, a very common species. Phosphorescence in mushrooms has been the basis in some countries for fairy stories and superstitions about ghosts.
